- b. For surface or air transportation, if the flashpoint is above 141°F (60.5°C) but no more than 200°F (93°C); the liquid is in a primary receptacle not exceeding 1 gallon per mailpiece; enough cushioning surrounds the primary receptacle to absorb all potential leakage; the cushioning and primary receptacle are packed in a securely sealed secondary container that is placed within a strong outer shipping container; and each mailpiece is plainly and durably marked on the address side with “ORM-D” or “ORM-D AIR,” as applicable, immediately following or below the proper shipping name. Mailable material sent via surface transportation must be marked on the address side as “Surface Only” or “Surface Mail Only.” For air transportation, each mailpiece must bear a shipper’s declaration for dangerous goods.
- c. For air or surface transportation, if the flashpoint is above 200°F (93°C) the material is not regulated as a hazardous material. Such nonregulated materials must be properly and securely packaged to prevent leakage under the general packaging requirements in [2.0, Packaging](#).

10.13.4 Cigarette Lighters

A cigarette lighter equipped with an ignition element and containing fuel is a Class 3 flammable liquid. A cigarette lighter that contains a flammable gas is classed as a Division 2.1 flammable gas. A cigarette lighter containing either flammable liquid or flammable gas is permitted only in domestic mail via surface transportation when all of the following conditions are met:

- a. The design of the lighter and its packaging are approved by the DOT Associate Administrator for Hazardous Material Safety, per 49 CFR 173.21(i) and 173.308; and a DOT Approval Number (T-Number) is issued.
- b. The prospective mailer of the lighter submits to the PCSC manager a written request for authorization to mail the lighter, accompanied by a legible photocopy of the official DOT notice conveying the approval described in [10.13.4a](#) and a specimen of the actual lighter, the packaging materials in which each lighter is to be mailed, the number of mailpieces and mailing location; and the mailer receives from the PCSC manager a letter approving the requested authorization for mailing.
- c. When presented for mailing, the address side of the mailpiece containing the lighter prominently displays the T-Number, the proper shipping name “Lighter(s)” or “Lighter(s) for Cigarette,” and the marking “Surface Only” or “Surface Mail Only”; all preparation and packaging requirements in the PCSC manager's approval letter are met; and a legible photocopy of the PCSC manager's approval letter accompanies the mailing.

10.13.5 Special Permit Authorization DOT–SP 9275

Manufacturers and distributors seeking to mail parcels via air transportation in accordance with Department of Transportation Special Permit 9275 must submit a written request for approval to the manager, Mailing Standards (see [608.8.0](#) for address). Approval to mail parcels using DOT–SP 9275 allows the mailer to use First-Class Mail, Priority Mail, or Parcel Select services for shipping in compliance with all DOT regulations in DOT–SP 9275 and the following mailing requirements:

- a. Mailers must present a current copy of their DOT Special Permit Authorization letter with a written request for approval to the manager, Mailing Standards.
- b. Once approved, mailers must present a copy of their approval letter from the manager, Mailing Standards (to be kept on file at the office of mailing) at the time of their first mailing at any given postal facility, along with a copy of their current DOT Special Permit Authorization letter. It is the mailers responsibility to provide the office of mailing with updated DOT Special Permit approval letters. The Postal Service may refuse mailings not supported by a current DOT authorization letter.
- c. Mailers must enter parcels using First-Class Mail, Priority Mail, or Parcel Select service via a USPS-authorized manifest mailing system (MMS) (see [705.2.0](#)).
- d. Mailers must label each parcel on the address side with “USPS Approved DOT–SP 9275” using at least 14-point type.
- e. Parcels must weigh 10 pounds or less. Each inner package (receptacle) may not exceed 16 ounces of flammable liquid or 1 pound of solids containing flammable liquid.
- f. Mailers must ensure that all addressees are notified that they are not authorized to remail the contents of the parcel via the Postal Service under DOT–SP 9275. Mailers must include the following notice: “Flammable substances contained in these packages may be mailed only by consumers (the addressee) via surface transportation in accordance with [10.13](#). Full responsibility rests with the mailer to comply with all postal and nonpostal statutes and regulations regarding mail.

601.10.14

Information regarding postal statutes, regulations, and mailing requirements is available from your local Postmaster or Postal Service Business Mail Entry Manager, and at the Postal Service's mailing standards Web site at pe.usps.com.”

- g. Mailers must comply with the warning and labeling requirements in 21 CFR Part 700 (740.1 and 701.3) when mailing each parcel.

10.14 Flammable Solids (Hazard Class 4)

10.14.1 Definitions

Hazard class 4 consists of three divisions:

- a. Division 4.1, Flammable Solids. Any solid material other than one classed as an explosive that, under conditions normally incident to transportation, is likely to cause fires through friction or retained heat from manufacturing or processing, or that can be ignited readily and, when ignited, burns so vigorously and persistently as to create a serious transportation hazard.
- b. Division 4.2, Spontaneously Combustible. A liquid or solid pyrophoric material that even in small amounts and without an external ignition source can ignite within 5 minutes after coming in contact with air, or a self-heating material that, when in contact with air and without an energy supply, is liable to self-heat.
- c. Division 4.3, Dangerous When Wet. A material that, by contact with water, is likely to become spontaneously flammable or to give off flammable or toxic gas at a price greater than 1 liter per kilogram of the material per hour.

10.14.2 Mailability

Flammable solids are prohibited in international mail. Flammable solids are prohibited in domestic mail via air transportation. A flammable solid that can qualify as an ORM-D material is permitted in domestic mail via surface transportation if the material is contained in a secure primary receptacle having a weight of 1 pound or less; the primary receptacle(s) is packed in a strong outer shipping container with a total weight of 25 pounds or less per mailpiece; and each mailpiece is plainly and durably marked on the address side with “Surface Only” or “Surface Mail Only” and “ORM-D” immediately following or below the proper shipping name.

10.14.3 Matches

Matches are classified as flammable solids. Strike-anywhere matches are prohibited in international and domestic mail. Safety matches (book, card, or strike-on-box) are prohibited in international mail, and in domestic mail via air transportation, but are permitted in domestic mail via surface transportation if:

- a. They do not ignite spontaneously under conditions normally incident to transportation or when subjected for 8 consecutive hours to a temperature of 200°F (93°C).
- b. They cannot be readily ignited by friction unless struck on their own or a similar box, card, or book.
- c. They are tightly packed in a securely sealed primary receptacle to prevent any shifting or movement that could cause accidental ignition by rubbing against adjoining items. The primary receptacle(s) is placed securely within an outer

shipping container made of fiberboard, wood, or other equivalent material. Multiple primary receptacles may be placed in a single outer shipping container. The address side of the mailpiece must be marked "Surface Only" or "Surface Mail Only" and "Book Matches," "Strike-on-Card Matches," or "Card Matches," as appropriate. A shipping paper is not required.

- d. The gross weight of each mailpiece is not more than 25 pounds.

10.15 Oxidizing Substances, Organic Peroxides (Hazard Class 5)

10.15.1 Definition

Hazard class 5 consists of two divisions:

- a. Division 5.1, Oxidizing Substances. A material that may, generally by yielding oxygen, cause or enhance the combustion of other materials.
- b. Division 5.2, Organic Peroxides. Any organic compound that contains oxygen in the bivalent structure and that may be considered a derivative of hydrogen peroxide, where one or more of the hydrogen atoms have been replaced by organic radicals.

10.15.2 Mailability

Oxidizing substances and organic peroxides are prohibited in international mail. For domestic mail, a material that can qualify as an ORM-D material is permitted via air or surface transportation. Liquid materials must be enclosed within a primary receptacle having a capacity of 1 pint or less; the primary receptacle(s) must be surrounded by absorbent cushioning material and held within a leak-resistant secondary container that is packed within a strong outer shipping container. Solid materials must be contained within a primary receptacle having a weight capacity of 1 pound or less; the primary receptacle(s) must be surrounded with cushioning material and packed within a strong outer shipping container. Each mailpiece may not exceed a total weight of 25 pounds. The address side of each mailpiece must be plainly and durably marked with "ORM-D AIR" or "ORM-D," as applicable, immediately following or below the proper shipping name. A mailable Class 5 material sent via surface transportation must be marked "Surface Mail" or "Surface Mail Only" on the address side. A mailable material sent via air transportation must bear a shipper's declaration for dangerous goods.

10.16 Toxic Substances (Hazard Class 6, Division 6.1)

10.16.1 Definitions

The terms used in the standards for Division 6.1 material are:

- a. *Toxic substance* is a poisonous material, other than a gas, that is known to be so toxic to humans as to cause death, injury, or harm to human health if swallowed, inhaled, or contacted by the skin.
- b. *Oral toxicity* applies to a liquid with a lethal dose (LD₅₀) for acute oral toxicity of not more than 500 mg/kg or a solid with an LD₅₀ for acute oral toxicity of not more than 200 mg/kg that when administered by mouth is likely to cause death within 14 days in half of the test animals.

601.10.16.2

- c. *Dermal toxicity* applies to a material with an LD₅₀ for acute dermal toxicity of not more than 1,000 mg/kg that when administered by continuous contact with bare skin is likely to cause death within 14 days in half of the test animals.
- d. *Inhalation toxicity* applies to a dust or mist with a lethal concentration (LC₅₀) for acute inhalation toxicity of not more than 10 mg/L; or a saturated vapor concentration in air at 68°F (20°C) of more than one-fifth of the LC₅₀ for acute toxicity on inhalation of vapors and with an LC₅₀ for acute inhalation toxicity of vapors of not more than 5,000 ml/m³; that when administered by continuous inhalation for 1 hour is likely to cause death within 14 days in half of the test animals.
- e. *Irritating material* is any liquid or solid substance (e.g., tear gas) that gives off intense fumes and causes extreme irritation and impairment to a person's ability to function.

10.16.2 Mailability

Toxic substances or poisons are prohibited in international mail. For domestic mail, a Division 6.1 toxic substance or poison that can qualify as an ORM-D material is permitted when packaged under the applicable requirements in [10.16.4](#). Certain other poisonous materials are permitted to be mailed only between the authorized parties and under the conditions in [10.16.3](#).

10.16.3 Authorized Parties

A Division 6.1 toxic substance having an LD₅₀ for oral toxicity of greater than 5mg/kg but less than or equal to 50 mg/kg is mailable only if packaged under the applicable requirements in [10.16.4](#) and when sent between authorized parties and under specified conditions, as follows:

- a. Toxic substances for scientific use (not outwardly or of their own force dangerous or injurious to life, health, or property) may be sent only between manufacturers, dealers, bona fide research or experimental scientific laboratories, and employees of federal, state, or local governments who have official use for such poisons and are designated by the agency head to receive or send such poisons. For air transportation, a shipper's declaration for dangerous goods is required.
- b. Poisonous drugs and medicines may be sent only from the manufacturer or dealer of the drugs and medicines to licensed physicians, surgeons, dentists, pharmacists, druggists, cosmetologists, barbers, and veterinarians (18 USC 1716). In limited circumstances, when the mailing is initiated by a drug manufacturer or the drug manufacturer's registered agent, customers may return prescription drugs to the manufacturer or its registered agent as indicated in [11.11.4](#) and [11.11.5](#).

10.16.4 Packaging and Marking

The following requirements must be met, as applicable:

- a. A toxic substance that can qualify as an ORM-D material and does not exceed a total capacity of 8 ounces per mailpiece is permitted if: the material is held in a primary receptacle(s); enough cushioning material surrounds the primary receptacle to absorb all potential leakage; the cushioning and primary receptacle(s) are packed in another securely sealed secondary container that is

placed within a strong outer shipping container. Each mailpiece must be plainly and durably marked on the address side with “ORM-D” or “ORM-D AIR,” as applicable, immediately following or below the proper shipping name. Mailable material sent via surface transportation must be marked on the address side as “Surface Only” or “Surface Mail Only.”

- b. Other toxic substances and poisons are permitted to be sent between the authorized parties and under the conditions in [10.16.3](#) when they do not exceed 8 ounces per mailpiece and if: the material is held in a leak-resistant primary receptacle(s); sufficient absorbent and cushioning material completely surround each primary receptacle; the primary receptacle(s) and the absorbent and cushioning materials are firmly held within a leakproof (for liquids) or siftproof (for solids) secondary container; the secondary container is firmly and securely held within a strong outer shipping container of 200-pound grade corrugated fiberboard or equivalent strength. The address side of each mailpiece must be marked with the proper shipping name and UN (or NA) identification number of the material (unless exempted by [11.11.6](#)). Mailable materials sent via surface transportation must be marked on the address side as “Surface Only” or “Surface Mail Only.” Each mailpiece must bear a shipping paper.

10.16.5 Irritants

Irritants are prohibited in international mail and domestic mail.

10.17 Infectious Substances (Hazard Class 6, Division 6.2)

10.17.1 General

Division 6.2 materials include infectious substances, biological products, regulated medical waste, sharps medical waste, used health care products, and forensic materials. Division 6.2 materials are not permitted in international mail or domestic mail, except when they are intended for medical or veterinary use, research, or laboratory certification related to the public health; and only when such materials are properly prepared for mailing to withstand shocks, pressure changes, and other conditions related to ordinary handling in transit. Mailable Division 6.2 materials sent as international mail must meet the standards in the *International Mail Manual*. For domestic mail, mailable Division 6.2 materials must meet the applicable standards in [10.17](#). Unless otherwise noted, all mailable Division 6.2 materials must meet the mail preparation requirements for air transportation.

10.17.2 Definitions

The terms used in the standards for Division 6.2 materials are defined as follows:

- a. *Infectious substance* means a material known or reasonably expected to contain a pathogen. A pathogen is a microorganism that can cause disease in humans or animals. Examples of pathogens include bacteria, viruses, fungi, and other infectious agents. An infectious substance must be assigned to one of the following two categories:
 1. *Category A*: An infectious substance transported in a form capable of causing permanent disability or life-threatening or fatal disease in otherwise healthy humans or animals when exposure occurs. Category A infectious substances are not mailable. A Category A infectious substance

is assigned the identification number UN 2814 or UN 2900, based on the known medical history or symptoms of the source patient or animal, endemic local conditions, or professional judgment concerning the individual circumstances of the source human or animal.

2. *Category B*: An infectious substance that does not meet the criteria for inclusion in Category A. A mailpiece known or suspected to contain a Category B infectious substance must bear the proper shipping name “Biological substance, Category B” on the address side of the mailpiece and must be assigned to and marked with identification number UN 3373 or, for regulated medical waste and sharps medical waste, identification number UN 3291.
 - b. *Biological product* means a virus, therapeutic serum, toxin, antitoxin, vaccine, blood, blood component or derivative, allergenic product, or analogous product or arsphenamine or derivative of arsphenamine (or any other trivalent arsenic compound) intended to prevent, treat, or cure a disease or condition of humans or animals. A biological product includes a material subject to regulation under 42 U.S.C. 262 or 21 U.S.C. 151-159. Unless otherwise excepted, mark these mailpieces with identification number UN 3373 when they contain a biological product known or reasonably expected to contain a pathogen that meets the definition of a Category B infectious substance.
 - c. *Cultures* are infectious substances that result from a process by which pathogens are intentionally propagated. This definition does not include a human or animal patient specimen as defined in [10.17.2e](#).
 - d. *Exempt human or animal specimen* means a human or animal sample (including, but not limited to, secretta, excreta, blood and its components, tissue and tissue fluids, and body parts) transported for routine testing not related to the diagnosis of an infectious disease. Typically, exempt human specimens are specimens for which there is a low probability that the sample is infectious, such as specimens for drug or alcohol testing; cholesterol testing; blood glucose level testing; prostate-specific antigens (PSA) testing; testing to monitor heart, kidney, or liver function; pregnancy testing; and testing for diagnosis of noninfectious diseases such as cancer biopsies. Exempt human or animal specimens are not subject to regulation as hazardous materials but must be packaged according to [10.17.9](#).
 - e. *Patient specimen* means material that is collected directly from humans or animals and transported for purposes such as diagnosis and research. Patient specimens include excreta, secretta, blood and its components, tissue and tissue swabs, body parts, and specimens in transport media (such as transwabs, culture media, and blood culture bottles).
 - f. *Regulated medical waste*, for USPS purposes, means a soft waste material (other than a sharp) derived from the medical treatment, diagnosis, immunization, or biomedical research of a human or animal. Soft medical waste includes items such as used rubber gloves, swabs, gauze, tongue depressors, and other similar material. Mark these mailpieces with identification number UN 3291.

- g. *Sharps medical waste*, for USPS purposes, means a medical waste object that is capable of cutting or penetrating skin or packaging material and that is contaminated with a pathogen or may become contaminated with a pathogen derived from the medical treatment, diagnosis, immunization, or biomedical research of a human or animal. Sharps include used medical waste such as needles, syringes, scalpels, broken glass, culture slides, culture dishes, broken capillary tubes, broken rigid plastic, and exposed ends of dental wires. Mark these mailpieces with identification number UN 3291.
- h. *Toxin* means a Division 6.1 material from a plant, animal, or bacterial source. A toxin containing an infectious substance or a toxin contained in an infectious substance must be classed as Division 6.2, described as an infectious substance, and assigned to UN 2814, UN 2900, or UN 3373, as appropriate. A toxin known or suspected to contain a Category A infectious substance is not mailable. A toxin known or suspected to contain a Category B infectious substance must be marked UN 3373 and packaged under 10.17.5. Toxins from plant, animal, or bacterial sources that do not contain an infectious substance, and are not contained in an infectious substance, may be considered for classification as Division 6.1 toxic substances under 10.16.
- i. *Used health care product* means a medical, diagnostic, or research device or piece of equipment, or a personal care product used by consumers, medical professionals, or pharmaceutical providers that does not meet the definition of a diagnostic specimen, biological product, regulated medical waste, or sharps waste, is contaminated with potentially infectious body fluids or materials, and is not decontaminated or disinfected to remove or mitigate the infectious hazard prior to transport.

10.17.3 Nonregulated Materials

The following materials are not subject to regulation as Division 6.2 hazardous materials and are mailable when the packaging requirements in 10.17.8 are met:

- a. A biological product, including an experimental or investigational product or component of a product, subject to Federal approval, permit, review, or licensing requirements, such as those required by the Food and Drug Administration of the U.S. Department of Health and Human Services or the U.S. Department of Agriculture. A biological product known or suspected to contain a Category B infectious substance must be marked UN 3373 and packaged under 10.17.4. A biological product known or suspected to contain a Category A infectious substance is not mailable.
- b. Blood collected for the purpose of blood transfusion or the preparation of blood products; blood products; plasma; plasma derivatives; blood components; tissues or organs intended for use in transplant operations; and human cell, tissues, and cellular and tissue-based products regulated under the Public Health Service Act (42 U.S.C. 264-272) or the Food, Drug, and Cosmetic Act (21 U.S.C. 332 et seq.).
- c. Blood, blood plasma, and blood components collected for the purpose of blood transfusion or the preparation of blood products and sent for testing as part of the collection process, except where the person collecting the blood has

601.10.17.3

reason to believe it contains a Category B infectious substance, in which case the test sample must be shipped as a Category B infectious substance. Materials known or suspected to contain a Category A infectious substance are not mailable.

- d. Dried blood spots, collected by applying a drop of blood to absorbent material, or dried specimens for fecal occult blood detection. (These materials are not classified as exempt human or animal specimens.)
- e. Forensic material containing a biological material, such as tissue, body fluid, excreta, or secreta, not expected to contain a Category A or Category B infectious substance and transported on behalf of a U.S. Government agency or a state, local, or Indian tribal government agency. A forensic material known or suspected to contain a Category B infectious substance must be shipped as a Category B infectious substance. A forensic material known or suspected to contain a Category A infectious substance is not mailable.

All materials mailable under the provisions in [10.17](#) must be properly packaged. [Exhibit 10.17.3](#) lists the specific reference in [10.17](#) under which each type of mailable material must be packaged.

Exhibit 10.17.3 Packaging Standards for Division 6.2 Infectious Substances

MATERIAL BEING MAILED	PACKAGING STANDARDS		
	Nonregulated	Category A	Category B
Blood for Transfusion	10.17.8	nm	10.17.4
Biological Product	10.17.8	nm	10.17.4
Culture or Stock	10.17.8	nm	10.17.4
Patient Specimen	n/a	nm	10.17.4
Exempt Human or Animal Specimen	10.17.9	n/a	n/a
Forensic Material	10.17.8	nm	10.17.4
Regulated Medical Waste	10.17.5	nm	10.17.5
Sharps Waste	10.17.5	nm	10.17.5
Toxin*	10.16.4	nm	10.17.4
Treated Medical Waste	10.17.8	n/a	n/a
Used Health Care Product	10.17.6	nm	10.17.6

nm = Not mailable.

n/a = Not applicable.

* *Toxin* means a Division 6.1 material from a plant, animal, or bacterial source. A toxin containing an infectious substance or a toxin contained in an infectious substance must be classified as Division 6.2; described as an infectious substance; and assigned to UN 2814, UN 2900, or UN 3373, as appropriate. A Division 6.1 toxin that can qualify as an ORM-D material is permitted when packaged under [10.16.3](#) or [10.16.4](#).

10.17.4 Packaging Category B Infectious Substances

A material that is classified as a Category B infectious substance and that meets the definition in [10.17.2a2](#) must be triple-packaged, meeting the packaging requirements in 49 CFR 173.199, and sent as First-Class Mail, Priority Mail, or Express Mail. Each primary receptacle containing a liquid must be leakproof and surrounded by absorbent material sufficient to protect the primary receptacle and absorb the total amount of liquid should the primary receptacle leak or break. Each primary receptacle containing a solid must be siftproof. Secondary containers for liquids must be leakproof. Secondary containers for solids must be siftproof. The primary and secondary packaging must be enclosed in a rigid outer shipping container. A single primary receptacle must not contain more than 1 liter (34 ounces) of a liquid specimen or 4 kg (8.8 pounds) of a solid specimen. Two or more primary receptacles whose combined volume does not exceed 4 liters (1 gallon) for liquids or 4 kg (8.8 pounds) for solids may be enclosed in a single secondary container. In addition:

- a. The secondary container must be marked with the international biohazard symbol shown in Exhibit [10.17.5d3](#).
- b. The primary receptacle or secondary packaging must be capable of withstanding, without leakage, an internal pressure producing a pressure differential of not less than 95 kPa (0.95 bar, 14 psi) in the range of -40° C to 55° C (-40° F to 130° F).

601.10.17.5

- c. All mailpieces sent under [10.17.4](#) must be marked on the address side with the shipping name "Biological substance, Category B" and "UN 3373" as outlined in 49 CFR 173.199 (a)(5). Regulated medical waste and sharps medical waste as defined in [10.17.2f](#) and [10.17.2g](#) must be marked UN 3291. See [10.17.5](#).
- d. Orientation arrows are not required on these mailpieces but may be used.
- e. The outer packaging must show the name and telephone number of a person who is knowledgeable about the material shipped and has comprehensive emergency response and incident mitigation information, or of someone who has immediate access to the person with such knowledge and information.

10.17.5 Sharps Waste and Other Mailable Regulated Medical Waste

Regulated medical waste and sharps medical waste known or suspected to contain a Category A infectious substance is not mailable. Regulated medical waste and sharps medical waste as defined in [10.17.2f](#) and [10.17.2g](#), and containing materials classified as Category B infectious substances, must be marked UN 3291 and are permitted for mailing only using merchandise return service (see [507.11.0](#)) with First-Class Mail or Priority Mail service, subject to the following requirements:

- a. *Authorization.* Each vendor of a complete regulated medical waste or sharps waste mailing container system (including all component parts required to safely mail such waste to a storage or disposal facility) must obtain authorization from the USPS prior to mailing. Before applying for authorization, each type of mailing container system must be tested and certified under the standards in [10.17.5e](#) by an independent testing facility. The vendor in whose name the authorization is being sought must submit a written request to the manager, Mailing Standards, USPS Headquarters (see [608.8.0, USPS Contact Information](#), for address). The request for authorization must contain the following:
 - 1. An irrevocable \$50,000 surety bond or letter of credit as proof of sufficient financial responsibility to cover disposal costs if the vendor ceases doing business before all its waste container systems are disposed of or to cover cleanup costs if spills occur while the containers are in USPS possession. The surety bond or letter of credit must be issued in the name of the vendor seeking the authorization and must name the USPS as the beneficiary or obligee. Vendors that market their containers to distributors are responsible for disposal and cleanup costs attributed to those containers. In addition, vendors must provide a list of distributors, including firm names, addresses, and telephone numbers, to the Postal Service on request.
 - 2. Address of the headquarters or general business office of the vendor seeking the authorization.
 - 3. Name, address, and phone number of each storage and disposal site.
 - 4. List of all types of mailing container systems to be covered by the request, a complete sample of each mailing container system, and proof of package testing certifications performed by the independent testing facility that subjected the packaging materials to the testing requirements in [10.17.5e](#).

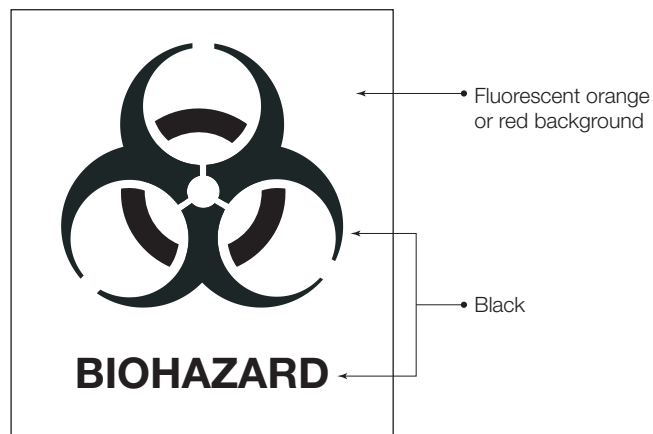

5. Copy of the proposed waste shipping paper to be used with each mailing container system.
 6. 24-hour toll free telephone number for emergencies.
 7. List of the types of waste to be mailed for disposal in each mailing container system.
 8. Copy of the merchandise return service label to be used with each mailing container system and verification that the merchandise return service permit fee and accounting fee have been paid.
 9. Address of the Post Office or postage due unit where the containers are delivered.
- b. *Packaging.* Regulated medical waste and sharps medical waste that also meets the definition of a Category A infectious substance is not mailable. A medical waste material treated by steam sterilization, chemical disinfections, or other appropriate method so that it no longer contains a Category A or Category B infectious substance must be packaged under [10.17.8](#). The packaging for regulated medical waste and sharps medical waste containing or suspected of containing a Category B infectious substance is subject to these standards:
1. Sharps medical waste and regulated medical waste meeting the definitions in [10.17.2e](#) and [10.17.2g](#) must be collected in a rigid, securely sealed, and leakproof primary receptacle. For sharps waste, the primary receptacle must also be puncture-resistant and may not have a maximum capacity that exceeds 3 gallons in volume. For regulated medical waste, the primary receptacle may not have a maximum capacity that exceeds 5 gallons in volume. Each primary receptacle may not contain more than 50 ml (1.66 ounces) of residual waste liquid. Each primary receptacle must display the international biohazard symbol shown in [Exhibit 10.17.5d3](#). Package testing results must show that the contents did not penetrate through the primary container during package testing and that the primary container can maintain its integrity at temperatures as low as 0°F and as high as 120°F.
 2. The primary receptacle must be packaged within a watertight secondary container or containment system. The secondary container may consist of more than one component. If one of the components is a plastic bag, the bag must be at least 4 mil in thickness and must be used in conjunction with a fiberboard box. A plastic bag by itself does not meet the requirement for a secondary container. Several primary receptacles may be enclosed in a secondary container. The primary receptacle(s) must fit securely and snugly within the secondary container to prevent breakage during ordinary processing.
 3. The secondary container must be enclosed in a strong outer shipping container constructed of 200-pound grade corrugated fiberboard. The joints and flaps of the outer shipping container must be securely taped, glued, or stitched to maintain the integrity of the container. When tape or glue is used to secure an outer shipping container, the material must be

601.10.17.5

- water-resistant. Fiberboard boxes with interlock bottom flaps (i.e., easy-fold) are not permitted as outer shipping containers unless reinforced with water-resistant tape. The secondary container must fit securely and snugly within the outer shipping container to prevent breakage during ordinary processing.
4. There must be enough material within the primary receptacle to absorb and retain three times the total liquid allowed within the primary receptacle (150 ml per primary receptacle) in case of leakage.
 5. Each mailpiece must not weigh more than 25 pounds. Medical Professional Packages as identified in [10.17.5c](#), may not weigh more than 35 pounds. The container's maximum allowable weight must be printed on the outside of the box and on the assembly and closure instructions included with each mailpiece. The mailpiece must be tested at the maximum allowable weight identified by the vendor.
 6. In each mailing container system, the authorized vendor must include a step-by-step instruction sheet that clearly details the proper sequence and method of container system assembly prior to mailing to prevent package failure during transport due to improper assembly. The instruction sheet must also include a customer service telephone number, or provide specific information on where such a telephone number is located elsewhere on the container system, for third-party end users to contact if they have assembly questions or find a component part is missing.
- c. *Medical Professional Packages*. Medical Professional Packages, while intended for use by small medical offices, is not limited to use by medical offices only. One primary receptacle larger than 5 gallons in volume may be used for mailing pre-primary sharps receptacles (sharps receptacles normally used in doctors' offices) and other regulated medical waste under the following conditions:
1. The mailpiece must meet all the requirements in [10.17.5](#) except for the primary receptacle capacity limits of [10.17.5b1](#).
 2. Only rigid, securely closed, puncture and leak-resistant pre-primary sharps receptacles that meet or exceed Occupational Safety and Health Administration standards as identified in 29 CFR 1910.1030, may be placed inside the primary receptacle. Each pre-primary sharps container may contain no more than 50 ml (1.66 ounces) of residual waste liquid. Several pre-primary sharps receptacles may be enclosed in the single primary receptacle.
 3. Multiple tie-closed plastic bags of regulated medical waste may be placed inside the single primary receptacle.
 4. The primary receptacle must be lined with a plastic bag at least 4 mil in thickness and must include sufficient absorbent material within the liner to absorb all residual liquid in the primary receptacle.
 5. The mailpiece must not weigh more than 35 pounds.
- d. *Mailpiece Labeling, Marking, and Documentation*. Regulated medical waste and sharps waste must meet the following requirements:

1. For Medical Professional Packages, the additional marking “Medical Professional Packaging” must be clearly printed in lettering at least 2 inches high on the address side of the outer shipping container.
2. Each primary receptacle and outer shipping container must bear a label, which cannot be detached intact, showing: (a) the company name of the vendor to which the mailing authorization is issued; (b) the USPS Authorization Number, and; (c) the container ID number (or unique model number) signifying that the packaging material is certified and that the vendor obtained the authorization required by 10.17.5a. Place the label on the top or on a side of the container.
3. The primary receptacle(s) and the outer shipping container must bear the international biohazard symbol in black with either a fluorescent orange or fluorescent red background as shown in Exhibit 10.17.5d3. The symbol on the outer shipping container must be at least 3 inches high and 4 inches wide.

Exhibit 10.17.5d3 International Biohazard Symbol

4. Each mailpiece must have a four-part waste shipping paper. The shipping paper must be affixed to the outside of the mailpiece in an envelope or similar carrier that can be easily opened and resealed to allow review of the document. The shipping paper must comply with all applicable requirements imposed by the laws of the state from which the container system is mailed. At a minimum, the information in Exhibit 10.17.5d4 must be on the shipping paper.

601.10.17.5

Exhibit 10.17.5d4 Shipping Paper for Regulated Medical Waste and Sharps Waste Containers

SECTION	INFORMATION REQUIRED
1. Generator (Mailer)	<p>a. Name.</p> <p>b. Complete address (not a Post Office box).</p> <p>c. Telephone number.</p> <p>d. Description of contents of mailing container. "Regulated Medical Waste" or "Regulated Medical Waste-Sharps" is required as appropriate.</p> <p>e. Date container was mailed.</p> <p>f. State permit number of approved facility in which contents are to be disposed of.</p>
2. Destination Facility (Disposal Site)	Complete address (not a Post Office box)
3. Generator's (Mailer's) Certification	<p>The following certification statement must be printed on the shipping paper:</p> <p>"I certify that this container has been approved for the mailing of [insert either "regulated medical waste" or "sharps waste," as appropriate], has been prepared for mailing in accordance with the directions for that purpose, and does not contain excess liquid or nonmailable material in violation of the applicable Postal Service regulations. I AM AWARE THAT FULL RESPONSIBILITY RESTS WITH THE GENERATOR (MAILER) FOR ANY VIOLATION OF 18 USC 1716 WHICH MAY RESULT FROM PLACING IMPROPERLY PACKAGED ITEMS IN THE MAIL. I also certify that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and in proper condition for carriage by air according to the national governmental regulations."</p> <p>This statement must be followed by printed or typewritten name of generator (mailer), signature of generator, and date signed.</p>
4. Destination Facility (Storage or Disposal Site)	<p>The following certification statement of receipt, treatment, and disposal must be printed on the shipping paper:</p> <p>"I certify that the contents of this container have been received, treated, and disposed of in accordance with all local, state, and federal regulations."</p> <p>This statement must be followed by printed or typewritten name of an authorized recipient at destination facility, signature of authorized recipient, and date signed.</p>
5. Transporter Intermediate Handler Other Than the Postal Service (If Different From Destination Facility)	<p>a. Name.</p> <p>b. Complete address (not a Post Office box).</p> <p>c. Printed or typewritten name of transporter or intermediate handler.</p> <p>d. Signature of transporter or intermediate handler and date signed.</p>
6. Serialized Waste Shipping Papers	Each waste shipping paper or mail disposal service shipping record must be serialized using a unique numbering system for identification purposes.
7. Comment Area	Each shipping paper must contain an area designated for entering comments or noting discrepancies.
8. Completion and Distribution of Waste Shipping Paper	<p>Each shipping paper must contain instructions for properly completing the four-part form.</p> <p>Copies of the form must be distributed as follows:</p> <p>a. One copy must be kept by generator (mailer).</p> <p>b. One copy must be kept by transporter or intermediate handler for 90 days.</p> <p>c. One copy must be kept by destination facility for 90 days.</p> <p>d. One copy must be mailed to generator by destination facility.</p>
9. Emergency Telephone Number	<p>Each shipping paper must bear the following statement with appropriate information:</p> <p>"IN CASE OF EMERGENCY, OR THE DISCOVERY OF DAMAGE OR LEAKAGE, CALL 1-800-###-####."</p>

5. The outer shipping container must bear a properly prepared merchandise return service label (see [507.11.0](#)). The merchandise return service permit must be held in the same name as that of the authorized medical waste vendor.
 6. The outer shipping container must be marked on two opposite side walls with the package orientation marking in 49 CFR 173.312 to identify the proper upright position of the mailpiece during handling.
 7. Mailpieces containing regulated medical waste or sharps waste must be marked on the address side with the correct UN number and proper shipping name (e.g., “Regulated Medical Waste, UN 3291” or “Regulated Medical Waste—Sharps, UN 3291”).
 8. Vendors must retrieve mailpieces held at processing facilities due to improper labeling such as no return address or due to improperly completed shipping papers.
- e. *Package Testing.* Vendors must submit to the manager, Mailing Standards (see [608.8.0](#) for address), package testing results from an independent testing facility for each package for which the vendor is requesting authorization. In addition, vendors must submit package testing results from an independent testing facility when the design of a container system changes or every 24 months, whichever occurs first. The test results must show that if every mailpiece prepared for mailing were subject to the environmental and test conditions in 49 CFR and the additional test requirements in [10.17.5f](#), no contents would be released into the environment and the effectiveness of the packaging would not be significantly reduced. The Postal Service may require proof of accreditation or other documentation to support the credentials of an independent testing facility.
- f. *Testing Criteria.* Packages tested for approval as Medical Professional Packages may not be tested using pre-primary containers that are currently, or have previously been, approved as USPS primary containers. Test reports must identify by brand name the pre-primary containers used during testing. Each mailpiece must pass each of the tests described below:
1. *Leak-proof test.* The test must be conducted on one primary receptacle with the lid in place, without the secondary and outer packaging. The test duration must be at least 5 minutes and must be conducted at 20 kPa (3 psi). The pass/fail criterion is: no air leakage from anywhere other than the closure of the primary receptacle. Air leakage at the closure is not considered a failure if the primary receptacle passes the test for watertightness as determined by placing 50 ml of deionized water into the primary receptacle, securing the closure, and then turning the container on its side and observing for any evidence of leakage. Any evidence of water leaking from the primary receptacle is a failure.
 2. *Stacking test.* One mailpiece must withstand the test in 49 CFR 178.606. The dynamic compression test must be conducted on the empty, unsealed mailpiece assembled for mailing, without the primary receptacle(s). The test mass is the vendor-identified maximum weight, not to exceed 25 pounds, as indicated on the outer shipping container and on

601.10.17.5

the assembly and closing instructions. A compensation factor of 1.5 must be used to compute the test load, based on the vendor-identified weight. The pass/fail criteria are: no buckling of the sidewalls sufficient to cause damage to the contents in the primary receptacle, and in no case does the deflection exceed 1 inch.

3. *Vibration test.* One mailpiece filled with sharps or other regulated medical waste must withstand the test in 49 CFR 178.608. The test mailpiece is filled with sharps or other regulated medical waste to the vendor-identified maximum weight, not to exceed 25 pounds, as indicated on the outer shipping container and on the assembly and closing instructions. The test sample is prepared as it would be for mailing. The pass/fail criterion is: no rupture, cracking, or splitting of any primary receptacle.
4. *Wet drop test.* Five mailpieces filled with sharps or other regulated medical waste must withstand the test in 49 CFR 178.609e. Each test mailpiece is filled with sharps or other regulated medical waste to the vendor-identified maximum weight, not to exceed 25 pounds, as indicated on the outer shipping container and on the assembly and closing instructions included with each mailpiece. Each mailpiece is prepared as it would be for mailing and subjected to a water spray as described in the test. A separate, untested mailpiece is used for each drop orientation: top, longest side, shortest side, and corner. The pass/fail criteria are: no rupture, cracking, or splitting of any primary receptacle, and no contents may penetrate into or through the body or lid of any primary receptacle.
5. *Cold drop test.* Five mailpieces filled with sharps or other regulated medical waste must withstand the test in 49 CFR 178.609f. Each test mailpiece is filled with sharps or other regulated medical waste to the vendor-identified maximum weight, not to exceed 25 pounds, as indicated on the outer shipping container and on the assembly and closing instructions included with each mailpiece. Each mailpiece is prepared as it would be for mailing and chilled as described in the test. A separate, untested mailpiece is used for each drop orientation: top, longest side, shortest side, and corner. The pass/fail criteria are: no rupture, cracking, or splitting of any primary receptacle, and no contents may penetrate into or through the body or lid of any primary receptacle.
6. *Impact test.* One mailpiece filled with sharps or other regulated medical waste must withstand the test in 49 CFR 178.609h. The test mailpiece is filled with sharps or other regulated medical waste to the vendor-identified maximum weight, not to exceed 25 pounds, as indicated on the outer shipping container and on the assembly and closing instructions included with each mailpiece. The mailpiece is prepared as it would be for mailing. The pass/fail criteria are: no rupture, cracking, or splitting of any primary receptacle, and no contents may penetrate into or through the body or lid of any primary receptacle.
7. *Puncture-resistant test.* Package testing results must show that during all of the previous tests, the contents did not penetrate through the primary receptacle.

8. *Temperature test.* Package testing results must show that each primary receptacle maintained its integrity when exposed to temperatures as low as 0°F and as high as 120°F.
 9. *Absorbency test.* Package testing results must show that the primary receptacle(s) contain enough absorbent material to absorb three times the total liquid allowed within the primary receptacle in case of leakage. Absorbency is determined by pouring 150 ml of deionized water into the primary receptacle(s), then turning the receptacle(s) upside down and observing for any evidence of free liquid not absorbed on contact. Any evidence of free liquid is a failure.
 10. *Watertight test.* Package testing results must show that no leakage occurred when 50 ml of deionized water was placed into the secondary containment system and the entire system turned upside down for 5 minutes.
- g. *Suspension of Authorization.* The Postal Service may suspend a vendor's authorization based on information that a mailpiece no longer meets the standards for mailing sharps medical waste and regulated medical waste containers, or that the mailpiece poses an unreasonable safety risk to Postal Service employees or the public. The suspension can be made immediately, making the mailpiece nonmailable immediately. The vendor may contest a decision to suspend authorization by writing to the manager, Mailing Standards (see [608.8.0](#) for address), within 7 days from the date of the letter of suspension. The appeal should provide evidence demonstrating why the decision should be reconsidered. Any order suspending authorization remains in effect during an appeal or other challenge. When a vendor is notified that its authorization to mail sharps or other regulated medical waste containers has been suspended, the vendor must immediately:
1. Recall all identified containers.
 2. Notify all customers that they cannot mail the identified containers.
 3. Suspend sales and distribution of all identified containers.
 4. Collect the identified containers from distributors, consumers, and the Postal Service without using the mail and in accordance with all federal and state regulations.

10.17.6 Packaging Used Health Care Products

A used health care product known or reasonably suspected to contain a Category A material is not mailable. A used health care product not suspected to contain an infectious material, or that is known or suspected to contain a Category B infectious substance, and is being returned to the manufacturer or manufacturer's designee is mailable as First-Class Mail, Priority Mail, or Express Mail subject to the following packaging requirements:

- a. Each used health care product must be drained of liquid to the extent possible and placed in a watertight primary receptacle designed and constructed to ensure that it remains intact under normal conditions of transport. For a used health care product capable of cutting or penetrating skin or packaging material, the primary receptacle must be capable of retaining the product

601.10.17.7

without puncture of the packaging under normal conditions of transport. The primary receptacle must be marked with the international biohazard symbol as shown in [Exhibit 10.17.5d3](#).

- b. Each primary receptacle must be placed inside a watertight secondary container designed and constructed to ensure that it remains intact under normal conditions of transport. The secondary container must also be marked with the international biohazard symbol as shown in [Exhibit 10.17.5d3](#).
- c. The secondary container must be placed inside an outer shipping container with sufficient cushioning material to prevent movement between the secondary container and the outer shipping container. An itemized list of the contents of the primary receptacle and information concerning possible contamination with a Division 6.2 material, including its possible location on the product, must be placed between the secondary container and the outer shipping container. A shipping paper and a content marking on the outer shipping container are not required.

10.17.7 Packaging Forensic Material

Forensic material containing a biological material, such as tissue, body fluid, excreta, or secreta, and sent on behalf of a U.S. Government agency or a state, local, or Indian tribal government agency must be packaged under [10.17.8](#) when it is not known or suspected to contain a Category A or Category B infectious substance. Forensic material known or suspected to contain a Category A infectious substance is not mailable. Forensic material known or suspected to contain a Category B infectious substance as identified in [10.17.4](#) is mailable as First-Class Mail, Priority Mail, or Express Mail when triple-packaged in a primary receptacle, secondary container, and a rigid outer shipping container as follows:

- a. The forensic material must be held within a securely sealed primary receptacle. The primary receptacle must be surrounded by sufficient absorbent material (for liquids) and cushioning material to protect the primary container from breakage. The absorbent material must be capable of taking up the entire liquid contents of the primary receptacle in case of leakage. The primary receptacle must be marked with the international biohazard symbol as shown in [Exhibit 10.17.5d3](#).
- b. The primary receptacle and the absorbent and cushioning material must be enclosed in a watertight and securely sealed secondary container. The secondary container must also display the international biohazard symbol as shown in [Exhibit 10.17.5d3](#).
- c. The secondary container must be firmly and snugly packed within a strong outer shipping container that is securely sealed. A shipping paper and a content marking on the outer shipping container are not required.

10.17.8 Packaging Nonregulated Materials

Nonregulated materials as defined in [10.17.3](#) are not subject to regulation as hazardous materials but must be properly packaged when presented for mailing. Regulated medical waste, sharps medical waste, and used health care products must be packaged and mailed under [10.17.5](#) and [10.17.6](#). Exempt human and animal specimens must be packaged under [10.17.9](#). Nonregulated materials are mailable as First-Class Mail, Priority Mail, Express Mail, or Package Services mail.

Such materials must be held within a securely sealed primary receptacle. The primary receptacle must be surrounded by sufficient absorbent material (for liquids) and cushioning material to protect the primary receptacle from breakage. The absorbent material must be capable of taking up the entire liquid contents of the primary receptacle in case of leakage. Either the primary receptacle or the inner packaging must be marked with the international biohazard symbol shown in [Exhibit 10.17.5d3](#). The primary receptacle and the absorbent and cushioning material must be snugly enclosed in a rigid outer shipping container that is securely sealed. A shipping paper and a content marking on the outer shipping container are not required. Nonregulated material specimens and biological products are subject to the following packaging standards:

- a. *Liquid Patient Specimens and Biological Products*. Mailers must package a liquid nonregulated patient specimen, a forensic specimen, or a biological product (such as polio vaccine) as follows:
 1. *Not exceeding 50 ml*. A patient specimen or biological product consisting of 50 ml or less per mailpiece must be packaged in a securely sealed primary receptacle. Two or more primary receptacles whose combined volume does not exceed 50 ml may be enclosed within a single mailpiece. Sufficient absorbent material and cushioning material to withstand shock and pressure changes must surround the primary receptacle(s), or be otherwise configured to take up the entire liquid contents in case of leakage. The primary receptacle(s) and the absorbent cushioning must be enclosed in a secondary container with a leakproof barrier that can prevent failure of the secondary container if the primary receptacle(s) should leak during transport. The secondary container must be securely sealed, and it may serve as the outer shipping container if it has sufficient strength to withstand ordinary postal processing. The secondary container must be marked with the international biohazard symbol shown in [Exhibit 10.17.5d3](#), except when the secondary container also serves as the outer shipping container. In that case, the biohazard symbol must appear on the inner packaging or on the primary container. A shipping paper and a content marking on the outer shipping container are not required.
 2. *Exceeding 50 ml*. A liquid patient specimen, forensic material, or biological product that exceeds 50 ml must be packaged in a securely sealed primary receptacle. A single primary receptacle must not contain more than 500 ml of specimen. Two or more primary receptacles whose combined volume does not exceed 500 ml may be enclosed in a single secondary container. Sufficient absorbent material and cushioning material to withstand shock and pressure changes must surround the primary receptacle(s), or be otherwise configured to take up the entire liquid contents in case of leakage. The primary receptacle(s) and the absorbent cushioning must be enclosed in a secondary container with a leakproof barrier that can prevent failure of the secondary container if the primary receptacle(s) should leak during transport. The secondary container cannot serve as the outer shipping container. The secondary container must be marked with the international biohazard symbol shown in [Exhibit 10.17.5d3](#). The secondary container must be securely and snugly

601.10.17.9

enclosed in a fiberboard box or container of equivalent strength that serves as the outer shipping container. A shipping paper and a content marking on the outer shipping container are not required.

- b. *Solid (or Dry) Specimen.* A solid or dry specimen, such as a saliva swab, blood spot, fecal smear, culture or stock, or forensic material, must be completely dried before packaging in a mailing container or envelope. Cushioning material to withstand shock and pressure changes is required only if the dry specimen is placed in a breakable primary receptacle. When required, the cushioning material must surround the primary receptacle. The primary receptacle (and cushioning material, if required) must be enclosed in a secondary container with a siftproof barrier that can prevent failure of the secondary container if the primary receptacle breaks during shipment. The secondary container must be securely sealed, and it may serve as the outer shipping container if it has sufficient strength to withstand ordinary postal processing. The secondary container must be marked with the international biohazard symbol shown in [Exhibit 10.17.5d3](#), except when the secondary container also serves as the outer shipping container. In that case, the biohazard symbol must appear either on the inner packaging or on the primary receptacle. A shipping paper and a content marking on the outer shipping container are not required.

10.17.9 Packaging Exempt Human or Animal Specimens

Exempt human or animal specimens as defined in [10.17.2d](#) are not subject to regulation as hazardous materials but when presented for mailing must be triple-packaged in leakproof (for liquids) or siftproof (for solids) primary receptacles. Sufficient cushioning and absorbent materials must surround each primary receptacle containing liquid. Secondary containers for liquids must be leakproof. Secondary containers for solids must be siftproof. The primary and secondary packaging must be enclosed in a rigid outer shipping container. A single primary receptacle must not contain more than 500 ml of a liquid specimen or 500 grams of a solid specimen. Two or more primary receptacles whose combined volume does not exceed 500 ml (for liquids) or 500 grams (for solids) may be enclosed in a single secondary container. The secondary container cannot serve as the outer shipping container. The secondary container must be marked with the international biohazard symbol shown in [Exhibit 10.17.5d3](#). The secondary container must be securely and snugly enclosed in a fiberboard box or container of equivalent strength that serves as the outer shipping container. A shipping paper is not required. The outer shipping container must be marked on the address side with the words “Exempt human specimen” or “Exempt animal specimen,” as appropriate. In addition, at least one surface of the outer packaging must have a minimum dimension of 3.9 inches x 3.9 inches (100 mm x 100 mm). Exempt human and animal specimens are mailable as First-Class Mail, Priority Mail, Express Mail, or Package Services mail.

10.18 Radioactive Materials (Hazard Class 7)

Radioactive materials are prohibited in international mail and domestic mail if required to bear the DOT Radioactive White-I, Radioactive Yellow-II, or Radioactive Yellow-III label (49 CFR 172.436, 172.438, or 172.440, respectively) or if it contains quantities of radioactive material in excess of those authorized in Publication 52,

Hazardous, Restricted, or Perishable Mail. Radioactive materials are prohibited in domestic mail via air transportation. For international mail, the standards in IMM 135 apply.

10.19 Corrosives (Hazard Class 8)

10.19.1 Definition

A *corrosive* is any liquid or solid that causes visible destruction or irreversible alteration in human skin tissue at the site of contact or a liquid that has a severe corrosion rate on steel.

10.19.2 Mailability

Corrosives are prohibited in international mail. A corrosive that can qualify as an ORM-D material is permitted in domestic mail via air or surface transportation subject to these limitations:

- a. **Liquid Corrosive.** A liquid mixture must be 1 pint or less and must contain 15% or less corrosive material with the remainder of the mixture not being a hazardous material, unless otherwise specified for a specific corrosive material. Primary receptacles must be securely sealed compatible glass bottles that are enclosed within securely sealed metal or plastic secondary containers. The secondary container must be packed within a strong outer shipping container that does not exceed 25 pounds per mailpiece.
- b. **Solid Corrosive.** A solid mixture must be 10 pounds or less per primary receptacle and must contain 10% or less corrosive material with the remainder of the mixture not being a hazardous material, unless otherwise specified for a specific corrosive solid. The primary receptacle(s) and secondary container must be securely sealed compatible siftproof containers packed in strong outer shipping container. The total weight of a mailable solid corrosive cannot exceed 25 pounds per mailpiece.

10.19.3 Marking

For surface transportation, the mailpiece must be plainly and durably marked on the address side with "Surface Only" or "Surface Mail Only" and "ORM-D" immediately following or below the proper shipping name. For air transportation, the mailpiece must be plainly and durably marked on the address side with "ORM-D AIR" immediately following or below the proper shipping name and must bear a shipper's declaration for dangerous goods.

10.19.4 Nonspillable Wet Electric Storage Batteries

A battery containing liquid electrolyte is prohibited from mailing unless the battery casing is completely sealed to prevent the liquid corrosive from spilling during handling. Nonspillable batteries with UN2800 are prohibited in international mail, but may be sent as domestic mail via air or surface transportation under the following conditions:

- a. The nonspillable battery must be protected from short circuits, surrounded with sufficient cushioning material, and securely packaged in a strong fiberboard box that serves as the outer shipping container.
- b. The outer shipping container must be marked "NONSPILLABLE BATTERY, UN2800" on the address side.

601.10.20

- c. The nonspillable battery must be capable of withstanding the vibration and pressure differential tests cited in 49 CFR 173.159(d)(i) and (ii).
- d. Only one nonspillable battery is allowed per mailpiece and the weight of the mailpiece cannot exceed 25 pounds.

10.20 Miscellaneous Hazardous Materials (Hazard Class 9)

10.20.1 Definition

A *miscellaneous hazardous material* is a substance or article that presents a hazard during transportation but does not meet the definition of any other hazard class. Examples of miscellaneous hazardous materials (not all of which are mailable) include solid dry ice, elevated temperature substances, environmentally hazardous substances, life-saving appliances, and asbestos.

10.20.2 Mailability

A miscellaneous hazardous material is prohibited in international mail. A miscellaneous hazardous material that can qualify as an ORM-D material is permitted for domestic mail via air or surface transportation, subject to the applicable 49 CFR requirements.

10.20.3 Marking

For surface transportation, the mailpiece must be plainly and durably marked on the address side with "Surface Only" or "Surface Mail Only" and "ORM-D" immediately following or below the proper shipping name. For air transportation, a mailable material must be plainly and durably marked on the address side with "ORM-D AIR" immediately following or below the proper shipping name and bear a shipper's declaration for dangerous goods.

10.20.4 Dry Ice

Dry ice (carbon dioxide solid) is prohibited in international mail. Dry ice is permitted in the domestic mail via air or surface transportation when used as a refrigerant to cool the contents of a mailpiece. A mailpiece containing dry ice must be packed in a container that is designed to permit the release of carbon dioxide gas and prevent a build-up of pressure that could rupture the parcel. Containers must conform to 49 CFR 173.217 and 175.10(a)(13). Additionally, the following applies:

- a. Air Transportation Requirements. Each mailpiece may not contain more than 5 pounds of dry ice. The address side of each mailpiece must be clearly marked "Carbon Dioxide Solid, UN1845" or "Dry Ice, UN1845" along with the net weight of the dry ice and the identity of the contents being cooled. A shipper's declaration prepared in triplicate and a DOT Class 9 warning label for miscellaneous hazardous materials must be affixed to the outside of the mailpiece.
- b. Surface Transportation Requirements. The amount of dry ice per mailpiece may exceed 5 pounds. The address side of each mailpiece must be clearly marked "Carbon Dioxide Solid" or "Dry Ice" and "Surface Only" or "Surface Mail Only" along with the net weight of the dry ice and the identity of the contents being cooled. A shipper's declaration and a DOT Class 9 warning label are not required for the dry ice.

10.20.5 Primary Lithium (Non-Rechargeable) Cells and Batteries

Small consumer-type primary lithium cells or batteries (lithium metal or lithium alloy) like those used to power cameras and flashlights are mailable with the following restrictions. Each cell must contain no more than 1.0 gram (g) of lithium content per cell. Each battery must contain no more than 2.0 g aggregate lithium content per battery. Additionally, each cell or battery must meet the requirements of each test in the *UN Manual of Tests and Criteria*, Part III, and subsection 38.3 as referenced in DOT's hazardous materials regulation at 49 CFR 171.7. All primary lithium cells and batteries must be mailed within a firmly sealed package separated and cushioned to prevent short circuit, movement, or damage. Except for batteries installed in equipment, they must be in a strong outer package. All outer packages must have a complete delivery and return address. Primary lithium cells and batteries are mailable as follows:

- a. Via surface transportation when the cells or batteries (not packed with or installed in equipment) are "in the originally sealed packaging." They are forbidden aboard passenger aircraft. The outside of the package must be marked on the address side "Surface Mail Only, Primary Lithium Batteries - Forbidden for Transportation Aboard Passenger Aircraft." The mailpiece must not exceed 5 pounds.
- b. Via surface or air transportation when the cells or batteries are properly packed with or properly installed in the equipment they operate and the mailpiece has no more than the number of batteries needed to operate the device. Cells or batteries properly installed in the device they operate must be protected from damage and short circuit, and the device must be equipped with an effective means of preventing accidental activation. The outside of the package must be marked on the address side "Package Contains Primary Lithium Batteries." The mailpiece must not exceed 11 pounds.

10.20.6 Secondary Lithium-ion (Rechargeable) Cells and Batteries

Small consumer-type lithium-ion cells and batteries like those used to power cell phones and laptop computers are mailable with the following restrictions. Each cell must contain no more than 1.5 g of equivalent lithium content per cell. Each battery must contain no more than 8.0 g aggregate quantity of equivalent lithium content per battery. Additionally, each cell or battery must meet the requirements of each test in the *UN Manual of Tests and Criteria*, Part III, and subsection 38.3 as referenced in the DOT's hazardous materials regulation at 49 CFR 171.7. All secondary lithium-ion cells and batteries must be mailed in a firmly sealed package separated and cushioned to prevent short circuit, movement, or damage. Except for batteries installed in equipment, they must be in a strong outer package. All outer packages must have a complete delivery and return address. These cells and batteries are mailable as follows:

- a. Via surface or air transportation when individual cells or batteries are mailed or when properly packed with or properly installed in the equipment they operate. Cells or batteries properly installed in the device they operate must be protected from damage and short circuit, and the device must be equipped with an effective means of preventing accidental activation. The outside of the package must be marked on the address side "Package Contains Lithium-ion Batteries (no lithium metal)."

601.10.20.7

- b. The mailpiece must not contain more than 3 batteries.

10.20.7 Damaged or Recalled Batteries

Damaged or recalled batteries are prohibited from mailing unless approved by the manager, Mailing Standards.

Exhibit 10.20.7 Lithium Battery Mailability Chart

PRIMARY LITHIUM BATTERIES	SURFACE TRANSPORTATION	AIR TRANSPORTATION	MAILPIECE WEIGHT LIMIT	INTERNATIONAL APO/FPO
<i>Small non-rechargeable consumer-type batteries</i>				
Without the equipment they operate (individual batteries)	Mailable	Prohibited	5 lb.	Prohibited
Packed with equipment but not installed in equipment	Mailable	Mailable	11 lb.	Mailable
Contained (properly installed in equipment)	Mailable	Mailable	11 lb.	Mailable

Note 1: Each primary cell must not contain more than 1g lithium content.

Note 2: Each primary battery must not contain more than 2g lithium content.

SECONDARY LITHIUM-ION BATTERIES	SURFACE TRANSPORTATION	AIR TRANSPORTATION	MAILPIECE BATTERY LIMIT	INTERNATIONAL APO/FPO
<i>Small rechargeable consumer-type batteries</i>				
Without the equipment they operate (individual batteries)	Mailable	Mailable	No more than 3 batteries	Mailable
Packed with equipment but not installed in equipment	Mailable	Mailable	No more than 3 batteries	Mailable
Contained (properly installed in equipment)	Mailable	Mailable	No more than 3 batteries	Mailable

Note 3: Each secondary cell must not contain more than 1.5g equivalent lithium content.

Note 4: Each secondary battery must not contain more than 8g equivalent lithium content.

Note 5: For secondary batteries (lithium-ion) there is a limit of 3 batteries per mailpiece.

10.21 Other Regulated Materials – Magnetized Materials

A magnetized material is not classified within any of the nine hazard classes. Such material is regulated as a hazardous material only if offered for carriage on air transportation and when it has a magnetic field strength capable of causing the deviation of aircraft instruments. Regulated magnetized materials are mailable subject to the following limitations:

- a. Definition. A magnetized material is any article that has a magnetic field strength capable of causing the deviation of aircraft instruments. A magnetized material is regulated as a hazardous material when it is presented for air transportation and has a measurable magnetic field strength greater than 0.00525 gauss at 15 feet. Magnetized materials include magnets and magnetized devices such

as magnetrons and light meters of sufficient strength to possibly cause erroneous aircraft compass readings. If the maximum field strength observed at a distance of 7 feet is less than 0.002 gauss or there is no significant compass deflection (less than 0.5 degree), the article is not restricted as a magnetized material.

- b. **Mailability.** Regulated magnetized material is prohibited in international mail. A material with a measurable magnetic field strength greater than 0.00525 gauss at 15 feet is prohibited from domestic mail via air transportation. Mailable materials must be packaged and marked as specified in Publication 52, *Hazardous, Restricted, and Perishable Mail*. Mailable material permitted via air transportation must bear a shipper's declaration for dangerous goods. Magnetized material is not regulated as a hazardous material when transported via surface transportation.

11.0 Other Restricted and Nonmailable Matter

11.1 Pistols, Revolvers, and Other Concealable Firearms

11.1.1 Definitions

The terms used in this standard are defined as follows:

- a. *Handgun* means any pistol, revolver, or other firearm or device the mailing of which is regulated by this standard.
- b. *Pistol or revolver* means a handgun styled to be fired by the use of a single hand and to fire or otherwise expel a projectile by the action of an explosion, spring, or other mechanical action, or air or gas pressure with enough force to be used as a weapon.
- c. *Firearm* means any device, including a starter gun, designed to, or that may readily be converted to, expel a projectile by the action of an explosion, spring, or other mechanical action, or air or gas pressure with enough force to be used as a weapon.
- d. *Other firearms capable of being concealed on the person* include, but are not limited to, short-barreled shotguns and short-barreled rifles.
- e. *Short-barreled shotgun* means a shotgun that has one or more barrels less than 18 inches long. The term *short-barreled rifle* means a rifle that has one or more barrels less than 16 inches long. These definitions include any weapon made from a shotgun or rifle, whether by alteration, modification, or otherwise, if such weapon as modified has an overall length of less than 26 inches. A short-barreled shotgun or rifle of greater dimension may be regarded as nonmailable when it has characteristics to allow concealment on the person.
- f. *Licensed manufacturer* and *licensed dealer* mean, respectively, a manufacturer of firearms or a bona fide dealer of firearms, duly licensed by the Bureau of Alcohol, Tobacco and Firearms of the Department of the Treasury, under the Gun Control Act of 1968 (Public Law 90-618), 18 USC 921, et seq.

601.11.1.2

- g. *Antique firearm* means any firearm (including those with a matchlock, flintlock, percussion cap, or similar type of ignition system) manufactured in or before 1898, or any replica thereof, if such replica:
1. Is not designed or redesigned for using rimfire or conventional centerfire fixed ammunition.
 2. Uses rimfire or conventional centerfire fixed ammunition that is no longer manufactured in the United States and that is not readily available in the ordinary channels of commercial trade.

11.1.2 Handguns

Pistols, revolvers, and other firearms capable of being concealed on the person (referred to as *handguns*) are nonmailable unless mailed between the parties listed in [11.1.3](#) and [11.1.5](#) after the filing of an affidavit or statement required by [11.1.4](#) and [11.1.6](#).

11.1.3 Authorized Persons

Subject to [11.1.4](#), handguns may be mailed by a licensed manufacturer of firearms, a licensed dealer of firearms, or an authorized agent of the federal government or the government of a state, territory, or district, only when addressed to a person in one of the following categories for use in the person's official duties:

- a. Officers of the Army, Coast Guard, Air Force, Navy, Marine Corps, or Organized Reserve Corps.
- b. Officers of the National Guard or militia of a state, territory, or district.
- c. Officers of the United States or of a state, territory, or district, whose official duty is to serve warrants of arrest or commitment.
- d. USPS employees authorized by the Chief Postal Inspector.
- e. Officers and employees of enforcement agencies of the United States.
- f. Watchmen engaged in guarding the property of the United States, a state, territory, or district.
- g. Purchasing agent or other designated member of agencies employing officers and employees included in [11.1.3c.](#) through [11.1.3e.](#)

11.1.4 Affidavit of Addressee

Any person proposing to mail a handgun under [11.1.3](#) must file with the postmaster, at the time of mailing, an affidavit signed by the addressee setting forth that the addressee is qualified to receive the firearm under a particular category of [11.1.3a.](#) through [11.1.3g.](#) and that the firearm is intended for the addressee's official use. The affidavit must also bear a certificate stating that the firearm is for the official duty use of the addressee, signed by one of the following, as appropriate:

- a. For officers of Armed Forces, by the commanding officer.
- b. For officers and employees of enforcement agencies, by the head of the agency employing the addressee to perform the official duty with which the firearm is to be used.

- c. For watchmen, by the chief clerk of the department, bureau, or independent branch of the government of the United States, the state, the territory, or the district by which the watchman is employed.
- d. For the purchasing agent or other designated member of enforcement agencies, by the head of such agency, that the firearm is to be used by an officer or employee included in 11.1.3c. through 11.1.3e, *Authorized Persons*.

11.1.5 Manufacturers and Dealers

Handguns may also be mailed between licensed manufacturers of firearms and licensed dealers of firearms in customary trade shipments, or for repairing or replacing parts.

11.1.6 Certificate of Manufacturers and Dealers

A licensed manufacturer or dealer need not file the affidavit under 11.1.4, but must file with the postmaster a statement on Form 1508 signed by the mailer that he or she is a licensed manufacturer or dealer of firearms, that the parcels containing handguns (or major component parts thereof) are customary trade shipments or contain such articles for repairing or replacing parts, and that to the best of his or her knowledge or belief the addressees are licensed manufacturers or dealers of firearms.

11.1.7 FBI Crime Detection Bureaus

Handguns may be mailed without regard to 11.1.3 through 11.1.6 if:

- a. Addressed to the Federal Bureau of Investigation (FBI), or its director, or to the scientific laboratory or crime detection bureau of any agency whose members are federal law enforcement officers or officers of a state, territory, or district authorized to serve warrants of arrest or commitment; or
- b. Offered by an authorized agent of the federal government as an official shipment to any qualified addressee in categories 11.1.3a. through 11.1.3g, or to a licensed manufacturer or dealer of firearms or to a federal agency.

11.2 Antique Firearms

Antique firearms sent as curios or museum pieces may be accepted for mailing without regard to 11.1.3 through 11.1.6.

11.3 Rifles and Shotguns

Although unloaded rifles and shotguns not precluded by 11.1.1e and 11.1.2 are mailable, mailers must comply with the Gun Control Act of 1968, Public Law 90-618, 18 USC 921, et seq., and the rules and regulations promulgated thereunder, 27 CFR 178, as well as state and local laws. The mailer may be required by the USPS to establish, by opening the parcel or by written certification, that the gun is unloaded and not precluded by 11.1.1e.

11.4 Legal Opinions on Mailing Firearms

Postmasters are not authorized to give opinions on the legality of any shipment of rifles or shotguns. Contact the nearest office of the Bureau of Alcohol, Tobacco and Firearms for further advice.

601.11.5

11.5 Knives and Sharp Instruments**11.5.1 Mailability**

Knives (including sharp-pointed instruments such as stiletos that lack cutting edges) with a blade that opens automatically by hand pressure applied to a button or other device in the handle, or by operations of inertia, gravity, or both, or with a detachable blade propelled by a spring-operated mechanism, are mailable only when sent to:

- a. The respective government's or organization's designated supply or procurement officers and employees ordering, procuring, or buying such knives for use with the activities of the federal government; the National Guard, the Air National Guard, or the militia of a state, territory, or the District of Columbia; or the municipal government of the District of Columbia or of the government of any state or territory, or of any county, city, or other political subdivision of a state or territory.
- b. Manufacturers of such knives, or bona fide dealers of such knives, in connection with a shipment made under an order from any person designated in [11.5.1a](#).

11.5.2 Addressee Identification

Before delivering a shipment (or parcel) that contains an article or articles described in [11.5.1](#), a USPS employee may require that the recipient identify himself or herself as in one of the categories in [11.5.1a](#).

11.5.3 Wrapping

Sharp-pointed or sharp-edged instruments such as knives, tools, ice picks, and razor blades, that are otherwise mailable, must be wrapped to protect their points and edges from cutting through the outer carton in which they are mailed.

11.6 Prohibited Parcel Marking

For any parcel containing a firearm or a ballistic or switchblade knife, any marking that indicates the contents is not permitted on the outside wrapper or container.

11.7 Intoxicating Liquor

A potable beverage is nonmailable if it is of 0.5% or more alcoholic content by weight, which is taxable under Chapter 51, Internal Revenue Service Code. The product may be mailed if it conforms to applicable requirements of the Internal Revenue Service and Food and Drug Administration and is not an alcoholic beverage, poisonous, or flammable.

11.8 Matter Emitting Obnoxious Odor

Any matter that is a source of an obnoxious odor is nonmailable.

11.9 Liquids and Powders**11.9.1 Liquids and Semisolids**

Liquids and semisolids that may liquefy under normal conditions and are otherwise mailable must be adequately prepared for mailing under [1.0](#) through [8.0](#).

11.9.2 Powders

Powders that, if allowed to escape from their containers, could cause damage, discomfort, destruction, or soiling, must either be packed in siftproof containers or in other containers sealed in durable siftproof outer containers.

11.10 Motor Vehicle Master Keys and Locksmithing Devices**11.10.1 Motor Vehicle Master Key—Definition**

A *motor vehicle master key* is any key (other than the key furnished by the manufacturer with the motor vehicle, or the key furnished with a replacement lock, or an exact duplicate of such keys) designed to operate two or more motor vehicle ignition, door, or trunk locks of different combinations, including any pattern, impression, or mold from which such a master key can be made (18 USC 1716A; 39 USC 3002).

11.10.2 Nonmailable

Any motor vehicle master key, as defined in [11.10.1](#), and any advertisement for the sale of such item, are nonmailable, unless sent to any of the following:

- a. Lock manufacturer.
- b. Professional locksmith.
- c. Motor vehicle manufacturer or dealer.
- d. Federal, state, or local government agency.

11.10.3 Marking

Any marking identifying the contents is not permitted on the outside wrapper or container of any parcel containing motor vehicle master keys.

11.10.4 Locksmithing Device—Definition

A *locksmithing device* is:

- a. A device or tool (other than a key) designed to manipulate the tumblers in a lock into the unlocked position through the keyway of such lock.
- b. A device or tool (other than a key or a device or tool under [11.10.4a](#)) designed for bypassing a lock or similar security device, or for opening it by a method normally not used by consumers to open such locks or security devices.
- c. A device or tool designed for making an impression of a key or similar security device to duplicate such key or device.

11.10.5 Nonmailable

Any locksmithing device, as defined in [11.10.4](#), is nonmailable, unless sent to any of the following:

- a. Lock manufacturer or distributor.
- b. Bona fide locksmith.
- c. Bona fide reposessor.
- d. Motor vehicle manufacturer or dealer.
- e. Bona fide automotive repair shops or businesses.

601.11.11

11.11 Drugs**11.11.1 Over-the-Counter Drugs**

Over-the-counter drugs are medicines that can be obtained without a prescription. Over-the-counter drugs may be mailed when all applicable federal, state, and local laws, such as the Poison Prevention Packaging Act of 1970 and the Consumer Product Safety Commission requirements, are followed.

11.11.2 Prescription Drugs

Prescription drugs are licensed medicines that require a written order by a medical doctor or pharmacist before they can be obtained. Prescription drugs, including those that contain controlled substances, may be mailed by drug manufacturers or their registered agents, pharmacies, or other authorized dispensers as permitted by 21 CFR 1307.12 or in compliance with any regulation of the Food and Drug Administration or other applicable law.

11.11.3 Controlled Substances

Controlled substances are any anabolic steroid, narcotic, hallucinogenic, stimulant, or depressant drug in Schedules I through V of the Controlled Substances Act, 21 USC 801 and 21 CFR 1300. Controlled Substances may be mailed by drug manufacturers or their agents, pharmacies, or other authorized dispensers when distribution is lawful under 21 USC 801 and 21 CFR 1300 and if the mailer or the addressee meets one of the following conditions:

- a. The mailer or the addressee is registered with the Drug Enforcement Administration (DEA).
- b. The mailer or the addressee is exempt from DEA registration in performing official duties such as military, civil defense, and law enforcement personnel.

11.11.4 Packaging and Markings

Securely package all mailable drugs so that the contents cannot become damaged or dislodged during mailing. Follow the general packaging instructions in [601.1.0](#) through [601.8.0](#). Do not identify the nature of the contents on the outside of the mailpiece.

11.11.5 Return of Prescription Drugs

Mailers may use merchandise return service to return prescription drugs for purposes of drug recalls; voluntary manufacturer withdrawals; and dispensing errors such as incorrect drug, dosage, or strength, as permitted by 21 CFR 1307.12 or other applicable law. The mailpiece must be addressed to the manufacturer or its registered agent. Manufacturers or their registered agents must furnish mailing containers to their customers for the purpose of mailing back the identified drugs. Manufacturers or their registered agents must use merchandise return service (see [507.11.0](#)) with First-Class Mail or Priority Mail for these mailpieces. Manufacturers or their agents continue to be responsible for maintaining records in compliance with any regulation of the Drug Enforcement Administration and/or the Food and Drug Administration.

11.11.6 Mailing Standards

If distribution of a controlled substance is lawful under 21 USC 801, et seq., and any implementing regulation in 21 CFR 1300, et seq., the USPS considers such distribution by mail to constitute the mailing of matter not outwardly or of its own force dangerous or injurious to a person's life or health and accordingly mailable, subject to these standards:

- a. The inner container of any package containing controlled substances is marked and sealed under the applicable provisions of the Controlled Substances Act (21 USC 801, et seq., and any implementing regulation in 21 CFR 1300, et seq.) and placed in a plain outer mailing container or securely overwrapped in plain paper.
- b. If the mailing includes prescription drugs containing controlled substances, the inner container is also labeled to show the prescription number and the name and address of the pharmacy, practitioner, or other person dispensing the prescription.
- c. The outer mailing wrapper or container is free of markings that indicate the nature of the content.

11.12 Drug Paraphernalia**11.12.1 Definition and Examples**

It is unlawful to use domestic or international mail to transport drug paraphernalia. The term *drug paraphernalia* refers to any equipment, product, or material of any kind primarily intended or designed for use in manufacturing, compounding, converting, concealing, producing, processing, preparing, injecting, ingesting, inhaling, or otherwise introducing into the human body a controlled substance, possession of which is unlawful under the Controlled Substances Act. Examples of drug paraphernalia are items primarily intended or designed for use in ingesting, inhaling, or otherwise introducing marijuana, cocaine, hashish, hashish oil, PCP, or amphetamines into the human body, such as metal, wooden, acrylic, glass, stone, plastic, or ceramic pipes with or without screens, permanent screens, hashish heads, or punctured metal bowls; water pipes, chamber pipes, carburetor pipes, electric pipes, ice pipes or chillers, and air-driven pipes; carburetion tubes and devices; smoking and carburetion masks; roach clips (i.e., objects used to hold burning material that is too small or short to be held in the hand); miniature spoons with level capacities of 1/10 cubic centimeter or less; chillums; bongs; wired cigarette papers; and cocaine freebase kits.

11.12.2 Determination

In determining whether an item constitutes drug paraphernalia, in addition to all other logically relevant factors, these factors may be considered:

- a. Oral or written instructions or other descriptive materials provided with the item that explain or depict its use.
- b. National and local advertising on its use.
- c. The manner in which the item is displayed for sale.

601.11.12.3

- d. Whether the owner, or anyone in control of the item, is a legitimate supplier of like or related items to the community, such as a licensed distributor or dealer of tobacco products.
- e. Direct or circumstantial evidence of the ratio of sales of the items to the total sales of the business enterprise.
- f. The existence and scope of legitimate uses of the item in the community.
- g. Expert testimony on its use.

11.12.3 Exceptions

The standards in [11.12.1](#) and [11.12.2](#) apply neither to any person authorized by local, state, or federal law to manufacture, possess, or distribute items described in [11.12.1](#) and [11.12.2](#); nor to any item that, in the normal lawful course of business, is sold through the mail and traditionally intended for use with tobacco products, including any pipe, paper, or accessory.

11.13 Household Substance

A household substance (39 USC 3001(f)), i.e., any matter unsolicited by the addressee, that contains a substance as defined by section 2 of the Poison Prevention Packaging Act of 1970 (15 USC 1471(2)), is permitted in the mail only if it complies with the requirements for special child-resistant packaging established for that substance by the Consumer Product Safety Commission (16 CFR 1700).

11.14 Pesticide

A pesticide (18 USC 1716), i.e., any matter that contains a pesticide as defined by section 2 of the Federal Insecticide, Fungicide, and Rodenticide Act (7 USC 136(u)), is permitted in the mail only if it complies with child-resistant packaging standards established by the Environmental Protection Agency applicable to that particular matter (40 CFR 157) and meets the applicable standards in [10.0, Hazardous Materials](#).

11.15 Fragrance Advertising Sample

A fragrance advertising sample (39 USC 3001(g)), i.e., any matter normally acceptable in the mail but containing a fragrance advertising sample, is permitted in the mail only if it is sealed, wrapped, treated, or otherwise prepared in a manner reasonably designed to prevent individuals from being unknowingly or involuntarily exposed to the sample. A sample meets this requirement if it uses paper stocks with a maximum porosity of 20 Sheffield units or 172 Gurley-Hill units treated exclusively with microencapsulated oils, and if the sample is produced so that it cannot be activated except by opening a glued flap or binder or by removing an overlying ply of paper.

11.16 Compliance Certificate

A mailer who presents matter that is generally permitted in the mail under [11.13](#), [11.14](#), and [11.15](#) but for compliance with the specified packaging and preparation requirements may submit an accompanying written statement certifying that the matter is packaged or prepared under the applicable federal laws and postal standards. The certifying statement may be made on the mailer's letterhead, on a postage statement, or as a notice on the exterior of each item presented for mailing.

11.17 Battery-Powered Devices

Cells or batteries properly installed in equipment must be protected from damage and short circuit, and equipment or devices containing cells or batteries must include an effective means of preventing accidental activation. A battery with liquid electrolyte is not permitted in the mail unless it is a nonspillable type battery that meets the standards in [10.0, Hazardous Materials](#).

11.18 Abortive and Contraceptive Devices**11.18.1 Abortion Devices**

Any article or thing designed, adapted, or intended for producing abortion is not permitted in the mail (18 USC 1461).

11.18.2 Contraceptives

Unsolicited samples of an article or thing designed, adapted, or intended for preventing conception is permitted in the mail only when sent to a manufacturer or a dealer of such an article or things, to a licensed physician or surgeon, or to a nurse, pharmacist, druggist, hospital, or clinic (39 USC 3001; 18 USC 1461).

11.19 Building Construction Material

Building construction material is not permitted in the mail if the acceptance and processing is likely to harm or injure USPS employees, mail, or equipment. Factors considered include but are not limited to whether the material may pose potential storage problems at the postal facilities that may process the material; whether the volume of material may impede the flow of mail in USPS transportation or mail distribution systems; whether the volume of material may lead to security problems; and whether processing the material may create safety hazards for USPS employees.

11.20 Animal Fighting Accessories

Under 7 USC 2156, the mailing of a knife, a gaff, or any other sharp instrument attached, or designed or intended to be attached to the leg of a bird for use in an animal fighting venture, as defined in section [12.5.7b](#), is prohibited. Violators can be subject to the criminal penalties in 7 USC 2156. See [9.3.1](#) for restrictions on mailing live animals used in animal fighting ventures and [12.5.7](#) for restrictions on mailing printed matter related to animal fighting ventures.

12.0 Written, Printed, and Graphic Matter Generally**12.1 Solicitations in Guise of Bills, Invoices, or Statements of Account (39 USC 3001(D); 39 USC 3005)****12.1.1 General**

Any otherwise mailable matter that reasonably could be considered a bill, invoice, or statement of account due, but is in fact a solicitation for an order, is nonmailable unless it conforms to [12.1.2](#) through [12.1.5](#) in *Solicitations in Guise of Bills, Invoices, or Statements of Account (39 USC 3001(D); 39 USC 3005)*. A nonconforming solicitation constitutes prima facie evidence of violation of 39 USC 3005.

Compliance with this section does not avoid violation of Section 3005 if any part of the solicitation or any information with it misrepresents a material fact to the

601.12.1.2

addressee (e.g., misleading the addressee about the identity of the sender of the solicitation or about the nature or extent of the goods or services offered may be a violation of Section 3005).

12.1.2 Required Disclaimer

The solicitation must bear on its face either the disclaimer required by 39 USC 3001(d)(2)(A) or the notice: “THIS IS NOT A BILL. THIS IS A SOLICITATION. YOU ARE UNDER NO OBLIGATION TO PAY THE AMOUNT STATED ABOVE UNLESS YOU ACCEPT THIS OFFER.” The statutory disclaimer or the alternative notice must be displayed in conspicuous boldface capital letters of a color prominently contrasting with the background against which it appears, including all other print on the face of the solicitation and that are at least as large, bold, and conspicuous as any other print on the face of the solicitation, but not smaller than 30-point type (see [Exhibit 12.1.2](#)). The notice or disclaimer required by this section must be displayed conspicuously apart from other print on the page immediately below each portion of the solicitation that reasonably could be construed to specify a monetary amount due and payable by the recipient. It must not be preceded, followed, or surrounded by words, symbols, or other matter that reduces its conspicuousness or that introduces, modifies, qualifies, or explains the required text, such as “Legal Notice Required by Law.”

12.1.3 Intelligibility

The notice or disclaimer must not, by folding or any other device, be made unintelligible or less prominent than any other information on the face of the solicitation.

12.1.4 Separable Pages

If a solicitation consists of more than one page or if any page is designed to be separated into portions (e.g., by tearing along a perforated line), the notice or disclaimer required by [12.1.2](#) must be displayed in its entirety on the face of each page or portion of a page that might be reasonably considered a bill, invoice, or statement of account due as required by [12.1.2](#).

12.1.5 Definitions

For this standard, *color prominently contrasting* excludes any color, or any intensity of an otherwise included color, that does not permit legible reproduction by ordinary office photocopying equipment used under normal operating conditions, and which is not at least as vivid as any other color on the face of the solicitation; and *color* includes black.

12.2 Solicitations Deceptively Implying Federal Connection, Approval, or Endorsement (39 USC 3001(H) and 3001(I); 39USC3005)**12.2.1 USPS Endorsement**

Any solicitation stating that it is approved by the USPS or the Postmaster General or that it conforms to any postal law or regulation is nonmailable.

12.2.2 Nonmailable by Government Misrepresentation

A solicitation that misrepresents a government entity is nonmailable subject to these conditions:

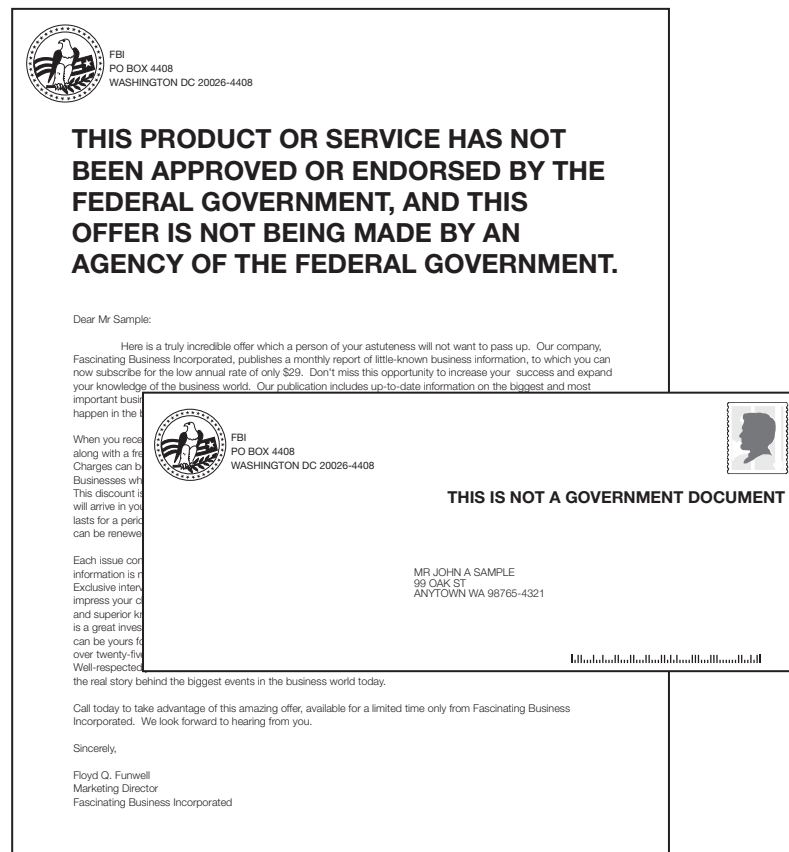

- a. Matter that contains a solicitation for products, services, information, or funds that implies any federal government connection, approval, or endorsement through the use of a seal, insignia, reference to the Postmaster General, citation to a federal statute, name of a federal agency, department, or commission, or program, trade, or brand name, or any other term or symbol; or contains any reference to the Postmaster General or a citation to a federal statute that misrepresents either the identity of the mailer or the protection or status afforded such matter by the federal government is nonmailable unless it conforms to [12.2.3](#). A nonconforming solicitation constitutes prima facie evidence of violation of 39 USC 3005. Compliance with [12.2.3](#) does not avoid violation of 39 USC 3005 if the solicitation or accompanying information misrepresents material fact such as the nature, value, quantity, quality, or efficacy of the products or services offered for sale, or of the activities of an organization asking for information or monetary contributions.
- b. Such solicitations must not contain a false representation that federal government benefits or services will be affected by whether or not the recipient makes a purchase or contribution.
- c. Solicitations for payment for services otherwise available to the recipient free of charge from the federal government are nonmailable unless they contain a clear and conspicuous statement giving notice of that fact.

12.2.3 Permitted Solicitations

A solicitation described in [12.2.2a](#) may be mailable if it meets at least one of these conditions (see [Exhibit 12.2.3b](#)):

- a. The solicitation is by a nongovernmental entity that actually has the federal government connection, approval, or endorsement implied by the solicitation's terms or symbols.
- b. The solicitation appears in a publication for which the addressee has paid or promised to pay a consideration or which the addressee has otherwise indicated he or she wants to receive, and the solicitation is not on behalf of the publisher of the publication.

Exhibit 12.2.3b Disclaimers for Solicitations Implying Federal Connection

- c. The solicitation displays the notice required by 12.2.3c1 on the envelope or outside cover or wrapper in which the solicitation is mailed, and one of the two notices required by 12.2.3c2 on the contents. These notices must be printed in boldface capital letters of a color prominently contrasting with the background against which they appear. "Color prominently contrasting" excludes any color or intensity that ordinary photocopying cannot reproduce legibly. The color, which can include black, must be at least as vivid as any other color on the face of the solicitation and its envelope or outside cover or wrapper. The required wording, type size and style, and placement for the notices are as follows:

1. On the Envelope, Cover, or Wrapper. The face of the envelope or outside cover or wrapper must bear the notice: "THIS IS NOT A GOVERNMENT DOCUMENT." The letters for printing this notice must be as large, bold, and conspicuous as any other letters on the face of such envelope, cover, or wrapper, but never smaller than 12-point type. The notice must appear in the upper right quadrant, below the postage stamp or other postage indicia and above the address, and it must be surrounded by a clear space not less than 1/4 inch wide.
2. On the Contents. The solicitation mailed within the envelope, cover, or wrapper must bear at the outset on its face one of these two headlines, depending on its purpose as indicated in parentheses: (a) "THIS PRODUCT OR SERVICE HAS NOT BEEN APPROVED OR ENDORSED BY THE FEDERAL GOVERNMENT, AND THIS OFFER IS NOT BEING MADE BY AN AGENCY OF THE FEDERAL GOVERNMENT" (for the purchase of or payment for a product or service); (b) "THIS ORGANIZATION HAS NOT BEEN APPROVED OR ENDORSED BY THE FEDERAL GOVERNMENT, AND THIS OFFER IS NOT BEING MADE BY AN AGENCY OF THE FEDERAL GOVERNMENT" (for information or the contribution of funds or membership fees). The letters for printing these notices must be as large, bold, and conspicuous as any other letters on the face of the solicitation, but never smaller than 30-point type. The notice must be surrounded by a clear space at least 1/2 inch wide. The notice must not be preceded, followed, or surrounded by words, symbols, or other matter that reduces its conspicuousness or introduces, modifies, qualifies, or explains the required text, such as "Notice Required by Law." The notice must not, by folding or any other device, be made unintelligible or less prominent than any other information on the face of the solicitation.

12.3 Lottery Matter (18 USC 1302)

12.3.1 Definition

For this standard, *lottery* is any scheme or promotion, whether lawful under the laws of any state, which, on paying a consideration, offers a prize dependent in whole or in part on lot or chance.

12.3.2 Unlawful Mail Matter

Unlawful matter includes any letter, newspaper, periodical, parcel, stamped card or postcard, circular, or other matter permitting or facilitating participation in a lottery; any lottery ticket or part thereof or substitute; and any form of payment for a lottery ticket or share.

12.3.3 Fishing Contests, Indian Gaming Regulatory Act, Lotteries

This standard does not apply to:

- a. Any fishing contest not conducted for profit, in which prizes are awarded for the species, size, weight, or quality of fish caught by contestants in any bona fide fishing or recreational event (18 USC 1305).
- b. Mailings, to addresses within a state, of tickets or other material on a lottery conducted by that state under its laws (18 USC 1307).

601.12.4

- c. Any gaming conducted by an Indian tribe under the Indian Gaming Regulatory Act (25 USC 2720).
- d. An advertisement, list of prizes, or other information on a lottery not prohibited by the state where it is conducted.

12.4 Advertising Matter

12.4.1 Restrictions

Any advertising, promotional, or sales matter that solicits or induces the mailing of any article described in 8.0, 9.0, or 10.0 is nonmailable except that such matter relating to controlled substances, radioactive materials, restricted liquids and powders, battery-powered devices, odd-shaped items in envelopes, and switchblade and ballistic knives, as described in 8.0, 9.0, or 10.0, is mailable if it contains packaging instructions and any other mailing limitations under 8.0 through 12.0, 508.8.0, *Pandering Advertisements*, and 508.9.0, *Sexually Oriented Advertisements*, (18 USC 1716).

12.4.2 Master Keys

Advertisements for motor vehicle master keys are nonmailable (18 USC 1716A, 39 USC 3002), except to lock manufacturers, professional locksmiths, motor vehicle manufacturers or dealers; and federal, state, or local government agencies.

12.5 Other Nonmailable Matter

12.5.1 Fictitious Name

Matter addressed to a person using a fictitious name, title, or address in conducting, through the mail, any scheme or device in violation of law is nonmailable if:

- a. After notification, the addressee fails to appear at the Post Office and be identified.
- b. The fictitious character of such mail is established to the Judicial Officer's satisfaction in consequence of a proceeding initiated under 39 CFR 953 (18 USC 1342).

12.5.2 Foreign Origin

Mail of foreign origin is nonmailable if it contains matter determined by a court of competent jurisdiction or by the International Trade Commission to violate the Semiconductor Chip Protection Act of 1984 (17 USC 901-914) or to violate the copyright laws of the United States or any copyright convention or treaty to which the United States is a party (17 USC 601-603).

12.5.3 Foreign Destination

Matter addressed to foreign countries posted in violation of law or treaty stipulation is nonmailable.

12.5.4 Lewd or Filthy Matter

Obscene, lewd, lascivious, or filthy publications or writings, or mail containing information on where, how, or from whom such matter may be obtained, and matter that is otherwise mailable but that has on its wrapper or envelope any indecent, lewd, lascivious, or obscene writing or printing, and any mail containing any filthy, vile, or indecent thing is nonmailable (18 USC 1461, 1463).

12.5.5 Matter Inciting Violence

Any matter of a character tending to incite arson, murder, assassination, treason, insurrection, or forcible resistance to any law of the United States, or containing any threat to take the life of, or to inflict harm upon, the President of the United States is nonmailable (18 USC 1461, 1717).

12.5.6 Other Matter

Other matter that is nonmailable (18 USC 1717) includes every letter, writing, circular, stamped card or postcard, picture, print, engraving, photograph, newspaper, pamphlet, book, publication, or thing as described in these statutes:

- a. Forged or altered military or official passes (18 USC 499).
- b. Matter bearing forged or altered seals of government departments or agencies (18 USC 506).
- c. Defense information (18 USC 793, 794).
- d. Documents obtained by persons falsely assuming to be foreign diplomats (18 USC 915).
- e. False statements influencing foreign governments (18 USC 954).
- f. Matter relating to a conspiracy to injure property of a foreign government (18 USC 956).
- g. Matter unlawfully in aid of a foreign government (18 USC 957).
- h. Matter relating to an expedition against a friendly nation (18 USC 960).
- i. Matter relating to delivery of an armed vessel to a belligerent nation (18 USC 964).
- j. Matter wrongfully bearing the seal of a government department or agency (18 USC 1017).
- k. Forged, altered, or misused passports (18 USC 1543, 1544). Passport applications containing false statements, and passports falsely obtained (18 USC 1542).
- l. Matter bearing false statements intended to injure Armed Forces during war (18 USC 2388).

12.5.7 Animal Fighting Matter

Written, printed, or graphic matter (e.g., advertisements or other commercial speech) promoting or furthering an animal fighting venture conducted in any state (except a venture involving live birds permitted under the laws of the state in which the fight is conducted) is nonmailable under 7 USC 2156. Violators can be subject to the criminal penalties in 7 USC 2156. See [9.3.1](#) for restrictions on mailing live animals used in animal fighting ventures and [11.20](#) for restrictions on mailing accessories used in animal fighting ventures. For this standard:

- a. *Animal* means any live bird, or any live dog or other mammal, except human.
- b. *Animal fighting venture* means any event involving a fight between at least two animals that is conducted for sport, wagering, or entertainment. The term does not include any activity whose primary purpose involves using one or more animals in hunting other animals.

601.12.5.8

- c. *State* means any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any U.S. territory or possession.

12.5.8 Private Identification Without Disclaimer

A private identification document without a disclaimer is nonmailable (18 USC 1738; 39 USC 3001(a)). This group includes any document that:

- a. Is of a type intended or commonly accepted for the identification of individuals;
- b. Bears a birth date or age purported to be that of the person named in it;
- c. Is not issued by or under the authority of a government;
- d. Is deposited in the mail by someone in the business of furnishing, for valuable consideration, documents that meet criteria in [12.5.8a](#) and [12.5.8c](#);
- e. Is deposited in the mail to further that business; and
- f. Is deposited by someone who knows that it fails to carry diagonally printed, clearly and indelibly on both the front and back, "NOT A GOVERNMENT DOCUMENT" in capital letters no smaller than 12-point type.

12.6 Sweepstakes Matter (39 USC § 3001(K)(3)(A))**12.6.1 Definition**

The term *sweepstakes* means a game of chance for which no consideration is required to enter.

12.6.2 Mailable Matter

Sweepstakes matter is mailable only if it discloses all of the following:

- a. In the body, in the rules, and on the order or entry form that no purchase is necessary.
- b. In the body, in the rules, and on the order or entry form that a purchase will not increase the odds of winning.
- c. All terms and conditions, including rules and entry procedures of the sweepstakes.
- d. The sponsor or mailer, with the principal place of business or address at which the sponsor or mailer may be contacted.
- e. Sweepstakes rules, including the odds of winning, quantity, value, and nature of the prize and the schedule of any payments over time.

12.6.3 Nonmailable Matter

Sweepstakes matter is nonmailable if it does any of the following:

- a. Represents that individuals not making a purchase may be disqualified from receiving future solicitations.
- b. Requires that the entry be accompanied by an order or payment for a product or service previously ordered.
- c. Represents that the recipient has won a prize unless that individual has won such prize.
- d. Otherwise contradicts or is inconsistent with any disclosure required by [12.6.2, Mailable Matter](#), or [12.6.3, Nonmailable Matter](#).

12.7 Skill Contests (39 USC 3001(K)(3)(B))**12.7.1 Definition**

The term *skill contest* means a puzzle, game, competition, or other contest in which a prize is awarded, the outcome depends upon the skill of the contestant, and for which a payment, purchase, or donation is required to enter.

12.7.2 Mailable Matter

Skill contests are mailable only if they include all of the following:

- a. Disclose the terms and conditions of the contest, including the rules and entry procedures.
- b. Disclose the sponsor or mailer, with the principal place of business or address at which the sponsor or mailer may be contacted.
- c. Contain rules that state all of the following:
 1. Number of rounds or levels and the cost to enter each round.
 2. If subsequent rounds will be more difficult.
 3. Maximum cost to enter all rounds.
 4. Number of entrants or percentage expected to correctly solve the contest.
 5. Identity or qualifications of the judges, if judged by other than the sponsor.
 6. Method of judging.
 7. Dates the winners will be determined and the prizes awarded.
 8. Quantity, value, and nature of the prize.
 9. Schedule of any payments over time.

12.8 Facsimile Check (39 USC § 3001(K)(3)(C))

A facsimile check is nonmailable unless it states on the face of the check that it is not a negotiable instrument and has no cash value.

12.9 Exclusions and Disclosures (39 USC §§ 3001(K)(4) & 3001(K)(5))**12.9.1 Mailable Matter**

Matter described in 12.6, 12.7, and 12.8 is mailable if it appears in a magazine, newspaper, or other periodical if the promotions are not directed to a named individual, or the promotions do not include the opportunity to make a payment or order a product or service.

12.9.2 Notices and Disclaimers

Any notice or disclaimer required under 12.6, 12.7, and 12.8 shall be clearly and conspicuously displayed. Disclaimers required by 12.6.2a and 12.6.2b must be more conspicuously displayed than any other disclaimer.

12.10 Removal of Names from Mailing Lists (39 USC § 3001(L))**12.10.1 Lists**

In general, any person who uses the mails for any mailing falling under 12.2, 12.6, 12.7, and 12.8 shall adopt reasonable practices or procedures to prevent the mailing of such matter to any person who, personally or through their legal

601.12.10.2

representative, submits a written request that no such matter shall be mailed to that person. Such request may be made either to the mailer, or the Attorney General, or their representative, of the appropriate state. Such requests shall be honored for a period of five years from the date of the request. The mailer shall maintain a record of all such written requests.

12.10.2 Special Requirements for Sweepstakes and Skill Contests

Any promoter of sweepstakes or skill contests must make a clear and conspicuous disclosure of the address or toll-free telephone number by which an individual, or their duly authorized representative, may notify a promoter to have that individual's name and address removed from all lists of names and addresses used by that promoter to mail any skill contest or sweepstakes. Promoters have 60 days from the date of receipt of the removal request to effect the removal of the name and address from all mailing lists used by that promoter for any skill contest or sweepstakes.

12.11 Unauthorized Decisions by Postmasters

Postmasters are not authorized to decide whether written, printed, or graphic matter is nonmailable based on its content or to deny entry to such matter or exclude it from the mail.

12.12 Refusal Due to Improper Preparation

Written, printed, or graphic matter not properly prepared for mailing can be refused.

602 Addressing

Overview

- [1.0 Elements of Addressing](#)
- [2.0 Restrictions](#)
- [3.0 Use of Alternative Addressing](#)
- [4.0 Detached Address Labels \(DALs\)](#)

1.0 Elements of Addressing

1.1 Clear Space

A clear space must be available on all mail for the address, postage (permit imprint, postage stamp, or meter stamp), postmarks, and postal endorsements.

1.2 Delivery Address

The delivery address specifies the location to which the USPS is to deliver a mailpiece. Except for mail prepared with detached address labels under [4.0](#), the piece must have the address of the intended recipient, visible and legible, only on the side of the piece bearing postage.

1.3 Address Elements

All mail not bearing a simplified address under [3.0, Use of Alternative Addressing](#), must bear a delivery address that contains at least the following elements in this order from the top line:

- a. Intended recipient's name or other identification.
- b. Private mailbox designator ("PMB" or alternative "#") and number if the mailpiece is addressed to a commercial mail receiving agency (CMRA) address.
- c. Street and number. (Include the apartment number, or use the Post Office box number, or general delivery, or rural route or highway contract route designation and box number, as applicable.)
- d. City and state (or state abbreviation). The city is any acceptable mailing name for the 5-digit ZIP Code serving the intended recipient as shown in the USPS City State Product.
- e. ZIP Code (5-digit or ZIP + 4) where required:
 1. ZIP Codes are required on Express Mail, Presorted and automation price First-Class Mail, Periodicals mail, Standard Mail, Package Services mail (except single-piece price Parcel Post), all mail sent to military addresses within the United States and to APO and FPO addresses, all official mail (penalty mail), all business reply mail, and all merchandise return service mail.
 2. Unless required above, ZIP Codes may be omitted from single-piece price First-Class Mail (including Priority Mail), single-piece price Parcel Post, and pieces bearing a simplified address.

1.4 Complete Addresses

1.4.1 Complete Address Definition

A complete address has all the address elements necessary to allow an exact match with the current USPS ZIP+4 Product to obtain the finest level of ZIP+4 code for the delivery address. A complete address may be required on mail at some automation prices.

1.4.2 Complete Address Elements

A complete delivery address includes:

- a. Addressee name or other identifier and/or firm name where applicable.
- b. Private mail box designator and number (PMB 300 or #300).
- c. Urbanization name (Puerto Rico only, ZIP Code prefixes 006 to 009, if area is so designated).
- d. Street number and name (including predirectional, suffix, and postdirectional as shown in USPS ZIP+4 Product for the delivery address or rural route and box number (RR 5 BOX 10), highway contract route and box number (HC 4 BOX 45), or Post Office box number (PO BOX 458), as shown in USPS ZIP+4 Product for the delivery address). (“PO Box” is used incorrectly if preceding a private box number, e.g., a college mailroom.)
- e. Secondary address unit designator and number (such as an apartment or suite number (APT 202, STE 100)).
- f. City and state (or authorized two-letter state abbreviation). Use only city names and city and state name abbreviations as shown in USPS City State Product. Contact the National Customer Support Center (see [509.1.0](#)) for more information about the City State Product.
- g. Correct 5-digit ZIP Code or ZIP+4 code. If a firm name is assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used in the delivery address.

1.5 Return Addresses

1.5.1 Purpose for Return Address

The return address tells the USPS where the sender of a mailpiece wants it returned if the piece cannot be delivered.

1.5.2 Return Address Elements

The return address contains elements corresponding to those for the delivery address. A return address is required in specific circumstances (see [1.5.3](#)). If the sender's name is not included in the return address, another clear designation (apartment, suite, or room number) is required to ensure proper handling of ancillary services and/or return of the piece. ZIP Codes (5-digit or ZIP+4) are required in the return address of all mail on which postage is paid with precanceled stamps or company permit imprint, and in the sender's return address on Periodicals mail when “Address Service Requested” is specified. Official mail (penalty mail) also requires a ZIP Code in the return address.

1.5.3 Required Use of Return Addresses

The sender's domestic return address must appear legibly on:

- a. Mail of any class, when its return and/or an address correction service is requested.
- b. Official mail.
- c. Mail paid with precanceled stamps.
- d. Matter bearing a company permit imprint.
- e. Priority Mail.
- f. Periodicals in envelopes or wrappers.
- g. Package Services (except unendorsed Bound Printed Matter).
- h. Registered Mail.
- i. Insured mail.
- j. Collect on delivery (COD) mail.
- k. Certified Mail if a return receipt is requested.
- l. Express Mail if a return receipt is requested. The return address on the Express Mail label meets this standard.

1.5.4 Postmark

An endorsement directing return to point of mailing (postmark) is not honored.

1.6 Ancillary Services

The USPS uses the return address to provide ancillary services requested by the mailer (e.g., "Return Service Requested"). The return address on any mailpiece endorsed for an ancillary service must identify where the piece is to be returned and where the mailer is prepared to pay applicable postage and fees for pieces returned or for ancillary service provided at the mailer's request. A domestic return address must be placed in the upper left corner of the address side of the piece or the upper left corner of the addressing area.

1.7 Attachment of Different Class

If the names and addresses of the sender and intended recipient do not appear on both the host and attachment, the sender's name and address must be placed on one piece and the recipient's name and address on the other. Combination containers that have inseparable parts or compartments are mailable with the names and addresses on only one.

1.8 ZIP Codes

1.8.1 Purpose of ZIP Code

The ZIP (Zone Improvement Plan) Code system is a numbered coding system that facilitates efficient mail processing. The USPS assigns ZIP Codes. All Post Offices are assigned at least one unique 5-digit ZIP Code. Larger Post Offices may be assigned two or more 5-digit ZIP Codes (multi-5-digit ZIP Code offices). Separate 5-digit ZIP Codes are assigned to each delivery unit at these offices.

1.8.2 ZIP+4 - A Complete ZIP Code

The most complete ZIP Code is a nine-digit number consisting of five digits, a hyphen, and four digits, which the USPS describes by its trademark ZIP+4. The correct format for a numeric ZIP+4 code is five digits, a hyphen, and four digits. The first five digits represent the 5-digit ZIP Code; the sixth and seventh digits (the first two after the hyphen) identify an area known as a sector; the eighth and ninth digits identify a smaller area known as a segment. Together, the final four digits identify geographic units such as a side of a street between intersections, both sides of a street between intersections, a building, a floor or group of floors in a building, a firm within a building, a span of boxes on a rural route, or a group of Post Office boxes to which a single USPS employee makes delivery.

1.8.3 Numeric Delivery Point Barcode

A numeric equivalent of a delivery point barcode (DPBC) consists of five digits followed by a hyphen and seven digits as specified in [708.4.2.4](#). The numeric equivalent is formed by adding three digits directly after the ZIP+4 code.

1.9 Additional Addressing Standards by Class

Basic addressing standards for First-Class Mail, Express Mail, Standard Mail, and Package Services are in the Prices and Eligibility section for each class of mail. Additional standards for Periodicals are in [707.3.2, Addressing](#). Standards apply to overseas military mail, Department of State mail, mail in window envelopes, international mail, and mail claimed at any automation price.

2.0 Restrictions**2.1 Dual Address**

Mail with a dual address (both a street address and a Post Office box number) is delivered to the address immediately above the city and state (or to the Post Office box if both the street address and Post Office box are on the same line). If a ZIP+4 code or 5-digit ZIP Code is used, it must correspond to the address element immediately above the city and state (or with the Post Office box number in the address if both the street address and Post Office box are on the same line). These restrictions also apply to return addresses on mail (for more information, see Publication 28, *Postal Addressing Standards*).

2.2 More Than One Post Office

Mail with the name of more than one Post Office in the delivery address or return address is not acceptable for mailing.

2.3 Mail Addressed to CMRAs

Mail sent to an addressee at a commercial mail receiving agency (CMRA) must be addressed to their private mailbox ("PMB" or "#") number at the CMRA mailing address.

3.0 Use of Alternative Addressing

3.1 General Information

3.1.1 Use

Alternative addressing formats may be used as described in [3.2](#) through [3.4](#) in *Use of Alternative Addressing*.

3.1.2 Prohibited Use

Alternative addressing formats may not be used on:

- a. Express Mail pieces.
- b. Mail with any extra service under [503](#).
- c. Mail with any ancillary service endorsement under [507.1.1](#) through [507.1.8](#).
- d. Periodicals intended to count as subscriber or requester copies to meet the applicable circulation standards.
- e. Mail addressed to an overseas military Post Office under [703.2.2](#).

3.1.3 Treatment

Mail with an occupant or an exceptional address format is delivered as addressed and is not forwarded. Such mail is treated as undeliverable only when the address is incorrect or incomplete or when the mail cannot be delivered for another reason related solely to the address (e.g., a vacant building), as shown in [Exhibit 1.4.1, USPS Endorsements for Mail Undeliverable as Addressed](#). Periodicals publishers are notified when mailpieces with the occupant or exceptional address formats are undeliverable for solely address-related reasons. Mail with a simplified address format is distributed to all deliveries on a route or to Post Office boxholders. Undeliverable mail with any alternative addressing format is disposed of as waste under [507.1.9.1](#).

3.2 Simplified Address

3.2.1 Use—Rural and Highway Contract Routes, P.O. Boxholders

The simplified address format (“Postal Customer”) may be used on mail only when complete distribution is made to each family (household residence) or boxholder on a rural or highway contract route at any Post Office or to all Post Office boxholders at a Post Office without city carrier service. The following also applies:

- a. Mailers may use a more specific address, such as “Rural Route Boxholder,” for mail intended to all boxholders on a rural route, followed by the name of the Post Office and state. The word “Local,” instead of the Post Office and state name, is optional; however the Postal Service recommends using the Post Office and state name for mail not dropshipped directly to a destination delivery unit.
- b. Mailers may use “Residential Customer” to indicate that delivery is desired to residential addresses only.
- c. See [703.6.0](#) for congressional mail.

3.2.2 Use—City Routes, P.O. Boxholders

When distribution is to be made to each active possible delivery on city carrier routes or to each Post Office boxholder at a Post Office with city carrier service, the addressee's name; mailing address; and city, state, and ZIP Code may be omitted from the address only on pieces mailed as official matter by agencies of the federal government (including mail with the congressional frank prepared under [703.6.0](#)); any state, county, or municipal government; and the governments of the District of Columbia, the Commonwealth of Puerto Rico, and any U.S. territory or possession listed in [608.2.0](#). The requirement for distribution to each stop or Post Office boxholder may be modified for congressional mail under [703.6.0](#). The following also applies:

- a. Only these forms of address may be used instead of the addressee's name and address:
 1. "Postal Customer" (delivery desired at all addresses).
 2. "Residential Customer" (delivery desired at residential addresses only).
 3. "Business Customer" (delivery desired at business addresses only).
- b. At least 10 days before the mailing date, the mailer must submit a sample mailpiece and the following information to the entry office postmaster (in response, the mailer receives a mailing schedule that must be followed):
 1. Proposed mailing date.
 2. Total number of pieces being mailed.
 3. Method of postage payment.
 4. Names of all city delivery Post Offices to receive any of the mailing and the number of pieces for each.

3.2.3 Mail Preparation

Mailers must prepare letter-size pieces in trays. Mailers must prepare flat-size pieces and irregular parcels in carrier route bundles in sacks or directly on pallets. Bundles, sacks, or trays may be placed on 3-digit, 5-digit, or 5-digit scheme pallets under [705.8.10](#). In addition to the required simplified address, each bundle must bear a facing slip showing the desired distribution (for example, 5-digit ZIP Code and route number) or the top piece of each bundle must include the route number and ZIP Code. Mailers may obtain delivery statistics for routes as described in [509.1.0](#). The following also applies:

- a. All pieces must be in the same processing category.
- b. Mailers must mark pieces according to [102](#), [202](#), [302](#), or [402](#).
- c. Mailers must prepare all pieces for the same carrier route in bundles of 50, so far as practicable. If the pieces are bundled in quantities other than 50, mailers must show the actual number of pieces on the facing slip or on the top piece of the bundle.
- d. If selective distribution is desired, the mailer must include enough pieces to cover the routes selected.

3.2.4 Postage

Postage must be paid with permit imprint, meter indicia, precanceled stamps, or other authorized methods not requiring cancellation, according to the standards for the class of mail.

3.2.5 Address Designation

Only the address designations in [3.2.1](#) or [3.2.2](#) may be used. Other designations (e.g., “Food Buyer,” “Voter”) are not permitted.

3.3 Occupant Address**3.3.1 Use of Occupant Address**

The occupant address format (“Postal Customer” or “Occupant,” “Householder,” or “Resident”) may be used to address mail selectively to a rural route and box number, a specific street number, or a specific Post Office box number without using the addressee’s name:

Example

POSTAL CUSTOMER
2711 ORDWAY ST NW APT 204
WASHINGTON DC 20008-5036

3.4 Exceptional Address**3.4.1 Use of Exceptional Address**

The exceptional address format (“Jane Doe or Current Resident” or “Jane Doe or Current Occupant”) may be used on any mail except mail types listed in [3.1.2](#). The word “Current” is optional. The order of the words may be reversed (e.g., “Current Resident or Jane Doe” rather than “Jane Doe or Current Resident”).

3.4.2 Placement

The exceptional address format must be placed in the address block, with the following exceptions:

- a. If all the current resident/occupant information cannot be placed on the first or second line of the address, the exceptional address format may be placed no more than 3/4 inch above the address block.
- b. If an optional endorsement line (OEL) is used, the mailer may elect to place the exceptional address format above the OEL. In these cases, the exceptional address format must be at least 1/2 inch, but not more than 3/4 inch, above the optional endorsement line. If a window envelope is used with an OEL, the exceptional address information may be printed either in the area on the insert showing through the window or on the envelope above the window.

4.0 Detached Address Labels (DALs)**4.1 DAL Use****4.1.1 Definition**

For these standards, *item(s)* refers inclusively to the types of mail described in [4.1.2](#) through [4.1.4](#).

4.1.2 Periodicals or Standard Mail Flats Saturation Mailings

Saturation mailings of unaddressed Periodicals or Standard Mail flats may be mailed with detached address labels (DALs). For this standard, saturation mailing means a mailing sent to at least 75% of the total addresses on a carrier route or 90% of the residential addresses on a route, whichever is less. Deliveries are not required to every carrier route of a delivery unit.

4.1.3 Standard Mail Merchandise Samples

Merchandise samples more than 5 inches wide (high) or 1/4 inch thick, or nonuniform in thickness, mailed at Standard Mail prices, must be mailed with DALs when prepared for general distribution on city delivery routes. Merchandise samples may be mailed with DALs for general distribution on other (e.g., rural) routes and for the residual portion of a general distribution mailing. For this standard, *general distribution* means distribution in a single mailing to at least 25% of the addresses in any 5-digit ZIP Code delivery area regardless of the number of samples addressed to a single route or the number of 5-digit areas to which samples are addressed. If the same mailing includes a general distribution to one or more 5-digit areas and a secondary distribution of lesser quantities to one or more other 5-digit areas, pieces in the secondary distribution are considered residual.

4.1.4 Bound Printed Matter

Unaddressed pieces of Bound Printed Matter may be mailed with DALs when:

- a. The mail is prepared on 5-digit pallets meeting the standards in [705.8.0](#), except that for flat-size mail, separate 5-digit pallets of carrier route and Presorted price mail are not required. The destination delivery unit (DDU) is determined using the Drop Shipment Product under the provisions for the DDU price in [366.3.0](#) through [366.6.0](#) or [466.3.0](#) through [466.6.0](#). The mail may not be prepared on pallets when the Drop Shipment Product indicates that the delivery unit that serves the 5-digit pallet destination cannot handle pallets. For such delivery units, mail with DALs must be prepared in sacks. The trays or cartons of DALs must be prepared under [4.3](#), placed on the same pallet as the pieces, and must be stretch-wrapped together as one unit.
- b. The mail is prepared in 5-digit sacks and entered at the destination delivery unit. The destination delivery unit is determined by using the Drop Shipment Product under the provisions for the DDU price in [366.3.0](#) through [366.6.0](#) or [466.3.0](#) through [466.6.0](#). DALs must be bundled under [4.3](#) and presented to the destination delivery unit with the accompanying items to be distributed with the DALs.

4.1.5 Alternative Addressing Format

The addresses on DALs may be prepared using an alternative addressing format under [3.0](#), subject to the applicable eligibility, volume, density, and preparation standards.

4.1.6 Documentation

When requested by the USPS, DAL mailers must provide documentation to establish that the applicable distribution standards in [4.1.2](#) through [4.1.4](#) are met.

4.1.7 Extra Services

Items mailed with DALs may not be combined with any extra service.

4.2 Label Preparation

4.2.1 Label Construction

Each DAL must be made of paper or cardboard stock that is not folded, perforated, or creased, and that meets these measurements:

- a. Between 3-1/2 and 5 inches high (perpendicular to the address).
- b. Between 5 and 9 inches long (parallel to the address).
- c. At least 0.007 inch thick, except under [4.2.5b](#).

4.2.2 Addressing

The address for each item must be placed on a DAL, parallel to the longest dimension of the DAL, and may not appear on the item it accompanies. The DAL must contain the recipient's delivery address and the mailer's return address. A ZIP+4 code or 5-digit ZIP Code is required unless a simplified address format is used. The delivery address may include the correct delivery point barcode.

4.2.3 Ratio

Only one DAL may be prepared for each accompanying item, and only one item may be identified for delivery per DAL (a single DAL may not be prepared to deliver one each of different accompanying items or multiples of the same item).

4.2.4 Required Information

The following words must appear in bold type at least 1/8 inch high on the front of each DAL: "USPS regulations require that this address label be delivered with its accompanying postage-paid mail. If you should receive this label without its accompanying mail, please notify your local postmaster." The title or brand name of the item (which may include an illustration of the item) must also appear on the front or back of the DAL to associate it with the accompanying item.

4.2.5 Other Information

In addition to the information described in [4.2.2](#) and [4.2.4](#) and an indicium of postage payment, only the following may appear on the front of a DAL:

- a. Official pictures and data circulated by the National Center for Missing and Exploited Children.
- b. Advertising, under the following conditions:
 1. The DALs must be automation-compatible under [201.3.0](#) and have a correct delivery point barcode or an Intelligent Mail barcode with an 11-digit routing code (see [708.4.0](#)).
 2. The advertising must not obstruct or overlap any of the required elements that are placed on the front of a DAL.
 3. The advertising must be to the left of the delivery address and must be placed to maintain required clear spaces around the address and postage payment (see [202](#) and [1.0](#)).

4.3 Mail Preparation

4.3.1 Notice to Delivery Office

Each delivery office to receive a DAL mailing must be notified in writing at least 10 days before the requested delivery period. To ensure that the delivery office can readily relate the notice to the cartons containing the corresponding items, a copy of that letter must be enclosed with the DALs unless the initial notice and the cartons used for the DALs and items each conspicuously bears a mailing identification number. The letter must contain the following information:

- a. Name and telephone number of mailer or representative.
- b. Origin Post Office of mailing.
- c. Expected mailing date.
- d. Description of mailing.
- e. Number of addressees for each 5-digit ZIP Code.
- f. Number of DALs per carton or bundle.
- g. Number of items per carton or bundle.
- h. Expected delivery period (range of dates).
- i. Requested action for excess or undeliverable DALs or items (see 4.4).

4.3.2 Basic Standards for DALs

The DALs must be presorted, counted, and packed by 5-digit ZIP Code delivery area. Only DALs for the same 5-digit area may be placed in the same carton. DAL mailings claimed at carrier route or walk-sequence prices must be further prepared under the corresponding standards. Different size cartons may be used in the same mailing, but each must be filled with dunnage as necessary to ensure that the DALs retain their integrity while in transit. Each carton of DALs must bear a label showing the information in 4.3.5 unless a mailing identification number is used (see 4.3.1). Multiple containers of DALs must be numbered sequentially (“1 of __,” “2 of __,” etc.).

4.3.3 Basic Standards for Items Distributed With DALs

The items to be distributed with the DALs must be placed in cartons or prepared in bundles placed in sacks, as appropriate for the type of item and subject to the standards for the price claimed. A label bearing the content description information in 4.3.5 must be affixed to each carton, sacked bundle, or pallet unless a mailing identification number is used (see 4.3.1). Cartons of items (including those on pallets) may be of different sizes but must be filled with dunnage as necessary to ensure the integrity of the items while in transit. The gross weight of each carton or sack must not be more than 40 pounds.

4.3.4 Combined Cartons

Both the DALs and the accompanying items may be enclosed in the same carton when sent to a small volume 5-digit ZIP Code area. If packed together, these standards apply:

- a. The DALs must be bundled and labeled under 4.3.2 and placed on top of the items.

- b. The carton must be packed with dunnage to ensure the integrity of the contents while in transit.
- c. The gross weight of the carton must not exceed 40 pounds.
- d. The exterior of the carton must be labeled under [4.3.5](#) and marked “DALs ENCLOSED” in letters not less than 1/2 inch high.

4.3.5 Container Labels

Sacks, cartons, and pallets of DAL mail must be labeled under the preparation standards for the price claimed. A second label must be affixed to each carton or sacked bundle to provide the following information (unless a mailing identification number is used under [4.3.1](#)):

- a. Delivery Post Office name and 5-digit ZIP Code delivery area.
- b. Title, brand name, or other description of the items.
- c. Name and telephone number of the mailer or representative.
- d. Number of labels or items in the carton, as applicable.
- e. Instructions to open and distribute either the DALs with matching items or the items with matching DALs, as appropriate.

4.3.6 Use of Equipment

Cartons, bundles of flats, and sacks of items may be palletized under the applicable standards; cartons of DALs must be palletized with the corresponding items under the same standards. The USPS plant manager at whose facility a DAL mailing is deposited may authorize other types of equipment for the portion of the mailing to be delivered in that plant's service area.

4.4 Disposition of Excess or Undeliverable Material

4.4.1 Excess Material

The letter required under [4.3.1](#) must either request that the delivery office contact the mailer (or representative) about excess DALs or items, or provide instructions for their treatment. (If the mailer does not provide information about excess DALs or items, such material is disposed of as waste by the USPS.) The mailer must choose one of the following options for each DAL mailing and the items:

- a. Disposal of any excess material as waste.
- b. Return of the excess material to the mailer, postage due at the applicable single-piece price under [4.5](#).
- c. Holding of the excess material for pickup by the mailer (or representative). If pickup is not made within 15 calendar days of the notice to the mailer, the material is returned to the mailer postage due.
- d. Holding of the excess material while additional DALs or items are supplied (as applicable). If additional material is not supplied within 15 days of the notice to the mailer, the excess material is returned to the mailer postage due. Additional material must be sent prepaid to the delivery Post Office as First-Class Mail, Priority Mail, or Express Mail.

4.4.2 Undeliverable DAL

Ancillary service endorsements are not permitted. A DAL that is undeliverable as addressed is handled under [507.1.1](#) through [507.1.9](#) for the applicable class of mail. The accompanying item is treated as specified by the mailer under [4.4.1](#).

4.5 Postage**4.5.1 Prices**

DAL mailings are not eligible for any automation price, but they may qualify for a carrier route price, subject to the applicable standards. For DALs used with Standard Mail ECR flats and ECR parcel mailings, mailers must pay a surcharge for each DAL. See [343.1.0](#) and [443.1.0](#).

4.5.2 Postage Computation and Payment

Postage is computed based on the weight of the entire mailpiece (the combined weight of the item and the accompanying DAL). If the number of DALs and items mailed is not identical, the number of pieces used to determine postage is the greater of the two. No postage refund is allowed in these situations. The total weight of the mailing excludes the weight of the cartons used to carry the DALs or items, dunnage, and carton labels. In addition, these methods of postage payment apply:

- a. Periodicals flats must be prepaid. A notice of entry must appear in the upper right corner of the DAL.
- b. Standard Mail flats and samples and Bound Printed Matter must be paid by permit imprint, which must appear on each DAL. Standard Mail postage is computed at the applicable nonletter prices.
- c. The DAL surcharge (see [343.1.0](#) and [443.1.0](#)) applies to each DAL used in a Standard Mail ECR flats or parcel mailing.

4.5.3 Returns

Postage for excess or undeliverable DALs that are properly endorsed or for items being returned is computed at the single-piece price (First-Class Mail, Priority Mail, or Package Services) applicable to the combined weight of the DAL and the accompanying item, regardless of whether both are returned. The total amount due for returned material, which includes the return postage and the applicable address correction fee for each DAL or item returned, is collected when the material is returned to the mailer.

4.5.4 Additional Items

Postage for additional material (DALs or items) mailed to the USPS under [4.4.1d](#) must be prepaid as First-Class Mail, Priority Mail, or Express Mail, subject to the eligibility standards for the price claimed and the conditions in [4.5.2](#).

604 Postage Payment Methods

Overview

- 1.0 Stamps
- 2.0 Stamped Stationery
- 3.0 Precanceled Stamps
- 4.0 Postage Meters and PC Postage Products (“Postage Evidencing Systems”)
- 5.0 Permit Imprint (Indicia)
- 6.0 Payment of Postage
- 7.0 Computing Postage
- 8.0 Insufficient or Omitted Postage
- 9.0 Refunds and Exchanges
- 10.0 Revenue Deficiency

1.0 Stamps

1.1 Postage Stamp Denominations

Postage stamps are available in the following denominations:

TYPE AND FORMAT		DENOMINATION
Regular Postage	Panes of up to 100	\$0.01, .02, .03, .04, .05, .09, .10, .17, .20, .23, .24, .27, .40, .42, .50, .59, .60, .62, .70, .72, .80, .83, .94 \$1, \$2, \$4.80, \$5, \$16.50
	Booklets	\$0.42 (\$8.40 booklets)
	Coils of 50	\$0.42
	Coils of 100	\$0.27, .42
	Coils of 500	\$0.01, .03, .05, .10
	Coils of 3,000	\$0.01, .03, .05, .20, .41, .42
	Coils of 10,000	\$0.01, .02, .03, .05, .10, .41, .42
Precanceled Presorted Price Postage — First-Class Mail and Standard Mail	Coils of 500, 3,000, and 10,000	Various nondenominated (available only to permit holders)
Commemorative	Panes of up to 50	\$0.42 and other denominations
	20-Stamp Booklets	\$0.42 (\$8.40 booklets)
Semipostal	Breast Cancer Research Panes of up to 20	Purchase price of \$0.55; postage value equivalent to First-Class Mail nonautomation single-piece price (\$0.42); remainder is contribution to fund breast cancer research.
Forever Stamp	20-Stamp Booklets	\$0.42 (\$8.40 booklets)
	18-Stamp Sheetlets	\$0.42 (\$7.56 sheetlets)

1.2 Postage Stamps Valid for Use

All postage stamps issued by the United States since 1860, unless listed in 1.3, are valid for postage from any point in the United States or from any other place where U.S. Mail service operates. Precanceled stamps may be used to pay regular

604.1.3

postage and fees for extra services if the mailpiece is endorsed under the standards for the class of mail and service requested. Precanceled postage may be used only by permit holders authorized under 3.0. Unless excepted by standard, the total postage affixed must equal at least the postage charge for the class of the mail and, if applicable, the fee for the extra service requested. All nondenominated postage and makeup price stamps, including official mail stamps, are valid at the original prices of issue.

1.3 Postage Stamps Invalid for Use

The following are not valid to pay postage for U.S. domestic or U.S.-originated international mail:

- a. Postage due, special delivery, special handling, and Certified Mail stamps.
- b. Stamps of other countries.
- c. United Nations stamps, unless on mail deposited at the United Nations, NY.
- d. U.S. stamps that are mutilated or defaced; cut from stamped envelopes, aerogrammes, or stamped cards; covered or coated in such a manner that canceling or defacing marks cannot be printed onto the stamps; or overprinted with an unauthorized design, message, or other marking.
- e. Nonpostage stamps, such as migratory-bird hunting and conservation stamps, U.S. saving and thrift stamps.

1.4 Imitations of Stamps

Matter bearing imitations of postage stamps, in adhesive or printed form, or private seals or stickers resembling a postage stamp in form and design, is not acceptable for mailing.

1.5 Imitations of Markings

Matter bearing decorative markings and designs, in adhesive or printed form, resembling the markings and designs of official postal services, is not accepted for mailing (see [Exhibit 1.5](#)).

Exhibit 1.5 Prohibited Imitations

1.6 Stamp Reproduction

Postmasters may not advise the public about the reproduction of foreign or domestic postage stamps. Such information is available from Stamp Development, USPS Headquarters (see [608.8.0](#) for address).

1.7 Position of Stamp on Mailpiece

Stamps must be affixed firmly in the upper right corner of the address side of the mail cover. Any stamp partly concealed by an overlapping stamp may not be counted as postage.

1.8 Reuse of Stamps

Reuse of stamps with intent to cause loss to the government or the USPS is punishable by fine and imprisonment.

1.9 Perforating Stamps

Postage stamps may be marked with perforation holes. The mark may not cover more than 1/4 square inch (1/2 inch by 1/2 inch) of the stamp, and the diameter of the holes may not exceed 1/32 inch.

1.10 Additional Standards for Forever Stamps

Forever stamps are sold for the price of the current First-Class Mail single-piece 1-ounce letter price in [133.1.4](#). The postage value of each forever stamp is the current First-Class Mail single-piece 1-ounce letter price. Forever stamps may be used only on single-piece price mail.

1.11 Additional Standards for Semipostal Stamps

Semipostal stamps are subject to the following special conditions:

- a. Semipostal stamps are stamps sold for a price that exceeds the postage value of the stamp. The difference between the price and postage value (also known as the “differential”) less an offset for reasonable USPS costs, as determined by the USPS, is contributed to a specific cause. Semipostal stamps are offered for sale for a limited time as provided by law or by the USPS.
- b. The following semipostal stamp is available: The Breast Cancer Research semipostal stamp. The difference between the purchase price and the First-Class Mail nonautomation single-piece first-ounce letter price in effect at the time of purchase constitutes a contribution to breast cancer research and cannot be used to pay postage. Funds (net of reasonable USPS costs) raised in connection with the Breast Cancer Research semipostal stamp are transferred to the Department of Defense and the National Institutes of Health.
- c. The postage value of each semipostal stamp is the First-Class Mail nonautomation single-piece first-ounce letter price in [133.1.4, *Prices for Letters and Cards*](#), that is in effect at the time of purchase. Additional postage must be affixed to pieces weighing in excess of 1 ounce, pieces subject to the nonmachinable surcharge, or pieces for which extra services have been elected. The postage value of semipostal stamps purchased before any subsequent change in the First-Class Mail nonautomation single-piece first-ounce letter price is unaffected by any subsequent change in that price. The purchase price is listed in [1.1](#).

1.12 Paying for Stamps

Payment may be made in U.S. currency. Foreign or mutilated money is not acceptable. The USPS may require payment of the exact amount of the purchase. Checks are acceptable subject to USPS check-acceptance policy and the

604.1.13

assessment of charges to the customer for an uncollectible check returned by the bank. The customer must use a money order or certified check if the amount due is sent by mail.

1.13 Seals and Stickers

The nonaddress side of mail may have seals or stickers, if they do not imitate postage stamps and do not have words, numerals, or other markings indicating a value.

2.0 Stamped Stationery

2.1 Plain Stamped Envelope

2.1.1 Fee

Fee, in addition to the postage value preprinted on the envelope:

TYPE	FEE	
	Each	500
Size 6-3/4	\$0.09	\$14.90
Size 10	0.09	16.95

2.1.2 Availability

Plain stamped envelopes are available at all Post Offices, except that:

- a. Only sizes 6-3/4 and 10 regular and window envelopes are sold in less than full box lots (a full box contains 500 envelopes).
- b. Only nonprofit organizations and political committees authorized to use the Nonprofit Standard Mail prices may buy Nonprofit (precanceled) envelopes. Only full boxes are sold at Post Offices; only less than box lots are sold at philatelic outlets.

2.1.3 Envelope Dimensions

Envelope dimensions, which can vary 1/16 inch, are as follows:

- a. Size 6-3/4: 3-5/8 by 6-1/2 inches.
- b. Size 10: 4-1/8 by 9-1/2 inches.
- c. Intermediate sizes (between 6-3/4 and 10, as determined by surface area in square inches) are not less than 6-1/2 or more than 9-1/2 inches long, not less than 3-5/8 or more than 5 inches high, have a surface area of not more than 39 square inches, and have an aspect ratio (length divided by height) not less than 1.3 or more than 2.5.

2.1.4 Window Sizes

Window envelopes are available with these window sizes:

- a. The standard window is 1-1/8 inches high and 4-3/4 inches wide, and is placed 5/8 inch from the bottom edge of the envelope.
- b. In size 6-3/4 envelopes, the window is 7/8 inch from the left edge; in size 10 envelopes, 1 inch from the left edge.

- c. On double window envelopes, the second window (designed for a return address) is 1/2 inch from the top and left edges, and measures 3/4 inch high and 2-1/2 inches wide.
- d. Other window sizes and locations can be produced, if the window size is not more than 1-1/2 inches high and 5 inches wide, and the window is not less than 3/8 inch from any envelope edge. Windows must allow compliance with general USPS addressing guidelines.

2.1.5 Imprinting

Stamped envelopes may be privately imprinted in any style, if at least 3-1/2 inches of clear space remains at the right end of the address side.

2.2 Personalized Stamped Envelopes

2.2.1 Fee

Fee, in addition to the postage value preprinted on the envelope:

TYPE	FEE	
	50	500
Size 6-3/4	\$4.60	\$22.00
Size 10	4.60	25.00

2.2.2 Availability

Personalized envelopes (stamped envelopes imprinted with a return address) are available by mail order only. Customers mail Form 3203, with the full payment (by check or money order) for the envelopes ordered, to Stamp Fulfillment Services (see [608.8.0](#) for address).

2.2.3 Printing Specifications

All printing on personalized envelopes is subject to these specifications:

- a. Any line of printing is limited to 47 characters and spaces.
- b. The total number of lines is limited to seven.
- c. The last two lines of printing must be reserved for the street address or Post Office box number where mail is to be delivered, and the city, state, and ZIP Code.
- d. Stamp Development, USPS Headquarters, must approve any printing not permitted under [2.2.4](#) through [2.2.6](#). Requests for nonstandard printing are considered on orders of one million or more identical envelopes. Stamp Development's decision is final.
- e. Each envelope must bear a return address printed in uppercase and lowercase letters, with flush left margin, using 8-point Helvetica type. The firm name or main lines are in bold type.

2.2.4 Printed Return Address Standards

The printed return address must include the local address that includes a street address; a Post Office box number; a rural route and box number; a building name, room number, and street address; or both a street address and Post Office box number; and the name of the Post Office or branch Post Office, state, and either the

604.2.2.5

ZIP+4 or the 5-digit ZIP Code. The ZIP Code must be correct for the address on the line immediately preceding the city and state. The postmaster determines whether the address is adequate to ensure return of undeliverable mail.

2.2.5 Printed Return Address Options

The printed return address may include:

- a. The name and title of an individual, or the name of a firm, corporation, institution, association, or society.
- b. Descriptive words that represent business or professional names.
- c. The branch or department name of a business if necessary to ensure return of undeliverable mail.
- d. The telephone number of an individual or group if printed immediately preceding the local address.
- e. A brief advertising statement or descriptive phrase following the name or on up to two separate lines. Indecent matter may not appear on wrappers or envelopes (18 USC 1463).

2.2.6 Optional Information

The following endorsements and instructions printed in at least 8-point type may be included as part of the return address:

- a. Any ancillary service endorsement under [507.1.1](#) through [507.1.9](#) that requests address correction, forwarding, or return appropriate for the intended class of mail (e.g., "Address Service Requested"). The endorsement must appear directly below the return address, separated with a minimum clear space of 1/4 inch.
- b. Any sender instruction under [507.1.8, *Returning Mail*](#), and [507.4.0, *Address Correction Services*](#), that specifies a period for holding mail, not fewer than 3 and not more than 30 days (e.g., "AFTER 5 days RETURN TO"). The instruction must appear directly above the return address. If such an instruction is printed on envelopes at Standard Mail prices, those envelopes must also bear an authorized ancillary service endorsement that provides for return postage.

2.2.7 Rejected Envelopes

A customer may reject personalized envelope orders for defective manufacture or mistakes in printing, denomination, size, etc.:

- a. If the purchaser's error, only the value of the postage is refunded. Such a refund may be made at a Post Office or by returning the envelopes to Stamp Fulfillment Services (see [608.8.0](#) for address). If the customer wants the envelopes replaced instead, the customer must pay the difference between the full selling price of the envelopes and the postage value. The customer must include an explanation for rejecting the envelopes in a request for replacement or refund.
- b. If an error is made by the USPS, Stamp Fulfillment Services refunds the total cost of the envelopes. The envelopes must be returned to Stamp Fulfillment Services (see [608.8.0](#) for address) with an explanation of the error. Only the customer whose name is in the return address, or the customer's

representative, may submit rejected personalized envelopes for a refund. Rather than seeking a refund, the customer may request that the envelopes be replaced.

2.3 Other Stationery

2.3.1 Stamped Cards

Stamped cards are available as single stamped cards, double (reply) stamped cards, and in sheets of 40 for customer imprinting. Single and double stamped cards are 3-1/2 inches high by 5-1/2 inches long. Sheets must be cut to this size so that the stamp is in the upper right corner of each card. The USPS does not offer personalized stamped cards (cards imprinted with a return address).

2.3.2 Fee for Stamped Cards

Fee, in addition to the postage value preprinted on the card:

TYPE	FEE
Single Card	\$0.03
Double Card	0.06
Sheet of 40 cards (uncut)	1.20

2.3.3 Validity of Postal Stationery

All stamped envelopes, stamped cards (formerly called “postal cards”), and aerogrammes issued by the United States since 1873 are valid for postage from any point in the United States or from any other place where U.S. domestic mail service operates, under the same conditions as for postage stamps in 1.0.

3.0 Precanceled Stamps

3.1 General Information

3.1.1 Definition

Precanceling is the cancellation of adhesive postage, stamped envelopes, or stamped cards before mailing. Precanceling may be done by the mailer under a postal permit, or mailers may purchase precanceled stamps bearing a price category from the USPS.

3.1.2 Use of Precanceled Stamps

Precanceled postage is an optional postage payment method for mailings at Presorted and automation First-Class Mail prices and at all Standard Mail prices.

3.1.3 Prohibited Use of Precanceled Stamps

Precanceled postage stamps may not be used on any reusable mailing containers, such as boxes, cases, or bags.

3.1.4 Documentation

Unless excepted by standard, a precanceled stamp mailing must be accompanied by documentation subject to the standards for documentation for each class of mail if the mailing contains nonidentical-weight pieces or pieces without the full postage at the applicable price.

3.1.5 Amount of Postage

The value of precanceled stamps affixed to each piece in a mailing must be either the exact amount due or another amount permitted by standard. Refunds for overpayment must meet the standards in [9.0, Refunds and Exchanges](#).

3.1.6 Depositing Precanceled Stamp Mailings

Mail bearing precanceled postage must be presented to the Post Office where the permit is held, at the times and places designated by the postmaster. Mail bearing precanceled postage must not be deposited in street collection boxes.

3.1.7 Combining Precanceled Stamps With Other Postage Payment Methods

Precanceled mail may be combined in a mailing with mail paid with other means only if authorized by the USPS.

3.1.8 Return Address

Mailpieces with any precanceled imprint must have a complete domestic return address. If the return address is outside the delivery area of the Post Office of mailing, the mailer must put a cancellation endorsement to the left of the postage showing city, two-letter state abbreviation, and ZIP Code of the office of mailing; or submit, at the time of mailing, a duplicate of the postage statement and a sample mailpiece, both in an envelope stamped and addressed to the postmaster at the Post Office shown in the return address; or use the cancellation endorsement "Mailed From ZIP Code" followed by the 5-digit ZIP Code assigned to the postmaster at the office of mailing.

3.1.9 Markings and Endorsements

Whether the mailer or the USPS precanceled the stamps, each mailpiece with precanceled postage must bear markings and endorsements required for the price claimed or services requested.

3.2 Permit to Use Precanceled Stamps**3.2.1 Authorization to Use Precanceled Stamps**

A mailer who wants to use USPS-precanceled stamps and stamped envelopes must complete Form 3615 and file it at the Post Office where mailings are to be deposited. If an applicant has a completed Form 3615 on file for other services, precanceled authorization is annotated on the existing application. There is no fee for this permit.

3.2.2 Revocation of Precanceled Stamp Permit

A permit may be revoked if used in operating any unlawful scheme or enterprise, or for buying or acquiring stamps or mailer's precancel postmarks for other than mailing, or for failing to comply with the format requirement or instructions on Form 3615. The permit holder has 10 days to file a written statement showing why the permit should not be revoked. The manager, customer service support (district), issues the decision on such appeals.

3.3 Precancellation of Stamps by USPS

Precanceled stamps are preprinted with a price category as the precancellation method. These stamps are for matter mailed as part of a qualifying mailing of the price category shown on the stamps. Mailpieces bearing a price category

precancellation legend must include the return address. If the return address is not within the delivery area of the Post Office of mailing, the mailer must place a cancellation endorsement on the piece or provide information to the Post Office shown in the return address. Precanceled stamps with a preprinted price marking may be used to pay single-piece postage if the piece bearing the stamps has the correct marking (e.g., "First-Class Mail") immediately under the postage.

3.4 Precancellation of Stamps by Mailer

3.4.1 Definition of Stamps Precanceled by Mailer

A mailer meeting the standards in 3.4 may precancel adhesive stamps, stamped cards, and stamped envelopes with a mailer's precancel postmark. Stamped cards are precanceled at the time of printing and do not require a mailer's precancel postmark.

3.4.2 Authorization to Precancel Stamps

A mailer must request authorization to preprint price markings on precanceled stamps or to use a precancel postmark on adhesive stamps, stamped cards, and stamped envelopes. The applicant must submit a specimen mailpiece showing the preprinting method or proposed precancel postmark. If more than one preprinted marking is prepared or more than one format is used, a specimen for each must be submitted. Form 3615 must be endorsed "Preprinting of Price Markings," or "Mailer's Precancel Postmark," or both, as appropriate. The application and format samples must be submitted to the postmaster of the office where the precanceled mailings are to be deposited for approval by the district Business Mail Entry manager. If the application and samples are approved, the applicant receives written notice of approval from the postmaster and a unique permit number assigned by the postmaster.

3.4.3 Authorization Conditions

Mailer precancellation is authorized only for the specimen mailpieces submitted and approved. After that, a specimen must be submitted and approved for each new precancel postmark format or preprinted marking to be used.

3.4.4 Denial of Authorization to Precancel Stamps

If the application and format samples are not approved by the district Business Mail Entry manager, the applicant receives written notice from the postmaster stating the reasons for the denial and the applicant's appeal rights. The applicant may file a written appeal with the Pricing and Classification Service Center (PCSC). (See [608.8.4, PCSC and District Business Mail Entry Offices Contact Information](#).)

3.4.5 Revocation of Authorization to Precancel Stamps

A permit may be revoked for operating any unlawful scheme or enterprise, for buying or acquiring stamps for other than mailing, or for failing to comply with the required format standards. Within 10 days of receipt of the revocation notice, the permit holder may file a written appeal with the PCSC. (See [608.8.4, PCSC and District Business Mail Entry Offices Contact Information](#).) The PCSC issues the final agency decision.

3.4.6 Design and Content of Mailer's Postmark

The mailer's precancel postmark must contain specific elements:

604.3.4.7

- a. The mailing date (day, month, and year) if used on First-Class Mail; the month and year of mailing may be shown on Standard Mail.
- b. The words “Mailer’s Postmark” followed by the permit number and enough lines to deface (cancel) the postage.
- c. Either the city, state, and 5-digit ZIP Code of the Post Office where the precancel permit is held and the mailing is to be deposited, or the words “Mailed From ZIP Code” followed by the 5-digit ZIP Code of the mailing office. (If that Post Office is assigned more than one 5-digit ZIP Code, the precancel postmark must show the 5-digit ZIP Code assigned to the postmaster.)

3.4.7 Price Marking

The precancel postmark may include the words or authorized abbreviations of the price marking required for the price claimed. Alternatively, if authorized under [3.4.2](#), the mailer may preprint price markings required by other standards on adhesive stamps to be used for mailings at the corresponding prices. Such preprinted markings must be in uppercase letters of at least 6-point type, printed in black indelible ink on the stamp where optimum contrast is possible. A preprinted price marking applied by the mailer, by itself or with a precancel postmark, must not obscure other printing on the stamp that is part of the USPS design (e.g., “USA”).

3.4.8 Cancellation of Stamps

Black ink must be used for cancellation. It must provide enough indelibility and contrast to prevent reuse of the stamps. The precancel permit number must not be obscured by the cancellation.

3.4.9 Required Format

A mailer must use one of the Format A designs in [Exhibit 3.4.9](#). Format B may be used only by a mailer previously authorized to do so and who has the necessary die. The only permissible alternative or modification to any format is the addition of a price marking permitted by [3.4.7](#).

Exhibit 3.4.9 Format for Mailer's Precancel Postmarks

Format A

Format B

**3.5 Stamp Collectors**

Subject to USPS policy in [608.4.0](#), precanceled postage may be bought for philatelic purposes as well as postage payment. A stamp collector may mail matter bearing precanceled postage if the collector has a permit to use precanceled postage at the Post Office where the mail is presented. Creating philatelic oddities or precanceling issues or denominations that would not otherwise see legitimate mail use is not permitted. Mail orders must include a stamped, self-addressed envelope.

3.6 Using High Value Stamps

If precanceled postage on a single piece is more than \$1, the precanceled stamps must be overprinted or handstamped in black ink with the mailer's initials and the numerical abbreviations of the month and year for use (e.g., "A. B. Co. 9-78"). These stamps are acceptable on mail during the month shown and through the 10th of the following month.

4.0 Postage Meters and PC Postage Products ("Postage Evidencing Systems")**4.1 Basic Information****4.1.1 Definitions**

Postage meters and PC Postage products are collectively identified as "postage evidencing systems." A postage evidencing system is a device or system of components a customer uses to print evidence that postage required for mailing has been paid. Postage evidencing systems print indicia, such as meter imprints or information-based indicia (IBI), to indicate postage payment. Mailers print indicia directly on a mailpiece or on a label that is affixed to a mailpiece. Mailers must place indicia in the upper-right corner of the mailpiece or label, according to [4.3.3](#).

4.1.2 Product Categories

Product categories include postage meters and PC Postage products. Additional information on product categories and authorized providers is available online at www.usps.com/postagesolutions. The primary characteristics of postage meters and PC Postage products are described below.

- a. Postage meters are devices that allow download, storage, and accounting of postage in the device. Meters print indicia that may be IBI or non-IBI, to indicate postage payment. IBI are digitally generated indicia that include a two-dimensional barcode. Postage meters are available only through authorized providers. Meters may only be leased or rented and may not be sold or resold. Some components of metering systems may be purchased as authorized by the USPS.
- b. PC Postage products are software-based solutions for managing postage accounts. Mailers purchase postage using a computer and print indicia using desktop or label printers. PC Postage products print IBI indicating postage payment and may print directly onto mailpieces, shipping labels, and USPS-approved customized labels. PC Postage products are offered by commercial providers approved by the USPS. PC Postage products are typically offered by providers through subscription service agreements. Some components of PC Postage systems may be purchased as authorized by the USPS.
- c. PC Postage technology also enables authorized postage payment for Internet-based services operated by authorized private vendors as well as Click-N-Ship, a shipping label option available at www.usps.com.

4.1.3 Authorized Meter Providers

The following providers are authorized:

DATA-PAC MAILING SYSTEMS CORP
1217 BAY RD
WEBSTER NY 14580-1958
800-355-1755
www.data-pac.com

FRANCOTYP-POSTALIA INC
140 N MITCHELL CT STE 200
ADDISON IL 60101-5629
800-341-6052
www.fpusa.net

HASLER INC
19 FOREST PKY
SHELTON CT 06484-6140
800-243-6275
www.haslerinc.com

NEOPOST INC
30955 HUNTWOOD AVE
HAYWARD CA 94544-7084
800-624-7892

STAMPS.COM
12959 CORAL TREE PLACE
LOS ANGELES CA 90066-7020
888-434-0055
www.stamps.com

4.1.5 Authorized Classes of Mail

[9-11-08] Mailers may use postage evidencing systems to affix or imprint indicia on any class of mail except Periodicals and Bound Printed Matter.

4.2 Authorization to Use Postage Evidencing Systems

4.2.1 Customer Agreement

Customers must enter into an agreement with the USPS for authorization to use postage evidencing systems. By entering into the agreement, the customer accepts responsibility for control and use of the system and agrees to abide by all rules and regulations governing its use. The following conditions apply to these agreements.

- a. Customers enter into an agreement with the USPS (e.g., via electronic click-through or contract signature) in conjunction with executing a separate agreement with the provider for rental, lease, or use of a postage evidencing system. Actual implementation of the agreement with the USPS varies by

604.4.2.2

product category and provider and is typically facilitated by the provider on behalf of the USPS. Postage evidencing systems are rented or leased. They may not be purchased, sold, or resold.

- b. A meter lease or rental agreement with an authorized provider is required for postage meter use. Registration with an authorized provider is required for PC Postage system use.
- c. The customer must provide updated address information to the provider in the event of relocation.
- d. Postage meter manufacturers must conduct inspection of certain meters on a scheduled basis. The customer agrees to make the meter available for provider inspection or USPS examination when required.
- e. The customer agrees to promptly report a defective meter, or loss or theft of a meter, to the provider.

4.2.2 Authorized Possession

Only authorized customers may possess or use postage evidencing systems. Customers must surrender postage evidencing systems to the provider or its agent upon termination of the lease or rental agreement or device malfunction.

4.2.3 Use Outside the United States

The manager of Postage Technology Management must give specific approval to the provider before a provider may place a postage evidencing system for use outside the customs territory of the United States.

4.2.4 Denial of Use

USPS may deny use of a postage evidencing system in the event of failure to comply with rules and regulations. The customer must make the postage evidencing system and transaction records available and surrender the system to the provider, the USPS, or its agent when notified to do so.

4.2.5 Appeal Process

Appeals regarding standards in this section or regarding decisions on the basis of noncompliance must be made in writing to the manager, Postage Technology Management (see [608.8.1](#) for address).

4.3 Postage Payment**4.3.1 Paying for Postage**

The value of the indicia on each mailpiece must be the exact amount due for the applicable price category and associated criteria such as weight, shape, and zone or another amount permitted by mailing standards to qualify for worksharing or volume discounts. Payment options vary by provider and product category. Contact provider for authorized USPS payment options.

4.3.2 Legibility of Postage

Postage indicia must be legible (readable by USPS personnel and mail processing equipment). Illegible or unreadable (unscannable) indicia are not acceptable as payment of postage. Reflectance measurements of the indicia and the background material must meet the standards in [708.4.0](#).

4.3.3 Placement of Postage

Mailers must print or apply indicia in the upper-right corner of the envelope or, if postage is printed on an address label, the upper-right corner of that label. Mailers must meet the following additional standards when placing indicia on mailpieces. Position indicia at least 1/4 inch from the right edge of the mailpiece and 1/4 inch from the top edge of the mailpiece.

- a. Position indicia within the required boundaries. The boundaries of indicia are defined by the right edge of the envelope, the top edge of the envelope, and the bottom edge and the left edge of any USPS-required indicium element printed by the postage evidencing system.
- b. Maintain the required 1/2-inch clear zone to the left of and below all elements of the indicium, within which nothing must be printed or placed, except as follows:
 1. Indicia containing images obtained from a USPS-approved licensed vendor of customized PC Postage.
 2. For letterpress indicia only, advertising material may be printed with the indicia within space limitations. These advertising messages and slogans are known as “ad plates.” Customers must obtain the ad plates from their authorized postage meter provider. Ad plate messages must be distinguished by the inclusion of the name of the mailer or words such as “Mailer’s Message.”
- c. For postage evidencing systems that print digital indicia, an approved indicium must include within its boundaries only postal markings and text required or recommended by the USPS, except that the indicium may identify the provider. Other material may be printed only outside the boundaries of the clear zone identified in [4.3.3b](#).
- d. Any additional material printed by a postage evidencing system under [4.3.3b](#) and [4.3.3c](#) must comply with the following requirements:
 1. The material must be consistent with the Postal Service’s intent to maintain neutrality on religious, social, political, legal, moral, or other public issues.
 2. The material must not be obscene, deceptive, or defamatory of any person, entity, or group and must not advocate unlawful action.
 3. The material must not emulate any form of valid postage, government, or other official indicia or payment of postage.
 4. The material must not harm the public image, reputation, or goodwill of the Postal Service and must not be otherwise derogatory or detrimental to the Postal Service’s interest.
- e. Do not allow the indicia to infringe on the areas reserved for the FIM, POSTNET barcode, or optical character reader (OCR) clear zone.
- f. Orient indicia with the longest dimension parallel to the address.

604.4.3.4

- g. Single-piece, First-Class Mail letters must contain a mechanism so that the Postal Service can face the mailpiece during automated processing. Acceptable methods for a mailpiece produced by a postage meter or PC Postage system include:
 - 1. Printing postage meter indicia with fluorescent ink approved by the Postal Service. To determine if an ink has been approved by the Postal Service, send written requests to the Manager, Postage Technology Management (see 608.8.1 for address).
 - 2. Printing a postage meter or PC Postage indicia directly on a label containing fluorescence that has been approved by the Postal Service. To determine if a label has been approved by the Postal Service, send written requests to the Manager, Postage Technology Management.
 - 3. Printing a FIM D with the indicia or applying the indicia to an envelope containing a preprinted FIM. Position the FIM according to standards in [708.9.0](#).
- h. When placing multiple indicia on an envelope (e.g., for redate or postage correction) the indicia must not overlap each other. Overlapping indicia are not acceptable as payment of postage.

4.3.4 Postal Markings

Indicia are comprised of human-readable information. Information-based indicia (IBI) also contain machine-readable information that identifies the postage evidencing system, postage payment information, and mail service requested. There are particular data sets associated with different types of indicia, depending on the product and the type of mailing. Indicia may include postal markings related to the class of mail and presort level and an ancillary service endorsement. All words must be legible and in bold capital letters at least 1/4 inch high or 18-point type. See [202.3.0](#) for standards on markings and [202.4.0](#) for placing ancillary service endorsements on letter-size mailpieces. See [302.2.0](#) and [302.3.0](#) for corresponding standards for flat-size mailpieces; see [402.2.0](#) and [402.3.0](#) for parcels.

4.3.5 Refund Procedures

Refund procedures for unused printed postage, postage purchased but not printed, and postage lost due to postage evidencing system failure varies by product category. See [9.0](#) for refund procedures.

4.4 Special Indicia

4.4.1 Date and Postage Corrections

Mailers may print a date correction or additional postage indicium directly on the mailpiece or on a USPS-approved label under the following conditions.

- a. A date correction indicium is required for any mailpiece not deposited by the date of mailing in the indicium. Only one date correction indicium is permitted on a mailpiece. For all postage evidencing systems except PC Postage systems, a date correction must show the actual date of deposit and zero postage value ("0.00"). Place the date correction as follows:
 - 1. On letter-size mail, place the date correction on the nonaddress side in the upper right corner or on the address side in the lower left corner.

2. On flat-size mail or parcels, place the date correction next to the original indicium, except when applied by an ink jet printer on barcoded flats.
- b. Indicia for additional postage on shortpaid mailpieces must equal the total amount of required postage.

4.4.2 Reply Postage

Mailers may use indicia generated by any postage evidencing system to prepay reply postage on Express Mail, on Priority Mail when the price is the same for all zones, on First-Class Mail, and on single-piece price Media Mail and Library Mail under the following conditions.

- a. The postage amount must be sufficient to prepay the full postage due.
- b. Print indicia directly on the mailpiece or on a label, and place indicia under [4.3.3](#).
- c. Indicia used to prepay reply postage must not show the date.
- d. Pre-address the mailpiece for return to the authorized user only.
- e. Print the words “NO POSTAGE STAMP NECESSARY POSTAGE HAS BEEN PREPAID BY” directly above the address.
- f. Mailers may use FIM A on barcoded letter-size First-Class Mail reply mail except when using PC Postage.
- g. When using PC Postage, mailers must use FIM D for prepaid reply mail when the indicium is printed directly on the mailpiece.
- h. The address side must appear as described in this section and shown in the illustration below. Nothing may be added except a return address, FIM, or barcode.

4.5 Mailings

4.5.1 Mailing Date Format

The mailing date in meter indicia must meet the format standards in this section. The year must be represented by all four digits or by the last two digits. Mailers may print the indicia directly onto mailpieces or onto separate labels or tape affixed to mailpieces. The mailing date format used in the indicia is also subject to the following conditions.

- a. Complete Date. Mailers must use a complete date for the following:
 1. All First-Class Mail, Priority Mail, and Express Mail pieces.
 2. All mailpieces with Insured Mail, COD, or Special Handling service.
 3. All mailpieces prepared with the indicia printed on nonadhesive paper (e.g., computer printer paper) and affixed to the mailpiece or used as part of an insert in a window envelope.
- b. Month and Year. Mailers may use a complete date or a mailing date consisting solely of the month and year in the indicia only for Standard Mail and Package Services pieces.
- c. No Date. Mailers must use indicia with no mailing date for prepaid metered reply postage. As an option, mailers may use indicia with no mailing date for Standard Mail and Package Services pieces not subject to [4.5.2a](#).

4.5.2 Mailing Date Accuracy and Mailing Periods

The date or period when mailers may deposit or present metered mail for mailing is controlled by the mailing date in the indicia under the following conditions.

- a. Complete Date. Mailpieces bearing a complete date in the indicia must be deposited or presented on that date, except that pieces entered after the day's last scheduled collection from the Post Office or collection box may bear the actual date of entry or the date of the next scheduled collection from the Post Office or collection box. When authorized by USPS, presort mail accepted after midnight may bear the previous day's date. If the mailer knows that the mail is not to be deposited or presented on the date in the indicia, the mailer must use a date correction indicium under [4.4.1](#).
- b. Month and Year. Mailpieces bearing only the month and year in the indicia may be deposited or presented for mailing on any day during the month shown in the indicia and through the third day of the following month.
- c. No Date. Mailpieces bearing no date in the indicia may be deposited or presented for mailing on any date.

4.5.3 Deposit of Mail

Mailers must deposit or enter mailpieces with metered or PC Postage indicia according to the following conditions.

- a. Mailers may deposit Express Mail, flat-rate Priority Mail, Priority Mail weighing one pound or less, single-piece price First-Class Mail, single-piece price Media Mail, and single-piece price Library Mail items with a metered or PC Postage indicia at any postal facility, preferably within the area of the customer's local Post Office. Mailers may also deposit zone-priced Priority Mail pieces at any

postal facility, provided the postage affixed to each mailpiece is calculated to include the amount due as specified in [4.3.1](#), taking into account the weight, shape, and the zone from the ZIP Code of the office where the mailpiece is deposited to the ZIP Code of the destination address.

- b. Mailers must deposit all mail not specified in [4.5.3a](#) as follows:
 - 1. At a postal facility within the ZIP Code shown in the indicia.
 - 2. For Presort price mail, at the authorized mailing office if not at a facility within the ZIP Code shown in the indicia.
- c. Mailers also may dropship metered mail according to standards in [705.18.0](#).

4.6 Authorization to Produce and Distribute Postage Evidencing Systems

Title 39, *Code of Federal Regulations*, part 501, contains information concerning authorization to produce and distribute postage evidencing systems. Additional information may be obtained from the manager, Postage Technology Management (see [608.8.1](#) for address).

5.0 Permit Imprint (Indicia)

5.1 General Standards

5.1.1 Definition

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees for Priority Mail, First-Class Mail, Standard Mail, and Package Services. This method is not available for Periodicals or Express Mail and must not be used to pay postage on any mailpiece that is designed for reply purposes (except for permit reply mail under [507.10.0](#)).

5.1.2 Minimum Volume

[9-11-08] Permit imprint mailings must contain at least 200 pieces or 50 pounds of mail, except:

- a. Other higher minimum quantities may apply, depending on the price claimed.
- b. An occasional First-Class Mail mailing may contain fewer than 200 pieces if from a mailer whose total daily mailings are not much more than 200 pieces but who, to cooperate with the Post Office, presents a part of that mail early in the day.
- c. A mailing may contain fewer than 200 pieces if it is the completion of a large mailing extending over 2 or more consecutive days and the mailer includes an explanation on the accompanying postage statement.
- d. Single-piece price mailings submitted under the terms of an approved manifest mailing system agreement with a minimum volume reduction provision.
- e. Bound Printed Matter nonpresorted, non-discounted mailings.

5.1.3 Use of Permit Imprint

Each mailpiece sent under this payment method must bear a permit imprint indicia showing that postage is paid. Permit imprint indicia may be printed directly on mailpieces, on labels (including address labels) permanently affixed to mailpieces, or on mailpiece wrappers, envelopes, and other containers. Except where the enclosure is prohibited by other standards, matter bearing a permit imprint indicia may be mailed as an enclosure when postage for the enclosure or the host matter is not paid with the enclosed permit imprint, and the enclosed permit imprint indicia is not visible when the matter is mailed.

5.1.4 Permit and Fees

A mailer may obtain a permit to use a permit imprint indicia and pay postage in cash before or at the time of mailing by submitting Form 3615 and the applicable fee to the Post Office where mailings are made. There is no other fee for the use of a permit imprint indicia as long as the permit remains active, but other fees (e.g., an annual presort mailing fee) may be due depending on the class of mail to be prepared.

5.1.5 Application Fee

Application fee: \$180.00.

5.1.6 Payment of Permit Imprint Postage

Payment must be made for each mailing, either in cash or through an advance deposit account, before the mailing can be released for processing. Funds to pay postage must be deposited as directed by the USPS. If the funds paid or on deposit are less than that necessary to pay for a mailing, the difference must be paid or deposited before the mailing or other permit imprint mailings can be accepted. Credit for postage is not allowed. Postage may not be paid partly in money and partly by postage stamps unless permitted by standard.

5.1.7 Preparation of Mailing

All pieces in a permit imprint mailing must be faced (positioned with all addresses in the same direction, unless counterstacked under the applicable standards) and meet the preparation standards for the price claimed. Mail claimed at a postage price that varies by zone must be separated by zone when mailed, unless otherwise authorized by the USPS.

5.1.8 Weight Standards for Permit Imprint Mailing

All pieces in a permit imprint mailing must be of identical weight unless otherwise authorized by the USPS.

5.1.9 Combining Permit Imprint Mailings With Other Payment Methods

Mailpieces paid with permit imprint may be combined in the same mailing with pieces paid with other methods only if authorized by the USPS.

5.1.10 Presenting Mailings to be Weighed

Permit imprint mailings with postage paid by advance deposit account must be presented to the USPS for weighing, unless otherwise authorized by Business Mailer Support, USPS Headquarters.

5.1.11 Depositing Permit Imprint Mailings

Mail must be deposited and accepted at the Post Office that issued the permit, at a time and place designated by the postmaster, except as otherwise provided for plant-verified drop shipments.

5.2 Suspension and Revocation

5.2.1 Suspension of Authorization

The USPS may immediately suspend the authorization to use a permit imprint if the permit holder or its agent refuses or fails to provide information in a timely manner (as specified in [604.5.3.9](#)) to the USPS about the use of its company permit.

5.2.2 Revocation of Permit

A permit may be revoked for use in operating any unlawful scheme or enterprise, for nonuse during any 2-year period, for refusal to provide information about permit imprint use or mailings, or for noncompliance with any standard applicable to permit imprints. The permit holder may make a written appeal to the postmaster within 10 days of receipt of the notice.

5.3 Indicia Design, Placement, and Content

5.3.1 Production

Embossed or unembossed permit imprint indicia may be made by printing press, hand stamp, lithography, mimeograph, multigraph, address plate, or similar device. They may not be typewritten or hand-drawn.

5.3.2 Permit Imprint Indicia Content and Format

The content and format of a permit imprint indicia must meet the standards below. No other formats may be used.

5.3.3 Indicia Legibility and Color

The permit imprint indicia must be legible and of a color that contrasts sufficiently with the paper and the indicia's background for readability. A different color may be used to highlight the background of an indicia.

5.3.4 Indicia Placement on Mailpiece

Permit imprint indicia must be aligned parallel with the address of the mailpiece. The indicia must not encroach on reserved space (e.g., ACS participant code, delivery point barcode) if such a standard applies and can be placed in one of these four positions:

- a. Upper right corner of the mailpiece.
- b. Upper right corner of the address area.
- c. To the right of the address on an address label.
- d. To the right of the address on an insert appearing through a window envelope.

5.3.5 Marking Expedited Handling on Standard Mail

[8-14-08] Except for postcard-size mail and permit imprint indicia placed on address labels, indicia on Standard Mail pieces bearing references to expedited handling or delivery (e.g., "Priority," "Express," "Overnight") must:

- a. Show the words “Standard” or “STD”; “Presorted Standard” or “PRSRT STD”; or “Nonprofit Organization,” “Nonprofit Org.,” or “Nonprofit” more prominently than other words in the indicia.
- b. Include a clear space of at least 3/8 inch around the entire indicia.

5.3.6 First-Class Mail and Priority Mail Format

A permit imprint indicia on First-Class Mail or Priority Mail must show “First-Class Mail” or “Priority Mail” (or “Priority”), as applicable; “U.S. Postage Paid”; city and state; and permit number. If the Electronic Verification System (eVS) is used under [705.2.9](#), the marking “eVS” (or the alternative “e-VS” or “E-VS”) must appear directly below the permit number. The “Priority Mail” (or “Priority”) marking may be omitted when using USPS-provided Priority Mail envelopes and containers. The indicia may show the mailing date, amount of postage paid, or the number of ounces for which postage is paid. The ZIP Code of the permit holder may be shown directly after the state name or in a separate inscription reading “ZIP Code 00000,” when that ZIP Code does not create uncertainty about the permit holder’s correct address or permit number. Instead of printing the city and state of mailing in the indicia, the mailer may print “Mailed From ZIP Code,” followed by the 5-digit ZIP Code assigned to the postmaster of the mailing office. The indicia may also include required price markings.

5.3.7 Standard Mail and Package Services Format

A Standard Mail or Package Services permit imprint indicia must contain the same information required in [5.3.6](#) for a First-Class Mail indicia, except “First-Class Mail” or “Priority Mail” (or “Priority”) must be omitted. If eVS is used under [705.2.9](#), the marking “eVS” (or alternative “e-VS” or “E-VS”) must appear directly below the permit number. The indicia may include the amount of postage paid, the weight of the piece, and price markings as required. The indicia must not include the mailing date.

5.3.8 Indicating Extra Services

Permit imprint mail with extra services also paid with a permit must show “First-Class Mail” (if First-Class Mail); “U.S. Postage and Fees Paid”; city and state; and permit number. The city, state, and permit number may be omitted in a company permit imprint indicia, subject to [5.3.9](#).

5.3.9 Use of a Company Permit Imprint

A company permit imprint is one in which the exact name of the company or individual holding the permit is shown in the indicia in place of the city, state, and permit number. If a company permit imprint is used for eVS under [705.2.9](#), the marking “eVS” (or alternative “eVS” or “E-VS”) is placed directly below the name on a separate line. As an option for eVS mail only, “Permit No.” and the permit number used exclusively for eVS may appear on a separate line between the company name and the marking “eVS.” The following standards apply:

- a. For 1 year from the date of mailing, the permit holder or its agent must keep records for each mailing paid with a company permit imprint and make them available for USPS review on request. These records include (for each version of what was mailed, if applicable) the weight of a single piece; the total number of pieces mailed; the total postage; the date(s) and Post Office(s) of mailing;

and other records required by the postage price claimed or the payment method used. A complete sample mailpiece must be included for each identical-weight mailing, or each commingled or combined version in a nonidentical-weight mailing. Sample pieces are not required for nonidentical-piece Standard Mail and Package Services machinable or irregular parcel mailings (e.g., merchandise and other fulfillment mailings).

- b. Each mailpiece must bear a complete domestic return address. The return address on official mail is subject to the corresponding standards. On unendorsed Standard Mail and Bound Printed Matter, the return address is permitted below the indicia. Except for official mail, if the return address is *not* the physical location at which the USPS may review the records listed in [5.3.9a](#) (i.e., where they are kept or can be made available) or is *not* a point of contact from which such a physical location can be readily determined, the mailer must:
 1. Include in the indicia the 5-digit ZIP Code of the physical location at which the records listed in [5.3.9a](#) are either kept or can be made available for USPS review.
 2. Provide the postmaster of that Post Office with a complete sample mailpiece (except as noted above); the date(s) and Post Office(s) of mailing; and the name and local address of the party from whom the records listed in [5.3.9a](#) may be obtained.

5.3.10 Indicia Formats

Unless prepared under the option in [5.3.11](#), permit imprint indicia for ordinary mail and official mail must be prepared in one of the formats exemplified in [Exhibit 5.3.10](#), as applicable to the price claimed or type of mail. (Not all permissible combinations of content elements are shown.) Specific markings may be required by the standards for the price claimed.

604.5.3.10

Exhibit 5.3.10 Indicia Formats for Official Mail and Other Classes

First-Class Mail Official Mail:

FIRST-CLASS MAIL POSTAGE & FEES PAID AGENCY NAME PERMIT NO. G-999	FIRST-CLASS MAIL PRESORTED POSTAGE & FEES PAID AGENCY NAME PERMIT NO. G-999	FIRST-CLASS MAIL AUTO POSTAGE & FEES PAID AGENCY NAME PERMIT NO. G-999
--	---	--

Note: These are only examples; not all possible variations are shown. When not in indicia, class or rate must be marked on mailpiece, directly below or to the left of the indicia.

Standard Mail Official Mail:

PRSRT STD POSTAGE & FEES PAID AGENCY NAME PERMIT NO. G-999	PRESORTED STANDARD AUTOCR POSTAGE & FEES PAID AGENCY NAME PERMIT NO. G-999	PRSRT STD AUTO POSTAGE & FEES PAID AGENCY NAME PERMIT NO. G-999
---	--	---

Note: "Standard" (or "STD") may also be used. These are only examples; not all possible variations are shown. When not in indicia, class or rate must be marked on mailpiece,

Package Services Official Mail:

POSTAGE & FEES PAID AGENCY NAME PERMIT NO. G-999	MEDIA MAIL POSTAGE & FEES PAID AGENCY NAME PERMIT NO. G-999	PRSRT BOUND PRINTED MATTER POSTAGE & FEES PAID AGENCY NAME PERMIT NO. G-999
--	--	---

Note: These are only examples; not all possible variations are shown. When not in indicia, class or rate must be marked on mailpiece, directly below or to the left of the indicia.

5.3.11 Optional Indicia Format

Permit imprint indicia may be prepared in a format other than the basic format described in [5.3.10](#), subject to these conditions:

- a. The rule that forms a box around the content of the indicia may be omitted if the content remains as specified in [5.3.6](#) through [5.3.9](#) and [Exhibit 5.3.10](#).
- b. Unless printed directly on an address label, the indicia content must be placed within a clear area no smaller than 1/2 inch high and 1/2 inch wide, no more than 1-1/2 inches below or left from the upper right corner of the mailpiece or of the address area when oriented to read the address, regardless of processing category or postage price claimed. If printed on an address label (including paper, adhesive, and multilayer sandwich labels), the space allowed

for the indicia content must be rectangular, large enough to ensure legibility of that content from a normal reading distance and to separate it from other information on the label, and located in the upper right corner of the label when oriented to read the address.

- c. No printing appears in the indicia other than that required or allowed under [5.3.6](#) through [5.3.9](#).
- d. Except as required to enclose the permit information, no printing appears above or to the right of the permit information when the indicia is printed directly on the mailpiece or within the address area or on the address label.
- e. Except for indicia printed on address labels, the permit information is printed in no smaller than 4-point type. In indicia printed on address labels under [5.3.11b](#), the permit information must be legible.
- f. Except as required to enclose the permit information, decorative designs intended to be part of the indicia design must appear below or to the left of the permit information in an area extending no farther than 4-1/2 inches to the left of the right edge, and 1-1/2 inches below the top edge of the mailpiece, address area, or address label, as applicable. Such designs must not resemble or imitate a postage meter imprint, postage stamp, postcard postage, or other postage payment method; and they must not include words, symbols, or designs used by the USPS to identify a class of mail, price of postage, or level of service, *unless* such elements are correctly used under the applicable standards for the mailpiece on which they appear and the corresponding postage and fees have been paid.
- g. All other applicable standards in [5.0](#) are met.

6.0 Payment of Postage

6.1 Basic Standards

The mailer is responsible for proper payment of postage. Postage on all mail must be fully prepaid at the time of mailing, except as specifically provided by standard for:

- a. Business reply mail (see [507.9.0](#)) and metered reply mail (see [4.4.2](#)) handled as business reply mail.
- b. Merchandise return service (see [507.11.0](#)).
- c. Certain mail sent by members of the Armed Forces (see [703.4.0](#)).
- d. Certain matter by or for the blind or handicapped (see [703.5.0](#)).
- e. Official mail (see [703.6.0](#) and [703.7.0](#)).
- f. Keys and identification devices returned to owners (see [123.1.6](#) and [133.1.7](#)).

6.2 Unpaid Mailable Matter for Private Delivery

If mailable matter without postage, intended for delivery by a private delivery company, is found in USPS collection boxes (or other receptacles for mail deposit), USPS facilities, or USPS mail processing operations, the company is contacted to

pick up the matter by the close of the next workday. If the company does not pick up the matter, it is returned to the sender, postage due. If the sender cannot be identified or refuses the matter, it is treated as dead mail.

6.3 Payment for Postage Due Mail

Customers must pay in cash for postage-due mail before the mail is delivered. If postage-due collections equal about \$10 or more every 60 days, payment may be made by advance deposit of money in a postage due account. Postage on quantity mailings found in private mailboxes is subject to 8.1.1. Government agencies using penalty mail must pay postage due through an OMAS postage due account. Government agencies may no longer use penalty meter strips or penalty mail stamps to pay postage due.

6.4 Advance Deposit Account

Mailers may choose to establish an advance deposit account(s) from which postage, per piece charges, and other fees are deducted. For certain extra services, an advance deposit account is required. Mailers may use a single advance deposit account to pay postage due charges for more than one extra service (e.g., business reply mail, merchandise return service, and bulk parcel return service).

6.5 Annual Accounting Fee for Extra Services

Except for accounts used solely to pay postage due for shortpaid mail, address correction notices, and undeliverable-as-addressed pieces returned to sender (e.g., return service requested), mailers must pay a separate annual accounting fee for each extra service paid through an advance deposit account. This fee covers the administrative cost of maintaining the account and provides the mailer with the accounting of all charges deducted from that account. The accounting fee is charged once each 12-month period on the anniversary date of the initial accounting fee payment. The fee may be paid in advance only for the next year and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment.

7.0 Computing Postage

7.1 General Standards

7.1.1 Determining Single-Piece Weight for Retail and Discount Mail

To determine single-piece weight in any mailing at single-piece prices, in a bulk mailing at Parcel Post, Media Mail, or Library Mail prices, or in any bulk price mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in any other bulk or presort price mailing, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

7.1.2 Expression of Numerical Values

For these standards, express:

- a. Piece counts in whole numbers.
- b. Weights in decimal pounds (e.g., 1.1250 pounds) rounded as shown below.

- c. Postage in decimal dollars (e.g., \$0.1625) rounded as shown below.
- d. Intermediate postage figures on all permit imprint and Periodicals statements (rounded off) to four decimal places. On all postage affixed statements (rounded off) to three decimal places. An intermediate postage figure is defined as follows: For First-Class Mail, Standard Mail, and Package Services mailings, any figure on any line of a postage statement, with the exception of the "Total Postage" line, is an intermediate figure. For Periodicals mailings, any figure on any line of a Form 3541, with the exception of the "Total Outside-County Postage," "Total In-County Postage," and "Total Postage" lines is an intermediate figure.
- e. Total postage figures (rounded off) to two decimal places. A total postage figure is defined as follows: For First-Class Mail, Standard Mail, and Package Services mailings any figure on a "Total Postage" line. For Periodicals mailings, any figure on a "Total Outside-County Postage," "Total In-County Postage," and "Total Postage" line.

7.1.3 Rounding Numerical Values

For these standards:

- a. *Round off* requires increasing by 1 the last digit to be kept if the digit to its right, which is not to be kept, is 5 or greater. If that digit is 4 or less, the last digit kept is unchanged (e.g., 3.376 rounded off to two decimal places is 3.38, 3.374 is 3.37).
- b. *Round up* requires increasing by 1 the last digit to be kept if there are any digits to its right, regardless of significance (e.g., rounding up either 3.3701 or 3.379 to two decimal places yields 3.38).

8.0 Insufficient or Omitted Postage

8.1 Insufficient Postage

8.1.1 Definition

Mail of any class, including mail indicating extra services (except Express Mail, Registered Mail, and nonmachinable First-Class Mail), that is received at either the office of mailing or office of address without enough postage is marked to show the total (rounded off) deficiency of postage and fees. Individual such pieces (or quantities fewer than 10) are delivered to the addressee on payment of the charges marked on the mail. For quantity mailings of 10 or more pieces, the mailer is notified so that the postage charges may be adjusted before dispatch.

8.1.2 Undeliverable and Refused Mail

Mail with insufficient postage that is refused by the addressee or otherwise undeliverable is:

- a. Returned to the sender with the reason for nondelivery "Returned for Additional Postage" if First-Class Mail with a return address. *The sender may affix the additional postage, cross out the reason for nondelivery, and remail the piece.*

604.8.1.3

- b. Returned to the sender and delivered when the sender pays the total deficient postage and additional postage for forwarding or return if other than First-Class Mail and with a return address.
- c. Treated as dead mail if it has no return address.

8.1.3 Nonmachinable Mail

Shortpaid nonmachinable First-Class Mail is returned to the sender for additional postage.

8.1.4 Adding to Original Postage

Postage stamps or meter stamps originally affixed to insufficiently prepaid mail are accepted in payment of postage to the amount of their face value when the mail is again presented for mailing.

8.1.5 Damaged Postage

When the cancellation impression shows that a postage stamp (or stamps) was wholly or partly lost, the piece is handled as if correct postage had been paid for the class and weight of the piece absent any evidence to the contrary.

8.1.6 Registered Mail With Insufficient Postage

If shortpaid Registered Mail is found in ordinary mail, with only the First-Class Mail price of postage paid, the piece is delivered to the addressee as ordinary First-Class Mail. If the amount of postage and fees affixed indicates that the piece was intended to be registered, the piece is priced as postage due and forwarded to the addressee through the Registered Mail. If shortpaid Registered Mail is found in the Registered Mail, the piece is delivered without the collection of postage due. The additional postage is collected from the sender.

8.1.7 Express Mail With Insufficient Postage

An insufficiently prepaid Express Mail shipment is never endorsed "Postage Due," and collection of deficient postage is never attempted from the addressee. For an Express Mail Next Day, Second Day, Military, or Same Day Airport Service item received at the office of mailing without sufficient adhesive or meter stamps, the mailer is contacted to correct the deficiency before dispatch. If postage is paid by an Express Mail corporate account or federal government "Postage and Fees Paid" indicia, and the mailer writes an incorrect postage and/or fees amount, the account is debited for the correct amount. For a Custom Designed Service item received at the office of mailing with an incorrect weight listed, and if postage is paid with adhesive or meter stamps, the mailer is contacted to correct the deficiency before dispatch. If postage is paid by an Express Mail corporate account or federal government "Postage and Fees Paid" indicia, the account is debited for the correct amount.

8.2 Omitted Postage**8.2.1 Handling Mail With Omitted Postage**

Matter of any class, including that for which extra services are indicated, received at either the office of mailing or office of address without postage, is endorsed "Returned for Postage" and is returned to the sender without an attempt at delivery. If a mail recipient attempts to return or forward the mail without paying additional postage when required, the mail is endorsed "Returned for Postage" and returned

to the recipient. If no return address is shown, or the delivery and return addresses are identical, or the delivery and return addresses are different but for the same person or organization, the piece is treated as dead mail.

8.2.2 Handling Unpaid Metered Reply Mail

Metered reply mail on which the mailer failed to imprint a meter stamp is treated as business reply mail (BRM). Such mail is delivered on payment of postage and the applicable business reply per-piece charge for basic BRM.

8.3 Mailable Matter Without Postage in or on Mail Receptacles

8.3.1 Penalty

Whoever knowingly and willfully deposits any mailable matter (such as statements of account, circulars, sale bills, or other like matter) on which no postage is paid, in any letterbox established, approved, or accepted by the Postmaster General for the receipt or delivery of mail matter on any route, with intent to avoid payment of lawful postage thereon, shall for each such offense be fined not more than \$300.00 (18 USC 1725).

8.3.2 Liability for Postage

Except for limited use by newspapers under [508.3.0](#), any mailable matter not bearing postage found in, upon, attached to, supported by, or hung from private mail receptacles described in [508.3.0](#) is subject to payment of the same postage if carried by mail.

8.3.3 Full Distribution

If there is a distribution of identical pieces to all or substantially all addresses on a route, only a representative number of pieces is returned to the delivery unit. Postage is computed as described in [8.3.4](#).

8.3.4 Partial Distribution

If there is a distribution of pieces to some, but not all, addresses on a route, pieces are returned to the delivery unit for use in computing the postage due. First-Class Mail prices are applied to matter that would require First-Class Mail postage if mailed. For other matter, if the piece weighs less than 16 ounces, the applicable single-piece First-Class Mail or Priority Mail price based on the weight of the piece is applied, or an applicable Package Services price is applied, whichever is lower. If the piece weighs 16 ounces or more, the Package Services price is applied.

8.3.5 Known Distributor

If there is reason to believe that a private delivery firm or an individual within the Post Office delivery area is responsible for the delivery, the local postmaster notifies that party of the number of pieces and the postage due. If, within 5 days after notice, the firm or individual agrees to pay the postage due, payment is accepted and the pieces are delivered to the addressees. The party paying the postage may choose to redeliver the pieces rather than have the USPS deliver them. If the pieces are found to have been removed from receptacles improperly, they are delivered without postage charge.

8.3.6 Unknown Distributor

If the party responsible for delivery is not known or if the firm requested fails to pay the postage, the pieces are returned to the publisher or manufacturer, postage due and endorsed to show they were found in or on the addressee's mailbox without postage. If a publisher or manufacturer gives the name and telephone number of a person to contact and guarantees postage payment, the pieces are redelivered to the addressees. If the publisher or manufacturer is unknown or refuses the pieces, the matter is treated as dead mail.

9.0 Refunds and Exchanges**9.1 Stamp Exchanges****9.1.1 USPS Fault**

The Post Office may correct mistakes in selling damaged, defective, or otherwise unserviceable stamps by exchanging stamps at full postage value.

9.1.2 Damaged in Customer's Possession

Stamps that are damaged or otherwise unusable for postage (because of humidity, moisture, or other causes) while in a customer's possession may be exchanged only for an equal number of stamps of the same denomination. Unusable stamps accepted from a customer under these conditions must be those on sale at Post Offices within 12 months before the transaction. Quantities of the same denomination over \$10 must be returned in the same configuration as when bought (i.e., sheets, coils, booklets). Each such transaction is limited to \$100 worth of postage from each customer.

9.1.3 Condition and Quantity

The stamps presented for exchange must be in substantially whole condition, with the denomination evident. If coils of stamps are partially stuck together and cannot be counted, the postmaster may accept the customer's estimate of the number of stamps left in the coil and give equal quantities in exchange.

9.1.4 Appeal

Any customer denied an exchange for damaged stamps may appeal the postmaster's decision to the Consumer Advocate, USPS Headquarters (see [608.8.0](#) for address).

9.1.5 Purchase Error

If a customer bought the wrong denomination stamps (or the wrong kind, size, or denomination envelope), they may be exchanged at full postage value. Only full panes of stamps, coils of stamps in the original sealed wrappers, full boxes of stamped envelopes, or original sealed packs of stamped cards may be exchanged. A customer exchanging \$250 or more of such stock must show proof of identity (e.g., a driver's license) and must present the stock for exchange to the postal unit from which his or her mail is delivered.

9.1.6 Exchange of Spoiled and Unused Postal Matter

Unusable and spoiled stamped envelopes or stamped cards, if uncanceled, and unused precanceled stamps and stamped cards, are exchanged for other postage-stamped paper. Only the buyer may exchange stamped envelopes or aerogrammes (airletter sheets) with a printed return address and stamped cards with any printed matter of the buyer. If there is no purchaser's printing, any responsible person may exchange them. These conditions apply:

- a. Stamped envelopes (mutilated no more than is necessary to remove contents): postage value plus value of postage added because of a price increase or for additional service.
- b. Unmutilated aerogrammes (airletter sheets): postage value minus \$0.01 for each aerogramme redeemed.
- c. Unmutilated single and double stamped cards: 85% of postage value, plus full value of postage added because of a price increase or for additional service. Either half of a double stamped card may be redeemed, if the double card is printed and cut for use as single cards. Unused double stamped cards printed for reply should not be separated but, if they are separated in error and the buyer presents both halves, the cards may be redeemed. Reply halves of double stamped cards returned to sender outside of the mail are not redeemable by the original buyer, even though the reply half received no postal service.
- d. Sheet stamped cards spoiled when cut to size: 85% of postage value plus full value of postage added because of a price increase or for additional service, if all cut sections are submitted.
- e. Stamps affixed to commercial envelopes and postcards: 90% of postage value. Envelopes and postcards must be in substantially whole condition and in lots of at least 50 of the same denomination and value.
- f. Unused precanceled stamps in full coils and in full sheets redeemed from precanceled permit holders: 90% of postage value.

9.1.7 Stamps Converted to Other Postage Forms

A customer may submit postage stamps for conversion to an advance deposit for permit imprint mailings, subject to these conditions:

- a. Only full panes of postage stamps (or coils of stamps in the original sealed wrappers) are accepted for conversion. Accepted stamps include commemorative stamps issued no more than 1 year before the requested conversion date or regular stamp issues not officially withdrawn from sale.
- b. A request for stamp conversions must be made in writing to the district manager of Customer Service and Sales in the district where the customer's Post Office is located. The customer's request must include:
- c. Name, denomination, quantity, and value of stamps for which conversion is requested.
- d. Name of the Post Office where the stamps were bought.
- e. Evidence of purchase of the stamps.

604.9.1.8

- f. The amount of postage applied to a permit imprint advance deposit account through conversion is the full face value of the stamps.
- g. The district manager may ask the customer to submit additional records to support the information in the request. After reviewing the documentation, the district manager approves or denies the request. The customer is notified when the conversion is approved. The postmaster is advised of the procedures for accepting the stamps and making the required accounting entries.
- h. No part of any amount applied to a permit imprint advance deposit account from the conversion of postage stamps is refundable in cash or by any other means.

9.1.8 Not Exchangeable

The following postage items are not exchangeable:

- a. Adhesive stamps, unless mistakes were made in buying, stamps were defective, stamps were affixed to commercial envelopes and postcards, or under [9.1.7](#).
- b. Stamps cut from stamped cards, stamped envelopes, or aerogrammes (airletter sheets).
- c. Parts and pieces of stamped cards.
- d. Stamped cards, stamped envelopes, and aerogrammes received for reply.
- e. Mutilated and defaced stamps.

9.2 Postage and Fee Refunds

9.2.1 Refund Standards for Postage and Fees

A refund for postage and fees may be made:

- a. Under the standards below if postage and retail or extra service fees are paid and no service is rendered, or if the amount collected was more than the lawful price.
- b. Under [9.3](#) for refund requests for postage evidencing systems and metered postage. Metered postage is printed by a postage evidencing system ([4.0](#)). Refunds may be requested for unused indicia, unused postage value remaining in a postage evidencing system, and the unused balance in a postage payment account.
- c. Under [9.4](#) for refund requests for postage made at the time of mailing.
- d. Under [2.0](#) for rejected personalized envelopes.
- e. Under the terms of a contract between the contract postal unit (CPU) and the USPS for unused postage printed by the CPU.

9.2.2 Ineligible Matter

The USPS is presumed at fault and no service is rendered in cases involving returned articles improperly accepted in either domestic or international service because of excess size or weight. Any mailer who customarily weighs and prices mail is expected to be familiar with basic standards. The USPS is not at fault if the mailer is required to withdraw articles from the mail before dispatch.

9.2.3 Torn or Defaced Mail

If First-Class Mail or Package Services is torn or defaced during USPS handling so that the addressee or intended delivery point cannot be identified, the sender may receive a postage refund. This applies only when the failure to process and/or deliver is the fault of the USPS. Where possible, the damaged item is returned with the postage refund.

9.2.4 Full Refund

A full refund (100%) may be made when:

- a. The USPS is at fault.
- b. Postage or fees are paid in excess of the lawful price.
- c. Service to the country of destination is suspended.
- d. Postage is fire-scarred while in USPS custody (including in the letterbox), and the mail is returned to sender without service.
- e. Special delivery stamps are mistakenly used to pay postage, and the mail is returned to the sender without service.
- f. Fees are paid for special handling, Certified Mail, Delivery Confirmation, or Signature Confirmation and the article fails to receive the extra service for which the fee is paid.
- g. Surcharges are mistakenly collected on domestic Registered Mail or collected over the proper amount, or represented by stamps affixed to matter not actually accepted for registration.
- h. Fees are paid for return receipt or for restricted delivery, and the USPS (through fault or negligence) fails to furnish the return receipt or its equivalent, or makes erroneous delivery or nondelivery.
- i. An annual presort mailing fee is paid for Presorted First-Class Mail, Standard Mail, Presorted Media Mail, or Presorted Library Mail or a destination entry mailing fee is paid for Parcel Select or Bound Printed Matter and no mailings are made during the corresponding 12-month period.
- j. Customs clearance and delivery fees are erroneously collected.
- k. Fees are paid for registry or insurance service on mail addressed to a country to which such services are not available, unless claim for indemnity is made.
- l. Express Mail is not delivered according to the applicable service standard. No refund is made if the mail was properly detained for law enforcement purposes (see *Administrative Support Manual 274*).

9.2.5 Intercepted Mail

When mail is returned at the sender's request or for a reason not the fault of the USPS, any difference between the amount paid and the appropriate surface price chargeable from mailing office to interception point and return is refunded.

9.2.6 Unallowable Refunds

The limits on refunds are not intended to prohibit payments for unused adhesive stamps and adhesive stamps affixed to unmailed matter in connection with an authorized marketing program. Refunds are not made for the following:

604.9.2.7

- a. An application fee to use permit imprints.
- b. Collect on delivery (COD), Express Mail insurance, insured, and registered fees after the USPS accepts the article, even if the article is later withdrawn from the mail.
- c. Unused adhesive stamps (may be exchanged under [9.1.1](#) through [9.1.5](#) in *Stamp Exchanges*).
- d. Adhesive stamps affixed to unmailed matter.

9.2.7 Applying for Refund

For refunds under [9.2](#), the customer must apply for a refund on Form 3533; submit it to the postmaster; and provide the envelope, wrapper, or a part of it showing the names and addresses of the sender and addressee, canceled postage and postal markings, or other evidence of postage and fees paid. Refunds for metered postage are submitted under [9.3](#).

9.2.8 Ruling on Refund Request

Refund requests are decided based on the specific type of postage or mailing:

- a. Refunds under [9.2](#). The local postmaster grants or denies refunds under [9.2](#). The customer may appeal an adverse ruling through the postmaster to the Pricing and Classification Service Center (PCSC) manager who issues the final agency decision.
- b. Dated metered postage, except for PC Postage systems, under [9.3](#). The postmaster at the licensing Post Office grants or denies requests for refunds for dated metered postage under [9.3](#). The licensee may appeal an adverse ruling within 30 days through the manager, Postage Technology Management, USPS Headquarters (see [608.8.0](#) for address), who issues the final agency decision. The original meter indicia must be submitted with the appeal.
- c. Undated metered postage under [9.3](#). The manager, business mail entry at the district Post Office overseeing the mailer's licensing Post Office, or designee authorized in writing, grants or denies requests for refunds for undated metered postage under [9.3](#). The customer may appeal a decision on undated metered postage within 30 days through the manager, business mail entry, or designee, to the PCSC manager who issues the final agency decision. The original meter indicia must be submitted with the appeal.
- d. PC Postage systems under [9.3](#). The system provider grants or denies a request for a refund for dated indicia printed by PC Postage systems under [9.3](#) using established USPS criteria. For dated PC Postage indicia only, the licensee may appeal an adverse ruling within 30 days through the manager, Postage Technology Management, USPS Headquarters, who issues the final agency decision. The original indicia must be submitted with the appeal.
- e. Optional procedure (OP) mailings. Mailer's request for a refund must be submitted to the manager, Business Mailer Support, USPS Headquarters (see [608.8.0](#) for address).

9.2.9 Semipostal Stamps

Customers may exchange or convert semipostal stamps for their postage value (i.e., the price of the stamps less the contribution amount) to the extent exchange or conversion of postage stamps is permitted under 9.0. The postage the customer exchanges or converts is equal to the First-Class Mail single-piece price in effect at the time of exchange. However, if the customer provides a receipt showing the date of purchase, the postage exchanged or converted is equal to the First-Class Mail single-piece price in effect at the time of purchase. The contribution amount is not refundable and is not included in the exchange or conversion value.

9.2.10 Business Reply Mail

A business reply mail (BRM) permit holder may request a credit or refund for postage affixed to returned BRM pieces. Only the value of the postage affixed may be credited or refunded. Refunds are not given for foreign postage affixed to BRM. To receive a refund for postage affixed to returned BRM pieces, the permit holder must submit a completed Form 3533 to the postmaster, documenting the excess postage payment for which a credit or refund is desired. The permit holder also must present to the designated office properly faced and banded bundles of 100 identical BRM pieces with identical amounts of postage affixed. A charge of \$35.00 per hour, or fraction thereof, is assessed for the workhours used to process the refund. With permission from the postmaster, a BRM permit holder may submit a bundle with fewer than 100 BRM pieces. Refunds are not given for any BRM or QBRM per piece charges, annual accounting fees, quarterly fees, or monthly maintenance fees.

9.3 Refund Request for Postage Evidencing Systems and Metered Postage

9.3.1 Unused Postage Value in Postage Evidencing Systems

The unused postage value remaining in a postage evidencing system when withdrawn from service may be refunded, depending upon the circumstance and the ability of the USPS to make a responsible determination of the actual or approximate amount of the unused postage value. If the postage evidencing system is withdrawn because of faulty operation, a final postage adjustment or refund will be withheld pending the system provider's report of the cause to the USPS and the USPS determination of whether or not a refund is appropriate and, if so, the amount of the refund. No refund is given for faulty operation caused by the licensee. When a postage evidencing system that is damaged by fire, flood, or similar disaster is returned to the provider, postage may be refunded or transferred when the registers are legible and accurate, or the register values can be reconstructed by the provider based on adequate supporting documentation. When the damaged system is not available for return, postage may be refunded or transferred only if the provider can accurately determine the remaining postage value based on adequate supporting documentation. The licensee may be required to provide a statement on the cause of the damage and to attest that there has not been reimbursement by insurance, or otherwise, and that the licensee will not seek such reimbursement. Refunds for unused postage value are granted as specified in 4.0 in accordance with the following procedures:

- a. All postage evidencing systems except for PC Postage systems. The postage evidencing system must be examined to verify the amount before any remaining funds are cleared from the meter, and a refund or credit is initiated for unused

604.9.3.2

postage value or additional money is collected to pay for postage value used, based on what is found. Licensees may also submit their own transaction records, if any, or a system-generated register as supporting documentation.

- b. PC Postage systems. The licensee must notify the provider to withdraw the system. To determine the remaining postage value on the PC Postage system, the licensee generates a refund request indicium for transmittal to the provider for verification. A refund can be issued only when the system's postal security device (PSD) is in the provider's possession. The USPS refunds the entire unused postage value remaining on the PSD for the user's system, but the refund is issued through the licensee's provider.

9.3.2 Unused, Dated Postage Evidencing System Indicia, Except PC Postage Indicia

Unused, dated postage meter indicia are considered for refund only if complete, legible, and valid. PC Postage indicia refunds are processed under [9.3.3](#). All other metered postage refund requests must be submitted as follows:

- a. The licensee must submit the request. The refund request must include proof that the person or entity requesting the refund is the licensee for the postage meter that printed the indicia. Acceptable proof includes a copy of the lease, rental agreement, or contract.
- b. The licensee must submit the request, along with the items bearing the unused postage, to the licensing Post Office. The items must be sorted by meter used and then by postage value shown in the indicia, and must be properly faced and bundled in groups of 100 identical items when quantities allow. The request is processed by the USPS. The postmaster approves or denies the refund request.
- c. The licensee must submit the refund request within 60 days of the date(s) shown in the indicia.
- d. When the unused metered postage is affixed to a mailpiece, the refund request must be submitted with the entire envelope or wrapper. The unused metered postage must not be removed from the mailpiece once applied.
- e. Indicia printed on labels or tapes not stuck to wrappers or envelopes must be submitted loose and must not be stapled together or attached to any paper or other medium. However, self-adhesive labels printed without a backing may be submitted on a plain sheet of paper.
- f. If a part of one indicium is printed on one envelope or card and the remaining part on one or more, the envelopes or cards must be fastened together to show that they represent one indicium.
- g. Refunds are allowable for indicia on metered reply envelopes only when it is obvious that an incorrect amount of postage was printed on them.
- h. The refund request must be submitted with Form 3533. A separate Form 3533 must be completed for each meter for which a refund is requested. All identifying information and all sections related to the refund requested must be completed. Charges for processing a refund request for unused, dated meter indicia are as follows:

1. If the total face value of the indicia is \$350.00 or less, the amount refunded is 90% of the face value. USPS may process the refund payment locally via a no-fee postal money order.
2. If the total face value is more than \$350.00, the amount refunded is reduced by a figure representing \$35.00 per hour, or fraction thereof, for the actual hours to process the refund, with a minimum charge of \$35.00. The postmaster will submit the approved Form 3533 to the USPS Imaging and Scanning Center for payment processing through the Accounting Service Center.

9.3.3 Unused, Dated PC Postage Indicia

Unused, dated PC Postage indicia are considered for refund only if complete, legible, and valid. The refund request must be submitted as follows:

- a. Only the PC Postage licensee may request the refund. The licensee must submit the request, along with the items bearing the unused postage, to the system provider. The request is processed by the provider, not the USPS.
- b. The licensee must submit the refund request within 30 days of the date(s) shown in the indicia.
- c. The refund request must be submitted as required in [9.3.2d.](#) through [9.3.2g.](#)
- d. The provider may, at its discretion, charge for processing a refund request.

9.3.4 Undated Metered Postage

Unused, undated postage evidencing system indicia are considered for refund only if complete, legible, and valid. The refund request must be submitted as follows:

- a. Only the meter licensee or the commercial entity that prepared the mailing for the licensee using the licensee's meter may request the refund. The request must include a letter signed by the meter licensee or the commercial entity that prepared the mailing for the licensee explaining why the mailpieces were not mailed.
- b. The minimum quantity of unused, undated metered postage that may be submitted for refund is 500 pieces from a single mailing or, as an alternative, indicia with a total postage value of at least \$500 from a single mailing.
- c. The meter licensee, or the commercial entity that prepared the mailing for the licensee using the licensee's meter, must submit the request, along with the items bearing the unused postage and the required documentation, to the manager, business mail entry at the district Post Office overseeing the mailer's licensing Post Office, or to a designee authorized in writing. The manager or designee approves or denies the refund request.
- d. The request must include the items bearing the unused postage, sorted by meter used and then by postage value shown in the indicia. The items must be properly faced and bundled in groups of 100 identical items, when quantities allow, and must meet the requirements of [9.3.2d.](#) through [9.3.2g.](#)
- e. The request must be submitted within 60 days of the date the mail was metered. Supporting documentation must be submitted to validate the date. Examples of supporting documentation include the job order from the

604.9.3.5

customer, production records, the USPS qualification report, spoilage report, and reorders created report, as well as customer billing records, postage statements, and a sample mailpiece.

- f. The refund request must be submitted with Form 3533. All identifying information and all sections related to the refund requested must be completed. When more than one meter was used to prepare the mailing, a separate Form 3533 must be completed for each.
 1. If the total face value of the indicia for a single mailing submitted for refund is \$350.00 or less, the amount refunded is 90% of the face value. USPS may process the refund payment locally via a no-fee postal money order.
 2. If the total face value of the indicia for a single mailing submitted for refund is more than \$350.00, the amount refunded is reduced by a figure representing \$35.00 per hour, or fraction thereof, for the actual hours to process the refund, with a minimum charge of \$35.00. The manager, business mail entry will submit the approved Form 3533 to the USPS Imaging and Scanning Center for payment processing through the Accounting Service Center.

9.3.5 Ineligible Metered Postage Items

The following metered postage items are ineligible for refunds:

- a. Reply envelopes or cards paid at the proper postage price.
- b. Indicia printed on labels or tape removed from wrappers or envelopes.
- c. Loose indicia printed on labels or tape that have been stapled together or attached to paper or other medium in any manner.
- d. Indicia lacking identification of the licensing Post Office or other required information.
- e. Indicia printed on mail dispatched and returned to sender as undeliverable as addressed, including mail marked "no such Post Office" and mail addressed for local delivery and returned after directory service was given or delivery was attempted.

9.3.6 Refunds for Metered Postage

Refunds for indicia amounts already printed on an envelope or label but not mailed are made in accordance with [9.3](#).

9.3.7 Rounding Numerical Values

Any fraction of a cent in the total to be refunded is rounded down to the whole cent (e.g., \$4.187 is rounded to \$4.18).

9.4 Value Added Refunds

9.4.1 Definition of Value Added Refund

Subject to the standards in [9.4](#), a *presenter* (i.e., the mailer or other party, such as a presort service bureau), who prepares letter-size First-Class Mail or Standard Mail under [9.4.12](#) and [9.4.13](#) for their customers and presents it to the USPS in their behalf, may request a *value added refund* (VAR) for postage affixed to mail in excess of the price applicable to that mail when presented to the USPS. A presenter must

be authorized by the USPS to seek the refund. Any refund is issued to the presenter, and the disposition of any such refund is a private matter between the presenter and the presenter's customer.

9.4.2 Application

The presenter must make a written application to the postmaster serving each location where VAR mailings are to be deposited, verified, and paid. The application must describe the presenter's mail preparation system and the documentation that it can produce. The application must also show that the presenter can produce the postage statements and the refund documentation required by 9.4.17. The postmaster forwards the application and supporting documentation for approval to the Business Mailer Support manager, USPS Headquarters.

9.4.3 Mailer System

Eligibility to submit requests for VARs requires that the presenter process and document mail through a fully automated mail sorting system. The system must include barcoding equipment (e.g., multiline optical character readers) to read the address information and determine the correct ZIP+4 code; an ink jet or laser printer to apply the correct POSTNET barcode in the required location; and a barcode reader (BCR) to read the POSTNET barcode, verify it for accuracy, and sort the mailpiece to the correct location.

9.4.4 Presenter Agreement

In applying for authorization to make VARs, the presenter agrees:

- a. That verification samples taken by the USPS represent the entire mailing and are to be used to adjust the total refund amount requested.
- b. To provide the USPS with advance written notice of plans for system changes that affect the calculation of postage, amount of refund, generation of required documentation, or mail presorting.
- c. To cooperate with the USPS during mail verification or system audits, and to process sampled mail through barcode readers (BCRs) when requested.

9.4.5 Authorization

If the application is approved, an authorization to make refund requests remains in effect until such time as the Business Mailer Support manager or the mailer cancels the agreement. If Postal Service periodic reviews or mailer supplied information demonstrates a need for a modification, the authorization will be modified, with concurrence by the Business Mailer Support manager and the mailer.

9.4.6 Appeal

If the application is denied, the presenter may file a written appeal within 15 days through Business Mailer Support, USPS Headquarters, to the Marketing and Technology Channel Management manager, who issues the final agency decision.

9.4.7 Suspension

The Business Mailer Support manager may suspend an authorization after determining that the presenter does not meet the standards in 9.4.

604.9.4.8

9.4.8 Cancellation

The Business Mailer Support manager may cancel an authorization for any of these reasons:

- a. The presenter consistently provides incorrect information and is unwilling or unable to correct the problem.
- b. The presenter continually fails to meet the standards in [9.4](#).
- c. No mailings are made under these procedures during any 12 consecutive months.

9.4.9 Appeal of Cancellation or Suspension

A cancellation or suspension takes effect 15 days from the presenter's receipt of the notice unless, during that time, the presenter files a written appeal with the Business Mailer Support manager, USPS Headquarters, stating why the authorization should not be canceled or suspended. If the manager upholds the action, the appeal is forwarded to the Marketing and Technology Channel Management manager, USPS Headquarters, who issues the final agency decision. A final cancellation takes effect 15 days after receipt by the presenter.

9.4.10 Form 8096 Required

An original PS Form 8096 must be completed and signed by each of the presenter's customers whose metered pieces are included in the mailing that is eligible for a VAR. A list of those customers must be on file with the postmaster where the mailings are deposited for acceptance and payment. If postage is affixed to the pieces using a postage evidencing system by an intermediate agent (not the presenter of the mailing) for the owner of the pieces, a signed Form 8096 must be on file from the agent whose postage evidencing systems were used to affix the postage. Refund requests are denied if all required Forms 8096 are not provided.

9.4.11 Form 8096 Not Required

Form 8096 is not required for a customer whose mail is metered by the presenter with the presenter's own postage evidencing system. In such cases, the presenter must provide the Post Office where it submits refund requests with a list, in ascending numeric order, of its own postage evidencing system serial numbers and those of any intermediate agent used for affixing postage to the pieces included in the mailing.

9.4.12 First-Class Mail

If a VAR request is submitted when a First-Class Mail mailing is presented to the USPS, each piece in the mailing must be:

- a. Letter-size and weigh less than the applicable maximum weight for automation price mail as required in [201.3.4](#).
- b. Part of an automation price mailing prepared by the presenter.
- c. Metered by the presenter or the presenter's customer at the Presorted First-Class Mail or automation prices applicable to a piece of that weight, including the full postage for the second and third ounces, if applicable.

9.4.13 Standard Mail

If a VAR request is submitted when a Standard Mail mailing is presented to the USPS, each piece in the mailing must be:

- a. Letter-size and weigh less than the applicable maximum weight for automation price mail as required in [201.3.5](#).
- b. Part of an automation price mailing prepared by the presenter.
- c. Metered by the presenter or the presenter's customer at a nonautomation price or at any automation minimum per piece price. Pieces for each entry must be prepared as a separate mailing if the destination entry prices are claimed.

9.4.14 Criteria for Mailing

A mailing for which a VAR request is submitted must meet these criteria:

- a. The presenter must process the mail for each customer so that the price of postage affixed on each piece can be documented by customer, unless otherwise authorized by Business Mailer Support, USPS Headquarters, and price category.
- b. Documentation must be kept showing internal quality control procedures done for each mailing submitted for which a VAR is claimed.
- c. Mail must be prepared by the standards corresponding to the First-Class Mail or Standard Mail price claimed.
- d. The presenter must be authorized by Business Mailer Support to submit Standard Mail mailings that contain both Regular and Nonprofit price pieces under the applicable standards.
- e. Each piece in the mailing for which barcodes are applied by an MLOCR must bear an automation marking that also describes the method of postage payment and the price of postage affixed for metered and precanceled stamp mail or other postage information for permit imprint mail as described in [705.5.0, First-Class Mail or Standard Mail Mailings With Different Payment Methods](#).

9.4.15 Postage Statement

The presenter must provide a complete and accurate postage statement with each mailing annotated to show the presort option used to prepare that mailing, and reporting postage data based on the price category for which each piece qualifies when presented to the USPS.

9.4.16 Applying for Refund

To request a VAR, Form 3533 and supporting documentation as described below must be provided with the corresponding mailing at the time of mailing. After the time of mailing, refund applications are not considered. The entry office postmaster pays refunds weekly or on another schedule agreed to with the mailer.

9.4.17 Documentation for Mailing

Mailers are required to submit or generate the following reports:

604.9.5

- a. Each mailing must be accompanied by all of the following documentation to enable the VAR request and the specific and efficient USPS verification of that request:
 1. Form 3533, if a net VAR refund is due.
 2. The applicable postage statement.
 3. The USPS qualification report in standardized format detailing by ZIP Code the number of pieces qualifying for each price by presort level. If plant-verified drop shipment (PVDS) is used for Standard Mail, a separate USPS qualification report must be generated for each entry destination.
 4. The USPS Summary ZIP Destination report in one of two standardized formats that lists by tray destination and price category: each mail category, postage payment type, weight and price affixed (report all postage affixed First-Class Mail pieces as weighing one ounce); number of pieces; dollar amount of postage affixed to those pieces; cumulative postage affixed; total postage; net postage due; cumulative postage due; and a running total of the number of pieces. If plant-verified drop shipment (PVDS) is used for Standard Mail, a separate USPS Summary ZIP Destination report must be generated for each entry destination. This report is not required if there is only one metered price in the mailing. Business Mailer Support, USPS Headquarters, may authorize submission of only portions of this report.
 5. The USPS Postage Summary in a standardized format. This report shows, by type of payment method, the total postage claimed for all pieces in the mailing by price level and the total postage affixed by price level. It also shows a grand total summary of postage affixed, postage claimed, and total postage due. If plant-verified drop shipment (PVDS) is used for Standard Mail, a separate USPS Postage Summary report must be generated for each entry destination.
 6. Other documentation that may be required by other standards for the price claimed.
- b. The USPS Customer Mail Report must be generated for each mailing, but is required to be submitted to the USPS only when requested by USPS personnel for the resolution of errors (shortpaid and potential MLOCR profiling) detected in a specific mailing. The Customer Mail Report must list each customer by name and provide the following information about their mail: price affixed, mail category including postage payment type, weight, total postage, postage affixed, number of pieces, cumulative number of pieces, number of pieces rejected, and total pieces fed.

9.5 Express Mail Postage Refund

9.5.1 Who May Apply

A claim for a refund for Express Mail postage may be made only by the mailer (the sender of an Express Mail item or the holder of the Express Mail Corporate Account used to pay for postage).

9.5.2 Conditions for Refund

A refund request must be made within 90 days after the date of mailing as shown in the “Date In” box on Label 11. Except as provided in [114.3.1](#), a mailer may file for a postage refund only under one of the following circumstances:

- a. The item was not delivered or made available for claim as guaranteed under the applicable service purchased.
- b. The item was not delivered or made available for claim by the guaranteed delivery time applicable to the service purchased, and delivery was not attempted by the guaranteed delivery time applicable to the service purchased.

9.5.3 Refunds Not Given

A refund claim will not be given if the guaranteed service was not provided due to any of the circumstances in [114.3.1](#).

9.5.4 How to Apply for a Refund

The mailer must complete Part I of Form 3533 in duplicate and submit it, along with the original customer copy of Label 11, to any Post Office.

9.5.5 Immediate Refund

If the USPS can determine immediately that the mailer is entitled to a refund and the Express Mail item had postage affixed, then the USPS refunds the postage immediately in cash or with a no-fee money order.

9.5.6 Deferred Refund

If the USPS cannot determine immediately that the mailer is entitled to a refund, then the USPS researches the application and, if appropriate, issues a refund to the mailer within 5 business days.

9.5.7 Refunds Through a Corporate or Agency Account

If the USPS determines that the mailer is entitled to a refund and postage was paid through an Express Mail Corporate Account or a federal government agency account, then the USPS refunds the postage by issuing a credit to that account within 5 business days.

10.0 Revenue Deficiency**10.1 General****10.1.1 Definition of Revenue Deficiency**

Revenue deficiency means a shortage or underpayment of postage or fees. Revenue deficiencies are generally assessed by the postmaster or manager, Business Mail Entry, who issues a written notification to the customer citing the amount of the deficiency and the circumstances.

10.1.2 Appeal of Ruling

Except as provided under [10.2](#) and [703.1.0, Nonprofit Standard Mail](#), a mailer may appeal a revenue deficiency assessment by sending a written appeal within 30 days of receipt of the notification to the appropriate postmaster or manager in [10.1.2a](#) through [10.1.2c](#). In all cases, the mailer may be asked to give more information or

documentation to support the appeal. Failure to do so within 30 days of the request is grounds for denying an appeal. Any decision that is not appealed as prescribed becomes the final agency decision. Mailers may send appeals as follows:

- a. To the district manager, Finance, for revenue deficiencies for fees. The district manager, Finance, issues the final USPS decision.
- b. To the postmaster or manager, Business Mail Entry, for revenue deficiencies for postage. The postmaster or manager, Business Mail Entry, forwards the appeal to the PCSC manager, who issues the final agency decision.
- c. To the manager, Mailing Standards (see [608.8.0](#) for address), if the PCSC manager first assessed the deficiency. The manager, Mailing Standards issues the final agency decision.

10.2 Nonprofit Standard Mail

10.2.1 Assessment and Appeal

A revenue deficiency may be assessed in the amount of the unpaid postage against any person or organization that mailed, or caused to be mailed, ineligible matter at the Nonprofit Standard Mail prices in violation of [703.1.0](#). Nonprofit mailers have two levels of appeal. They may appeal revenue deficiency assessments as follows:

IF THE INITIAL REVENUE DEFICIENCY ASSESSMENT WAS MADE BY:	FIRST-LEVEL APPEAL	SECOND-LEVEL APPEAL AND FINAL USPS DECISION
Postmaster or manager, Business Mail Entry	PCSC	Manager of Mailing Standards
PCSC	Manager of Mailing Standards (see 608.8.0 for address)	Vice President, Pricing and Classification (see 608.8.0 for address)

All appeals must be submitted in writing within 30 days of the previous USPS decision. Any decision that is not appealed as prescribed becomes the final agency decision; no appeals are available within the USPS beyond the second appeal.

10.2.2 Collection

Any deficiency assessed under [10.2.1](#) that is found to be due and payable to the USPS in the final USPS decision must be paid promptly. If the USPS does not receive payment within 30 days, the USPS may deduct from the violator's trust account or any other funds in USPS possession any deficiencies incurred within 12 months of the date of the final mailing on which the deficiency was assessed.

607 Mailer Compliance and Appeals of Classification Decisions

Overview

- [1.0 Mailer Compliance With Mailing Standards](#)
- [2.0 Rulings on Mailing Standards](#)

1.0 Mailer Compliance With Mailing Standards

1.1 Mailer Responsibility

A mailer must comply with all applicable postal standards. Despite any statement in this document or by any USPS employee, the burden rests with the mailer to comply with the laws and standards governing domestic mail. For mailings that require a postage statement, the mailer certifies compliance with all applicable postal standards when signing the corresponding postage statement. Questions on mail classification and special mail services may be directed to local USPS representatives (e.g., business mail entry managers). The Pricing and Classification Service Center (PCSC) can help local Post Offices answer customer questions on mailing standards (see [608.8.4](#) for address or telephone number).

1.2 Postage Payment

A permit imprint, bulk, or other discount price mailing is accepted after an examination of the mailing and the accompanying postage statement prepared by the mailer. A USPS employee's signature on the postage statement and the subsequent acceptance of the mailing do not constitute verified accuracy of that statement, and do not limit the ability of the USPS to demand proper payment after acceptance when it becomes apparent such payment was not made.

1.3 Request for Exception to Standards

To the extent that postage prices, fees for mail services, and basic mail classification and eligibility are prescribed by federal statute or the Domestic Mail Classification Schedule, the USPS is not authorized to waive or except the corresponding DMM standards. Postmasters or managers at Post Offices, district or area offices, and other field facilities may not suspend or grant any waiver or exception to standards established by the USPS (e.g., regarding mail preparation) unless *specifically* authorized by the DMM. Any mailer's request for an exception to DMM standards must be referred to the PCSC (see [608.8.4](#) for address and telephone number).

2.0 Rulings on Mailing Standards

2.1 Local Decision

A mailer who disagrees with a classification decision by a local Post Office, whether on a pending or a proposed mailing, may send a written appeal to the postmaster within 30 days. The appeal is forwarded to the Pricing and Classification Service

607.2.2

Center (PCSC). The PCSC issues the final agency decision. Only the PCSC manager may rule on an appeal or initial request for a ruling on an exception to a USPS standard in the DMM.

2.2 Expedited Oral Decision

A mailer who receives an adverse ruling from a Post Office, whether on a pending or a proposed mailing, may ask the PCSC manager to provide an expedited oral decision on appeal. This request for an expedited appeal may be made by telephone. The PCSC manager will determine whether the appeal or individual questions in the appeal can be decided on an expedited basis and, if so, will advise the mailer of the determination and confirm it in writing.

2.3 Classification While Appeal Pending

Pending resolution of an appeal, the mailer may, by a letter to the local postmaster, request to mail under a deposit arrangement. The mailer must deposit with the postmaster enough funds to cover postage at the higher price. If the appeal is upheld, the difference between the amount deposited and a lower price determined to be appropriate is returned to the mailer. If the appeal is denied, the deposit is not returned. If a balance remains in the deposit after the higher price postage is deducted, the balance is refunded at the mailer's request.

2.4 Decisions on National Rulings

The manager, National Customer Rulings makes mail preparation, mailpiece design, and price eligibility decisions for customers in strategic industries as appropriate. Any mail classification decision made initially by the manager, National Customer Rulings may be appealed within 15 days to the manager, Pricing and Classification Service Center, who will issue the final agency decision.

2.5 PCSC Decision

Any mail classification decision made initially by the PCSC manager may be appealed within 15 days to the manager, Mailing Standards (see [608.8.0](#) for address), who has sole authority to render a decision on such appeals.

2.6 Corresponding Standards

Rulings and appeals concerning revenue deficiencies (on past mailings), refunds, or applications for various mailing privileges, prices, or authorizations, are subject to the corresponding standards.

608 Postal Information and Resources

Overview

- 1.0 About the Domestic Mail Manual
- 2.0 Domestic Mail
- 3.0 Post Offices and Holidays
- 4.0 Philatelic (Stamp Collecting) Services
- 5.0 Private Express Statutes
- 6.0 Complaints and Postal Law Violations
- 7.0 Trademarks and Copyrights of the USPS
- 8.0 USPS Contact Information

1.0 About the Domestic Mail Manual

1.1 Content of the DMM

Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM) contains the basic standards of the United States Postal Service (USPS) governing its domestic mail services; descriptions of the mail classes and extra services and conditions governing their use; and standards for price eligibility and mail preparation. Domestic mail is classified by size, weight, content, service, and other factors.

1.2 Copies of the DMM

The DMM is distributed to selected Post Offices and is available online on Postal Explorer (pe.usps.com). Copies of the DMM may be inspected during normal business hours at USPS Headquarters; area and district offices. A copy is also filed at the Office of the Federal Register, National Archives and Records Administration. The public may buy copies by subscription from the Superintendent of Documents, U.S. Government Printing Office (see [8.1](#) for address).

1.3 Revisions to the DMM

USPS may change the standards in the DMM. Substantive revisions are published in the *Postal Bulletin* and, when appropriate, the *Federal Register*.

1.4 Terms in the DMM

Terms in the DMM referring to the singular also apply to the plural, unless the context indicates otherwise. The term *postmaster* also applies to an officer-in-charge if the postmaster position is vacant and, in district host cities, to the district manager.

608.2.4

2.0 Domestic Mail

2.1 Definition of “Domestic”

Domestic mail is mail transmitted within, among, and between the United States of America, its territories and possessions, Army Post Offices (APOs), fleet Post Offices (FPOs), and the United Nations, NY. For this standard, the term “territories and possessions” comprises the following:

American Samoa

Manua Island, Swain’s Island, Tutuila Island

Guam

Northern Mariana Islands, Commonwealth of the

Rota Island, Saipan Island, Tinian Island

Puerto Rico, Commonwealth of

U.S. Virgin Islands

St. Croix Island, St. John Island,

St. Thomas Island

Wake Atoll

Wake Island

2.2 Mail Treated as Domestic

Mail originating in the United States of America, its territories and possessions, APOs, FPOs, and the United Nations, NY, for delivery in the Freely Associated States, and mail originating in the Freely Associated States for delivery within, among, and between the Freely Associated States and the United States of America, its territories and possessions, APOs, FPOs, and the United Nations, NY, is treated as if it were domestic mail. The term “Freely Associated States” comprises the following:

Marshall Islands, Republic of the

Ebeye Island

Kwajalein Island

Majuro Island

Micronesia, Federated States of

Chuuk (Truk) Island

Kosrae Island

Pohnpei Island

Yap Island

Palau, Republic of

Koror Island

2.3 International Mail

International mail is mail addressed to or received from foreign countries, except under 2.2. Provisions for international mail are published in the *International Mail Manual*.

2.4 Customs Forms Required

Regardless of contents, all Priority Mail weighing 16 ounces or more sent from the United States to ZIP Codes 96910-44, 96950-52, 96960, 96970, and 96799, and all Priority Mail sent from these ZIP Codes to the United States, must bear customs Form 2976-A. If Form 2976-A will not fit on the address side of the mailpiece,

Form 2976 must be used. This mail must be presented to an employee at a Post Office, to a letter carrier when using Click-N-Ship with Carrier Pickup, or to a Postal Service employee designated by the postmaster.

3.0 Post Offices and Holidays

3.1 Management of Post Offices

3.1.1 Establishment of Post Offices

The USPS establishes and maintains Post Offices, stations, and branches for customer convenience.

3.1.2 Closing or Consolidation of Post Offices

Under 39 U.S. Code (USC) 404(b), any decision to close or consolidate a Post Office must be based on certain criteria. These include the effect on the community served; the effect on employees of the Post Office; compliance with government policy established by law that the USPS must provide a maximum degree of effective and regular postal services to rural areas, communities, and small towns where Post Offices are not self-sustaining; the economic savings to the USPS; and other factors that the USPS determines necessary. In addition, certain mandatory procedures apply.

3.1.3 Procedures for Post Offices

The *Postal Operations Manual* contains USPS rules for discontinuing, consolidating, or suspending service at an existing Post Office or other postal facility; changing a Post Office or other postal facility name; setting public business hours of postal facilities; and using bulletin boards and handling lost articles found in public areas of postal facilities.

3.1.4 Military Post Offices

Military Post Offices (MPOs) are branches of a U.S. civil Post Office, operated by the Army, Navy, Air Force, or Marine Corps to serve military personnel overseas or aboard ships. The term includes Army Post Offices (APOs) for the U.S. Army and the U.S. Air Force and fleet Post Offices (FPOs) for the U.S. Navy and the U.S. Marine Corps. MPOs provide postal service for military personnel where the U.S. civil postal service does not operate and a military situation requires the service. MPOs are established or discontinued by the USPS only on request of the military department that operates them. Notice of these actions is published in the *Postal Bulletin*. Military Post Offices do not verify and accept bulk or discounted-price mail; such mailings must be deposited at (nonmilitary) U.S. Post Offices.

3.2 Holiday Service

[Exhibit 3.2a](#) and [Exhibit 3.2b](#) shows the national holidays observed by the USPS and the service levels provided on those holidays for retail window, Post Office box, firm call, delivery, and collection services.

- a. Holidays widely observed:

608.3.2

Preceding Day	Normal	Normal	Normal	Normal	Normal	Normal	Normal

1. When a holiday is observed on Monday and no residential collection is scheduled on Sunday, a full residential collection may be provided on the Monday holiday. Consecutive days without collections should be avoided.

b. Holidays not widely observed:

Exhibit 3.2b Holidays Not Widely Observed

Martin Luther King, Jr.'s Birthday; Presidents Day; Columbus Day; and Veterans Day

Day of Holiday and Surrounding Days	RETAIL WINDOW	P.O. BOX	FIRM CALL	DELIVERY SERVICES			COLLECTION SERVICES
				Business	Residential	Express Mail	
Saturday	Normal	Normal	Normal	Normal	Normal	Normal	Normal
Sunday	None	Normal	None	None	None	Normal	None
Monday (holiday)¹	Limited	Sunday	Limited	None	None	Holiday	Time decal ²

1. Veterans' Day, November 11, is the only movable holiday in the group of holidays designated as not widely observed; the other three holidays listed in section B are always observed on Mondays. When Veterans' Day falls on any day except Sunday, the services provided on that holiday are the same as those shown for Monday. When Veterans' Day falls on Sunday, the service levels are the same as those shown for Sunday; the USPS, however, observes the holiday on Monday and treats it as a Monday holiday.

2. When a holiday is observed on Monday and no residential collection is scheduled on Sunday, a full residential collection may be provided on the Monday holiday. Consecutive days without collections should be avoided.

4.0 Philatelic (Stamp Collecting) Services

4.1 Basic Standards

4.1.1 Philatelic Policy

A single national USPS policy governs postage stamps and postal stationery, including their release, sale, and discontinuance.

4.1.2 Stamp Subjects

Subjects for commemorative postage stamps and postal stationery may be proposed by the public through correspondence to the Citizens' Stamp Advisory Committee (see 8.1 for address). The Committee reviews suggestions and makes recommendations to the postmaster general, who makes the final selections.

4.1.3 Philatelic Availability

Stamps, postal stationery, and philatelic products are sold at various types of postal retail facilities. Post Offices establish special temporary retail stations to provide philatelic services and to sell commemorative stamps and philatelic products at activities of significant public or philatelic interest. Temporary philatelic stations may be authorized by the postmaster. Under specific circumstances, the USPS may limit or set conditions on the purchase of stamps and other forms of postage or postal stationery.

4.1.4 Philatelic Mail Orders

Mail orders for postage stamps and other philatelic items must be directed to Stamp Fulfillment Services (see 8.1 for address). Post Offices do not fill mail orders for stamps and other philatelic items other than orders under the stamps-by-mail program and for locally precanceled stamps. Customers must provide a self-addressed stamped envelope for the return of precanceled stamps.

4.1.5 Philatelic Postmarking

Postmarking for philatelic (stamp collecting) purposes is provided at the request of collectors or cover servicers. The *Postal Operations Manual* contains USPS policy on philatelic postmarking, including cancellation devices, types of postmarks or cancellations, first day covers, and service conditions.

4.2 Special Cancellations

4.2.1 Description of Special Cancellations

Special cancellations are inkjet cancellations in which a caption publicizing an event is used to cancel mail. Special cancellations may be used only in Post Offices with 190 revenue units for canceling large volumes of mail. Special cancellations are authorized only if the scheduled observance is for a national purpose for which Congress has made an appropriation, or is of general public interest and importance. Special cancellations are approved for a definite period not to exceed 6 months, and must not be conducted for private gain or profit.

4.2.2 Prohibitions for Special Cancellations

Special cancellations are not authorized for events of interest primarily to a particular local group; for fraternal, political, religious, service, commercial, or trade organizations; for campaigns or events promoting the sale or use of private products or services; for idea or slogan promotions not directly connected with the event of

608.4.2.8

general public interest and importance; for Post Office anniversaries; for recruitment programs; or for events that occur when all canceling machines in the Post Office are scheduled for other special cancellations.

4.2.3 Applying to Use Special Cancellations

Submit a written letter of request, on the requesting organization's letterhead, to the manager of Mailing Standards (see 8.1 for address) at least 4 months before the special cancellation will be used. The letter must include the following information:

- a. The name, address, and telephone number of the sponsor.
- b. Advance promotional materials that include a complete description and schedule of the event.
- c. Evidence that the event is not conducted for private gain or profit.
- d. The wording of the special cancellation, which must be standardized and approved by the sponsor's national headquarters. Space available for the wording is limited to three lines of not more than 20 letters, numbers, or spaces each. Illustrations or designs cannot be used. The wording must directly reflect the event to be commemorated.
- e. The Post Office name(s) where the cancellation is to be used.
- f. The requested time period of use.

4.2.4 Sponsor Payment for Special Cancellations

The sponsor must pay the costs incurred for installing and maintaining the special cancellation.

4.2.5 Time Limit on Use of Special Cancellations

Use of a special cancellation may not exceed 6 months. A special cancellation approved on an annual basis is limited to one 60-day period for each year. A request for reuse of recurring annual cancellations must be submitted 4 months before the date the cancellation will be used again. For national cancellations, the national sponsor may submit a single request.

4.2.6 Revocation of Special Cancellations

The USPS may curtail or revoke the use of any special cancellation when it is necessary to use special postmarking for USPS purposes.

4.2.7 Information about Special Cancellations

More information about special cancellations is in the *Postal Operations Manual*.

4.2.8 Mail Submitted for Special Cancellations

A mailer must affix First-Class Mail postage to mail that the mailer wants canceled with a special cancellation. The mail must bear a complete address. Stamps issued by foreign countries are not permitted on the mail. Mail bearing the special cancellation will not be enclosed in another envelope for return even if a postage-paid envelope is provided by the customer. Damaged envelopes canceled with a special cancellation are not replaced.

5.0 Private Express Statutes

5.1 Private Express Statutes

5.1.1 Legal Foundation

By the laws known as the Private Express Statutes, Congress has generally conferred on the USPS the exclusive right to carry letters for others over post routes. USPS regulations under the Private Express Statutes are in the Code of Federal Regulations, 39 CFR 310 and 320, as amended by final rules published in the *Federal Register*. These regulations take precedence over all prior rulings and USPS publications. Copies of the regulations are available from the manager of the Pricing and Classification Service Center (PCSC) (see 8.4 for address).

5.1.2 Definition of a Letter for Private Express

For the Private Express Statutes, a *letter* is a message directed to a specific person or address and recorded in or on a tangible object. A *message* consists of any information or intelligence that can be recorded on tangible objects including, but not limited to, paper in sheet or card form, recording disks, and magnetic tapes. Certain matter is excluded from the definition of letter, e.g.: telegrams; checks and certain other instruments shipped to, from, or between financial institutions; newspapers; and periodicals. The regulations detail exclusions.

5.1.3 Postage for Private Express

If the proper postage is paid, letters may be privately carried without violating the Private Express Statutes. The regulations detail compliance. Under certain circumstances, letters may be privately carried without paying postage. The principal exceptions cover letters sent with, and related in all substantial respects to, some part of the cargo or to the ordering, shipping, or delivering of the cargo; letters carried by the senders or the recipients, or by their regular salaried employees; and letters carried to or from a postal facility where they are to be or have been carried in the mail. The regulations detail exceptions.

5.1.4 Suspensions of Private Express Statutes

Limited suspensions of the Private Express Statutes specify the conditions under which: (a) private couriers may carry data-processing materials, international ocean carrier documents, extremely urgent letters, and advertisements incidental to the shipment of accompanying merchandise or periodicals; and (b) universities and colleges may carry the letters of their bona fide student and faculty organizations. Carriers wanting to use the suspension for data-processing materials must file a notice of their intention on a form available from the manager of the PCSC.

5.1.5 Violations of Private Express Statutes

The PCSC reviews initial reports of possible violations of the Private Express Statutes. When warranted by the facts, possible violations are forwarded to the USPS General Counsel for further action.

5.1.6 Legal Advice for Private Express

The public and USPS employees can obtain authoritative advice on the Private Express Statutes, including written advisory opinions, by contacting the Senior Counsel, Ethics and Information, USPS Headquarters (see 8.4 for address and telephone number).

608.6.2

6.0 Complaints and Postal Law Violations

6.1 Consumer Complaints and Inquiries

Any postal customer may complain or inquire about postal products, services, or employees at any Post Office or directly to the USPS Consumer Advocate (see 8.1 for address). A complaint or inquiry may be made in person, by telephone, by e-mail, or by letter. A complaint or inquiry about the handling of a specific piece of mail should include the related envelope or wrapper and copies of all postal forms filed. A customer who is dissatisfied with the local handling of a complaint or inquiry may send a written appeal to the Consumer Advocate. A court of law can require such appeal as a legal prerequisite for hearing a customer's suit against the USPS.

6.2 Postal Law Violations

Instructions on mail security as it relates to unauthorized opening, inspection, tampering, or delay of mail are in *Administrative Support Manual 274*. Information and complaints on a possible postal law violation must be sent to the appropriate address according to the ZIP Code ranges shown below:

ZIP CODES	ADDRESS
003-079, 08005, 08006, 08008, 08050, 08087, 08092, 08501-08504, 08506-08510, 08512-08514, 08516, 08517, 08519-08553, 08555-08561, 08600-08639, 08642-08691, 087-098, 100-149	Postal Inspection Service PO Box 2613 Jersey City NJ 07303-2613

PC Postage	We Deliver
pcpostage.com	We Deliver For You
Pickup on Demand	ZIP+4
Planet	ZIP Code

7.1.2 Use of Registered Marks

USPS trademarks must be used in the form listed in 7.1.1. Proper use of USPS registered marks requires capitalizing the initial letters of the marks to distinguish them from terms not used as trademarks. Words and phrases that are registered trademarks may also use the registration symbol ®. Figures that are registered marks must always use the registration symbol. (An exception to this rule is the USPS emblem used on letterheads and business cards. All other uses of the emblem must include the ®.)

7.1.3 Proposed or Pending Registration

The USPS has additional trademarks not yet registered. The rules in 7.1.2 apply to these common law marks, except that such marks are not to be identified by the symbol ®. Instead, the superscript initials TM may be used to identify these marks.

608.7.3

7.2 Copyrights

7.2.1 Copyrighted Material

The USPS secures copyrights in its philatelic designs and certain publications. The designs of postage stamps, stamped envelopes, stamped cards, aerogrammes, souvenir cards, and other philatelic items issued on or after January 1, 1978, are copyrighted by the USPS under title 17 USC.

7.2.2 Permitted Use of Copyrighted Material

The use of illustrations of the designs covered by such copyrights is permitted:

- a. In editorial matter in newspapers, magazines, journals, books, philatelic catalogs, and philatelic albums.
- b. In advertising matter, circulars, or price lists for the sale of the postal items illustrated.
- c. In advertising matter, circulars, or price lists for the sale of newspapers, magazines, journals, books, philatelic catalogs, and philatelic albums containing illustrations of philatelic designs.
- d. In motion-picture films, microfilms, slides, or electronic tape for projection on a screen or for use in telecasting. No print or other reproduction from such films, slides, or tapes may be made except for the uses permitted in this section.

7.2.3 Design Reproductions of Copyrighted Material

Illustrations permitted by 7.2.2a. through 7.2.2d may be in color or in black and white, and may depict philatelic items as uncanceled or canceled. When depicting uncanceled items in color, illustrations must be less than 75% or more than 150% in linear dimension of the size of the design of the philatelic items as issued. Color illustrations of canceled philatelic items and black and white illustrations of uncanceled or canceled philatelic items may be in any size.

7.2.4 License Request for Copyrighted Material

The USPS may grant licenses for the use of illustrations of its copyright designs and registered trademarks outside the scope of the above permission. A request for such a license must be sent to the manager, Licensing, Public Affairs and Communications (see 8.1 for address).

7.3 Inquiries about USPS Trademarks and Copyrights

Inquiries about USPS copyrights or use of USPS trademarks and service marks, copyright materials, and intellectual property other than patents and technical data rights in USPS contracts must be sent to USPS Stamp Development. Inquiries about licenses to publish or reproduce ZIP Code information must be sent to the National Customer Support Center (see 8.1 for address).

609 Filing Indemnity Claims for Loss or Damage

Overview

- [1.0 General Filing Instructions](#)
- [2.0 Providing Proof of Loss or Damage](#)
- [3.0 Providing Evidence of Insurance and Value](#)
- [4.0 Claims](#)
- [5.0 Compensation](#)
- [6.0 Adjudication of Claims](#)

1.0 General Filing Instructions

1.1 Extra Services With Indemnity

A customer may file an indemnity claim for insured mail, collect on delivery (COD) items, Registered Mail with postal insurance, or Express Mail. Inquiries on uninsured Registered Mail may be filed as detailed in [503.2.0](#). Customers can find additional information in Publication 122, *Customer Guide to Filing Domestic Insurance Claims or Registered Mail Inquiries*, available on www.usps.com and in Post Offices.

1.2 Bulk Insured Claims

Mailers authorized to mail at bulk insured prices under [503.4.0](#) will receive instructions for filing claims from their postmaster or designee, including specific claim numbers to be used when filing claims. At some time in the future, electronic filing of indemnity claims will become mandatory. Prior to mandatory electronic claims filing, customers will be provided with the format instructions for the new electronic (soft copy) of Form 3877 and instructions for electronic filing of indemnity claims.

1.3 Who May File

A claim may be filed by:

- a. Either the mailer or addressee, for damaged articles or articles with some or all of the contents missing.
- b. Either the mailer or addressee who is in possession of the original retail mailing receipt, or in possession of the online label record or computer printout of the Web-based application as described in [3.1e](#), for lost articles.
- c. Only the merchandise return permit holder, for merchandise return service (MRS) parcels that are registered or insured as indicated by the permit holder on the MRS label.
- d. Only the mailer, when the mailer has added and paid for insurance on merchandise return service parcels.
- e. Only the mailer, for insured or collect on delivery (COD) parcels paid using eVS under [705.2.9](#).

609.1.4

1.4 When to File

[8-14-08] File claims as follows:

- a. *Damaged or Missing Contents*: customers should file a claim immediately but must file no later than 60 days from the date of mailing.
- b. *Lost Articles*: customers must file a claim within the time limits in the chart below.

MAIL TYPE OR SERVICE	WHEN TO FILE (FROM MAILING DATE)	
	No Sooner Than	No Later Than
Express Mail	7 days	90 days
Express Mail COD	45 days	90 days
Registered Mail	15 days	180 days
Registered COD	45 days	180 days
Insured Mail	21 days	180 days
COD	45 days	180 days
APO/FPO Insured Mail (First-Class Mail, SAM, or PAL)	45 days	1 year
APO/FPO Insured Mail (Surface Only)	75 days	1 year

1.5 Where to File

A claim may be filed:

- a. At any Post Office, station, or branch, except for Registered Mail articles with merchandise return service.
- b. Only at the Post Office where the merchandise return permit is held, for Registered Mail articles with merchandise return service.
- c. Online at www.usps.com for customers who purchased insurance online through Click-N-Ship or eBay.
- d. Only at the administering Post Office where the permit is held and Forms 3877 are presented for insured or COD parcels paid using eVS under [705.2.9](#).

1.6 How to File

A customer may file a claim by presenting evidence of insurance, evidence of value, and/or proof of damage. If the article was mailed Express Mail COD or Registered Mail COD, the customer must provide both the original COD receipt with either the Express Mail or the Registered Mail receipt. The customer must complete the applicable portions of Form 1000. Customers may print Form 1000 from www.usps.com and complete the customer section before going to the Post Office.

1.7 Filing Duplicate Claims

A customer must file any duplicate claim no sooner than 30 days and no later than 60 days from the date the original claim was filed.

2.0 Providing Proof of Loss or Damage

2.1 Missing Contents

If a claim is filed because some or all of the contents are missing, the addressee must make the mailing container available to the USPS for inspection, including any wrapping, packaging, and any contents that were received. Failure to do so will result in denial of the claim.

2.2 Proof of Damage

If the addressee files the claim, the addressee must make the damaged article and mailing container available to the USPS for inspection, including any wrapping, packaging, and any other contents that were received. If the mailer files the claim, the St. Louis ASC will notify the addressee by letter to present the damaged article and mailing container to the USPS for inspection, including any wrapping, packaging, and any other contents that were received. Failure to do so will result in denial of the claim.

3.0 Providing Evidence of Insurance and Value

3.1 Evidence of Insurance

For a claim involving insured, COD, registered, or Express Mail service, the customer must present any of the following evidence showing that the particular service was purchased:

- a. The original mailing receipt issued at the time of mailing (retail insured mail, Registered Mail, and COD receipts must contain a USPS postmark).
Reproduced copies are not acceptable.
- b. The wrapper showing the names and addresses of the sender and the addressee and the proper mail endorsement, tag, or label showing that the article was sent insured, COD, registered with postal insurance, or Express Mail. If only the wrapper is submitted, indemnity can be limited to \$100 for insured, \$50 for COD, \$100 for Registered Mail, and \$100 for Express Mail.
- c. For Express Mail items accepted for mailing under an Express Mail Manifesting agreement in [705.2.0](#), a copy of the manifest page showing the Express Mail label number for the item in question; the manifest summary page for the date the piece was mailed; a copy of Form 3152-E, *Express Mail Manifesting Certification*, round-dated by the accepting Post Office; and a copy of the EMCA monthly statement that lists the label number and postage for the mailpiece. If the customer purchased additional insurance, a copy of the round-stamped Form 3877, *Firm Mailing Book for Accountable Mail*, must also be submitted.
- d. For retail insurance the original sales receipt from the USPS listing the mailing receipt number and insurance amount, if the original mailing receipt is not available. Reproduced copies of the USPS sales receipt are not acceptable.
- e. For insurance purchased online, the mailer may access and print an electronic record as follows:

609.3.2

1. A computer printout from the Web-based application used to print the label and purchase the insurance. The printout must clearly identify the following information: the Delivery Confirmation or Signature Confirmation number of the insured parcel, total postage paid, insurance fee paid, declared value, declared mailing or shipping date, origin ZIP Code, and delivery ZIP Code.
 2. A printed online label record.
- f. For insured mail or COD mail paid using eVS under [705.2.9](#), the mailer must present a printout of the part of Form 3877 that identifies the parcel by including the article number (the package identification code) of the insured or COD parcel, total postage paid, fee paid, declared insured value, amount due sender if COD, mailing date, origin ZIP Code, and delivery ZIP Code reported in the parcel record in the eVS manifest file. This information is used by the administering Post Office where the eVS permit account is held and the Form 3877 was presented to confirm payment through eVS.

3.2 Evidence of Value

The customer, either the mailer or the addressee, must submit acceptable evidence to establish the cost or value of the article at the time it was mailed. (Other evidence may be requested to help determine an accurate value.) Examples of acceptable evidence are:

- a. Sales receipt, invoice or bill of sale, or statement of value from a reputable dealer.
- b. For items valued up to \$100, the customer's own statement describing the lost or damaged article and including the date and place of purchase, the amount paid, and whether the item was new or used (only if a sales receipt or invoice is not available). If the article mailed is a hobby, craft, or similar handmade item, the statement must include the cost of the materials used in making the item. The statement must describe the article in sufficient detail to determine whether the value claimed is accurate.
- c. Picture from a catalog showing the value of a similar article (only if a sales receipt, invoice, or statement of value from a reputable dealer is not available). The date and place of purchase must be included.
- d. Paid repair bills; if the claim is for partial damage, estimates of repair costs or appraisals from a reputable dealer. Repair costs may not exceed the original purchase price.
- e. Receipt or invoice for the costs incurred to buy a surety bond required to reissue a lost item.
- f. Receipt or invoice of costs incurred for the reconstruction of nonnegotiable documents.
- g. A copy of a canceled check, money order receipt, credit card statement, or other documentation indicating the amount paid. For Internet purchases, a copy of the front and back of the canceled check, money order, or a copy of the credit card billing statement is required.

- h. For Internet transactions conducted through a Web-based payment network that offers payment services through a stored value account, provide a computer printout of the online transaction identifying the purchaser and seller, price paid, date of transaction, description of item purchased, and assurance that the transaction status is completed. The printout must clearly identify the Web-based payment network provider through which the Internet transaction was conducted.

4.0 Claims

4.1 Payable Claim

Insurance for loss or damage to insured, registered, or COD mail within the amount covered by the fee paid or within the indemnity limits for Express Mail as explained in 4.2 is payable for the following:

- a. Actual value of lost articles at the time and place of mailing (see 4.1n for bulk insured articles).
- b. Cost of repairing a damaged article or replacing a totally damaged article not exceeding actual value of the article at the time of mailing.
- c. Remittance due on a COD parcel not received by the sender, subject to the limitations set by the standards for COD service.
- d. Reasonable costs incurred duplicating documents such as:
 - 1. Copying service.
 - 2. Notary fees.
 - 3. Bonding fees for replacement of stock or bond certificates.
 - 4. Reasonable attorney's fees if required to replace the lost or damaged documents.
 - 5. Other direct and necessary expense or cost, as determined by the USPS.
 - 6. Face value of negotiable documents that cannot be reconstructed up to the amount of insurance coverage bought, but not to exceed the \$25,000 maximum amount of insurance coverage available if sent by Registered Mail.
- e. Extra cost of gift wrapping, if the gift-wrapped article was enclosed in another container when mailed.
- f. Cost of outer container, if designed and constructed for the article sent.
- g. Fair market value of stamps and coins of philatelic or numismatic value, as determined by a recognized stamp or coin dealer or current coin and stamp collectors newsletters and trade papers.
- h. Federal, state, or city sales tax paid on articles lost or totally damaged.
- i. Postage (not fee) paid for sending damaged articles for repair. (The USPS must be used for this purpose. Other reasonable transportation charges may be included if the USPS is not available.)

609.4.2

- j. Cost of film stock or blank tape for photographic film, negatives, slides, transparencies, videotapes, laser disks, x-rays, magnetic resonance imaging (MRI) prints, computerized axial tomography (CAT) scan prints, etc.
- k. Cost of bees, crickets, or baby poultry destroyed by *physical* damage to the package or delay for which the USPS is responsible. (In the absence of definite evidence showing responsibility for death of these insects or animals, the USPS is presumed to be at fault if 10% or more are dead on delivery, and pays indemnity for all dead bees, crickets, or poultry; if less than 10%, the USPS is not presumed to be at fault.)
- l. Cost of filing a lost ticket report with the airline.
- m. Per page copying cost of lost or damaged blueprints, schematics, etc.
- n. For bulk insured articles, indemnity is provided for the lesser of (1) the actual value of the article at the time of mailing or (2) the wholesale cost of the contents to the sender.
- o. Except for Registered Mail, the maximum indemnity for negotiable items (defined as instruments that can be converted to cash without resort to forgery), currency, or bullion, is \$15.00.

4.2 Payable Express Mail Claim

In addition to the payable claims in [4.1, Payable Claim](#), the following are payable for Express Mail:

- a. For Express Mail insurance, nonnegotiable documents are insured against loss, damage, or rifling while in transit. Coverage is limited to \$100 per piece (the unit on which postage is paid), subject to a maximum limit per occurrence as provided in [4.2a4](#). Claims for document reconstruction insurance must be supported by a statement of expense incurred in reconstruction. For this standard, while in transit begins when the USPS receives custody of the insured material and ends when the material is delivered to the addressee or, if undeliverable, when the sender receives the material on return. Nonnegotiable documents include audit and business records, commercial papers, and such other written instruments for the conduct and operation of banks and banking institutions that have not been made negotiable or cannot be negotiated or converted into cash without forgery. Nonnegotiable documents can be in print, disk, tape, microfilm, or other forms of data storage. Articles such as artwork, collector or antique items, books, pamphlets, readers proofs, repro proofs, separation negatives, engineering drawings, blueprints, circulars, advertisements, film, negatives, and photographs are considered merchandise, not documents. Indemnity for document reconstruction is paid as follows:
 - 1. For payments made (or which are payable) for reasonable costs incurred in the reconstruction of the exact duplicate of a lost or damaged nonnegotiable document. Indemnity is not paid for the cost of preparing the document mailed, or for the mailer's time in preparing the document mailed or reconstructed. Except for the per page copying cost, indemnity is not paid for documents if copies of the lost document are available or if they could have been made before mailing.

2. Reasonable reconstruction expenses incurred or obligated between the time of guaranteed or scheduled delivery and actual delivery.
 3. Loss sustained by the use of funds to maintain cash balances during the period of document reconstruction (based on the applicable Federal Reserve discount price). The period begins at the scheduled delivery time and may not exceed 15 days.
 4. Catastrophic loss for multiple Express Mail items, such as a major fire, limited to \$5,000.00, regardless of the number of Express Mail items, or the identity or number of customers involved. Each claim resulting from a catastrophic loss first is adjudicated individually. If the preliminary adjudication exceeds \$5,000.00, the percentage of the sum represented by each individual settlement is applied to the \$5,000.00 to determine each claimant's pro rata share of the final settlement, not to exceed \$100 per piece.
- b. Merchandise insurance coverage is provided against loss, damage, or rifling and is limited to \$100. (Additional insurance, up to a maximum liability of \$5,000.00, may be purchased for merchandise valued at more than \$100.)
 - c. For negotiable items, currency, or bullion, the maximum indemnity is \$15.00.

4.3 Nonpayable Claims

Indemnity is not paid for insured mail, Registered Mail, COD, or Express Mail in these situations:

- a. Evidence of insurance coverage not provided.
- b. Loss, rifling, or damage occurred after delivery by the USPS.
- c. Claim based solely on sentimental rather than actual value.
- d. Requested replacement value exceeded actual value at the time and place of mailing.
- e. The contents of film (e.g., positives, negatives, slides, transparencies, videotapes, laser disks, x-rays, magnetic resonance imaging (MRI) prints, computerized axial tomography (CAT) scan prints), the cost of creating or re-creating these items, or the photographer's time and expense in taking the photographs.
- f. Loss resulting from delay of the mail, except under [4.2a.2, Payable Express Mail Claim](#), and [4.3ad](#) below.
- g. Consequential loss claimed rather than the actual value of the article.
- h. Perishable contents froze, melted, spoiled, or deteriorated.
- i. Damage by abrasion, scarring, or scraping to articles not properly wrapped for protection.
- j. Death of baby poultry caused by shipment to points where delivery could not be made within 72 hours from the time of hatching, unless it is determined that transportation was in place to achieve the 72-hour target.

609.4.3

- k. Death of honeybees, crickets, and harmless live animals not the fault of the USPS (mailability of these insects and animals is subject to [601.9.0, Perishables](#)).
- l. The sender or addressee failed to cooperate in the completion of required claim forms.
- m. Fragile nature of article prevented its safe carriage in the mail, regardless of packaging.
- n. Personal time required to replace documents.
- o. Claim filed after the article transported outside the USPS.
- p. Damage caused by shock, transportation environment, or x-ray, without evidence of damage to the mailing container.
- q. Mail article or part or all of its contents officially seized while in the military postal system overseas.
- r. Consequential loss of Express Mail claimed, except under [4.2a3](#) and [4.3ad](#).
- s. Nonmailable items, prohibited items, or restricted items not prepared and mailed according to postal standards, or any item packaged in such a manner that it could not have reached its destination undamaged in the normal course of the mail.
- t. Loss or damage caused by employees or agents of the sender or addressee.
- u. Radioactive injury, electrical or magnetic injury, or erasure of electrical recordings.
- v. War, insurrection, or civil disturbance, or seizure by any agency of government.
- w. Loss after items signed for by the addressee, the addressee's agent, or delivery employee if authorized under the applicable standards.
- x. Items sent COD without the addressee's consent.
- y. Adult birds in Express Mail with no physical damage to the container.
- z. Cost incurred for estimates and appraisals.
- aa. Lottery tickets, sweepstakes tickets, contest entries, and similar items.
- ab. Mailer refuses to accept delivery of the parcel on return.
- ac. Mail not bearing the complete names and addresses of the mailer and addressee, or is undeliverable as addressed to either the addressee or the mailer.
- ad. Event or transportation tickets (e.g., concert, theater, sport, airline, bus, train, etc.) received after the event date. Such items are insured for loss, but not for delay or receipt after the event date for which they were purchased unless sent by Express Mail and the delay is attributable solely to the failure to meet the guaranteed delivery standard under the terms and conditions for the Express Mail service selected.
- ae. Software installed onto computers that have been lost or damaged.

af. Damaged articles not claimed within the time limits in the *Postal Operations Manual*.

ag. Personal time used to make hobby, craft, or similar handmade items.

5.0 Compensation

5.1 Payment Limit

The USPS does not make payment for more than the actual value of the article or, for bulk insurance, for more than the wholesale cost of the contents to the sender if a lesser amount. The USPS does not make payment for more than the maximum amount covered by the fee paid.

5.2 Depreciation

The USPS depreciates a used article either lost or damaged based on the life expectancy of the article.

5.3 Insufficient Fee

If, through an established error by the USPS, a fee was charged for less than that required to pay for the amount of insurance coverage requested at the time of mailing, the sender may pay the difference. Indemnity may be paid within the limit fixed for the higher fee. This applies only to the insurance fee when the article is insured. An additional fee may not be paid to register an article previously sent by insured mail, to buy insurance on mail sent as uninsured registered, or to increase the indemnity on the registered article. The declared value must already be noted on Form 3806 or Form 3813-P. Customers must complete all entries on Form 3877 or facsimile.

5.4 Loss or Total Damage

If the insured, registered, or COD article is lost or the entire contents totally damaged, the payment includes an additional amount for the postage (not fee) paid by the sender. Postage for Express Mail is refunded under [604.9.5](#).

5.5 Dual Claim

If the mailer and the addressee both claim insurance and cannot agree on which one should receive the payment, any payment due is made to the mailer unless the claim has already been paid to the addressee upon presentation of the original mailing receipt.

5.6 Incompetent or Deceased

If the payee is incompetent or deceased, payment is made to the legal representative. If there is no legal representative, payment can be made at the discretion of the USPS.

5.7 Recovered Article

If a lost registered, insured, COD, or Express Mail article is recovered after payment of a claim, the payee may accept the article and reimburse the USPS for the full amount paid if the article is undamaged. If the article is damaged, has depreciated, or has missing contents, the payee may accept it and reimburse the USPS in an amount set by the Consumer Advocate, USPS Headquarters.

609.6.1

6.0 Adjudication of Claims

6.1 Initial Adjudication of Claims

The St. Louis Accounting Service Center (ASC) adjudicates and pays or disallows all domestic claims, except the initial adjudication of domestic retail insured claims for insurance coverage of \$50.00 or less that are not for bulk insured service, and claims appealed under 6.3. Domestic retail insured claims for insurance coverage of \$50.00 or less, except for bulk insured service, are adjudicated and paid locally at the Post Office accepting the claims. Claims for insurance purchased online (through Click-N-Ship or eBay) up to \$500 may be filed online through www.usps.com, and will be processed and paid through the St. Louis ASC.

6.2 Appealing a Claim Decision

A customer may appeal a claim decision by filing a written appeal within 60 days of the date of the original decision. Except for domestic retail insured claims for insurance coverage of \$50.00 or less, the customer must send the appeal directly to Claims Appeals (see 608.8.0 for address). For domestic retail insured claims for insurance coverage of \$50.00 or less, the customer must send the appeal to the Post Office where the claim was filed. That Post Office forwards the appeal to the manager of Claims Appeals at the St. Louis ASC.

6.3 Final USPS Decision of Claims

If the manager of Claims Appeals at the St. Louis ASC sustains the denial of a claim, the customer may submit an additional appeal within 60 days for final review and decision to the Consumer Advocate, USPS Headquarters (see 608.8.0 for address), who may waive standards in 609 in favor of the customer.

1.1 Basic Standards

1.1.1 Organization Eligibility

Only organizations that meet the standards in [1.2, Qualified Nonprofit Organizations](#), or [1.3, Qualified Political Committees and State or Local Voting Registration Officials](#), and that have received specific authorization from the USPS may mail eligible matter at any Nonprofit Standard Mail price, including Nonprofit Enhanced Carrier Route prices.

1.1.2 Authorization

[9-11-08] Specific authorization is required to mail at Nonprofit Standard Mail prices and may be used at any Post Office with *PostalOne!* access. Mailers are required to confirm authorization at non-*PostalOne!* Post Office locations before mailings will be accepted at Nonprofit Standard Mail prices.

1.1.3 Discounts

Pieces mailed at the Nonprofit Standard Mail prices must meet the standards in [243](#), [343](#), or [443](#) and the corresponding standards for any other discount or price claimed.

1.2 Qualified Nonprofit Organizations

1.2.1 General

An organization described in [1.2.3](#) through [1.2.10](#) may be authorized to mail at the Nonprofit Standard Mail prices if it is not organized for profit and none of its net income inures to the benefit of any private stockholder or individual.

1.2.2 Primary Purpose

The standard of *primary purpose* used in the definitions in [1.2.3](#) through [1.2.10](#) requires that the organization be both organized and operated for the primary purpose. Organizations that incidentally engage in qualifying activities do not meet the primary purpose test.

703.1.2.3

1.2.3 Religious

A *religious organization* is a nonprofit organization whose primary purpose is to:

- a. Conduct religious worship (e.g., churches, synagogues, temples, or mosques);
- b. Support the religious activities of nonprofit organizations whose primary purpose is to conduct religious worship; or
- c. Further the teaching of particular religious faiths or tenets, including religious instruction and the dissemination of religious information.

1.2.4 Educational

An *educational organization* is a nonprofit organization whose primary purpose is the instruction or training of individuals for improving or developing their capabilities or the instruction of the public on subjects beneficial to the community. An organization may be educational even though it advocates a particular position or viewpoint, as long as it presents a sufficiently full and fair exposition of the pertinent facts to permit the formation of an independent opinion or conclusion. Conversely, an organization is not considered educational if its principal function is the mere presentation of unsupported opinion. These are examples of educational organizations:

- a. An organization (e.g., a primary or secondary school, a college, or a professional or trade school) that has a regularly scheduled curriculum, a regular faculty, and a regularly enrolled body of students in attendance at a place where educational activities are regularly carried on.
- b. An organization whose activities consist of presenting public discussion groups, forums, panels, lectures, or similar programs, including on radio or television.
- c. An organization that presents a course of instruction by correspondence or through the use of television or radio.
- d. Museums, zoos, planetariums, symphony orchestras, and similar organizations.

1.2.5 Scientific

A *scientific organization* is a nonprofit organization whose primary purpose is to conduct research in the applied, pure, or natural sciences or to disseminate technical information dealing with the applied, pure, or natural sciences.

1.2.6 Philanthropic (Charitable)

A *philanthropic (charitable) organization* is a nonprofit organization organized and operated to benefit the public. Examples include those that are organized to relieve the poor, distressed, or underprivileged; to advance religion, education, or science; to erect or maintain public buildings, monuments, or works; to lessen the burdens of government; or to promote social welfare for any of the above purposes or to lessen neighborhood tensions, eliminate prejudice and discrimination, defend human and civil rights secured by law, or combat community deterioration and juvenile delinquency. That an organization organized and operated to relieve indigent persons may receive voluntary contributions from those persons does not necessarily make it ineligible for Nonprofit Standard Mail prices as a philanthropic organization. That an organization, in carrying out its primary purpose, advocates

social or civic changes or presents ideas on controversial issues to influence public opinion and sentiment to accept its views, does not necessarily make it ineligible for Nonprofit Standard Mail prices as a philanthropic organization.

1.2.7 Agricultural

An agricultural organization is a nonprofit organization whose primary purpose is the betterment of the conditions of those engaged in agricultural pursuits, the improvement of the grade of their products, and the development of a higher degree of efficiency in agriculture; or the collection and dissemination of information or materials about agriculture. The organization may further and advance agricultural interests through educational activities; by holding agricultural fairs; by collecting and disseminating information about cultivation of the soil and its fruits or the harvesting of marine resources; by rearing, feeding, and managing livestock, poultry, bees, etc.; or by other activities related to agricultural interests.

1.2.8 Labor

A labor organization is a nonprofit organization whose primary purpose is the betterment of the conditions of workers. Labor organizations include, but are not limited to, organizations in which employees or workers participate, whose primary purpose is to deal with employers on grievances, labor disputes, wages, hours of employment, working conditions, etc. (e.g., labor unions and employee associations).

1.2.9 Veterans

A veterans' organization is a nonprofit organization of veterans of the armed services of the United States, or an auxiliary unit or society of, or a trust or foundation for, any such post or organization.

1.2.10 Fraternal

A fraternal organization is a nonprofit organization whose primary purpose is fostering fellowship and mutual benefits among its members. For this standard, a qualified fraternal organization must also be organized under a lodge or chapter system with a representative form of government; must follow a ritualistic format; and must be composed of members elected to membership by vote of the members. Qualifying fraternal organizations include the Masons, Knights of Columbus, Elks, and college fraternities or sororities, and may have members of either or both sexes. Fraternal organizations do not encompass such organizations as business leagues, professional associations, civic associations, or social clubs.

1.3 Qualified Political Committees and State or Local Voting Registration Officials

1.3.1 Political Committees

These political committees may be authorized to mail at the Nonprofit Standard Mail prices without regard to their nonprofit status:

- a. A national committee of a political party.
- b. A state committee of a political party.
- c. The Democratic Congressional Campaign Committee.
- d. The Democratic Senatorial Campaign Committee.
- e. The National Republican Congressional Committee.
- f. The National Republican Senatorial Committee.

703.1.3.2

1.3.2 Definitions

For the standards in [1.3.1](#):

- a. A *national committee* is the organization that, by virtue of the bylaws of a political party, is responsible for the day-to-day operations of such political party at the national level.
- b. A *state committee* is the organization that, by virtue of the bylaws of a political party, is responsible for the day-to-day operation of such political party at the state level.

1.3.3 Voting Registration Officials

Voting registration officials in a state or the District of Columbia are authorized to mail certain Standard Mail materials at the Nonprofit Standard Mail prices under the National Voter Registration Act of 1993 (see [1.6.12, Matter Mailed by Voting Registration Official](#)).

1.4 Ineligible Organizations**1.4.1 Private**

These and similar organizations do not qualify for the Nonprofit Standard Mail prices, even if organized on a nonprofit basis:

- a. Automobile clubs.
- b. Business leagues.
- c. Chambers of commerce.
- d. Citizens' and civic improvement associations.
- e. Individuals.
- f. Mutual insurance associations.
- g. Political organizations (other than those specified in [1.3](#)).
- h. Service clubs (e.g., Civitan, Kiwanis, Lions, Optimist, and Rotary).
- i. Social and hobby clubs.
- j. Associations of rural electric cooperatives.
- k. Trade associations.

1.4.2 Government

State, county, and municipal governments are generally not eligible for the Nonprofit Standard Mail prices. However, a separate and distinct state, county, or municipal governmental organization that meets the criteria for any one of the specific categories in [1.2](#) may be eligible, notwithstanding its governmental status.

1.5 Identification of Nonprofit Organization

All matter mailed at the Nonprofit Standard Mail prices must identify the authorized nonprofit organization. The name and return address of the authorized nonprofit organization must be either on the outside of the mailpiece or in a prominent location on the material being mailed. Pseudonyms or bogus names of persons or organizations may not be used. If the piece bears any name and return address, it

must be that of the authorized nonprofit organization. A well-recognized alternative designation (e.g., “The March of Dimes”) or abbreviation (e.g., “AFL-CIO”) may be used rather than the full organization name.

1.6 Eligible and Ineligible Matter

1.6.1 Organization’s Own Mail

An organization authorized to mail at the Nonprofit Standard Mail prices may mail only its own matter at those prices. An authorized organization may not delegate or lend the use of its authorization to mail at the Nonprofit Standard Mail prices to any other person or organization.

1.6.2 Ineligible Matter

No person or organization may mail, or cause to be mailed by contractual agreement or otherwise, any ineligible matter at the Nonprofit Standard Mail prices.

1.6.3 Cooperative Mailing

A cooperative mailing may be made at the Nonprofit Standard Mail prices only when each of the cooperating organizations is individually authorized to mail at the Nonprofit Standard Mail prices at the Post Office where the mailing is deposited. A cooperative mailing involving the mailing of any matter on behalf of or produced for an organization not itself authorized to mail at the Nonprofit Standard Mail prices at the Post Office where the mailing is deposited must be paid at the applicable Regular or Enhanced Carrier Route Standard Mail prices. The mailer may appeal the decision under [607.2.0](#). Exception: This standard does not apply to mailings by an organization authorized to mail at Nonprofit Standard Mail prices soliciting monetary donations to the authorized mailer and not promoting or otherwise facilitating the sale or lease of any goods or services. This exception applies only where the organization authorized to mail at Nonprofit Standard Mail prices is given a list of each donor, contact information (e.g., address, telephone number) for each, and the amount of the donation or waives in writing the receipt of this list.

1.6.4 Prohibitions and Restrictions

Nonprofit Standard Mail prices may not be used for the entry of material that advertises, promotes, offers, or, for a fee or consideration, recommends, describes, or announces the availability of:

- a. Any credit, debit, or charge card or similar financial instrument or account, provided by or through an arrangement with any person or organization not authorized to mail at the Nonprofit Standard Mail prices at the entry Post Office.
- b. Any insurance policy, unless the organization promoting the purchase of such policy is authorized to mail at the Nonprofit Standard Mail prices at the entry Post Office; the policy is designed for and primarily promoted to the members, donors, supporters, or beneficiaries of that organization; and the coverage provided by the policy is not generally otherwise commercially available as explained in [1.6.5](#).
- c. Any travel arrangement, unless the organization promoting the arrangement is authorized to mail at the Nonprofit Standard Mail prices at the entry Post Office; the travel contributes substantially (aside from the cultivation of members, donors, or supporters, or the acquisition of income or funds) to one or more of

703.1.6.5

the purposes that constitute the basis for the organization's authorization to mail at the Nonprofit Standard Mail prices; and the arrangement is designed for and primarily promoted to the members, donors, supporters, or beneficiaries of that organization.

- d. Any other product or service unless one of these exceptions is met:
 1. The sale of the product or the provision of such service is substantially related to the exercise or performance by the organization of one or more of the purposes used by the organization to qualify for mailing at the Nonprofit Standard Mail prices. The criteria in IRS regulations at 26 C.F.R. section 1.513-1(d), supplemented by the definitions in 1.6.6, are used to determine whether an advertisement, promotion, or offer for a product or service is for a substantially related product or service and, therefore, eligible for Nonprofit Standard Mail prices.
 2. The product or service is advertised in Standard Mail material meeting the prescribed content requirements for a periodical publication. The criteria in 1.6.8 are used to determine whether the Standard Mail material meets the content requirements for a periodical publication.

1.6.5 Definitions, Insurance

For the standard in 1.6.4b:

- a. Except as specified in 1.6.5c, the phrase *not generally otherwise commercially available* applies to the actual coverage stated in an insurance policy, without regard to the amount of the premiums, the underwriting practices, and the financial condition of the insurer. When comparisons are made with other policies, consideration is given to coverage benefits, limitations, and exclusions, and to the availability of coverage to the targeted recipients. When insurance policy coverages are compared to determine whether coverage in a policy offered by an organization is not generally otherwise commercially available, the comparison is based on the specific characteristics of the mailpiece recipients (e.g., geographic location or demographics).
- b. Except as specified in 1.6.5c, the types of insurance considered generally otherwise commercially available include, but are not limited to, homeowner's, property, casualty, marine, professional liability (including malpractice), travel, health, life, airplane, automobile, truck, motorhome, motorbike, motorcycle, boat, accidental death, accidental dismemberment, Medicare supplement (Medigap), catastrophic care, nursing home, and hospital indemnity insurance.
- c. Coverage is considered not generally otherwise commercially available if either of the following conditions applies:
 1. The coverage is provided by the nonprofit organization itself (i.e., the nonprofit organization is the insurer).
 2. The coverage is provided or promoted by the nonprofit organization in a mailing to its members, donors, supporters, or beneficiaries in such a way that the members, donors, supporters, or beneficiaries may make tax-deductible donations to the nonprofit organization of their proportional

shares of any income in excess of costs that the nonprofit organization receives from the purchase of the coverage by its members, donors, supporters, or beneficiaries.

1.6.6 Definitions, Substantially Related Advertising Products

For the standards in [1.6.4d](#):

- a. Standards established by the Internal Revenue Service (IRS) and the courts with respect to 26 USC 513(a) and (c) of the Internal Revenue Code are used to determine whether the sale or provision of an advertised product or service, whether sold or offered by the organization or by another party, is substantially related to the qualifying purposes of an organization. (Advertisements in Standard Mail material that meet the content requirements for a periodical publication need not meet the substantially related standard to be mailable at the Nonprofit Standard Mail prices. See [1.6.8](#).)
- b. To be substantially related, the sale of the product or the provision of the service must contribute importantly to the accomplishment of one or more of the qualifying purposes of the organization. This means that the sale of the product or providing of the service must be directly related to accomplishing one or more of the purposes on which the organization's authorization to mail at the Nonprofit Standard Mail prices is based. The sale of the product or providing of the service must have a causal relationship to the achievement of the exempt purposes (other than the production of income) of the authorized organization. (Income produced from selling an advertised product or providing a service does not make such action a substantially related activity, even if the income will be used to accomplish the purpose or purposes of the authorized organization.) See 26 C.F.R. section 1.513-1(d).
 1. If an organization pays Unrelated Business Income Tax (UBIT) on the income from the sale of a product or the provision of a service, that activity is by IRS definition not substantially related. See 26 U.S.C. section 512. The fact that an organization does not pay such tax, however, does not establish that the activity is substantially related because other criteria may exempt the organization from payment. See 26 C.F.R. section 1.513-1(e).
 2. Third-party paid advertisements may be included in material mailed at the Nonprofit Standard Mail prices if the products or services advertised are substantially related to one or more of the purposes for which the organization is authorized to mail at the Nonprofit Standard Mail prices. However, if the material contains one or more advertisements that are not substantially related, then the material is not eligible for the Nonprofit Standard Mail prices unless it is part of material that meets the content requirements described in [1.6.8](#) and is not disqualified from using the Nonprofit Standard Mail prices under another provision.
- c. Announcements of activities (e.g., bake sale, car wash, charity auction, oratorical contest) are considered substantially related if substantially all the work is conducted by the members or supporters of an authorized organization without compensation. See 26 U.S.C. section 513(a)(1); 26 C.F.R. section 1.513-1(e)(1).

703.1.6.7

- d. Advertisements for products and services, including products and services offered as prizes or premiums, are considered substantially related if the products and services are received by an authorized organization as gifts or contributions. See 26 U.S.C. section 513(a)(3); 26 C.F.R. section 1.513-1(e)(3).
- e. An advertisement, promotion, offer, or subscription order form for a periodical publication meeting the eligibility criteria in [707.4.0](#) and published by one of the types of nonprofit organizations listed in [1.2](#) is mailable at the Nonprofit Standard Mail prices.
- f. Unless the mailing is ineligible for the Nonprofit Standard Mail prices for other reasons, mailings will be accepted at the Nonprofit Standard Mail prices upon certification that income derived from the sale of products or services advertised in the mailing is not subject to the Unrelated Business Income Tax (UBIT) described at 26 U.S.C. section 512, and that each of the products or services is substantially related to the nonprofit organization's qualifying purpose.

1.6.7 Other Matter

An authorized nonprofit organization's material is not disqualified from being mailed at the Nonprofit Standard Mail prices solely because that material contains, but is not primarily devoted to:

- a. Acknowledgments of organizations or individuals who have made donations to the authorized organization.
- b. References to and a response card or other instructions for making inquiries about services or benefits available from membership in the authorized organization, if advertising, promotional, or application materials for such services or benefits are not included. For purposes of this section, descriptions of membership benefits available as a part of membership, including the use of adjectives, terms, conditions, and brand names, are permissible when they are a minor part of a solicitation or renewal request for membership payments. For purposes of this provision, "minor" is defined as "less than half." Measurement is made in accordance with [707.16.0](#) and [707.17.0](#). The solicitation or renewal request in which, to a minor degree, membership benefits may be promoted is considered to include only a printed letter to prospective members or current members whose membership is about to expire, and not to any separate, distinct, or independent brochure, circular, flyer, or other documents. Such separate documents will be considered advertising if they contain any advertising, promotional, or application materials. *Exception:* A separate document prepared by the qualifying organization, consisting of one sheet, will be considered to be part of the solicitation letter if it describes the organization's membership benefits and the solicitation letter does not describe the organization's benefits but instead refers the reader to the separate document.

1.6.8 Periodical Publication Content Requirements

Advertisements for products and services in material that meets the content requirements for a periodical publication are mailable at the Nonprofit Standard Mail prices. The material mailed must meet these standards:

- a. Have a title. The title must be printed on the front cover page in a style and size of type that make it distinguishable from other information on the front cover page.
- b. Be formed of printed sheets. (It may not be reproduced by stencil, mimeograph, or hectograph. Reproduction by any other process is permitted.) Any style of type may be used.
- c. Contain an identification statement on one of the first five pages of the publication that includes these elements:
 1. Title.
 2. Issue date. The date may be omitted if it is on the front cover or cover page.
 3. Statement of frequency showing when issues are to be published (daily; weekly; monthly; monthly except June; four times a year in June, August, September, and December; annually; irregularly, etc.).
 4. Name and address of the authorized organization, including street number, street name, and ZIP+4 or 5-digit ZIP Code. The street number and street name are optional if there is no letter carrier service.
 5. Issue number. Every issue of each publication is numbered consecutively in a series that may not be broken by assigning numbers to issues omitted. The issue number may be printed on the front or cover page instead of in the identification statement.
 6. International Standard Serial Number (ISSN), if applicable.
 7. Subscription price, if applicable.
- d. Consist of at least 25% nonadvertising matter in each issue. Advertising is defined in [707.4.13](#).

1.6.9 Contribution and Membership Premiums

Announcements for premiums received as a result of a contribution or payment of membership dues are not considered advertisements if the membership dues or requested contribution is more than 4 times the cost of the premium item(s) offered and more than 2 times the represented value in the mailpiece, if any, of the premium item(s) offered.

1.6.10 Political Mailings

A qualifying political committee under [1.3](#) may mail election-related materials, such as candidate endorsements, at the Nonprofit Standard Mail prices if the materials are exclusively of the qualifying political committee. Political mailings may not be made at the Nonprofit Standard Mail prices when a political candidate or anyone else not authorized to mail at the Nonprofit Standard Mail prices assists the qualifying political committee with the preparation or mailing of such materials, or pays any of the costs of preparation or mailing, or provides any consideration to the qualifying political committee in return for the mailing being made. The following are examples of political mailings that would not qualify for mailing at the Nonprofit Standard Mail prices:

703.1.6.11

- a. A mailing containing material identified as having been paid for by the campaign committee or treasurer of an individual candidate.
- b. A mailing containing circulars, flyers, brochures, or other printed matter prepared or printed by a political candidate or his or her campaign organization.
- c. A mailing on which the postage is paid for by a political candidate or his or her campaign organization.
- d. A mailing made on behalf of a candidate in return for a contribution to the qualifying political committee.

1.6.11 Products Mailable at Nonprofit Standard Mail Prices

The following products are mailable at Nonprofit Standard Mail prices:

- a. Low-cost items within the meaning of 26 USC 513(h)(2), Internal Revenue Code. At the beginning of each calendar year, the value of low-cost items is adjusted for cost of living. Effective January 1, 2008, the cost of such items cannot exceed \$9.10. This cost is the cost to the authorized organization that mails the items or on whose behalf the items are mailed.
- b. Items donated or contributed to the qualified organization. Such items do not have to meet the definition of a low-cost item.
- c. A periodical publication (as defined in [707.4.0](#)) of a nonprofit organization unless it is ineligible under [1.6](#) to be mailed at the Nonprofit Standard Mail prices.

1.6.12 Matter Mailed by Voting Registration Official

The voting registration official may mail, at the Nonprofit Standard Mail prices, only qualifying Standard Mail matter that is required or authorized to be mailed at those prices by the National Voter Registration Act of 1993.

1.6.13 Evidence of Eligibility

On request, an organization authorized to mail at the Nonprofit Standard Mail prices must provide evidence to the USPS, or cause evidence held by another party to be provided to the USPS, about the eligibility of any of its mail matter or mailings to be sent at those prices. Any failure to provide evidence needed for a ruling on the eligibility of matter to be sent at the Nonprofit Standard Mail prices, or to cause such evidence to be provided, is sufficient basis for a finding that the matter is not eligible for the Nonprofit Standard Mail prices, as well as for the revocation of the organization's authorization to mail at the Nonprofit Standard Mail prices.

1.7 Authorization—Application**1.7.1 Filing**

[9-11-08] An application on Form 3624, *Application to Mail at Nonprofit Standard Mail Rates*, must be filed by an organization prior to being authorized to mail at Nonprofit Standard Mail prices. The applicant must indicate on Form 3624 the qualifying category of organization under which it seeks authorization.

1.7.2 Fee

No fee is charged for filing Form 3624.

1.7.3 Permits and Authorizations

[9-11-08] Authorization to mail at Nonprofit Standard Mail prices does not relieve the mailer's obligation to obtain mailing permits and pay the required fees for mailing at presorted prices.

1.7.4 Qualified Nonprofit Organizations

Form 3624 must be accompanied by evidence that the applicant meets the standards of a qualifying category in 1.2 and that the organization is nonprofit (e.g., a certificate of exemption from federal income tax). *An exemption from the payment of federal income tax is not required to qualify for the Nonprofit Standard Mail prices. Such exemption is considered as evidence of qualification for preferred postal prices, but is not the controlling factor in the decision. When an organization submits proof that it is granted federal income tax exemption under 26 USC 501(c)(3), as a religious, educational, scientific, or philanthropic (charitable) organization; under 501(c)(5) as an agricultural or labor organization; under 501(c)(8) as a fraternal organization; or under 501(c)(19) as a veterans' organization, it is considered as qualifying for the Nonprofit Standard Mail prices, unless other evidence discloses some disqualification.*

1.7.5 Political Committees

Form 3624 filed by an organization seeking authorization as a qualified political committee must include evidence that the applicant meets the standards of one of the qualifying categories of political committees in 1.3; evidence of nonprofit status is not required.

1.7.6 Nonprofit Standard Mail Authorization Number

[9-11-08] Once an organization is authorized, it may mail at Nonprofit Standard Mail prices at any Post Office location that accepts presorted mailings within the United States. The Postal Service will issue a national Nonprofit Standard Mail authorization number to each organization authorized to mail at the Nonprofit Standard Mail prices. Authorized organizations must display this number in the appropriate space on each postage statement that accompanies a mailing at Nonprofit Standard Mail Prices.

1.8 Confirmation of Authorization to Mail at Nonprofit Standard Mail Prices

1.8.1 Confirmation of Authorization Application Procedure

[9-11-08] An authorized organization, or organization pending authorization, wishing to mail at a non-PostalOne! Post Office location must file Form 3623, *Request for Confirmation of Authorization (or Pending Authorization) to Mail at Nonprofit Standard Mail Prices*, with the postmaster prior to mailings being made at Nonprofit Standard Mail prices.

1.8.2 Fee

No fee is charged for filing Form 3623.

1.8.3 Organization Name

If the organization name on Form 3623 is different from the one on USPS records, the applicant must revise the organization's original application to reflect a name change by providing evidence that the organization name was officially changed

703.1.8.4

(e.g., an official amendment to the organization's Articles of Incorporation stating the former name and the new name and a letter issued by the Internal Revenue Service recognizing the name change).

1.8.4 Permits and Authorizations

[9-11-08] Confirmation of authorization to mail at Nonprofit Standard Mail prices does not relieve the mailer's obligation to obtain mailing permits and pay the required fees for mailing at presorted prices.

1.9 Mailing While Application Pending

1.9.1 Approval

[9-11-08] An organization may not mail at Nonprofit Standard Mail prices at a Post Office before Form 3624 or Form 3623, if required, is approved.

1.9.2 Postage Record

[9-11-08] While an application, or confirmation of authorization, is pending postage must be paid at applicable First-Class Mail or Priority Mail prices, or at applicable Standard Mail prices. The USPS records the difference between postage paid at regular Standard Mail prices and the postage that would have been paid at Nonprofit Standard Mail prices. No record is kept if postage is paid at First-Class Mail or Priority Mail prices.

1.9.3 Refund

[9-11-08] If an authorization, or confirmation of authorization, to mail at Nonprofit Standard Mail prices is issued, the mailer may be refunded the postage paid at the Post Office where pending mailings were made for any amount that exceeds the Nonprofit Standard Mail prices since the effective date of the authorization or confirmation. No refund is made:

- a. If the application on Form 3624 is denied and no appeal is filed.
- b. If postage was paid at First-Class Mail or Priority Mail prices.
- c. For the period before the effective date of the authorization.
- d. If confirmation of authorization using Form 3623 is denied.

1.9.4 Effective Date

The effective date of the Nonprofit Standard Mail price authorization is the date of the application or the date of the organization's eligibility, whichever is later.

1.9.5 Pending Status

The mailer may continue to mail in a pending status until a final decision is reached on an appeal of a denied application.

1.10 Ruling on Application

1.10.1 Additional Information

The PCSC manager may request additional information or evidence to support or clarify the application. Failure to provide such information is sufficient grounds to deny an application.

1.10.2 Rulings

[9-11-08] The PCSC manager rules on Form 3624 and Form 3623 and notifies the applicant directly.

1.10.3 Appealing a Denial

[9-11-08] If the application on Form 3624 or Form 3623 is denied, the applicant may submit a written appeal to the postmaster where the application was filed within 15 days of the applicant's receipt of the decision. After reviewing the file, if the PCSC manager still believes that the organization does not qualify to be authorized at Nonprofit Standard Mail prices, or the request for confirmation of authorization is not able to be confirmed, the applicable appeal is forwarded to the manager of Mailing Standards (see [608.8.0](#) for address), who issues the final agency decision.

1.11 Revocation**1.11.1 USPS Review**

The PCSC manager may initiate at any time a review of any organization authorized to mail at the Nonprofit Standard Mail prices. The PCSC manager may ask an organization for information or evidence to determine whether the organization is still qualified. Failure to provide such information is sufficient cause for revocation.

1.11.2 Revocation for Cause

If it is found that authorization has been given to an organization that was not qualified at the time of application or later became unqualified, the PCSC manager notifies the organization of the proposed revocation and the reasons for it.

1.11.3 Appeal

Revocation for cause under [1.11.2](#) takes effect 15 days from the organization's receipt of the notice, unless the organization files a written appeal within that time through the PCSC with the manager of Mailing Standards (see [608.8.0](#) for address). The manager of Mailing Standards may ask the organization for more information or evidence to determine the organization's eligibility. Failure to provide such information is sufficient grounds for denial of the appeal. The manager issues a written appeal decision directly to the organization.

1.11.4 Revocation for Nonuse

[9-11-08] The PCSC revokes an authorization to mail at Nonprofit Standard Mail prices if no Nonprofit Standard Mail price mailings are made by the authorized organization during a 2-year period. The PCSC notifies the organization of the revocation for nonuse.

2.0 Overseas Military Mail**2.1 Basic Standards****2.1.1 First-Class Mail**

First-Class Mail letter mail, including stamped cards and postcards, and sound-recorded communications that have the character of personal correspondence are given airlift service on a space available basis between overseas military Post Offices outside the 48 contiguous states, and between those

703.2.1.2

military Post Offices and the point of embarkation or debarkation of this mail within the 50 states. Unless sent free under [4.0](#), *Mail Sent by U.S. Armed Forces*, sound recordings must be marked “Sound Recorded Personal Correspondence” by the mailer on the address side.

2.1.2 APO/FPO Priority Mail Flat-Rate Boxes

A USPS-produced APO/FPO Priority Mail large flat-rate box sent to an APO/FPO destination address, regardless of the actual weight of the piece, is charged \$10.95. Items to an APO/FPO address may be shipped in a special version of the box identified with the additional logo: “Americas supports you. mil.” If the special version of the APO/FPO flat-rate box is used for non-APO/FPO addresses, the domestic or international large flat-rate box prices will apply. Articles mailed to an APO/FPO address in one of the regular flat-rate boxes (FRB-1 or FRB-2) are charged \$9.80. Only USPS-produced flat-rate boxes are eligible for the flat-rate box prices.

2.1.3 SAM Parcels

Parcels of any class, paid at surface postage prices, are airlifted to, from, or between overseas military Post Offices outside the 48 contiguous states. These parcels must be marked “SAM” (space available mail) on the address side, preferably below the postage and above the addressee’s name. These maximum weight and size limits apply when mailed from:

- a. The 48 contiguous states: 15 pounds, 60 inches in length and girth combined.
- b. An APO or FPO outside the 48 contiguous states: Package Services and Parcel Select weight and size limits ([401](#), *Physical Standards*).

2.1.4 Periodicals Publications

Periodicals publications featuring current news of general interest and published weekly or more frequently, mailed at or addressed to any military Post Office outside the 48 contiguous states, are given airlift service under [2.1.3](#). Airlift service in [2.1.3](#) and [2.1.4](#) is not provided for mailings of publications sent in bulk to exchanges or news agents for later resale or distribution.

2.1.5 Preparation

Items sent by air or surface mail are subject to the size and weight standards in [201](#) or [401](#) unless limited further by this standard. Mail must be addressed under [602](#). Postage at the applicable Priority Mail or Package Services prices is charged for parcels sent by air or surface transportation.

2.1.6 Privacy of Mail

The Department of Defense (DOD) can provide information on mail security and mail cover regulations for mail in the military postal system overseas.

2.1.7 Restriction

Regardless of postage payment method, single-piece price Priority Mail and single-piece price Package Services weighing more than 13 ounces must be presented at a Post Office retail counter. The sender may be required to provide identification before the mail is accepted by the USPS. Such mail may be presented

by a sender known to the postal carrier at the sender's residence or place of business. Mail not complying with the requirements of this section and requiring air transportation is returned to the sender for proper deposit.

2.2 Addressing Military Mail

2.2.1 Overseas Address

Overseas military addresses must conform to domestic addressing standards. The delivery line (the second line from the bottom in the address) must show the ship name, unit number, CMR or PSC number, and box number if assigned. The last line must contain the APO and FPO designation and the appropriate two-letter "state" abbreviation (AA, AE, or AP), followed by the ZIP+4 or 5-digit ZIP Code. AA, AE, and AP are used for addresses with the 3-digit ZIP Code prefixes 340, 090-098, and 962-966, respectively. In addition:

- a. Mail addressed to Army personnel must show full name, including first name and middle name or initial, and unit number.
- b. Mail addressed to Air Force personnel must show full name, including first name and middle name or initial, and PSC or unit number.
- c. Mail addressed to Navy and Marine Corps personnel must show full name, including first name and middle name or initial, and PSC number for shore-based units, or ship name.
- d. Mail sent to dependents residing in overseas areas must be addressed in care of the sponsor.

2.2.2 Geographic Address

Mail showing a foreign city and country in addition to the military address is subject to the postage prices and conditions for international mail.

2.2.3 Address Within United States

Mail addressed to military personnel within the United States must show the name of the military installation, state, and either the correct ZIP Code or ZIP+4 code. In addition:

- a. Mail addressed to Army personnel must show full name, including first name and middle name or initial, and organization.
- b. Mail addressed to Air Force personnel must show full name, including first name and middle name or initial, organization, and box number (if served by a PSC).
- c. Mail addressed to Navy and Marine Corps personnel must show full name, including first name and middle name or initial, and organization.
- d. Mail sent to dependents of military personnel for delivery through the sponsor's military unit must be addressed in care of the sponsor.
- e. Mail sent to dependents of military personnel for delivery at the sponsor's military quarters need not be addressed in care of the sponsor.

2.3 General Restrictions

2.3.1 Mailability Conditions

Hazardous, restricted, or perishable materials mailed to, from, and between overseas military Post Offices are subject to the conditions of *International Mail Manual* 130, the standards in [601, Mailability](#), and conditions prescribed by the Department of Defense (DOD), as listed in *Conditions Applied to Mail Addressed to Military Post Offices Overseas* in the *Postal Bulletin*.

2.3.2 Firearms

Firearms are subject to [601.11.0](#). To export firearms not specifically prohibited by the *Conditions Applied to Mail Addressed to Military Post Offices Overseas*, periodically printed in the *Postal Bulletin*, a mailer exporting permissible firearms must present an export license from the Office of Munitions Control, Department of State, Washington, DC 20520-0001. Importing firearms by military personnel by mail from overseas military Post Offices is subject to 27 CFR 178.114(b), Revenue Ruling 69-309 of the Bureau of Alcohol, Tobacco and Firearms (ATF), preparation of ATF Form 6, Department of Defense regulation 5030.49-R, and other appropriate military directives and standards of the U.S. Customs Service.

2.3.3 Animals and Plants

Information on mailing animal and plant products is in [601.9.0](#) and Publication 52, *Hazardous, Restricted, and Perishable Mail*.

2.3.4 Military Retirees

Except for eligible mail marked “Free Matter for the Blind or Handicapped,” any mailpiece addressed to a retiree at a military Post Office overseas must weigh less than 1 pound when the designation “Box R” is part of the address.

2.3.5 Packaging

Packages addressed from, to, or between overseas military Post Offices must meet the standards in [601.1.0](#) through [601.10.0 in Mailability](#). All containers of liquids and substances that easily liquefy must be packed, with enough absorbent material to take up all leakage in case of breakage, inside a second sealed waterproof container.

2.3.6 Customs Declarations

Any mailpiece weighing 16 ounces or more that is addressed to an APO or FPO ZIP Code must bear customs Form 2976 and must be presented to an employee at a Post Office or as designated by the postmaster. Certain destination APO and FPO addresses require customs Form 2976-A, as shown in the chart *Conditions Applied to Mail Addressed to Military Post Offices Overseas*, published in the *Postal Bulletin*. Unless the destination ZIP Code has a customs declaration form requirement in the chart, any known mailer (see the *International Mail Manual*) presenting bulk mailings that are declared on a postage statement is not required to use customs forms. The *International Mail Manual* contains procedures for completing the forms. Regardless of method of postage payment, mail from government agencies and their contractors going to, from, or between APO or FPO ZIP Codes is exempt from the requirements of this section unless customs declarations are necessary for customs treatment as indicated in the chart.

2.4 Military Ordinary Mail (MOM)

Military ordinary mail (MOM) is DOD official mail sent at Periodicals, Standard Mail, Parcel Select, or Package Services prices that requires faster service than sealift transportation to, from, and between military Post Offices. USPS transportation of MOM is by surface means. Expedited service is determined and provided by and at the expense of the DOD. MOM is limited to mail originated by the DOD or DOD-authorized contractors and each piece must:

- a. Be conspicuously marked “MOM” on the address side, below the postage or penalty mail indicia, and above the addressee’s name.
- b. Conform to the maximum size and weight limits for the postage price claimed (Periodicals, Standard Mail, or Package Services).

2.5 Parcel Airlift (PAL)

2.5.1 Description

Parcel airlift service (PAL) provides for air transportation of parcels on a space-available basis to or from military Post Offices (MPOs) outside the 48 contiguous states (from the Post Office of origin to the appropriate port of embarkation) for onward dispatch to other overseas MPOs or (from the port of embarkation for onward dispatch) to a Post Office within the 48 contiguous states.

2.5.2 Availability

PAL is available for Package Services or Parcel Select pieces that do not exceed 30 pounds in weight or 60 inches in length and girth combined, when mailed at or addressed to any overseas military Post Office outside the 48 contiguous states.

2.5.3 Parcel Airlift (PAL) Fees

Fee, in addition to postage and other fees, per piece:

MAXIMUM WEIGHT	FEE
2 pounds	\$0.50
3 pounds	1.00
4 pounds	1.45
30 pounds	2.00

2.5.4 Fee and Postage

The applicable PAL fee must be paid in addition to the regular surface price of postage for each addressed piece sent by PAL service.

2.5.5 Additional Services

The following extra services may be combined with PAL if the applicable standards for the services are met and the additional service fees paid:

- a. Certificate of mailing.
- b. Insured mail.
- c. Restricted delivery (if insured for more than \$200.00).
- d. Return receipt (if insured for more than \$200.00).
- e. Return receipt for merchandise.
- f. Special handling.

2.5.6 Marking

PAL parcels must be marked with the large letters “PAL” on the address side.

2.6 Express Mail Military Service (EMMS)**2.6.1 Availability**

EMMS is available between the United States and designated APOs and FPOs to provide Department of Defense personnel stationed overseas, and others entitled to APO and FPO mailing privileges, an expedited delivery service to or from the United States. EMMS Custom Designed Service and EMMS drop shipment service are available to authorized APO/FPO destinations.

2.6.2 Prices

EMMS postage prices correspond to the type of service requested, based on the weight of the addressed piece.

2.6.3 Designated Acceptance Sites

EMMS is available at designated USPS facilities for 2-day or 3-day service to designated APO/FPO 5-digit ZIP Codes and at designated APO/FPO facilities for 2-day or 3-day service to designated 3-digit destination ZIP Code areas, facilities, or locations in the United States. The 3-day service option is offered from U.S. acceptance offices to APOs/FPOs to which 2-day EMMS is not logistically supportable. (All 2-day EMMS acceptance offices can accept EMMS shipments for 3-day service after the local cutoff time for normal 2-day service. Designated APO/FPO facilities overseas can accept 3-day service EMMS shipments for 3-digit destination ZIP Code areas in the United States not included on their 2-day service network.)

2.6.4 Service Limitation

EMMS may not be available at or between all Post Offices or at all times of deposit. An EMMS directory, showing detailed local information about EMMS, is available at Post Offices.

2.6.5 Acceptance

EMMS items must be presented by the times authorized by the local postmaster.

2.6.6 Post Office to Addressee (To APO/FPO)

Under Post Office to Addressee Service to APO/FPO destinations, items presented under [2.6](#) for an APO/FPO address are available for delivery at the destination APO/FPO facility by 3 p.m. of the second day after mailing unless the APO/FPO facility is closed that day; in such cases, the item is available for delivery on the following business day. Items presented for 3-day service are available for delivery at the destination APO/FPO facility by 3 p.m. of the third day after mailing unless the APO/FPO facility is closed that day; in such cases, the item is available for delivery on the following business day.

2.6.7 Post Office to Addressee (From APO/FPO)

Under Post Office to Addressee Service from APO/FPO to U.S. destination, items presented under [2.6](#) are delivered to an addressee within the delivery area of the destination facility by 3 p.m. of the second day after mailing. Items presented for 3-day service are delivered to an addressee within the delivery area of the destination facility by 3 p.m. of the third day after mailing.

2.6.8 Mailing Label

For each Express Mail Next Day Service item, the mailer must complete a mailing label—either Label 11-A or Label 11-E (for Post Office to Post Office Service) or Label 11-B or Label 11-F (for Post Office to Addressee Service). Mailers authorized to present Next Day or Second Day Express Mail items using an Express Mail Manifesting System are required to follow label preparation procedures in Publication 97, *Express Mail Manifesting Technical Guide*.

2.6.9 Customs Declaration

For an Express Mail Military Service (EMMS) item, the mailer may also have to complete a customs declaration under 2.3.6. Military (APO/FPO) mail cannot be accepted under an Express Mail Manifesting agreement.

2.6.10 Waiver of Signature

Waiver of signature is not available for Express Mail Military Service.

2.6.11 ZIP Code Determination

For Express Mail Military Service (EMMS), the mailer must determine whether the item is addressed to a 5-digit APO/FPO ZIP Code to which EMMS is offered from the point of origin.

2.6.12 Deposit

Express Mail Military Service items must be presented by the times authorized by the local postmaster.

2.7 Delivery of Military Mail**2.7.1 Military Post Offices**

Military Post Offices (MPOs) are branches of a U.S. civil Post Office, operated by the Army, Navy, Air Force, or Marine Corps to serve military personnel overseas or aboard ships. The term includes Army Post Offices (APOs) for the U.S. Army and the U.S. Air Force and fleet Post Offices (FPOs) for the U.S. Navy and the U.S. Marine Corps. MPOs provide postal service for military personnel where the U.S. civil postal service does not operate and a military situation requires the service. MPOs are established or discontinued by the USPS only on request of the military department that operates them. Notice of these actions is published in the *Postal Bulletin*. Military Post Offices do not verify and accept bulk or commercial mail; such mailings must be deposited at (nonmilitary) U.S. Post Offices.

2.7.2 Units Without MPOs

For units not operating military Post Offices (MPOs), mail addressed to officials by title and personnel of military organizations is delivered to unit mail clerks or mail orderlies if such individuals are designated on DD Form 285 to receive all mail addressed to that unit. Registered, numbered insured, certified, and restricted-delivery mail addressed to individuals by name may be delivered to the unit mail clerk or mail orderly only if the addressee so authorizes in a letter to the Post Office, on Form 3849 or Form 3801.

703.2.7.3

2.7.3 Units With MPOs

For units operating military Post Offices (MPOs), all mail is delivered to the military postal clerk, an assistant postal clerk, or postal finance clerk for the organization. Mail for other military organizations may be delivered to military postal clerks or military postal finance clerks for further delivery, when requested.

2.7.4 Identification

To obtain mail, unit mail clerks, mail orderlies, postal clerks, and assistant postal clerks must provide proper identification.

2.7.5 Receipts

Return receipts for registered, numbered insured, and Certified Mail must not be completed by anyone other than the addressee.

3.0 Department of State Mail**3.1 Availability****3.1.1 General**

Subject to its own regulations, conditions, and restrictions, the U.S. Department of State transmits limited amounts of certain types of personal mail to authorized U.S. citizen employees of the federal government stationed in other countries.

Authorized mailers pay domestic postage prices and are not subject to foreign customs clearance standards. Customers can obtain current information regarding Department of State services, internal controls, and restrictions from the U.S. Department of State Diplomatic Pouch Division.

3.1.2 Inspection of Mail

The Department of State opens and inspects all mail sent to it for transmission abroad to determine whether the mail meets Department of State standards. Mail that does not comply may be returned to the USPS for return to sender.

3.1.3 Facilities Not Available

If Department of State destinations are not available, customers may mail articles to the addressee directly as regular international mail or, if the addressee has an APO or FPO address, as military mail under [2.0](#) or to a Department of State branch Post Office at a diplomatic post under Title 39 USC 406 or 413.

3.2 Conditions For Authorized Mail**3.2.1 Mailability**

USPS mailability standards for international mail apply to mail sent to the Department of State for transmission abroad.

3.2.2 Prohibited Material

In addition to any restriction imposed by the Department of State, the following items are prohibited:

- a. Parcels not meeting the size and weight limits in [3.2.3](#).

- b. Items not meeting the standards in [601.8.0, *Nonmailable and Restricted Articles and Substances Generally*](#), or Publication 52, *Hazardous, Restricted, and Perishable Mail*.
- c. International Air Transport Association (IATA) dangerous goods.
- d. Aerosols.
- e. Fragile materials.
- f. Materials in glass containers.
- g. Seeds, plants, and animals.
- h. Personal effects of deceased U.S. citizens.
- i. Items that are illegal to import into the receiving country or to export from the sending country.
- j. Goods from a foreign country addressed to the Department of State that require clearance by customs authorities before onward shipment to posts abroad.
- k. Liquids.
- l. Weapons of any kind or items that resemble weapons (e.g., pellet guns, toy guns, etc.).

3.2.3 Weight and Size

Weight limit is 50 pounds. Maximum dimensions are 32 inches long, 18 inches high, and 17 inches wide.

3.2.4 Postage Prices

Mailers must pay postage at the applicable domestic postage price for the class of mail and the type of service requested for mail sent through the Department of State. Zoned prices are computed to 3-digit ZIP Code area 205.

3.2.5 Express Mail

Mailers may not send Express Mail items through the Department of State.

3.2.6 Extra Services

The following extra services are not available for mail sent through the Department of State. If one of these services is requested, USPS returns the mailpiece to the sender with the endorsement "Service Not Available." (Mailers may request other extra services under [503](#).)

- a. Collect on Delivery (COD).
- b. Insured Mail.
- c. Registered Mail.
- d. Restricted Delivery.
- e. Special Handling.

3.2.7 Address Format

Address all official correspondence for transmission by the Department of State as follows:

RECIPIENT'S NAME (e.g., John Smith or Information Management Officer)

703.3.2.8

STREET AND NUMBER (e.g., 9900 Vienna Place)
WASHINGTON DC 20521+4 (e.g., Washington, DC 20521-9900)

3.2.8 Change-of-Address

Individuals may not file a change-of-address order for mail originally addressed to them at any Department of State ZIP Code. Additionally, individuals may not file a change-of-address order to forward mail to any Department of State ZIP Code. This restriction includes all change of address methods (e.g., online change of address available at www.usps.com).

3.2.9 Customs Declarations

Customs declarations (Form 2976 or 2976A) are not required on mail sent to individuals through Department of State facilities.

3.3 Mail Security

The Department of State does not assume liability for loss or damage to any mail it accepts for transmission abroad, including any liability for mail that has been accepted for mailing with extra services. However, if the Department of State receives such mail, it will attempt delivery. By using Department of State facilities, the sender consents both to the Department of State's examining the mail by means such as x-ray and other mail-screening methods, and to the department's opening, searching, and divulging the contents of any package.

4.0 Mail Sent by U.S. Armed Forces

4.1 Letters Sent Postage Collect

4.1.1 Eligibility and Marking

Letters sent by soldiers, sailors, airmen, and marines in the U.S. military service stationed in the United States or other places where U.S. domestic mail service operates, addressed to places in the United States, may be dispatched without postage for collection of the postage on delivery, if endorsed as follows:

- a. The address side of the letter must be marked "Soldier's Letter," "Airman's Letter," "Sailor's Letter," or "Marine's Letter," as applicable.
- b. Under the marking, the letter must bear the signature and official designation with a facsimile hand stamp or in writing of a commissioned officer to whose command the soldier or airman belongs, or of a surgeon or chaplain at a hospital where he or she is. In the Navy and Marine Corps, the letter must bear the signature and official designation with a facsimile hand stamp or in writing of a commissioned officer attached to the vessel on which the member is serving or an officer commanding a hospital or detachment ashore where he or she is.

4.1.2 Postage

Postage at the applicable single-piece price for First-Class Mail is collected from the addressee on delivery.

4.2 Matter Sent Free

4.2.1 Description

Matter that may be mailed free of postage by certain military personnel is restricted to letters, postcards, and recorded communications (whether sound or video) with the character of personal correspondence.

4.2.2 Eligibility

The free mailing privilege may be used only by members of the U.S. Armed Forces on active duty who are either:

- a. Assigned to military duty in a certain overseas area, as designated by the President or designee under 39 USC 3401(a)(1), and who mail the matter at an Armed Forces Post Office in that area.
- b. Hospitalized in a facility under the jurisdiction of the U.S. Armed Forces because of disease or injury from military service in an overseas area, as designated by the President or designee.

4.2.3 Description of Overseas Areas

The definition of *overseas areas* is administered by the Military Postal Service Agency, which periodically provides the USPS with information for publication in the *Postal Bulletin* listing current overseas areas and other pertinent details.

4.2.4 Military Address

Matter mailed free must be addressed to a military Post Office (APO/FPO) or a place in the United States (including its territories, possessions, and Puerto Rico) served by a U.S. Post Office.

4.2.5 Preparation

The address side of a mailpiece must be marked "FREE," written in the sender's handwriting, in the upper right corner; and the sender's name, military grade, and complete military address, in the upper left corner.

4.2.6 Extra Services

Matter mailed free may not be registered, certified, or insured.

4.2.7 Undeliverable Mail

If matter mailed free is undeliverable as addressed, the matter is treated as First-Class Mail for transportation, processing, delivery, and handling.

5.0 Free Matter for the Blind and Other Physically Handicapped Persons

5.1 Basic Information

5.1.1 General

Subject to the standards below, matter may be entered free of postage if mailed by or for the use of blind or other persons who cannot read or use conventionally printed materials due to a physical handicap. The provisions of 5.0 apply to domestic mail only.

5.1.2 Mail Classification

Matter mailed free under this standard is not considered part of any particular class of mail and is not protected against postal inspection. This matter is treated as First-Class Mail for the exclusive purposes of determining appropriate standards for processing and delivery and for handling if undeliverable.

5.1.3 Eligibility

The following persons are considered to be blind or unable to read or use conventionally printed material due to a physical handicap for purposes of this section:

- a. Certified participants in the Library of Congress National Library Service for the Blind and Physically Handicapped (NLS).
- b. Blind persons whose visual acuity, as determined by competent authority, is 20/200 or less in the better eye with correcting lenses, or whose widest diameter of visual field subtends angular distance no greater than 20 degrees.
- c. Other physically handicapped persons certified by competent authority as meeting one or more of the following conditions:
 1. Having a visual disability, with correction and regardless of optical measurement, that prevents the reading of standard printed material.
 2. Being unable to read or unable to use standard printed material as a result of physical limitations.
 3. Having a reading disability resulting from organic dysfunction and of sufficient severity to prevent their reading printed material in a normal manner.
 4. Meeting the requirements of eligibility resulting from a degenerative, variable disease that renders them unable to read or use conventional printed material because of impaired eyesight or other physical factors. These persons are eligible during the time in which they are certified by a competent authority as unable to read or use conventional materials.
- d. Eligible participants must be residents of the United States, including the several states, territories, insular possessions, and the District of Columbia, or American citizens domiciled abroad.

5.1.4 Certifying Authority

For purposes of this standard:

- a. The postmaster may extend the free matter privilege to an individual recipient based on personal knowledge of the individual's eligibility.
- b. In cases of blindness, visual impairment, or physical limitations, "competent authority" is defined to include doctors of medicine; doctors of osteopathy; ophthalmologists; optometrists; registered nurses; therapists; and professional staff of hospitals, institutions, and public or private welfare agencies (e.g., social workers, caseworkers, counselors, rehabilitation teachers, and superintendents). In the absence of any of these, certification may be made by

professional librarians or by any person whose competence under specific circumstances is acceptable to the Library of Congress (see 36 CFR 701.10(b)(2)(i)).

- c. In the case of reading disability from organic dysfunction, “competent authority” is defined as doctors of medicine and doctors of osteopathy.

5.1.5 Qualifying Individuals

The USPS may require individuals claiming entitlement to the free matter privilege to furnish evidence of eligibility consistent with the standards in 5.1.3 and 5.1.4, or verify by other means that the recipients are eligible to receive free matter.

5.2 Matter Sent To Blind or Other Physically Handicapped Persons

5.2.1 Acceptable Matter

Subject to 5.2.2, this matter may be mailed free:

- a. Reading matter in braille or 14-point or larger sightsaving type and musical scores.
- b. Sound reproductions.
- c. Paper, records, tapes, and other material for the production of reading matter, musical scores, or sound reproductions.
- d. Reproducers or parts of them for sound reproductions.
- e. Braille writers, typewriters, educational or other materials or devices, or parts thereof, used for writing by, or designed or adapted for use of, a blind person or a person who has a physical impairment as described in 5.1.3.

5.2.2 Conditions

The matter listed in 5.2.1 must meet these conditions:

- a. The matter must be for the use of a blind or other physically handicapped person.
- b. Either no charge, rental, subscription, or other fee is required for this matter; or, if required, may not exceed the cost of the item.
- c. The matter may be opened and inspected by the USPS.
- d. The matter contains no advertising. Advertising is defined as:
 1. All material of which a valuable consideration is paid, accepted, or promised, that calls attention to something to get people to buy it, sell it, seek it, or support it.
 2. Reading matter or other material of which an advertising price is charged.
 3. Articles, items, and notices in the form of reading matter inserted by custom or understanding that textual matter is to be inserted for the advertiser or the advertiser’s products in which a display advertisement appears.
 4. An organization’s advertisement of its own services or issues, or any other business of the publisher, whether in display advertising or reading matter.

703.5.2.3

5.2.3 Letters From Sighted Individuals

Letters prepared in any form by sighted individuals, to be sent to a blind or other physically handicapped person, or empty shipping materials for mailing matter described in this section, may not be sent free and must bear the full applicable postage.

5.3 Matter Sent By Blind or Other Physically Handicapped Persons**5.3.1 Acceptable Letters**

Only letters in braille or in 14-point or larger sightsaving type or in the form of sound recordings, and containing no advertising, may be mailed free, and only if unsealed and sent by a blind or other physically handicapped person as described in [5.1.3](#).

5.3.2 Other Letters

Letters that are handwritten, or printed or typed in a type size smaller than 14 points, may not be sent free. These letters must bear the full applicable postage.

5.4 Preparation**5.4.1 Basic Standards**

All matter mailed under this standard:

- a. Must be marked "Free Matter for the Blind or Handicapped" in the upper right corner of the address side.
- b. Must meet the minimum and maximum dimensions in [601.1.0](#).
- c. Is subject to the mailability standards in [601.8.0](#) through [601.11.0](#) in *Mailability*.

5.4.2 Extra Services

Insurance is the only extra service that can be added to mail sent under this standard. The fee for insurance must be paid by the sender.

6.0 Official Mail (Franked)**6.1 Basic Information****6.1.1 Members of Congress**

Official mail of Members of Congress is sent without prepayment of postage and bears instead either a written or printed facsimile signature or a specified marking. [Exhibit 6.1.1](#) shows what is accepted under frank and who is authorized its use.

Exhibit 6.1.1 Franked Mail of Members of Congress

USER ENTITLED	MATTER PERMITTED	MARKING REQUIRED	PERIOD AUTHORIZED
Vice President of the United States, Members of Congress, Resident Commissioners, Secretary of the Senate, Sergeant at Arms of the Senate, and each elected officer of the House of Representatives (other than Members of the House)	Public documents printed by order of Congress	“Public Document” and “U.S.S.” or “M.C.” must appear on address side.	During 90 days immediately after expiration of term of office
Members of Congress and Resident Commissioners	<i>Congressional Record</i> or any part of it (including reprints of any part, speech, or report contained in it) if for official business, activities, or duties	“Congressional Record” or “Part of Congressional Record” and “U.S.S.” or “M.C.” must appear on address side.	During term of office only
Members of Congress	Seed and agricultural reports from Department of Agriculture	Signature and title (written or printed facsimile) of person entitled to frank must appear on address side.	During 90 days immediately after expiration of term of office
Vice President of the United States, Members and Members-elect of Congress, Resident Commissioners, Secretary of the Senate, Sergeant at Arms of the Senate, each elected officer of the House of Representatives (other than a Member of the House), Legislative Counsels of the House of Representatives and the Senate, Law Revision Counsel of the House of Representatives, and Senate Legal Counsel	Official correspondence	The signature and title (written or printed facsimile) of person entitled to frank must appear on address side.	During term of office only. When position of Secretary, Sergeant at Arms, elected officer, Legislative Counsel, Law Revision Counsel, or Senate Legal Counsel is vacant, privileges may be exercised in officer’s name by authorized persons.
Vice President-elect	All mail connected with preparation for assumption of official duties as Vice President	Signature and title (written or printed facsimile) of Vice President-elect must appear on address side.	Until assumption of duties as Vice President
Former Vice President, each former Member of Congress, former Secretary of the Senate, former Sergeant at Arms of the Senate, each former elected officer of the House (other than former Member of the House), and each former Delegate or Resident Commissioner	Matter on official business about closing of offices	Signature and title (written or printed facsimile) of person entitled to frank must appear on address side.	During 90 days immediately after date of leaving office
Former Speakers of the House	Public documents, seeds, and agricultural reports from Department of Agriculture, official correspondence	Signature and title (written or printed facsimile) of former Speaker or public document marking as shown above, must appear on address side.	For as long as former Speaker determines necessary

6.1.2 Former President and Spouse

Any former President of the United States and any surviving spouse of a former President may send nonpolitical mail as franked mail if it bears the sender’s written or facsimile signature and the words “Postage and Fees Paid” in the upper right corner of the address side.

6.1.3 Surviving Spouse of Member of Congress

When a Member of Congress dies during the term of office, the Member's surviving spouse may send correspondence relating to the death without prepayment of postage, for a period not to exceed 180 days after the death of the Member. The mail must bear the sender's written or facsimile signature in the upper right corner of the address side. If there is no surviving spouse, this privilege may be exercised by an immediate family member of the deceased Member of Congress designated by the Secretary of the Senate or the Clerk of the House of Representatives, as appropriate.

6.1.4 Use

A person entitled to use franked mail may not lend this frank or permit its use by any committee, organization, association, or other person. This restriction does not apply to a committee of the Congress.

6.1.5 Criteria

Franked mail must be addressed to the recipient by name, except under [602.3.0, Use of Alternative Addressing](#), and it must meet the mailability criteria in [601](#) and the physical standards for the class of mail used.

6.1.6 Handling

Franked mail is entitled to all extra services for which it is properly endorsed and is handled and forwarded as ordinary mail, except that after delivery to the addressee, it may not be remailed.

6.1.7 Package to One Addressee

A person entitled to use franked mail may send a package of franked mail to one addressee, who may open the package and, on behalf of such person, address the franked articles and mail them.

6.2 Addressing**6.2.1 Required Addressing**

Except as permitted in [6.2.2](#), all mail sent under the franking privilege must be addressed to the recipient by name and complete delivery address.

6.2.2 Alternative Addressing

Mail sent under the franking privilege of a member of or member-elect to Congress or a delegate, delegate-elect, resident commissioner, or resident commissioner-elect to the U.S. House of Representatives may be addressed under the alternative addressing formats in [602.3.2](#) through [602.3.4](#) for delivery to customers within the congressional district, state, or area that he or she represents. A member of the House of Representatives may not, under the franking privilege, use the alternative addressing formats to send mail outside the congressional district that he or she represents. Any representative-at-large may send franked mail with the simplified address format to USPS customers within the entire state that he or she represents.

6.2.3 Simplified Address Format—Mail Preparation

Mailers must prepare containers of mail using the simplified address format in the manner listed below:

- a. Containers of congressional frank mailpieces using the simplified address format must be prepared under [602.3.0](#).
- b. PS Tag 11, *Congressional Mail* (“Postmaster—Open and Distribute”), must be securely affixed to each sack or tray of congressional mail to ensure adequate identification of the mail. On trays, the tag must be affixed to the end that bears the tray label.

6.2.4 Delivery

Mail with a simplified address format is delivered within the district, state, or area to any of the following:

- a. Each boxholder or family on a rural or highway contract route.
- b. Each Post Office boxholder.
- c. Each active possible delivery on city carrier routes.
- d. For deliveries under [6.2.4a](#) and [6.2.4c](#), partial distribution of simplified address mailings is permitted only when the carrier's delivery territory crosses congressional district boundaries. In these cases, complete distribution is made to the portion of the route within a single congressional district.

6.2.5 Delivery Information

Delivery information as described in [509.1.0, Address Information System Products](#), is provided on request for a congressional district when a Post Office serves areas located in more than one district.

7.0 Official Mail (Penalty)

7.1 Definitions

The term *penalty mail* refers to official mail, sent by U.S. government agencies, relating solely to the business of the U.S. government, that is authorized by law to be carried in the mail without prepayment of postage. For this standard, *agencies* are departments, agencies, corporations, establishments, commissions, committees, and all officers and authorities of the U.S. government authorized to use penalty mail.

7.2 Postage And Fees

7.2.1 Reimbursement

Agencies must reimburse the USPS the equivalent amount of postage and fees due for the penalty mail service they receive, following instructions from the USPS. The USPS requires agencies to use penalty postage meters (postage evidencing systems) or other forms of direct accountability for penalty mail services to ensure proper reimbursement through the Official Mail Accounting System (OMAS).

7.2.2 Prepayment

An agency may also prepay postage by any method available to private-sector mailers. This prepaid mail is not considered penalty mail.

7.3 Eligibility

7.3.1 Matter Sent as Penalty Mail

Only matter relating solely to the business of the U.S. government may be sent without prepayment of postage as penalty mail when mailed by officers of the executive and judicial branches of the government, the Legislative Counsel for the House of Representatives and the Senate, the Superintendent of Documents, and the Joint Committee on Printing when it mails correspondence on the Congressional Directory. Generally, the USPS holds that the agency determines which matter relates solely to its own business. Cases of questionable use must be referred to the agency.

7.3.2 USDA

Special conditions that apply to the U.S. Department of Agriculture (USDA) include:

- a. All correspondence, bulletins, and reports about agriculture extension work and home economics carried on in cooperation with the USDA may be sent as penalty mail when mailed by the college officer or other person connected with the extension department of the college and designated by the Secretary of Agriculture. The designated officer may deposit mailings only at the Post Office authorized by the PCSC. Correspondence must be conducted under the designated officer's name. Correspondence with an autograph signature may be sealed. All other matter must be unsealed.
- b. All correspondence, bulletins, and other matter promoting cooperative extension work as a federal enterprise or relating exclusively to the business of the U.S. government may be sent as penalty mail by cooperative extension agents of the USDA Extension Service when part of their official duties. If cooperative extension employees mail correspondence, authorized USDA agents must sign it and give their official titles to show that they are authorized to use penalty mail.
- c. Annual reports of government-aided colleges (under 7 USC 325) may be sent as penalty mail when addressed to the Secretary of Education, the Secretary of Agriculture, or to any other such government-aided college.

7.3.3 Employment Security Offices

All mail prepared by state employment security offices cooperating with the U.S. Department of Labor is accepted without prepayment of postage or fees.

7.3.4 Others Authorized

The general secretariat of the Organization of American States and Pan American Health Organization (or Pan American Sanitary Bureau) are authorized by law to transmit official matter without prepayment (see the *International Mail Manual*).

7.3.5 Vice President-Elect

The Vice President-elect of the United States may send franked mail in connection with preparations for assuming official duties as Vice President. The right to use penalty mail ceases immediately on inauguration to the vice presidency.

7.4 Authorization

7.4.1 Authorized Agencies

Agencies authorized to use penalty mail are listed in Handbook DM-103, *Official Mail*, and are updated periodically in the *Postal Bulletin*. Other agencies may request authorization to use penalty mail by writing to the Post Office Accounting manager, USPS Headquarters (see [608.8.0](#) for address).

7.4.2 College Officer

The college officer or other person connected with the extension department of the college and designated by the Secretary of Agriculture to use penalty mail under [7.3.2a](#) must be authorized by the PCSC to deposit penalty mail at a specific Post Office.

7.4.3 Licenses and Permits

Any agency authorized to use penalty mail must obtain licenses or permits to use penalty postage meters, penalty permit imprints, penalty business reply mail, and penalty Periodicals at specific Post Offices under [7.7](#) through [7.13](#).

7.4.4 Private Use

Unless permitted by USPS standards, an agency may not lend or provide penalty envelopes, cards, cartons, labels, meter stamps, or penalty mail stamps to any private person, concern, or organization. The use of these items for matter not relating exclusively to the business of the U.S. government is prohibited.

7.4.5 Permit and BRM Numbers

Penalty mail permit imprint or BRM numbers, or information to help agencies track and account for penalty mail postage by cost center, may be obtained by written request to the Post Office Accounting manager, USPS Headquarters.

7.5 Services, Classes, Prices, Preparation, And Detention

7.5.1 Postal Services

USPS policy is to give penalty mail customers all postal services for which they qualify, including forwarding, return, and address correction, unless otherwise provided by law or regulation. Agencies must pay for services in accordance with [604.6.0](#), [604.8.0](#), and [604.10.0](#).

7.5.2 Nonprofit Prices

Agencies are not permitted to send penalty mail at any nonprofit or subsidized price.

7.5.3 Basic Preparation

Penalty mail must:

- a. Be prepared with an appropriate penalty indicia format.
- b. Meet the eligibility, marking, preparation, and physical standards for the class of mail and price of postage used.
- c. Include a ZIP+4 code or a 5-digit ZIP Code in all delivery and return addresses.
- d. For all methods of payment, be endorsed for class or price except for single-piece price First-Class Mail.

703.7.5.4

7.5.4 Discounted Prices

Discounted penalty mail mailings must meet additional preparation standards:

- a. Presorted mailings must be prepared with penalty postage meters or penalty permit imprints or, for Periodicals, the penalty Periodicals imprint.
- b. Mailing fees and application fees are reimbursed under [7.2](#) and are not paid to the local Post Office, but are charged and billed through the Official Mail Accounting System (OMAS) from records of mailing activity.
- c. Discounted mailings must meet the eligibility and preparation standards and must be submitted to the designated USPS acceptance unit with the proper USPS postage statement.
- d. Discounted mailings are subject to the same USPS procedures for verifying mail preparation as private-sector mailings. First-Class Mail and Priority Mail, however, are not detained for improper mailer preparation. If the agency cannot be reached about a disqualified discounted mailing, the single-piece price is charged and the mailing is accepted.

7.5.5 Extra Services

Penalty mail endorsed for an extra service is given the requested service. Penalty mail may not be used for:

- a. Money orders.
- b. Collect on delivery (COD) mail.
- c. Post office box service fees.

7.5.6 Shortpaid and Unpaid Mail

[604.6.0](#), [604.8.0](#), and [604.10.0](#) apply to shortpaid and unpaid penalty mail, except that military units engaged in hostile operations or operating under arduous conditions may send mail postage-due, using a special postage-due format, when permitted under [7.5.7](#).

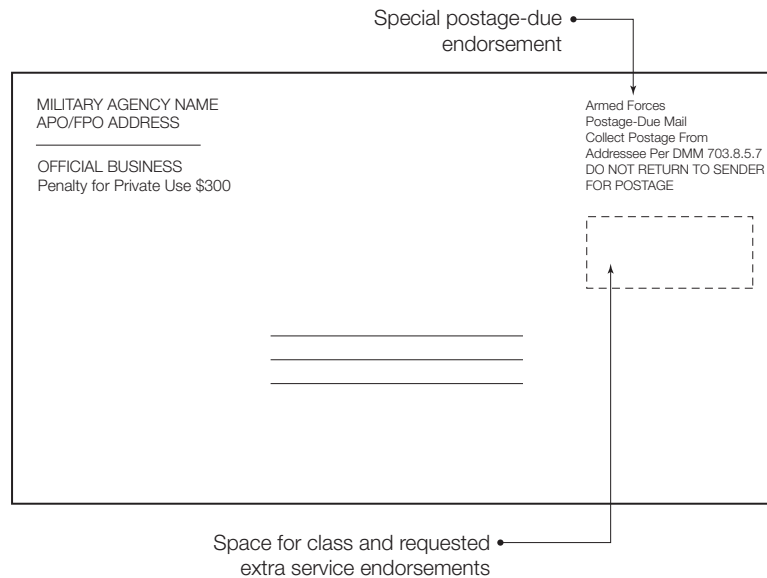

7.5.7 Military Units

Military units engaged in hostile operations or operating under arduous conditions may be authorized to use a special form of postage-due penalty mail, subject to these conditions:

- a. This mail must be in the format shown in [Exhibit 7.5.7](#).
- b. The special postage-due endorsement must be printed or hand-stamped above the delivery address where postage normally is affixed.
- c. Endorsements for class and requested extra services must be placed below the special postage-due indicia.
- d. The return address must be a military Post Office (APO/FPO).
- e. The Military Postal Service Agency must notify the Post Office Accounting manager, USPS Headquarters, within 3 business days after effecting these provisions.
- f. The use of these provisions is limited to 120 days from date of authorization unless otherwise announced.

- g. With prior agreement, the Military Postal Service Agency and the USPS may conduct tests of these provisions during designated military training exercises.

Exhibit 7.5.7 Postage-Due Mail for Military Units Engaged in Hostile Operations

7.5.8 Foreign

Penalty mail may be sent to other countries under the applicable standards and restrictions.

7.5.9 Mail Detention

Except as permitted by standard, the USPS does not hold penalty mail even if the mail appears to abuse official mailing privileges. Reports of indicated abuse are submitted to the PCSC for referral to the proper agency for investigation and action.

7.6 General Standards for Penalty Indicia

7.6.1 General

The formats and methods of mailing penalty mail are penalty metered mail, penalty permit imprint mail, penalty mail stamps, penalty Periodicals imprint mail, and penalty reply mail. There are also special procedures for penalty Express Mail. Information on use of INTELPOST may be obtained from the Post Office Accounting manager, USPS Headquarters. All penalty mail matter must meet the applicable standards in 7.6 through 7.15.

7.6.2 Use

Envelopes and labels prepared under these standards may be used only to transmit penalty mail within the U.S. Mail, except when:

- a. Official items are carried by employees of the originating agency.
- b. Official items are carried by contractors for later entry into the U.S. Mail.

- c. Agencies reach written agreement with the Post Office Accounting manager, USPS Headquarters, to account for and pay postage on official items carried outside the U.S. Mail (18 USC 1693-1699 and 39 USC 601-606).

7.7 Penalty Meter

7.7.1 Description

Any agency may use postage meters (postage evidencing systems) with a special penalty design, following the procedures in [604.4.0](#) as modified in [7.7.2](#) through [7.7.11](#).

7.7.2 License

The agency must include its 3-digit agency code on each application for a meter license submitted under [604.4.0](#) and may assign one cost code to each license. A meter may be licensed for use at only one licensing Post Office. The agency must have a license and assigned meter(s) for each Post Office where it will deposit mail. The agency may have any number of meters under a single license. All transactions for each meter on a single license are charged to the agency code on the license application.

7.7.3 Meter Indicia Format

Penalty mail meter stamp designs must be placed in the upper right corner of the mailpiece. Except under [604.4.0](#), *Postage Meters and PC Postage Products ("Postage Evidencing Systems")*, envelopes used with a penalty postage meter must not contain facing identification marks (FIMs) or printing other than the meter indicia in the area where the meter stamps are applied.

7.7.4 Return Address

The complete return address (agency name and mailing address) must be in the upper left corner of each mailpiece. The preprinted words "Official Business" must be immediately below the return address.

7.7.5 Refunds for Unused Penalty Meter Indicia

Refunds for complete, legible, valid, unused penalty mail meter indicia are made under [604.9.3.2](#). No refunds are made in cash or applied to a meter.

7.7.6 Transferring Meter

An agency transferring a meter from one licensing Post Office to another must obtain a license from the new licensing office under [7.7.2](#).

7.7.7 On-Site Service

An agency wanting on-site meter service must pay the required fee in cash or with a check when the service is rendered.

7.7.8 Replacement Meter

If a meter is replaced, the remaining postage is transferred from the original meter to the replacement meter. The postage may not be transferred to a penalty meter operating under a different license number. Cash refunds are not issued to agencies for penalty mail postage meters checked out of service.

7.7.9 Insufficient Postage

Penalty metered mail with insufficient postage imprinted, and envelopes and labels designed for penalty meter use found in the mail without a penalty meter stamp, are treated as postage due under [604.6.0](#), [604.8.0](#), and [604.10.0](#).

7.7.10 Computerized Meter Resetting

An agency may use a penalty mail version of the authorized postage meter payment process for remotely reset meters if it is offered by the postage meter provider and approved by the USPS. The agency must follow the procedures in [604.4.0](#), except the agency is not required to prepay for metered postage.

7.7.11 Disaster Field Office Meters

Authorized federal government agencies also may use a special penalty version of the authorized postage meter payment process for remotely reset meters for meters known as Disaster Field Office (DFO) meters. These meters are *only* for temporary use in federal government-declared disaster areas and must be replaced by regular penalty meters within 30 days, except for those used by designated agency staff specialists not in a fixed location (e.g., mobile vehicle or temporary office), who may use them through the duration of the emergency operation declaration. Written requests for authorization to use DFO meters must be submitted to the Post Office Accounting manager (see [608.8.0](#)) and include the name, office address, and telephone number of an agency headquarters manager responsible for tracking and maintaining these meters, including complying with the necessary examination requirements. License applications for DFO meters are handled by the meter providers, who set up the licenses through the Washington, DC, licensing Post Office under normal meter licensing procedures.

7.8 Penalty Permit Imprint

7.8.1 Application

An agency may apply to use penalty permit imprint procedures by completing Form 3615. The agency submits it to the Post Office where the mailings are to be deposited. The agency must show the complete name of the agency and, if applicable, the name of the component unit in the “Name of Applicant” section of the form. When the agency receives authorization to use a penalty permit imprint number not shown in the most recent listing in the *Postal Bulletin*, a copy of the authorizing letter from the Post Office Accounting manager, USPS Headquarters, must be submitted with Form 3615 to the Post Office where mailings are to be made. These procedures also apply when an agency uses a contractor to mail penalty permit imprint matter, unless the agency provides the contractor with the completed Form 3615 to submit to the entry Post Office. Fees are reimbursed under [7.2](#) and are not paid to the local Post Office. The USPS is not required to complete Form 3615 to activate its own permit imprint number (G-10) at Post Offices.

7.8.2 Indicia Format

The penalty permit imprint indicia must be in a rectangular box in the upper right corner of the mailpiece. The indicia must include the words “Postage and Fees Paid,” the agency name, and the agency’s assigned penalty permit imprint number or other penalty permit imprint number authorized by the Post Office Accounting manager, USPS Headquarters, preceded by the letter “G.” In addition, the class of mail or appropriate price endorsement must be the first item within the indicia or

703.7.8.3

immediately below or to the left of the indicia. Price endorsements for certain price categories may also be directly above the top line of the address. The city of mailing, amount of postage, and weight of the piece may be included within the indicia but are not required. First-Class Mail penalty permit imprints may also show the date.

7.8.3 Return Address

The complete return address (agency name and mailing address) must be in the upper left corner. The preprinted words “Official Business” and “Penalty for Private Use \$300.00” must be directly below the return address. The penalty statement must not be handwritten or typewritten.

7.8.4 Postage Statement

Mail sent under penalty permit imprint procedures must meet the standards of [604.5.0](#), except for prepayment and imprint format. The proper USPS postage statement must be submitted with each penalty permit imprint mailing. If a receipt is needed, the mailer must submit a duplicate of the postage statement. When a postage statement is submitted by a Government Printing Office (GPO) contractor, the serial number of the accompanying GPO Form 712 must be shown in the upper right corner.

7.8.5 GPO Contractor

As an exception to the general standard in [7.8.5](#), an agency mailing submitted by a GPO contractor may contain nonidentical-weight pieces or more than one class of mail, if:

- a. The pieces are for mailing only at single-piece prices.
- b. All other applicable standards for use of permit imprints are met, including those on minimum quantity and class of mail endorsements.
- c. A completed Form 3602-G is submitted to the entry Post Office for each mailing, in duplicate if the contractor wants a copy.
- d. The mailing is separated by the class and weight categories on Form 3602-G when presented to the Post Office. Postage is computed on the average weight of a piece for each category of mailing reported.
- e. Mailings reported on Form 3602-G are not eligible for intra-BMC Parcel Post, or intra-BMC Parcel Select prices.
- f. GPO Form 712 is submitted with the mailing and the proper USPS postage statement.

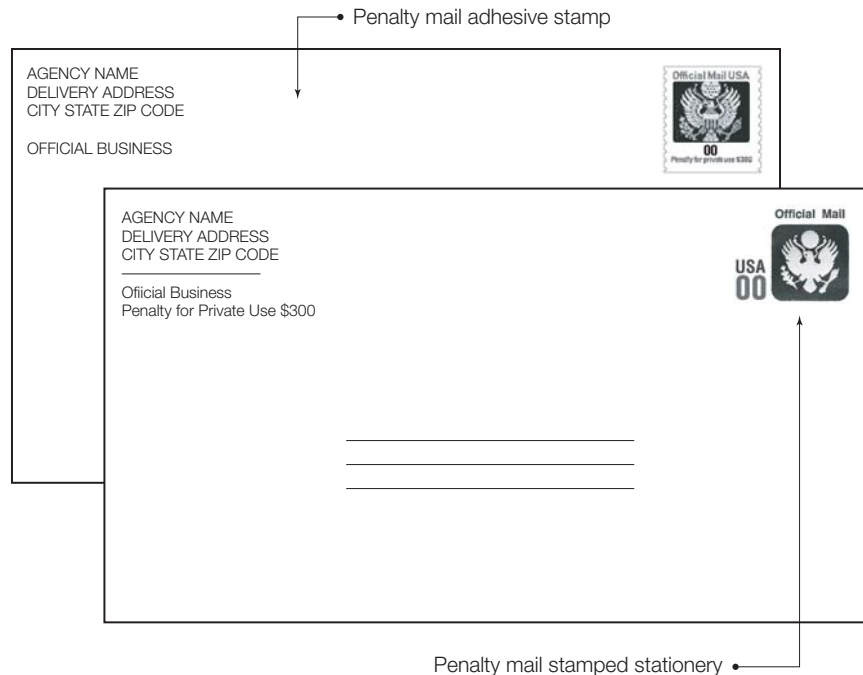

7.9 Penalty Postage Stamps and Stationery**7.9.1 Use**

Penalty mail stamps may be used by any authorized federal agency to facilitate postage accountability. Enough penalty mail stamps to cover the correct single-piece price postage, including applicable surcharges or extra service fees, must be affixed to each mailpiece. Pieces with insufficient penalty mail stamps affixed, and envelopes and labels designed for penalty mail stamps found in the mail without a penalty mail stamp, are handled under [604.6.0](#), [604.8.0](#), and [604.10.0](#).

7.9.2 Availability

Penalty mail stamped stationery (plain stamped envelopes, personalized envelopes, and stamped cards) and penalty mail adhesive stamps (see Exhibit 7.9.2) are available in various denominations.

Exhibit 7.9.2 Penalty Mail Postage Format

7.9.3 Application

A federal agency may apply to use penalty mail stamps by submitting a letter to the Post Office Accounting manager, USPS Headquarters, stating how the agency plans to use the stamps. The Post Office Accounting manager provides a written response stating approval or denial of the application.

7.9.4 Placement

Penalty mail adhesive stamps must be affixed in the upper right corner of the address side of the mailpiece.

7.9.5 Return Address

The complete return address of the agency (agency name and mailing address) must be in the upper left corner of the address side of the mailpiece. The preprinted words "Official Business" must be immediately below the return address. On penalty stamped stationery, "Penalty for Private Use \$300.00" must be placed below "Official Business."

703.7.9.6

7.9.6 Ordering Stock

An agency authorized to use penalty mail stamps must order penalty mail stock as follows:

- a. Orders for penalty mail stamp stock other than personalized envelopes must be sent on Form 17-G to the stamp distribution office (SDO) serving the ZIP Code area to which the stamp stock is to be shipped. Orders for personalized envelopes must be sent on Form 17-J to Stamp Fulfillment Services (see [608.8.0](#) for address).
- b. Each order must total at least \$50. Smaller orders received are increased to meet or exceed the minimum by adding full 100-stamp coils at the current First-Class Mail single-piece 1-ounce price.
- c. Each denomination of stamps must be ordered in multiples of 100 (i.e., full sheets or coils), except that \$1 and \$5 stamps must be ordered in multiples of 10.
- d. Penalty stamped cards must be ordered in full units of 250 cards.
- e. Penalty stamped envelopes (plain and personalized) must be ordered in full units of 500 envelopes.

7.9.7 Exchanges

Incorrectly shipped items or items damaged in shipping or defective or otherwise unserviceable may be exchanged by the SDO at full value.

7.10 General Standards for Penalty Reply Mail**7.10.1 Restriction to Approved Formats**

An agency may distribute penalty envelopes, cards, cartons, or labels to any person, concern, or organization. To distribute penalty reply mail, agencies must use the penalty business reply mail format; the penalty metered reply format; penalty mail adhesive stamps or penalty mail stamped stationery; or the penalty merchandise return service label.

7.10.2 Prepayment

Prepaid adhesive postage stamps may be affixed to cards and envelopes distributed for reply purposes.

7.10.3 Penalty Metered Reply

An agency that holds a penalty postage meter license may distribute penalty metered reply cards and envelopes for return to the meter license holder, subject to [604.4.0](#).

7.10.4 Penalty Stamped Mail

An agency authorized to use penalty mail may furnish to a person, concern, or organization from or through whom official matter is desired, for reply purposes, printed penalty mail stamped stationery or envelopes or cards bearing penalty mail stamps that contain the preprinted address of a federal office or officer.

7.10.5 Format

Letter-size reply mail pieces enclosed in automation price mailings must meet the standards in [201.3.0](#) and [507.9.0](#).

7.11 Penalty Business Reply Mail (BRM)

7.11.1 General

An agency may participate in business reply mail service (including Qualified Business Reply Mail). Standards for business reply mail are in [507.9.0](#). Agencies can choose to pay postage and per piece charges for BRM by setting up a BRM advance deposit account to be billed through the Official Mail Accounting System (OMAS) or by paying for BRM through an OMAS postage due account. Under a BRM advance deposit account, the agency is billed an annual accounting fee by each Post Office ZIP Code where mail is returned, the appropriate postage, and high-volume BRM per piece charges. Under the postage due option, the agency pays the appropriate postage and basic BRM per piece charges through an OMAS postage due account. The postage, fees, and per piece charges are the same as those for private-sector customers (see [507.9.1](#)). Government agencies cannot use cash, penalty meter stamps, or penalty mail stamps to pay postage due.

7.11.2 Application

An agency must apply for a BRM permit on Form 3615 at each Post Office where its BRM is to be returned. The form must include the BRM permit number, the agency code, the agency cost code (if desired), and whether the agency wants to set up a BRM account. A contractor for the agency may submit the form if it is signed by an authorized agency representative. The USPS is not required to complete Form 3615 to activate its own BRM permit number at Post Offices.

7.11.3 Permit Fees

If an agency uses BRM at any location, it is charged an annual BRM permit and renewal fee for each permit number assigned. These fees are billed automatically by USPS Headquarters each year, and no agency action is necessary.

7.11.4 Addressing and Format

Penalty BRM envelopes must show the address of an authorized agency or a component unit. Envelopes must be printed as detailed in [507.9.0](#) and as shown in [Exhibit 7.11.4](#), with these exceptions:

- a. The address may be printed, typewritten, or hand-stamped directly on the mailpiece, or a printed gummed label may be affixed in the address area. The address must not be handwritten. Letter-size BRM enclosed in automation price mailings must meet the standards in [201.3.0](#) and [507.9.0](#).
- b. The required legend must read “Postage Will Be Paid By [name of authorized agency].”
- c. The space for the permit holder’s use must include the statement “Official Business, Penalty for Private Use \$300.00.” Space above this statement may be used for return address, logos, and distribution codes.

703.7.11.5

Exhibit 7.11.4 Penalty Business Reply Mail Format

**See Exhibit 507.9.8.1 for more complete formatting information*

7.11.5 Cancellation

If an agency wants to cancel a BRM account, the agency must notify the Post Office handling the account.

7.12 Penalty Merchandise Return Service**7.12.1 Description**

Merchandise return service allows an authorized permit holder to pay the postage and extra service fees on single-piece price First-Class Mail, Priority Mail, and Package Services (Parcel Post, Bound Printed Matter, and Media Mail only) that is returned by the permit holder's customers via a special label produced by the permit holder as specified by [507.11.0](#).

7.12.2 Postage and Extra Service Fees

The standards for payment of postage and fees are:

- a. The permit holder guarantees payment of the proper postage and extra service fees on all returned merchandise return service articles distributed under the permit holder's permit number. Postage is collected for each article from an OMAS MRS account.
- b. Returned parcels are charged single-piece price postage and extra service fees based on the class or subclass marking on the label. If a piece is unmarked, then it is charged Parcel Post prices. If the postage for the returned piece is zoned and there is no way to determine the zone of origin (i.e., no postmark or return address), then postage is calculated at zone 4 (for Priority Mail) or zone 4 Inter-BMC prices (for Parcel Post).
- c. There is no per piece charge per parcel returned.

7.12.3 Annual Accounting Fee

All MRS permit holders are required to pay the annual accounting fee in [507.11.1.2](#), which is assessed automatically through OMAS.

7.12.4 Application

An agency must apply by letter to the Post Office Accounting manager, USPS Headquarters, to use merchandise return labels. A single permit number is assigned to each agency unless the agency asks for multiple numbers.

7.12.5 Post Office Notification

Agencies must apply for authorization to use their penalty merchandise return permit by submitting a Form 3615 at each Post Office where pieces bearing penalty merchandise return labels will be received. No fee should accompany this application since all fees for penalty mailers are assessed through OMAS.

7.12.6 Permit Renewal

Authorization to use a penalty merchandise return permit number at a local Post Office is renewed automatically unless the agency notifies the Post Office that it wishes to cancel its authorization. Annual authorization fees are assessed automatically through OMAS.

7.12.7 Label Format

The one-part merchandise return labels available for federal agencies must bear the address of an authorized agency or a component. [Exhibit 7.12.7a Merchandise Return Label With No Extra Services or With Insurance and/or Special Handling](#) shows the format required when no extra services are requested or when insurance and/or special handling are requested. [Exhibit 7.12.7b Merchandise Return Label for Registered Mail Service Without Insurance](#) shows the format required when registered service without postal insurance is requested. The label must be printed in the format required by [507.11.0](#), except:

- a. The phrases "Official Business" and "Penalty for Private Use \$300.00" must be printed directly below the return address and above the class of service requested in the upper left corner of the label.

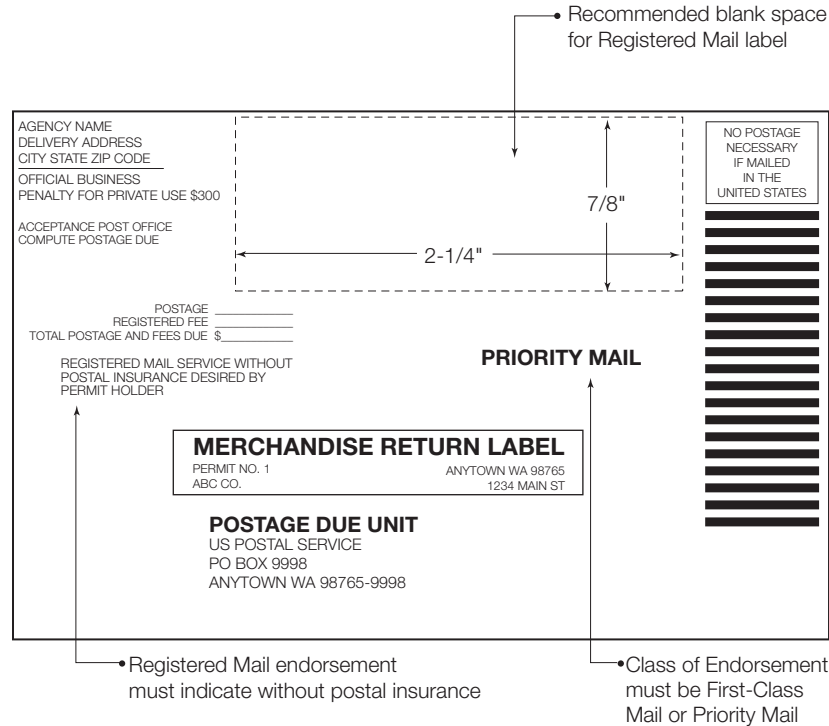

703.7.12.7

Exhibit 7.12.7a Merchandise Return Label With No Extra Services or With Insurance and/or Special Handling

- b. The Post Office name required in the “Merchandise Return Label” legend must be the same as the Post Office authorized to receive the mail.

Exhibit 7.12.7b Merchandise Return Label for Registered Mail Service Without Insurance

- c. Permit holders are encouraged, but are not required, to put the price marking in the space to the right and above the “Merchandise Return Label” legend. The marking must be at least 3/16 inch high and be printed or rubber-stamped. Only the permit holder may apply this marking.

7.12.8 Insurance Indicated by Permit Holder

The permit holder may obtain insured mail service with MRS. Indemnity under penalty mail merchandise return is limited to \$100. Items requiring insurance greater than \$100 may not be mailed under penalty merchandise return service. Only Package Services matter (matter not required to be mailed at First-Class Mail prices under 133.3.0) may be insured. Insured mail may be combined with other extra services as listed in 503.4.0, *Insured Mail*. To request insured mail service, the permit holder must preprint or rubber-stamp “Insurance Desired by Permit Holder for \$_____ (value)” to the left of and above the “Merchandise Return Label” legend and below the “Total Postage and Fees Due” statement on the merchandise return label. The value part of the endorsement, showing the dollar amount of insurance for the article, may be handwritten by the permit holder. If insurance is paid for by the MRS permit holder, then only the MRS permit holder may file a claim (609).

7.12.9 Insured Mail Added by Sender

If the permit holder has not indicated insured mail service on the MRS label, then the sender has the option of adding insurance at the sender's own expense. There is no limit on the indemnity coverage paid for by the sender. If insurance is paid by the sender, then only the sender may file a claim (609).

7.12.10 Registered Mail

Only the permit holder may request that the piece receive Registered Mail service by preprinting the endorsement noted below. All applications for registered merchandise return service must be submitted to the manager of Mailing Standards (see 608.8.0 for address). Registered Mail service may be obtained only on articles returned at First-Class Mail or Priority Mail prices. Only Registered Mail service without postal insurance is available under penalty mail merchandise return procedures. An agency wanting to register merchandise return articles with postal insurance must follow the procedures in 507.11.0. When Registered Mail service is requested for single-piece First-Class Mail or Priority Mail, no other extra service is available. The format in Exhibit 7.12.7b, *Merchandise Return Label for Registered Mail Service Without Insurance*, must be used for the merchandise return label, and the following endorsement must be preprinted to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" statement: "Registered Mail Service without Postal Insurance Desired by Permit Holder."

7.12.11 Special Handling

Only the permit holder may request that the mailpiece receive special handling. The format in Exhibit 7.12.7a, *Merchandise Return Label With No Extra Services or With Insurance and/or Special Handling*, must be used for the merchandise return label. Package Services items requiring special handling must have the following endorsement preprinted or rubber-stamped to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" statement: "Special Handling Desired by Permit Holder."

7.12.12 Permit Cancellation

A permit may be canceled by the Post Office Accounting manager, USPS Headquarters, for violation of postal regulations, including:

- a. Refusing to accept and pay the required charges for merchandise return offered for delivery.
- b. Distributing merchandise return labels that do not meet USPS specifications.

7.12.13 Later Receipt

When a permit is canceled, mailpieces received after the cancellation are treated under 507.11.0.

7.13 Penalty Periodicals**7.13.1 Application**

An agency may apply for penalty Periodicals mailing privileges for Periodicals publications that meet the basic eligibility standards in 707.4.0 through 707.15.0. The correct application form and supporting materials must be submitted to the Post Office where the known office of publication is located.

7.13.2 Compliance

Except for prepayment of postage, penalty Periodicals must meet the standards that apply to private-sector Periodicals publications.

7.13.3 Format

A penalty mail Periodicals imprint must be printed on the front or back cover of each copy, either in the upper right corner of the address area or in the upper right corner of the address side of the envelope or wrapper. The imprint for copies mailed while an application is pending must read “Application to Mail at Periodicals Rates Pending.” The imprint for authorized publications must contain the words “Periodicals” or “Periodicals Newspaper” (as appropriate); the words “Postage and Fees Paid”; the agency name; and the International Standard Serial Number assigned by the Library of Congress, if the publication has one, or the publication number assigned by the USPS at the time of authorization. See [Exhibit 7.13.3](#) for format.

Exhibit 7.13.3 Penalty Periodicals Formats

7.13.4 Return Address

For both authorized publications and those with applications pending, the front or back cover of each copy or the address side of its envelope or wrapper must also show the agency name and a complete return address. The words “Official Business” and “Penalty for Private Use \$300.00” must be preprinted directly below the return address. The penalty statement must not be handwritten or typewritten (see [Exhibit 7.13.3](#)).

703.7.13.5

7.13.5 Postage and Fees

Postage and fees are billed through OMAS. Agencies must submit a completed postage statement to the entry office with each mailing of each edition or as otherwise permitted by the standards for Periodicals in [707.16.0](#) and [707.17.0](#).

7.14 Penalty Express Mail

Agencies have the same service and contract options as other mailers when arranging for penalty Express Mail service. Agencies may prepay Express Mail postage or pay with penalty postage meters or penalty mail stamps. They may also use the 3-digit agency code (and 5-digit cost code) if authorized according to the most recent listing in the *Postal Bulletin*. If postage is prepaid or paid with penalty meters or penalty mail stamps, the 3-digit agency code is not written in the customer number block on Express Mail labels. If the 3-digit agency code is used, an agency envelope or label must be used that contains a complete agency return address and the preprinted phrases “Official Business” and “Penalty for Private Use \$300.00.”

7.15 Contractors**7.15.1 Reimbursement**

An agency authorized to use penalty mail must reimburse the USPS for contractor use of penalty mail services. The agency must promptly provide, in the form requested, all information on contractor use of penalty mail services that the Post Office Accounting manager, USPS Headquarters, considers necessary for accurate reimbursement to the USPS.

7.15.2 Preparation

Preparation standards for a contractor's penalty mailings include:

- a. First-Class Mail, Standard Mail, Package Services, and Parcel Select penalty mailings must be prepared with penalty permit imprints or penalty meters. Single-piece price mailings may also be prepared with penalty mail stamps.
- b. Periodicals must be prepared with a penalty Periodicals imprint.
- c. Reply mail must be prepared under [7.10, General Standards for Penalty Reply Mail](#), [7.11, Penalty Business Reply Mail \(BRM\)](#), and [7.12, Penalty Merchandise Return Service](#), as applicable.
- d. Express Mail must be prepared with penalty postage meters, penalty mail stamps, or use of 3-digit agency code under [7.14](#).

7.15.3 Postage Statement

A contractor submitting a mailing that requires a postage statement must prepare the statement in duplicate if the mailer wants a copy.

7.15.4 Providing Materials

When an agency requires a contractor to provide progress reports or to return government materials to the agency by mail, the agency may either require the contractor to prepay postage on these items or provide the contractor with BRM or merchandise return envelopes and labels.

7.15.5 Return Address

Penalty envelopes and labels used by any contractor must show the printed return address of an authorized agency. The name and address of a private person, concern, organization, or contractor may not be shown in the return address.

8.0 Absentee Balloting Materials**8.1 Basic Standards****8.1.1 Definition**

Balloting materials, consisting of postcard applications, ballots, voting instructions, and envelopes, may be sent through the mail without prepayment of postage to enable persons in the following categories to apply for registration and vote by absentee ballot when absent from the place of voting residence and otherwise eligible to vote as an absentee:

- a. Members of the Armed Forces in active service and their spouses and dependents.
- b. Members of the U.S. Merchant Marine and their spouses and dependents.
- c. U.S. citizens residing outside the territorial limits of the United States and the District of Columbia and their spouses and dependents residing with or accompanying them.

8.1.2 Eligibility

To be mailable without prepayment of postage, the balloting materials must be deposited at a U.S. Post Office, an overseas U.S. military Post Office, or an American Embassy or American Consulate.

8.1.3 Between Officials

Balloting materials may be mailed between state and local election officials, individually or in bulk, without prepayment of postage. Packages of materials mailed in bulk must bear an address label as described in [8.2](#).

8.1.4 Elections Affected

Materials may be for any general election of electors for President and Vice President, or of senators and representatives in Congress, and other general, primary, and special elections.

8.2 Marking**8.2.1 Envelope**

The envelope used to send balloting material and the envelope supplied for return of the ballots must have printed across the face the words "Official Absentee Balloting Material—First-Class Mail" (or similar language required by state law) in a rectangular box. Immediately below, the words "No Postage Necessary in the U.S. Mail—DMM 703.8.0" must be printed. Envelopes previously approved with the citation "DMM E080" must not be rejected. In the upper right corner of the envelope, in a rectangular box, the words "U.S. Postage Paid, 39 USC 3406" must be printed. An appropriate inscription or blank spaces for the return address of the sender must be shown in the upper left corner (see [Exhibit 8.2.1](#)).

703.8.2.2

Exhibit 8.2.1 Balloting Material Formats—Envelope

The diagram shows a rectangular envelope with the following layout:

- Top Left:** "Name and Complete Address" with four horizontal lines for text.
- Top Right:** A postage-paid box containing "U.S. Postage Paid" and "39 USC 3406". Below this box is the text "PAR AVION".
- Center:** A box containing "OFFICIAL ABSENTEE BALLOTING MATERIAL - FIRST-CLASS MAIL". Below this box is the text "NO POSTAGE NECESSARY IN THE U.S. MAIL - DMM 703.8.0".
- Bottom Center:** The address: "SECRETARY OF STATE OF WASHINGTON", "CHAMPAIGN COUNTY ELECTIONS BOARD", "CHAMPAIGN COUNTY COURTHOUSE", "1234 MAIN ST", "ANYTOWN WA 98765-4321".
- Bottom Right:** A series of vertical bars (Facing Identification Mark).

8.2.2 Postcard

The federal voting registration postcard application must be approximately 5 by 8 inches. The design shown in [Exhibit 8.2.2](#) must be printed on the address side of the card.

Exhibit 8.2.2 Balloting Material Formats—Postcard

The diagram shows a rectangular postcard with the following layout and dimensions:

- Dimensions:** A vertical arrow on the left indicates a height of "5\"", and a horizontal arrow at the bottom indicates a width of "8\"".
- Top Left:** "Name and Complete Address" with four horizontal lines for text.
- Top Right:** A postage-paid box containing "U.S. Postage Paid" and "39 USC 3406". Below this box is the text "PAR AVION".
- Center:** A box containing "OFFICIAL ABSENTEE BALLOTING MATERIAL - FIRST-CLASS MAIL". Below this box is the text "NO POSTAGE NECESSARY IN THE U.S. MAIL - DMM 703.8.0".
- Bottom Center:** "TO:" followed by three horizontal lines for text.
- Bottom Right:** A series of vertical bars (Facing Identification Mark).

8.2.3 FIM (Facing Identification Mark)

The correct facing identification mark (FIM) as described in [507.9.8.8](#) must be printed on the address side of envelopes and cards.

9.0 Mixed Classes

9.1 Basic Eligibility Information for Mixed Classes

9.1.1 General Eligibility

When mail of a higher class is enclosed with mail of a lower class, the postage on the entire piece or package is charged at the price of the higher class, except under 9.2 through 9.6 in *Mixed Classes*.

9.1.2 Concealing Higher Classes

A mailer is subject to a fine if the mailer knowingly conceals letters or other mail of a higher class (or price) in mail sent at a lower class (or price) without paying the correct postage on the enclosures (18 USC 1723).

9.2 Eligibility for Attachments of Different Classes

9.2.1 First-Class Mail or Standard Mail

Letters or other pieces of First-Class Mail or Standard Mail may be placed in an envelope and attached to the address side of a Periodicals, Standard Mail, Parcel Select, or Package Services piece. Combination envelopes or containers with separate parts for the two classes of mail may be used.

9.2.2 Price Qualification

If a Periodicals, Standard Mail, Parcel Select, or Package Services host piece qualifies for:

- a. A presort discount, a First-Class Mail or Standard Mail attachment is eligible for the comparable First-Class Mail or Standard Mail presort price. The attachment need not meet the volume standard that would apply if mailed separately.
- b. An automation price, a First-Class Mail or Standard Mail attachment is eligible for the comparable First-Class Mail or Standard Mail price. The attachment need not meet the volume standards that would apply if mailed separately. An automation price may not be claimed for an attachment unless a similar automation price is claimed for the host piece. If the attachment makes the host piece incompatible with automation standards, neither the host piece nor the attachment qualifies for an automation price.
- c. A carrier route price, a First-Class Mail or Standard Mail attachment is eligible for the comparable First-Class Mail or Standard Mail price if every host piece for which the carrier route price is claimed has a First-Class Mail or Standard Mail attachment. The attachment need not meet the volume standard that would apply if mailed separately. A carrier route price may not be claimed for an attachment unless a similar price is claimed for the host piece.
- d. A destination entry price (DDU, DSCF, DADC, or DBMC), a Standard Mail attachment is eligible for the comparable destination entry price. The attachment need not meet the volume standard that would apply if mailed separately. A price including a destination entry discount may not be claimed for an attachment unless a similar price is available and claimed for the host piece.

703.9.3

9.3 Eligibility for an Enclosure in Periodicals Publication**9.3.1 All Enclosures**

Except under [9.3.2](#), all enclosures mailed with a bound publication must be bound into the publication or securely affixed to a page of the publication. Enclosures mailed with an unbound publication must be combined with, and inserted within, the publication. Subject to payment of the applicable postage, separate and independent pieces of nonincidental First-Class Mail and pieces of Standard Mail may be mailed as enclosures with Periodicals publications.

9.3.2 Loose Enclosure

A loose enclosure may be mailed with a bound Periodicals publication only if:

- a. The enclosure and the Periodicals materials are totally enclosed in an envelope or plastic or paper wrapper; or the enclosure and the Periodicals materials are inside a sleeve and the enclosures are inserted within the publication and held by tension or secured to prevent separating from the publication while in the mail.
- b. For Standard Mail matter, the total weight of all enclosed material is less than 16 ounces.
- c. If enclosed in a plastic wrapper or polybag, the Periodicals publication is the top or bottom piece, faces out, and its title is visible.
- d. The enclosure is not addressed.

9.4 Eligibility for an Enclosure in Standard Mail, Parcel Select, and Package Services Parcels**9.4.1 First-Class Mail**

Letters or other pieces of First-Class Mail may be enclosed in pieces of Standard Mail, Parcel Select, and Package Services. Postage at the appropriate First-Class Mail price must be paid for each piece of First-Class Mail, except incidental First-Class Mail attachments or enclosures under [9.5](#).

9.4.2 Standard Mail

Standard Mail may be enclosed in a parcel mailed at Parcel Select or Package Services prices or under [4.0](#), *Mail Sent by U.S. Armed Forces*. Postage at the applicable First-Class Mail or Standard Mail price must be paid on this matter, unless excepted by the prices and eligibility standards in [453](#), [463](#), [473](#), and [483](#).

9.5 Eligibility for an Incidental First-Class Mail Attachment or Enclosure

An incidental attachment or enclosure must be closely associated with or related to the piece to which it is attached or in which it is enclosed; must be secondary to that piece; must not encumber postal processing; and must *require* First-Class Mail postage if mailed separately. Incidental First-Class Mail matter may be enclosed in or attached to Periodicals matter, Standard Mail merchandise (including books but excluding merchandise samples), Parcel Select, and Package Services matter. The attached or enclosed incidental matter may be mailed at the applicable postage price of the host piece with which it is attached or enclosed. Incidental First-Class

Mail matter includes a bill for the product or publication, a statement of account for past purchases, and a personal message or greeting included with a product, publication, or parcel.

9.6 Eligibility for Combined Mailing of Media Mail and Bound Printed Matter

9.6.1 Machinable Parcels

A mailer may combine into one parcel separate and distinguishable pieces of Media Mail and Bound Printed Matter for the same addressee, if these combined pieces form a regular machinable parcel as defined in [401.1.5](#).

9.6.2 Presorted Prices

Presorted prices may be claimed, subject to the applicable preparation standards. If Presorted prices are claimed on both subclasses, the mail must be prepared under the standards for Bound Printed Matter in [365.5.0](#) for flats and [465.5.0](#) for parcels.

9.7 Markings on Mixed Mail

9.7.1 Attachments

First-Class Mail attachments must be marked “First-Class” or “Letter Enclosed.” Standard Mail attachments must be marked “Standard” or “STD.”

9.7.2 Enclosures

When a Periodicals publication is mailed with a nonincidental First-Class Mail or any Standard Mail enclosure, the corresponding “First-Class Mail Enclosed” or “Standard Mail Enclosed” marking must be placed on or in the host publication as follows:

- a. If placed on the outer wrapper, polybag, envelope, or cover of the host Periodicals publication, the marking must be set in type no smaller than any used in the change-of-address notice in the identification statement.
- b. If placed in the identification statement, the marking must meet the standard in [9.7.2a](#).
- c. Except under [9.9](#), the marking must not be on or in copies without a First-Class Mail or Standard Mail enclosure.

9.7.3 Parcels

The mailer must mark “First-Class Mail Enclosed” or “Standard Mail Enclosed” on each Standard Mail, Parcel Select, and Package Services parcel with such an enclosure. The marking must be placed below the postage and above the delivery address, using any method that produces legible wording.

9.8 Postage Payment for Attachments of Different Classes

9.8.1 Computation and Payment

Postage for the host Periodicals, Standard Mail, Parcel Select, or Package Services piece must be paid under the applicable standards. Except for incidental First-Class Mail attachments under [9.11](#), First-Class Mail or Standard Mail attachments must have postage affixed at the proper price.

9.8.2 Postage Statements

Separate postage statements using the proper USPS forms must be prepared for the host piece and the attachment and must be submitted at the time of mailing.

703.9.8.3

9.8.3 Mailing Fee

The annual mailing fee must be paid for the current 12-month period at each office where postage for a Standard Mail attachment is paid at any Standard Mail price.

9.9 Postage Payment for Enclosure in Periodicals Publication**9.9.1 General Rule**

Postage for the Periodicals publication is paid under [707.16.0](#). The proper First-Class Mail or Standard Mail price is paid for the enclosed material, based on the comparable Periodicals price applicable to the addressed piece containing the enclosure.

9.9.2 Authorized Payment Method

A publisher authorized for Centralized Postage Payment (CPP) may arrange to submit postage statements and pay postage for First-Class Mail or Standard Mail enclosures to the designated Post Office (DPO) under the relevant standards in [707.16.0](#). The publisher must be authorized by the DPO each time the Periodicals publication is mailed with a First-Class Mail or Standard Mail enclosure.

9.9.3 Multiple Items

When more than one enclosure of the same mail class is enclosed with a publication, they may be treated as a single enclosure for computing postage.

9.9.4 Affixing Postage

Postage for a First-Class Mail or Standard Mail enclosure may be paid by affixing the correct amount in precanceled or meter stamps to the enclosure or to the outer wrapper, polybag, envelope, or cover of the host Periodicals publication.

9.9.5 Permit Imprint—Outside Publication

Postage for a First-Class Mail or Standard Mail enclosure may be paid with a permit imprint placed on the outer wrapper, polybag, envelope, or cover of the host Periodicals publication if:

- a. The permit imprint is prepared as shown in [604.5.0](#).
- b. The permit imprint and any required marking are set in type no smaller than any used in the change-of-address notice (“POSTMASTER: ...”) in the identification statement.
- c. The permit imprint and marking appear only on copies accompanied by a First-Class Mail or Standard Mail enclosure.
- d. Unless postage for the host publication is paid under CPP or plant-verified drop shipment procedures, the mail is entered at the Post Office where the permit is held.

9.9.6 Permit Imprint—Inside Publication

Postage for a First-Class Mail or Standard Mail enclosure may be paid with a permit imprint placed in the identification statement of the host Periodicals publication if:

- a. The permit imprint is prepared under [604.5.0](#).
- b. The permit imprint and any required marking are set in type no smaller than any used in the change-of-address notice (“POSTMASTER: ...”) in the identification statement and surrounded by either a black line or a 1/4-inch clear area.

- c. The permit imprint and the required markings are only on copies accompanied by a First-Class Mail or Standard Mail enclosure unless the marking in all copies is followed by both a list of the editions or edition codes mailed with a First-Class Mail or Standard Mail enclosure and the edition name or edition code that applies to the respective copy.
- d. Unless postage for the host publication is paid under CPP or plant-verified drop shipment procedures, the mail is entered at the Post Office where the permit is held.

9.9.7 Permit Imprint—Omitted

A permit imprint need not be printed on the outer wrapper, polybag, envelope, or cover of the host publication, and need not be printed inside the publication, when the marking “First-Class Mail Enclosed” or “Standard Mail Enclosed,” as appropriate, is placed on the outer wrapper, polybag, envelope, or cover of the host publication, or in the Identification Statement.

9.9.8 Computing Permit Imprint Postage

Permit imprint postage for the enclosure is computed at the applicable First-Class Mail or Standard Mail price, corresponding to the number of copies of the Periodicals publication prepared with the enclosure. The enclosure is eligible for the price for its class of mail that is most comparable to the presort and destination discounts that apply to the Periodicals host piece. For example, a Standard Mail enclosure is eligible for the SCF entry discount if the publication is deposited at the destinating SCF. When more than one enclosure of the same class of mail is enclosed with a publication, the enclosures are treated as a single enclosure for computing postage. Postage for the First-Class Mail or Standard Mail enclosure must be claimed on the proper postage statement.

9.9.9 Mailing Fee

The annual mailing fee must be paid for the current 12-month period at each office where postage for a Standard Mail enclosure is paid at any Standard Mail price.

9.9.10 Documentation

Subject to [708.1.0](#), documentation for a mailing of a Periodicals publication with nonincidental First-Class Mail or Standard Mail matter enclosed includes:

- a. The Periodicals postage statement and any supporting documentation specified in the standards for the price claimed.
- b. The First-Class Mail or Standard Mail postage statement for the enclosed matter.
- c. Amendments or additions to the documentation required in [9.9.10a](#) as necessary to account for the enclosed matter and support the postage claimed for it.

9.10 Postage Payment for Enclosure in Standard Mail, Parcel Select, or Package Services Parcel

9.10.1 Postage

Postage for the enclosure must be placed on the outside of the parcel, either separately or by addition to the postage for the parcel itself.

703.9.10.2

9.10.2 Postage Statements

Separate postage statements for the host piece (if required) and the enclosure must be submitted at the time of mailing.

9.11 Postage Payment for Incidental First-Class Mail Attachment or Enclosure**9.11.1 Computation**

Postage is based on the weight of the host piece plus the weight of the incidental attachment or enclosure and is paid at the price applicable to the host piece.

9.11.2 Periodicals

Postage for an incidental attachment or enclosure with a Periodicals piece is determined as follows:

- a. If the Periodicals piece consists entirely of nonadvertising matter, the attachment or enclosure is also considered nonadvertising matter.
- b. If the Periodicals piece consists of advertising and nonadvertising matter, the attachment or enclosure is considered advertising matter.

9.12 Postage Payment for Combined Mailings of Media Mail and Bound Printed Matter**9.12.1 Postage**

Postage for each separate unit must be placed on the outside of the parcel.

9.12.2 Postage Statements

When required, a separate postage statement must be submitted for each part of the combined mailing.

9.12.3 Endorsement

In addition to the required price markings, each parcel must show, below the postage and above the address, an endorsement declaring the enclosure and the additional postage paid for it (e.g., "Bound Printed Matter Enclosed \$1.345.").

9.12.4 Rating of Unmarked Parcel

A parcel containing Media Mail and Bound Printed Matter is charged postage at Inter-BMC/ASF Parcel Post prices if it:

- a. Is not endorsed as specified in [9.12.3](#).
- b. Does not consist of separate and distinguishable units of mail.
- c. Is not machinable.

9.13 Extra Services for Mixed Classes**9.13.1 Special Handling**

A combination mailpiece sent as a Parcel Select or a Package Services parcel may be sent using special handling; only one special handling fee is charged for the parcel.

9.13.2 Insured and COD

A combination mailpiece may be sent insured or COD. The insurance covers only the value of the parcel.

9.13.3 Registered

A combination mailpiece may not be sent as Registered Mail.

- 19.0 Postage Due Weight Averaging Program
- 20.0 Optional Combined Parcel Mailings
- 21.0 Repositionable Notes (RPNs)

1.0 Customized MarketMail

1.1 Basic Standards

1.1.1 General

Customized MarketMail (CMM) is an option for mailing nonrectangular and irregular-shaped Regular Standard Mail and Nonprofit Standard Mail pieces if the pieces weigh 3.3 ounces or less and meet the physical characteristics and the dimensional requirements in 1.1.3 and the mail preparation standards in 1.4. Other Regular and Nonprofit Standard Mail pieces measuring 3/4 inch thick or less and meeting the applicable standards in 1.0 may be entered as CMM at the mailer's option. CMM must be entered directly at a destination delivery unit (DDU).

1.1.2 Eligibility Standards

All pieces in a CMM mailing must:

705.1.1.3

- a. Meet the basic standards for Standard Mail in [243.2.0, Content Standards for Standard Mail Letters](#) through [243.4.0, Price Eligibility for Standard Mail](#) and, for Nonprofit Standard Mail, the additional standards in [703.1.0](#).
- b. Be part of a single mailing of at least 200 addressed pieces. All pieces must be identical in size, shape, and weight unless excepted by standard under an approved postage payment system.
- c. Bear a complete delivery address using the general addressing formats in [602.1.0](#) or the exceptional or occupant address formats in [602.3.0, Use of Alternative Addressing](#), with the correct ZIP Code or ZIP+4 code. Each piece also must bear a carrier release endorsement as specified in [508.1.0, Recipient Options](#). These additional addressing standards apply:
 1. Detached address labels (DALs) under [602.4.0, Detached Address Labels \(DALs\)](#) are not permitted.
 2. Ancillary service endorsements under [507.1.0, Treatment of Mail](#), are not permitted.
 3. The ZIP Code accuracy standard in [243.3.8](#) must be met.
 4. At the mailer's option, a carrier route information line under [708.6.0](#) may be added. If this option is used, a carrier route code must be applied to every piece in the mailing and must meet the carrier route accuracy standard in [243.6.2](#).
- d. Be marked, sorted, and documented as specified in [1.4](#).
- e. Be entered at the destination delivery unit appropriate to the delivery address on the corresponding mail, as a mailing subject to the applicable requirements in [243.2.0](#) through [243.4.0, Price Eligibility for Standard Mail](#) and [246.2.0](#) through [246.5.0 in Enter and Deposit](#), as a mailing using Express Mail or Priority Mail Open and Distribute under [16.5](#) and [16.5.13](#), or as a plant-verified drop shipment (PVDS) mailing under [15.0](#). Minimum volumes per destination are not required.

1.1.3 Physical Standards

Mailpieces prepared as Customized MarketMail (CMM) under [1.0](#) must meet these additional standards and physical characteristics:

- a. The material used for constructing the pieces must be free of sharp edges, protrusions, and other design elements that could cause harm or injury to USPS personnel handling these pieces.
- b. The dimensions of the pieces must not be smaller than the minimum dimensions for letter-size mail in [201](#) or greater than the maximum dimensions for flat-size mail in [301](#). Length and height are defined as follows:
 1. The length and the axis of length are determined by drawing a straight line between the two outer points most distant from each other.
 2. The height is determined by drawing perpendicular lines to the points that are the greatest distance above and below the axis of length. The sum of these two lines defines the height.
- c. The maximum weight may not exceed 3.3 ounces.

- d. Pieces may be rectangular or nonrectangular, may be uniform or nonuniform in thickness, and may include die cuts, holes, and voids.
- e. Pieces must be flexible enough to fit inside a minimum-size mail receptacle measuring 4-7/8 inches wide, 14-7/8 inches high, and 5-7/8 inches long (deep).
- f. Design approval by the district business mail entry manager is not required, but it is recommended.

1.2 Prices

Pieces mailed as Customized *MarketMail* under 1.0 must not exceed 3.3 ounces and must pay the following prices:

- a. Regular Standard Mail: \$0.460 per piece.
- b. Nonprofit Standard Mail: \$0.334 per piece.

1.3 Extra Services

CMM is not eligible for any extra service.

1.4 Preparation Standards

1.4.1 All Mailings

All mailings and all pieces in each mailing prepared as Customized MarketMail (CMM) are subject to specific preparation standards in 1.4 and to these general standards:

- a. All pieces must meet the standards for basic eligibility in 243.2.0 through 243.4.0 in *Prices and Eligibility* and specific eligibility in 246.2.0 through 246.5.0 in *Enter and Deposit*. Nonprofit Standard Mail pieces must meet the additional eligibility standards in 703.1.0.
- b. CMM pieces must not be part of a mailing containing any other type of Standard Mail pieces.
- c. Each mailing must meet the applicable standards for mail preparation in 245.1.0 and 245.2.0 and the following:
 - 1. Subject to the marking standards in 202, Regular Standard Mail pieces must be marked "Presorted Standard" (or "PRSRT STD") and Nonprofit Standard Mail pieces must be marked "Nonprofit Organization" (or "Nonprofit Org." or "Nonprofit"). All pieces must also be marked "Customized MarketMail," "CUST MKTMAIL," or "CMM."
 - 2. At the mailer's option, a carrier route information line under 708.6.0 may be added. If this option is used, a carrier route code must be applied to every piece in the mailing and must be applied using CASS-certified software and the current USPS Carrier Route File scheme, printed Carrier Route Files, or another AIS product containing carrier route information, subject to 509.1.0, *Address Information System Products*, and 708.3.0, *Coding Accuracy Support System (CASS)*. Carrier route information must be updated within 90 days before the mailing date.
- d. Pieces are subject to the price eligibility specified in 1.0, *Customized MarketMail*.

1.4.2 Required Endorsement

Any matter mailed as Customized MarketMail must bear the endorsement "Carrier—Leave If No Response" placed directly below the return address. If any other endorsement is used, the carrier route release endorsement must be separated by the equivalent of one blank line of the type size used.

1.4.3 Postage

CMM is subject to the same options of postage payment (precanceled stamps, metered postage, or permit imprint) for Standard Mail pieces as permitted under [244, Postage Payment and Documentation](#).

1.4.4 Documentation

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing. Mailings of nonidentical-weight pieces or mailings using more than three different types of containers must also be supported by standardized documentation meeting the standards in [708.1.0](#). Documentation for nonidentical-weight pieces is not required if the correct postage is affixed to each piece.

1.4.5 Required Bundling

Bundling is required before sacking, traying, or filling other types of mailing containers. A bundle must be prepared when two or more addressed pieces are destined to the same 5-digit ZIP Code or to the same carrier route if the optional carrier route presort level is used. The maximum weight for any bundle is 20 pounds. Pieces of irregular thickness must be counterstacked as provided in [245.2.0](#). At the mailer's option, facing slips, optional endorsement lines, or pressure-sensitive bundle labels may be used on bundles. CMM pieces prepared in optional carrier route bundles are subject to [243.6.0](#) but are not required to meet any minimum number of pieces per route.

1.4.6 Bundling and Labeling

Preparation sequence, bundle size, and labeling:

- a. *Carrier route* (optional), no minimum; and carrier route information line (required).
- b. *5-digit* (required), no minimum; and facing slip (optional), red Label 5 (optional), or optional endorsement line (OEL).

1.4.7 Required Containerizing

The following standards apply to containerizing CMM bundles:

- a. Bundles and single pieces to a destination must be prepared in 5-digit containers or optionally in 5-digit scheme under [L606](#), carrier route, or 5-digit carrier routes containers, with no minimum volume (piece or weight) required for an individual container.
- b. Bundles for PVDS drop shipment mailings or non-PVDS mailings under [246.2.0](#) through [246.5.0](#) must be placed in letter trays, flat trays, or sacks. Bundles in Priority Mail and Express Mail Open and Distribute shipments under [16.5](#) may be placed in USPS-supplied or mailer-supplied mailing containers.

- c. The container size must be appropriate to the dimensions of the pieces, and the number of containers must be appropriate to the volume of pieces in the mailing.
- d. If more than three types of containers are used, the mailing must be prepared using an approved manifest mailing system (MMS), unless the manager, Business Mailer Support approves another postage payment system. Each mailing presented in mailer-supplied containers must include sample containers for tare weight calculations.

1.4.8 Containerizing and Labeling

Containers are prepared and labeled as follows:

- a. PVDS drop shipments and non-PVDS mailings under [246.2.0](#) through [246.5.0](#), *Destination Delivery Unit (DDU) Entry* must be prepared in 5-digit trays or sacks, or as an option, in 5-digit scheme (under [L606](#), Column B), carrier route, or 5-digit carrier routes trays or sacks, labeled as follows:
 1. Line 1: For 5-digit, carrier route, 5-digit carrier routes, city, state, and 5-digit ZIP Code on mail; for 5-digit scheme (optional), [L606](#).
 2. Line 2: "DEL LTR STD CMM MAN" (for letter trays); "DEL FLTS STD CMM MAN" (for flat trays); "DEL STD CMM MAN" (for sacks).
 3. Line 3: Office of mailing or mailer information (see [707.21.0](#), *Sack and Tray Labels*).
- b. Express Mail and Priority Mail Open and Distribute shipments must be prepared in USPS-provided Express Mail or Priority Mail containers (pouches, sacks, cartons, or envelopes) or in mailer-supplied containers, labeled under [16.5](#).

2.0 Manifest Mailing System

2.1 Description

2.1.1 Using an MMS

A manifest mailing system (MMS) is a method of verifying postage payment of permit imprint mailings, as an alternative to weight verification. The MMS is an automated system that allows a mailer to document postage and fees for all pieces in First-Class Mail, Standard Mail, Parcel Select, Package Services, and international permit imprint mailings. Each piece is assigned a unique identification number that is listed on the manifest along with pertinent information about the mailpiece. The USPS randomly selects pieces from the mailing and compares them to the manifest to determine if postage was accurately reported. The standards in [2.2](#) describe how to mail using an MMS.

2.1.2 Electronic Verification System

Mailers using a MMS when presenting Parcel Select destination entry mailings under [456.2.0](#) or, commingled parcel mailings under [6.0](#) or [7.0](#), may document and pay postage using the Electronic Verification System (eVS) (see [2.9](#)). Business Mailer Support (BMS), USPS Headquarters, must approve these systems. Unless

705.2.2

authorized by Business Mailer Support, mailers may not commingle eVS mail with non-eVS mail within the same mailing or place eVS mail and non-eVS mail in or on the same mailing container.

2.2 Basic Standards

2.2.1 Authorization Document

A MMS is established through a letter of authorization or by a service agreement as follows:

- a. A MMS approved by the district, as defined in [2.4.6a](#), is authorized with a letter signed by the district Customer Service manager, and addressed to the mailer making the MMS application. The authorization letter contains provisions regarding mailer and USPS responsibilities, including document retention and quality control.
- b. A MMS approved by Business Mailer Support, as defined in [2.4.6b](#), is authorized with a service agreement signed by the mailer and the Business Mailer Support manager. The service agreement contains provisions regarding mailer and USPS responsibilities, including document retention and quality control.

2.2.2 Mailer System

The mailer must have an automated system that produces mail consistent with postal standards and calculates postage accurately. For presorted mail, the system also must determine the qualifying presort level and the correct price of postage for each piece and perform the presort routines. The mailer must assign a unique identification number to each piece. Letter- and flat-size mail produced using batch processing must bear the keyline information in [2.3](#). The system must produce a manifest for each mailing that allows USPS verification of the postage and levels of presort. The manifest must account for every piece in the mailing, as follows:

- a. For presorted letter- and flat-size mail produced using batch processing, the manifest must list destination ZIP Codes, presort categories, batch number ranges, postage amounts, and cumulative postage amounts.
- b. For mail produced using itemized processing, the manifest must list the postage for each piece and those factors used to calculate the correct amount of postage, such as the destination postal zone and piece weight. Each page of the manifest must show cumulative postage totals.
- c. When extra services are used, the manifest must include the fees for each piece.
- d. A summary listing the required information on the postage statement must be included as the last page of the manifest.
- e. A separate summary and register of mailings is required for all plant-verified drop shipment (PVDS) mailings.

2.2.3 Manifest Format

The two basic manifest formats are:

- a. *Itemized processing.* Each piece of mail is individually listed by unique identification number, weight, and other pertinent information. Publication 401, *Guide to the Manifest Mailing System*, contains specific formats for manifests using itemized processing.
- b. *Batch processing.* The mailing is divided into groups of mailpieces with consecutive identification numbers. Only the identification numbers of the first and last pieces of each group are listed, along with the piece count and the total postage charges for the entire batch. This method is limited to piece price letter- and flat-size mailings. Publication 401 contains specific formats for manifests using batch processing.

2.2.4 Mailer Quality Control

The mailer must implement a quality control program that ensures proper mail preparation and provides accurate documentation. The mailer must implement a quality control program that ensures proper mail preparation and provides accurate documentation. The authorization letter or service agreement must detail the USPS-approved quality control procedures.

2.2.5 Permit Imprint

Mailings deposited under the MMS program must meet the standards for permit imprint mail in [604.5.0](#), except that presorted letter-size or flat-size mail produced using batch processing must include the qualified price abbreviation in the keyline.

2.2.6 Marking

MMS mailings must meet the marking standards for the price claimed. Markings on presorted letter-size and flat-size mail produced using batch processing are placed in the keyline as described in [2.3.3](#). Markings on itemized mailpieces may be:

- a. Incorporated as part of the permit imprint.
- b. Printed or rubber-stamped above the address and immediately below or to the left of the permit imprint.
- c. Produced as otherwise specified in the MMS authorization.
- d. Provided in an endorsement line in the address area, directly above the top line of the address, if no additional information except carrier route information appears on the endorsement line.

2.2.7 Postage Statement

The mailer must submit a complete postage statement with each mailing. If the entry office postmaster approves, mailers may submit a computerized facsimile of the applicable USPS postage statement. Data fields may be omitted on facsimile if they pertain to prices not claimed in the mailing.

2.2.8 Manifest Adjustments

When mailpieces are mutilated, spoiled, or destroyed during normal operations and cannot be presented as part of the mailing, a method of adjusting the manifest and postage statement that has been approved by the USPS must be used. Whether the method in [2.2.8a](#) or [2.2.8b](#) is used, the total number of pieces must be deducted at the end of the manifest and the postage statement adjusted. Use one of the following methods:

705.2.3

- a. For manifests using itemized processing, line out the identification number, weight, and postage information (if applicable, also line out the piece on Form 3877) or write the unique identification number, piece weight, and postage (and, if applicable, the fee amount) on a separate listing. Deduct the total number of pieces, piece weights, and postage and fees from the totals shown on the manifest, summary, and postage statement.
- b. For manifests using batch processing, write the adjustments directly on the manifest listing showing the consecutive serial number, weight increment, price category, and postage of each item next to the batch that includes the serial number. Alternatively, a separate list may be prepared as an attachment to the manifest showing, for each spoiled piece, the consecutive serial number, weight increment, price category, and postage. The total number of pieces, piece weight, and postage must be deducted from the batch, manifest summary, and postage statement.

2.3 Keyline**2.3.1 Batch Mailings**

The keyline printed on each piece of presorted letter- or flat-size First-Class Mail or Standard Mail produced using batch processing must contain, in order, the consecutive unique piece number, the weight increment (First-Class Mail only), the price category for which the piece qualifies, and the postage paid by weight and price category (see [Exhibit 2.3.1](#)).

Exhibit 2.3.1 Letter-Size Keyline Information

2.3.2 Mailer Codes

Codes for internal mailer use may be printed to the right of the postage-paid information, if at least two spaces separate the postage paid and any internal code information.

2.3.3 Price Category Abbreviations

Keylines on First-Class Mail or Standard Mail may use only the price category abbreviations in Exhibit 2.3.3a or Exhibit 2.3.3b, respectively. All pieces that qualify for more than one postage price must show each price category abbreviation, separated by a “/” (slash) (e.g., EB/DS).

a. First-Class Mail:

Exhibit 2.3.3a Price Category Abbreviations—First-Class Mail

CODE	PRICE CATEGORY
AV	Automation 5-Digit
AT	Automation 3-Digit
AB	Automation AADC Letters
AB	Automation ADC Flats
MB	Automation Mixed AADC Letters
MB	Automation Mixed ADC Flats
FP	Presorted
SP	Single-Piece Price (when fewer than 500 pieces accompany automation price mail)

b. Standard Mail:

Exhibit 2.3.3b Price Category Abbreviations—Standard Mail

CODE	PRICE CATEGORY
AV	Automation 5-Digit [letters only]
AT	Automation 3-Digit [letters only]
AB	Automation AADC Letters
AB	Automation AADC Flats
MB	Automation Mixed AADC Letters
MB	Automation Mixed ADC Flats
MA	Machinable AADC Letters
MM	Machinable Mixed AADC Letters
NV	Nonmachinable 5-digit Letters
NT	Nonmachinable 3-digit Letters
NA	Nonmachinable ADC Letters
NM	Nonmachinable Mixed ADC Letters
EB	Enhanced Carrier Route Basic
EH	Enhanced Carrier Route High Density
ES	Enhanced Carrier Route Saturation
NF	Not Flat-Machinable
DB	Destination Bulk Mail Center (DBMC)
DS	Destination Sectional Center Facility (DSCF)
DD	Destination Delivery Unit (DDU)

2.3.4 Keyline Location—Batch Mailings

The keyline must be readily identifiable and placed anywhere on the address side that does not conflict with other standards (see [Exhibit 2.3.1](#) for examples). On letter-size mail, the keyline must not interfere with the OCR read area (see [202.2.1](#)) or barcode clear zone (see [202.5.1](#)). If printed on an insert, the keyline must conform to [202.5.0](#).

2.3.5 Unique ID Number Location—Itemized Mailings

The unique identification number must be printed on the address side of each itemized piece. It may be a product number or any other number that is not duplicated within the mailing. The numbers must be printed in overall ascending order, or in ascending order within each zone, 5-digit, 3-digit, or BMC ZIP Code area on the manifest.

2.4 Authorization**2.4.1 Application**

The mailer must submit an MMS application and supporting documentation as specified on the application to the postmaster of each Post Office where mailings will be deposited. Publication 401 contains an application to mail using an MMS. Application procedures for mailers who want to manifest and pay postage for

Express Mail using an Express Mail Manifesting System are outlined in 2.6. Publication 205, *Electronic Verification System Technical Guide*, provides the eVS application procedures for mailers.

2.4.2 Approval Review

After the mailer completes the development and installation of the MMS, the following will occur:

- a. For a MMS approved by the district, as defined in 2.4.5a, a district USPS representative will review the system and the district Customer Service manager will give final approval if the system is functioning as required.
- b. For a MMS approved by Business Mailer Support, as defined in 2.4.5b, a district USPS representative will review the system and the district Customer Service manager will give temporary approval if the system is functioning as required. A final review will be conducted by a Business Mailer Support representative within 90 days of the date of the temporary approval, and the Business Mailer Support manager will give final approval if the system is functioning as required.

2.4.3 General Requirements for Authorization

General requirements for authorization are as follows:

- a. Verification samples are deemed representative of the entire mailing, and postage adjustment calculations are applied to the total mailing. The mailer must pay additional postage for any underpayments identified during USPS verification. A mailer may elect to overpay postage for pieces that are borderline weight or price increments to avoid postage underpayment adjustments.
- b. If the total postage or the total weight of pieces sampled during a verification results in an underpayment by more than 1.5%, total postage for the mailing is adjusted.
- c. For eVS mailings prepared under 2.9, USPS charges eVS mailers for postage due for any underpaid, unmanifested, or mis-shipped destination delivery unit (DDU) parcels at the end of the review period following the monthly mailing period as follows:
 1. *Underpaid Parcels*. If the total postage of parcels sampled during the mailing period indicates that the mailer has underpaid postage by more than 1.5% when compared with the corresponding parcel records in the mailer's manifest files, USPS determines additional postage due based on the total postage already paid for the mailing month using the procedures in Publication 205.
 2. *Unmanifested Parcels*. USPS charges eVS mailers for parcels not listed in the mailer's manifest files but identified by USPS processing scans or acceptance and delivery scans as being mailed. USPS determines the postage charges using sampling data and the procedures in Publication 205.
 3. *Mis-Shipped DDU Parcels*. USPS charges eVS mailers the appropriate single-piece price less the original price paid for parcels identified by acceptance scans to be deposited at incorrect destination delivery units.

705.2.4.4

USPS transports these mis-shipped parcels to the correct destination delivery units. USPS determines the additional postage using scanning data and the procedures in Publication 205. Parcels mis-shipped at destination BMCs or destination SCFs are handled through parcel sampling and are treated as underpaid parcels.

- d. The mailer must notify the USPS in writing of any system change that affects postage calculation, generation of required documentation, or mail presorting before the mailing is presented.
- e. Postage must be paid by an advance deposit account from which funds may be deducted by the USPS to cover any deficiency discovered after acceptance of the mail.

2.4.4 Authorization Period

The authorization period for an MMS is as follows:

- a. A MMS, not approved to use the Minimum Volume Reduction Provision (MVRP) defined in Publication 401, and approved by the district as defined in [2.4.5a](#), remains in effect until such time as the district Customer Service manager or the mailer cancels the agreement. If Postal Service periodic reviews or mailer supplied information demonstrates a need for modification to the agreement, the authorization will be modified with concurrence by the district Customer Service manager and the mailer.
- b. A MMS approved to use a MVRP as defined in Publication 401, remains in effect for the time period specified in the MVRP, unless the district Customer Service manager or the mailer cancels the MMS authorization. The MVRP authorization will be reviewed at the end of the authorization period and may be renewed by decision of the district Customer Service manager.
- c. A MMS approved by Business Mailer Support as defined in [2.4.5b](#), remains in effect until such time as the Business Mailer Support manager or the mailer cancels the agreement. If Postal Service periodic reviews or mailer supplied information demonstrates a need for modification of the agreement, the authorization will be modified with concurrence by the Business Mailer Support manager and the mailer.

2.4.5 Approval Authority

Approval authority for manifest mailing systems is as follows:

- a. The district Customer Service manager approves systems that produce separate or mixed mailings of single-piece price First-Class Mail, Package Services, Parcel Select, international mail, including mailings with extra services and predetermined weights, or presorted First-Class Mail letter systems not exceeding 25,000 pieces per manifest or 50,000 total pieces in daily manifested mail volume.
- b. The Business Mailer Support manager, USPS Headquarters, approves MMS that produce presorted First-Class Mail (except as noted in [2.4.5a](#)) or Standard Mail mailings, Package Services or Parcel Select presort mailings, PVDS mailings, or eVS mailings.

2.4.6 Denial

If an MMS application is denied, the mailer may appeal the decision as follows:

- a. For MMS applications denied by the district Customer Service manager, the mailer may, within 15 days from the receipt of the notice, file a written appeal, including any additional evidence in support of why the MMS should be authorized. This appeal is sent to the Business Mailer Support manager, USPS Headquarters, who issues the final agency decision.
- b. For MMS applications denied by the Business Mailer Support manager, the mailer may, within 15 days from the receipt of the notice, file a written appeal, including any additional evidence in support of why the MMS should be authorized. This appeal is sent to the Marketing and Technology Channel Management manager, USPS Headquarters, who issues the final agency decision.

2.4.7 Renewal

Only MMS with an approved Minimum Volume Reduction Provision (MVRP) requires renewal. MMS with MVRP are renewed prior to the expiration date by the Sales manager that originally authorized the MVRP. The Sales manager reviews all supporting documentation to determine if the mailer continues to meet the requirements of the MVRP. The MVRP is renewed when the review demonstrates that the MVRP continues to meet established requirements.

2.5 Revocation

2.5.1 Revocation Authority

The revocation authority for MMS is as follows:

- a. The district Customer Service manager may revoke a MMS authorization when the final approval had originally been given through that office.
- b. The Business Mailer Support manager may revoke any MMS authorization.

2.5.2 Reasons for Revocation

The reasons for revocation of an MMS are as follows:

- a. The mailer provides incorrect data on the manifest list and appears unable or unwilling to correct the problems.
- b. The mailer is not properly completing the required quality control procedures.
- c. The mailings no longer meet MMS criteria established by standards in 2.0 or in the MMS authorization letter or service agreement.
- d. The mailer does not present mailings under MMS for more than 6 months (except as noted in the authorization letter or service agreement).
- e. The mailer continues to present mailings that are improperly prepared and proper postage is not being paid.

2.5.3 Corrective Action

After a notice of revocation is issued, the mailer and the USPS determine corrective actions, including an implementation schedule. At the conclusion, the USPS reexamines the mailer's system. Failure to correct identified problems is sufficient grounds to revoke the mailer's MMS authorization.

2.5.4 Appeal of Revocation

The mailer may appeal following receipt of the notice of revocation and may continue to mail under the MMS during the appeal process. Appeals are handled as follows:

- a. For MMS authorizations given final approval by the district Customer Service manager, the mailer has 15 days from the date of receipt of the notice to file a written appeal with the Business Mailer Support manager. The appeal must include the reason why the MMS authorization should not be revoked. The Business Mailer Support manager issues the final agency decision. The final revocation takes effect 15 days after receipt by the mailer.
- b. For MMS authorizations given final approval by the Business Mailer Support manager, the mailer has 15 days from the date of receipt of the notice to file a written appeal with the Marketing and Technology Channel Management manager, USPS Headquarters. The appeal must include the reason why the MMS authorization should not be revoked. The Marketing and Technology Channel Management manager, USPS Headquarters, issues the final agency decision. The final revocation takes effect 15 days after receipt by the mailer.

2.6 Express Mail Manifesting Agreements

2.6.1 Description

Express Mail Manifesting (EMM) is an automated system that allows a mailer to document postage and fees for all pieces in an Express Mail mailing by transmitting an electronic file to the USPS.

2.6.2 What May Be Manifested

EMM may be used to pay postage for domestic Express Mail items and Global Express Mail items as well as any extra service fees. Postage for other classes of mail cannot be paid through EMM. Custom-designed service and mailings to military (APO/FPO) addresses may not be mailed using EMM.

2.6.3 Service Guarantee

Express Mail items mailed using an EMM are covered by current Express Mail service and postage guarantees:

- a. Mailers using Express Mail Manifesting (EMM) receive Sunday/holiday guaranteed delivery at no additional charge without paying a premium.
- b. Refunds for service failures are subject to the standards in [604.9.5](#). Reimbursements are paid under [604.9.5.7](#).

2.6.4 Postage Payment

Postage for EMM is paid through an Express Mail corporate account (EMCA) using the information in the mailer's electronic file. Mailers wishing to mail using an EMM system must apply for an EMCA using the procedures in [114](#) before an EMM agreement will be authorized.

2.6.5 Mail Volume

EMM is designed for large volume mailings; however, there are no minimum volume requirements.

2.7 Basic Standards

2.7.1 Mailer Participation Requirements

To participate in Express Mail Manifesting, mailers must:

- a. Develop or purchase computer software that will meet the EMM technical requirements outlined in Publication 97, *Express Mail Manifesting Technical Guide*.
- b. Obtain a DUNS® number for each mailing location.
- c. Obtain USPS certification that the mailer's software and barcoded labels meet EMM requirements.
- d. Develop and administer effective quality control procedures that will ensure the integrity of the system.
- e. Use one-ply Express Mail labels that meet the requirements in Publication 97.
- f. Be able to have the USPS accept and dispatch EMM items from their company or a postal facility at the times approved by the district marketing manager.
- g. Receive authorization to mail items using EMM under [2.8](#).

2.7.2 Mailer Quality Control

The mailer must implement a quality control program that ensures proper mail preparation and provides accurate documentation. The service agreement must detail the USPS-approved quality control procedures.

2.7.3 Mailer System Accuracy/Manifest Adjustments

The USPS verifies the accuracy of the EMM system by selecting mailpieces at random and comparing them to a verification manifest. If the sampling indicates that the total postage (for the sample mailpieces) is understated by more than 1.5%, the mailer must either withdraw the mailing or pay postage at an adjusted price. Specific procedures are outlined in Publication 97.

2.7.4 Markings, Label Specifications, and Barcodes

No special price markings are required on EMM items. However, barcoded EMM labels are required on all EMM mailpieces, and specific label formats must be followed. Detailed barcode and Express Mail label specifications and options are published in Publication 97. The labels are subject to approval by Product Information Requirements, Product Development, USPS Headquarters, and the National Customer Support Center (NCSC). Mailers must follow the specific certification procedures outlined in Publication 97.

2.7.5 Mail Entry

Mailers must present a photocopy or facsimile of Form 3152-E and a verification manifest with each mailing.

2.7.6 Manifest Data Edit Error/Warning Listing

Mailers must retrieve and retain the Manifest Data Edit Error/Warning Listing for each mailing that will be made available by the host computer. The listing confirms whether an electronic transmission was successful or contained errors or warnings. Specific information about this requirement is included in Publication 97 and in the mailer's EMM agreement.

2.7.7 Form 3152-E for Postage Payment

Form 3152-E is presented with each mailing. There is no postage affixed to the mailpieces and no postage statement presented with mailings. Postage payment is completed by electronic withdrawal of funds from a mailer's Express Mail corporate account. Form 3152-E must include the following information:

- a. Number of pieces in the mailing.
- b. Total weight of pieces in the mailing.
- c. Total postage and extra service fees, if applicable, for the mailing.
- d. EMCA number.
- e. Electronic file number from header record positions 4-25.
- f. Mailer signature.
- g. Date of mailing.

2.8 Applications, Agreement Renewals, Modifications, Suspensions, and Cancellations**2.8.1 Applications**

Mailers must apply to use an EMM system by completing the application in Publication 97. The application must be sent to the USPS sales representative at the Post Office where the items will be accepted as mail. After the application and other documentation has been received and reviewed, the application and Form 1357-S is faxed to Product Information, Product Requirements, USPS Headquarters. This office will send the contact page of the application to the Postal NCSC Delivery Confirmation Office. The Delivery Confirmation Office will send a test kit to the applicant via electronic mail to test the electronic file transmission accuracy. The application for EMM must be accompanied by the following:

- a. A completed Form 1357-S.
- b. A copy of Form 5637 showing that an Express Mail corporate account has been established.
- c. A DUNS® number for each mailing location.
- d. Sample copies of a verification manifest created from the mailer's EMM software.
- e. An EMM label sample.
- f. A price matrix, if applicable.

2.8.2 Approval

A temporary service agreement will be issued by the district marketing manager through the Business Mail Entry Office for 90 days at the location where the mailings will be verified and accepted when a review of the mailer's application and mailing operation indicates the mailer meets the eligibility requirements for entry of Express Mail items using an EMM system. Prior to the end of the 90 day temporary agreement the district business mail entry manager will conduct a final review to ensure that the system continues to meet standards. Upon a successful review, the district Customer Sales and Service manager gives final approval of the EMM

system. Publication 97-A, Express Mail Manifesting Implementation and Administration Guide, outlines the specific responsibilities of the various USPS departments in approval process.

2.8.3 Denial

If an application for EMM is denied by the district marketing manager, the denial is effective 15 days from the mailer's receipt of the notice unless a written appeal is filed within that time to the Business Mailer Support manager, USPS Headquarters, who issues the final agency decision on the application.

2.8.4 Changes, Additions, or Modifications to the Service Agreement

If a mailer proposes to change the method of presenting or documenting mailings from the method specified in the agreement, or the mailer is no longer able to comply with the standards that apply to the authorization, the mailer must immediately notify the district marketing manager.

2.8.5 Renewal

EMM agreements are valid for 2 years. The district Customer Service and Sales manager, USPS Headquarters, will conduct renewal reviews.

2.8.6 USPS Suspension

The district Customer Service and Sales manager may suspend an EMM agreement at any time, pending review, when there is an indication that postal revenue is not fully protected. The district Customer Service and Sales manager will notify the mailer of the decision in writing. The suspension becomes effective upon the mailer's receipt of the notification.

2.8.7 USPS Cancellation

The district Customer Service and Sales manager may cancel an EMM agreement upon 15 days notice if:

- a. The mailer fails to provide a manifest with correct data.
- b. The required quality control procedures described in the EMM agreement are not properly performed.
- c. The EMM does not comply with USPS requirements.
- d. Mailings are presented that are not properly prepared or paid.
- e. No Express Mail manifest mailings are presented for more than 6 months (unless approved by the Business Mailer Support manager).
- f. The mailer has relocated or has changed ownership without notification.
- g. The 2-year renewal review reveals that the EMM agreement should no longer be authorized or the mailer is not complying with the agreement.

2.8.8 Cancellation Notice and Appeal

The cancellation takes effect 15 days from the mailer's receipt of the notice unless, within that time, the mailer files a written appeal with the Business Mailer Support manager. The appeal must present additional information explaining why the EMM agreement should not be canceled. The Business Mailer Support manager will issue the final agency decision.

2.9 Electronic Verification System

2.9.1 Description

The Electronic Verification System (eVS) is a manifest mailing system that allows parcel mailers to document and pay postage and extra services fees by transmitting electronic files to the Postal Service without generating paper manifests, postage statements, or clearance documents, with the following principal features:

- a. *File Creation.* eVS requires the creation of an electronic file containing specific data records organized into manifests. Each manifest within the file corresponds to a data record for each destination entry facility or each origin/entry Post Office, with records for the parcels grouped under the record for the entry facility or entry Post Office. Successfully accepted files and the records within those files are used by eVS to generate electronic postage statements for automatic debiting of the mailer's postage payment account. Files must be prepared as specified in Publication 205, *Electronic Verification System Technical Guide*.
- b. *Daily Mailing and Presort Eligibility.* A mailing, which is determined by all file transmissions received from the eVS mailer within a 24-hour cycle, must meet all presort and volume requirements for the class of mail and price category claimed. The 24-hour cycle begins at 2:00:00 a.m. and ends at 1:59:59 a.m. Central Time.
- c. *Sampling.* eVS sampling data, which are used to monitor postage and preparation accuracy, is primarily captured after the mailer deposits the mailing at a destination entry facility.
- d. *Monthly Data Reconciliation.* eVS sampling data are reconciled against all the mailer's manifests received during a calendar month rather than against each individual mailing. All mailings entered during a calendar month are treated as a single mailing for the purpose of reconciliation and the collection of any postage due.

2.9.2 Availability

eVS may be used only for parcel mail paid with a permit imprint and only for the following classes and subclasses of mail, price categories, and mail processing categories, except for those prices or processing categories as noted:

- a. *First-Class Mail.* Single-piece price and presorted prices; machinable and nonmachinable parcel processing categories. Field testing for First-Class Mail prices available July 1, 2007.
- b. *Priority Mail.* Single-piece price, flat-rate envelope, and flat-rate box; all parcel processing categories. Field testing for Priority Mail prices available July 1, 2007.
- c. *Regular Standard Mail.* Presorted prices, destination bulk mail center (DBMC) prices, destination sectional center facility (DSCF) prices, and destination delivery unit (DDU) prices; machinable parcels, irregular parcels, and Not Flat-Machinable pieces. Field testing for irregular presorted prices and Not Flat-Machinable prices available after May 14, 2007.

- d. *Nonprofit Standard Mail*. Presorted prices, DBMC prices, DSCF prices, and DDU prices; machinable parcels, irregular parcels, and Not Flat-Machinable parcels. Field testing for irregular presorted prices and Not Flat-Machinable prices available after May 14, 2007.
- e. *Parcel Post*. Parcel Post prices include Intra-BMC prices and inter-BMC prices (including balloon and oversized prices); machinable parcels and nonmachinable parcels.
- f. *Parcel Select*. Prices include DBMC prices, DSCF prices, and DDU prices (including balloon and oversized prices); machinable parcels and nonmachinable parcels; origin BMC and BMC presort prices, and barcoded machinable parcel discounts.
- g. *Bound Printed Matter*. Nonpresorted prices, presorted prices, DBMC prices, DSCF prices, and DDU prices; machinable parcels and irregular parcels. Field testing for nonpresorted prices, machinable and irregular parcels, available after May 14, 2007.
- h. *Media Mail*. Single-piece prices, basic prices, and 5-digit prices; machinable parcels. Field testing for all irregular parcels available after May 14, 2007.
- i. *Library Mail*. Single-piece prices, basic prices, and 5-digit prices; machinable parcels and irregular parcels. Field testing for all Library Mail prices available after May 14, 2007.

2.9.3 Extra Services

eVS mailers may use the following Extra Services if they are available for the specific class of mail used:

- a. Delivery Confirmation.
- b. Signature Confirmation.
- c. Certified Mail.
- d. Insured Mail, if Form 3877 is used.
- e. Collect on Delivery (COD), if Form 3877 is used.
- f. Return Receipt.
- g. Return Receipt for Merchandise.
- h. Restricted Delivery.
- i. Special Handling.
- j. Bulk Insurance.

2.9.4 Use

Mailers depositing permit imprint parcels for those classes of mail and price categories specified in [2.9.2](#) may document and pay postage using eVS. Mailers authorized to commingle Standard Mail parcels, Package Services, and Parcel Select presorted parcels under [6.0](#) and [7.0](#) also may use eVS to document and pay postage for all parcels in the mailing for those mail classes and subclasses available under [2.9.2](#).

2.9.5 General Requirements

General requirements for participation are as follows:

- a. *Permit Account Number.* The mailer must have or establish a single permit account number for eVS at the business mail entry unit designated by the administering district manager. The Post Office where the business mail entry unit is located is generally considered the Post Office of Account for the eVS mailer. The eVS permit account number is to be used exclusively for eVS mailings. No other permit number may be used for eVS mailings.
- b. *Postage Payment Account.* The mailer must have or establish a *PostalOne!* postage payment debit account for the withdrawal of funds from postage statements generated by eVS from the electronic files transmitted by the mailer.
- c. *Annual Mailing Fees.* The mailer must pay all applicable presort and destination entry mailing fees at the administering district business mail entry unit.
- d. *Customer Identification Number.* The mailer must have or obtain a DUNS number from Dun and Bradstreet or a unique identification number from the Postal Service. This customer identification number must be registered with the Postal Service and used to identify all electronic manifests transmitted by the mailer for eVS mailings. The mailer may use the same customer identification number in the Package Identification Code (PIC) or different numbers in the PIC if these additional numbers are also registered with the Postal Service. The mailer is required to keep the Postal Service updated on changes and additions to customer identification numbers.
- e. *Application.* The mailer must complete and submit the eVS application available from the Postal Service.
- f. *Computer Access.* The mailer must obtain computer access to eVS and, if necessary, to *PostalOne!*
- g. *File Transfer.* The mailer must complete and submit Form 1357-S to set up the file transfer mechanism with the Postal Service. Form 1357-S is not required for Electronic Data Interchange (EDI).
- h. *Software.* The mailer must develop or obtain computer software that meets eVS electronic file specifications for manifesting parcels and the barcode specifications for producing accurate and scannable barcodes used on the parcel mailing labels.
- i. *File and Label Certification.* The mailer must have electronic files and barcodes certified by the Postal Service.
- j. *Quality Assurance.* The mailer must develop and administer effective quality assurance procedures to ensure the integrity and accuracy of the mailer's mail production, postage payment, and file transmissions.
- k. *Mailing Test.* The mailer must complete a test during which eVS manifest files are transmitted and mailings are made to determine the accuracy of the mailer's system.
- l. *Mailing Agreement.* The mailer must enter into an eVS manifest mailing agreement with the Postal Service.

2.9.6 System Requirements

A mailer using eVS must have or contract with a service provider that has an automated system that produces mail according to USPS standards and calculates postage and extra services fees accurately. The system used for eVS must:

- a. Create and submit electronic manifest files as described in Publication 205 and assign a unique file number for each manifest file containing the mailer's customer identification number used for all file transmissions.
- b. Produce a manifest file for each mailing or mailing segment deposited at a destination Postal Service facility or entry Post Office as identified by ZIP Code.
- c. Provide all required data in each manifest record for each parcel for the destination Postal Service facility or entry Post Office.
- d. Assign each parcel a unique package identification code used for producing a corresponding unique barcode containing a customer identification number.
- e. Transmit electronic manifest files on or before the date of mailing.

2.9.7 Postage Payment

All eVS mailings must be paid with a permit imprint and meet the standards for permit imprint mail in [604.5.0](#). USPS calculates postage payment and electronically debits postage from the mailer's postage account based on information received from the mailer's electronic manifest and data collected through USPS operational and sampling scans. Mailers must pay for postage through a Centralized Account Payment System (CAPS) debit account.

2.9.8 Verification and Postage Adjustments

USPS randomly samples parcels and considers verification samples to be representative of the entire mailing period. Verification data is used to make the following monthly adjustments for postage due, collected on the 21st day after the last day of the month of mailing:

- a. *Postage Adjustment Factor (PAF) Payment.* USPS applies postage adjustment calculations, based on verification samples, to all pieces mailed during the mailing period. A mailing period is defined as a calendar month for purposes of calculating adjustments in eVS. USPS adjusts the total postage for the mailing period if the total postage of the pieces sampled during the mailing period results in an underpayment greater than 1.5%. The mailer must pay postage for any underpayments identified by USPS verification. The mailer must maintain sufficient funds in the mailer's postage account to cover any underpayments discovered after acceptance of the mail.
- b. *Unmanifested Parcel Payment.* The mailer is responsible for postage payment of unmanifested parcels. Unmanifested parcels are those parcels for which the Postal Service has obtained information from scanning operations but has not received or successfully processed manifest files and records corresponding to the parcels. The mailer must pay postage for unmanifested parcels or pieces identified by USPS. The mailer must maintain sufficient funds in the mailer's postage account to cover postage due discovered after acceptance of the mail.

- c. *Mis-shipped DDU Parcel Payment.* The mailer is responsible for postage payment of destination delivery unit (DDU) mis-shipped parcels. DDU Misshipped parcels are DDU price parcels delivered to the incorrect Postal Service facility by the mailer and transported by the Postal Service to the correct facility. The mailer must pay postage for DDU mis-shipped parcels identified by USPS. The mailer must maintain sufficient funds in the mailer's postage account to cover postage due discovered after acceptance of the mail.

2.9.9 Authorization

Mailers must be authorized to participate in eVS according to the following procedures:

- a. Mailers must meet the general requirements and system requirements for eVS and submit an eVS application and supporting documentation as specified in Publication 205, *Electronic Verification System Technical Guide*, to the Business Mailer Support manager, USPS Headquarters (see [608.8.0](#) for address).
- b. After mailers successfully complete development and testing for eVS, the USPS grants temporary approval. USPS conducts a review within 90 days of the temporary approval and grants final approval if the mailer's system is working as required. The Business Mailer Support manager, USPS Headquarters, has final authority for eVS approval.
- c. After receiving final authorization, the mailer and a USPS representative must sign a service agreement. The agreement contains provisions regarding mailer and USPS responsibilities, including electronic documentation, document retention, quality control, and the duration of the agreement.

2.9.10 Denial

If USPS denies an eVS application, the mailer may appeal the decision within 15 days from the receipt of the notice by filing a written appeal, including evidence showing why the mailer should be authorized to use eVS. The mailer sends the appeal to the Business Mail Acceptance manager, USPS Headquarters, who issues the final agency decision (see [608.8.0](#) for address).

2.9.11 Revocation

The Business Mailer Support manager may revoke authorization for eVS participation for any of the following reasons:

- a. A mailer does not provide correct data in electronic manifests and is not able or willing to correct the problems.
- b. A mailer does not properly complete the required quality control procedures.
- c. A mailer does not produce mailings meeting eVS criteria established by this standard or in the mailer's eVS manifest mailing agreement.
- d. A mailer does not present mailings using eVS for more than 6 months (except as noted in the service agreement).
- e. A mailer does not present properly prepared mailings.
- f. A mailer does not pay proper postage.

2.9.12 Corrective Action

After USPS issues a notice of revocation to a mailer, the mailer and the USPS determine corrective actions, including an implementation schedule. At the conclusion of the implementation period, the USPS reexamines the mailer's system to determine if it complies with the program requirements. Failure to correct identified problems is sufficient grounds to sustain revocation of the mailer's eVS authorization.

2.9.13 Appeal of Revocation

After receiving initial notice of revocation, a mailer has 15 days from the date of receipt of the revocation notice to file a written appeal with the Business Mail Acceptance manager, USPS Headquarters. The appeal must include the reason the eVS authorization should not be revoked. The mailer may continue to mail using eVS during the appeal process. The Business Mail Acceptance manager issues the final agency decision. The final revocation takes effect 15 days after the date of the final agency decision.

3.0 Optional Procedure Mailing System**3.1 Basic Information****3.1.1 Description**

An Optional Procedure Mailing System is a method of verifying and accepting First-Class Mail, Standard Mail, Package Services, or Parcel Select paid by permit imprint. Mailings may consist of identical-weight or nonidentical-weight pieces. The Optional Procedure Mailing System reviews a mailer's financial, production, and other business records in lieu of standard weight verification procedures. Postage verification is normally completed by a USPS audit of business records kept by the mailer. A USPS audit is designed to detect underpayment of postage. The burden rests with the mailer to prove any overpayment of postage.

3.1.2 General Qualification

An Optional Procedure Mailing System is authorized when all of the following conditions are met: The mailer's plant is operating and mailing when the application is submitted.

- a. The mailer's records provide a sound audit trail that ensures proper postage is collected.
- b. Mailings qualify as permit imprint mailings under the applicable standards.
- c. The administering Post Office or district can provide trained, qualified employees during the mailer's hours of mailing operations.

3.1.3 Quality Control

The mailer must implement a documented quality control program that ensures integrity of the system, accuracy and proper maintenance of Optional Procedure records, eligibility of the mailings prepared for the postage prices claimed, and ability to take corrective actions.

3.1.4 Service Agreement

A service agreement must be signed by the mailer, the postmaster, the district manager, and the Business Mailer Support manager before the first Optional Procedure mailing is presented. Before the service agreement is finalized the mailer must submit an Optional Procedure Mailing System application and that application must be approved under the procedures in 3.2. The agreement must set forth, among other things, the mailing information described in 3.2.3 and 3.2.5.

3.2 Authorization

3.2.1 Application

The mailer must submit an Optional Procedure Mailing System application to the postmaster at the office of mailing. Publication 407, *Optional Procedure (OP) Mailing System*, available through business mail entry units and www.usps.com, contains an application and detailed information about mailer standards, responsibilities, and qualifying criteria. The mailer must submit, as part of the application, a complete sample job with all records to be part of the audit trail identified and labeled; a detailed explanation of how each record supports the number of pieces and presort level price of postage claimed on the postage statements; and a detailed description of current internal quality control procedures as they relate to production and presentation of mailing.

3.2.2 Business Mailer Support Action

The Business Mailer Support manager, USPS Headquarters, approves or denies applications for Optional Procedure Mailing Systems.

3.2.3 Approval

When the application is approved, a written service agreement is signed between the USPS and the mailer to specify the types of mailings that may be mailed under the Optional Procedure Mailing System (e.g., the classes of mail, processing categories, permit numbers to be used, and whether the mailer is authorized to mail identical-weight and/or nonidentical-weight pieces).

3.2.4 Authorization Period

Authorization remains in effect until such time as the Business Mailer Support manager or the mailer cancels the agreement. If Postal Service periodic reviews or mailer supplied information demonstrates a need for modification of the agreement, then the authorization will be modified with concurrence by the Business Mailer Support manager and the mailer.

3.2.5 Denial

If the application is denied, the denial is effective 15 days from the mailer's receipt of the notice unless, within that time, the mailer files a written appeal with the Business Mailer Support manager. The appeal must present additional information explaining why the Optional Procedure application should be approved. If the manager determines that the application should be denied, the file is forwarded to the Marketing and Technology Channel Management manager, USPS Headquarters, who will issue the final agency decision to the mailer.

3.2.6 Changes

If the mailer proposes to change the method of presenting or documenting mailings from that specified in the agreement, or the mailer is no longer able to comply with the standards that apply to the authorization, the mailer must immediately notify the Business Mailer Support manager, through the postmaster of the administering Post Office. The Business Mailer Support manager will notify the mailer in writing if the Optional Procedure agreement should be modified, continued, or canceled.

3.2.7 Additions or Modifications to the Service Agreement

If the mailer requests additional options or modifications to the Optional Procedure agreement, the mailer must submit a written request to the Business Mailer Support manager stating the requested change or modification and complete documentation supporting each change or modification. The mailer's request must be submitted before the change or modification is made. Changes to the Optional Procedure service agreement cannot be made until the Business Mailer Support manager has notified the mailer in writing that the changes or modifications have been approved and an addendum is added to the Optional Procedure service agreement.

3.2.8 USPS Suspension

The Business Mailer Support manager may suspend an Optional Procedure Mailing System at any time, pending review, when there is an indication that postal revenue is not fully protected. The Business Mailer Support manager will notify the mailer in writing of the decision. The suspension becomes effective upon the mailer's receipt of the notification.

3.2.9 Mailer Cancellation

The mailer may cancel an Optional Procedure Mailing System authorization at any time by written notice to the administering Post Office.

3.2.10 USPS Cancellation

The USPS may cancel an Optional Procedure Mailing System authorization if:

- a. The mailer provides misleading or incorrect data to avoid paying postage, makes no mailings under the Optional Procedure agreement during any consecutive 12-month period, or routinely fails to comply with the Optional Procedure agreement or the standards applicable to the Optional Procedure Mailing System.
- b. An audit reveals that the Optional Procedure Mailing System agreement should no longer be authorized or the mailer is not complying with the agreement.

3.2.11 Cancellation Notice and Appeal

The cancellation takes effect 15 days from the mailer's receipt of the notice unless, within that time, the mailer files a written appeal with the Business Mailer Support manager. The appeal must present additional information explaining why the Optional Procedure Mailing System authorization should not be canceled. If the Business Mailer Support manager does not uphold the appeal, the appeal letter, additional information, and the complete record underlying the decision to cancel the authorization are forwarded to the Marketing and Technology Channel Management manager, USPS Headquarters, who issues the final agency decision to the mailer.

3.3 Records

3.3.1 Mailer Responsibility

The mailer must submit accurate postage statements and keep accurate records. The mailer must prepare a complete record for each mailing, label all component records as they are created with the mailing (and/or order) to which they relate, and keep it at a central location for 1 year. Records used for verification of Optional Procedure mailings must be records that are also routinely kept for production of other than Optional Procedure mailings.

3.3.2 Mailer Running Summary

The mailer must maintain a running summary of mailings made to the USPS. The summary must include the permit number, date of mailing, postage statement sequence number, total pieces, weight of a single piece (or weight ranges of nonidentical-weight pieces), and the total weight and total postage for each mailing. For plant-verified drop shipment (PVDS) mailings the grand totals from the consolidated postage statement are entered on the summary.

3.3.3 Contents

Each mailing record must contain a sample of the mailpiece, the corresponding postage statement, and source documents required for the audit trail as specified in the mailer's Optional Procedure agreement.

4.0 Alternate Mailing System

4.1 Basic Information

4.1.1 Purpose

An Alternate Mailing System (AMS) provides for other methods of accepting permit imprint mail, not established in [2.0, Manifest Mailing System](#), or [3.0, Optional Procedure Mailing System](#), that show proper postage payment and mail preparation without verification by weight.

4.1.2 Postage Adjustment

Underpayments identified during USPS verification may require a postage adjustment. Verification samples are considered to be representative of the entire mailing and postage adjustment calculations are applied to the total mailing. The total corrected postage for the entire mailing is deducted from the mailer's permit imprint advance deposit account.

4.2 Authorization

4.2.1 Procedure

A mailer may request authorization to pay postage by an AMS by submitting a written request to the postmaster at the office of mailing. The request must include a complete description of the types of matter to be mailed, the proposed method of paying postage, the proposed method to determine correct mail preparation, and a statement of the reasons for requesting the alternate system. The USPS may review the mailer's operation before ruling on the application.

4.2.2 Conditions

The conditions of authorization are:

- a. Authorization to use AMS must benefit the USPS.
- b. Authorization to use AMS must include a signed AMS agreement.
- c. An AMS agreement must specify the terms and conditions of the AMS.
- d. All postage must be paid by permit imprint unless otherwise permitted in writing by the Business Mailer Support manager.
- e. There must be no additional cost to the USPS for an AMS agreement beyond the costs of current mail acceptance procedures for the mail in question.
- f. The mailer must implement a quality control program that ensures proper mail preparation and accurate documentation, subject to USPS approval. The service agreement must include details of this program. Each AMS mailing must include a statement from the mailer certifying that the approved quality control verification is done.

4.2.3 Business Mailer Support Action

The Business Mailer Support manager approves or denies a written request for AMS.

4.2.4 Approval

If the application is approved, a service agreement must be signed by the USPS and the mailer.

4.2.5 Authorization Period

Authorization remains in effect until such time as the Business Mailer Support manager or the mailer cancels the agreement. If Postal Service periodic reviews or mailer supplied information demonstrates a need for modification of the agreement, then the authorization will be modified with concurrence by the Business Mailer Support manager and the mailer.

4.2.6 Denial

If the application is denied the mailer may file a written appeal within 15 days from the receipt of the notice, including additional evidence explaining why the AMS request should be approved, to the Marketing and Technology Channel Management manager, USPS Headquarters, who reviews the appeal and issues the final agency decision.

4.2.7 Revocation

The Business Mailer Support manager may revoke an AMS authorization if the mailer:

- a. Provides incorrect data for mailings and appears unable or unwilling to correct all problems.
- b. Is not conducting required quality control procedures.
- c. No longer meets the criteria established by standard or the AMS agreement.
- d. Does not present mailings under AMS for more than 6 months (except under the service agreement).

705.4.2.8

- e. Continues to present mailings improperly prepared or mailings without correct postage.

4.2.8 Notice of Revocation

After a revocation notice is issued, the mailer and the USPS decide on the corrective actions and set up an implementation schedule, after which the USPS reexamines the mailer's system. Failure to correct identified problems is sufficient grounds to revoke a mailer's AMS authorization.

4.2.9 Appeal

Revocation proceeds if the mailer is unable or unwilling to correct the discrepancies found. The mailer may file a written appeal within 15 days from the date of receipt of the notice, which includes evidence explaining why the AMS authorization should not be revoked. The appeal must be filed with the Business Mailer Support manager for referral to the Marketing and Technology Channel Management manager, USPS Headquarters, who issues the final agency decision. The mailer may continue to present mail under the AMS pending a decision on appeal. The revocation decision takes effect 15 days after receipt by the mailer.

5.0 First-Class Mail or Standard Mail Mailings With Different Payment Methods

5.1 Basic Provisions

5.1.1 General

After specific USPS authorization, a mailer may prepare separate First-Class Mail or Standard Mail letter-size automation price mailings that each contain pieces paid with more than one of the three authorized methods of postage payment (permit imprint, meter stamp, or precanceled stamp) or that contain pieces having different prices of postage affixed or multiple ounces of First-Class Mail permit imprint mail or nonidentical-weight permit imprint mail. For this standard, *mailer* or *presenter* is the entity preparing the combined mailing and presenting it to the USPS. All standards applying to each method of payment apply in a combined mailing, unless excepted below.

5.1.2 Postage Payment

Postage that is due to the USPS for permit imprint mail and additional postage for postage-affixed pieces is paid through the mailer's advance deposit account.

5.1.3 Value Added

To request value added refunds of postage overpayments for the metered part of combined mailings, see [604.9.0](#).

5.1.4 Mailer Processing

The mailer must have an automated mailing system that can be shown to correctly produce automation price letter-size mailings under the applicable standards and accurately compute and document the postage due.

5.1.5 Authorization Process

To be authorized to prepare automation price combined letter-size mailings, a mailer must submit a written request to the postmaster serving the mailer's production plant. This request must:

- a. Identify the postage payment methods to be combined, the prices of postage to be affixed to precanceled stamped or metered pieces, and, for First-Class Mail, the weight increments of pieces to be combined.
- b. Describe all steps in the automated mailing system to be used to prepare combined mailings. Include a flow chart showing how jobs are handled from the time received from clients or other departments through the time the combined mailing is presented to the Post Office for verification and acceptance.
- c. Include samples of all reports that the mailing system can generate. Number and annotate samples to describe step-by-step how the data are obtained and how each data element is supported and can be verified. Describe at which step in the mailing operation the reports may be generated, and how the reports relate to each other and to the preparation of postage statements.
- d. Describe how rejects are handled during mail preparation.
- e. Describe in detail internal quality control procedures that ensure that mailings are properly prepared, that postage statement and supporting data are accurate, and that correct postage is paid. Submit copies of quality control instructions and checklists used.

5.1.6 On-Site Review

The USPS examines the mailer's operation as part of the application process. During the on-site review, the mailer must:

- a. Produce a controlled test mailing with supporting documentation.
- b. Show that internal quality control procedures are satisfactorily administered.
- c. Show that the mailing system provides acceptable documentation by which the USPS can verify postage statement data.

5.1.7 Interim Authorization

If the mailer meets standards, the USPS grants a 90-day interim authorization to prepare combined mailings. During this time, USPS monitors the mailer's system to ensure continued compliance with all applicable standards.

5.1.8 Final Authorization

At the end of the 90-day interim authorization, if the mailer's program meets all applicable standards, Business Mailer Support prepares a detailed authorization for the mailer to follow in preparing combined mailings. The mailer must give advance written notice to Business Mailer Support regarding any planned changes to the system used to prepare combined mailings.

5.1.9 Authorization Period

Authorization remains in effect until such time as the Business Mailer Support manager or the mailer cancels the agreement. If Postal Service periodic reviews or mailer supplied information demonstrates a need for modification of the agreement, then the authorization will be modified with concurrence by the Business Mailer Support manager and the mailer.

5.1.10 Denial

If an application is denied, the mailer may, within 15 days from receipt of the notice, file a written appeal, including additional evidence explaining why the request should be approved, to the Marketing and Technology Channel Management manager, USPS Headquarters, who issues the final agency decision.

5.1.11 USPS Review

A USPS review of the mailer's system is conducted annually with the following results:

- a. If the review shows no need for modifications to the agreement, it continues according to current requirements.
- b. If the review shows modifications were made to the system without prior notification to Business Mailer Support, but the system still remains qualified, the agreement is changed to reflect the new requirements.
- c. If the review shows that the system can be continued, but requires modifications specified by the USPS, the mailer must be so informed. If the mailer agrees to the modifications, a new agreement is implemented under [5.1.7](#) and [5.1.8](#).
- d. If the review shows that the mailer is not properly preparing combined mailings or does not agree to USPS modifications, steps must be taken to cancel the authorization.

5.1.12 Suspension

The Business Mailer Support manager may suspend a combined mailing system agreement at any time, pending investigation, if the manager finds that postage is not being fully paid or mail is not being prepared according to standards. The decision to suspend the agreement may be appealed to the Marketing and Technology Channel Management manager, USPS Headquarters, within 15 days of the receipt of the notice, by submitting a written appeal with explanation. The suspension remains in effect during the appeal. A suspension is ended when the mailer comes into compliance.

5.1.13 Cancellation by USPS

The USPS may cancel an authorization to prepare combined mailings at any time if the mailer:

- a. Provides misleading or incorrect data to avoid payment of postage.
- b. Makes no combined mailings under the agreement during any consecutive 12-month period.

- c. Fails to comply with applicable standards or the agreement, including required quality control procedures, and does not make changes to comply after USPS notification.

5.1.14 Cancellation Procedure

If the USPS decides to cancel an authorization, cancellation becomes effective 15 days from the mailer's receipt of the notice, unless the mailer files a written appeal within that time with the Business Mailer Support manager. The appeal must include additional information explaining why the combined mailing authorization should not be canceled. If the manager denies the appeal, both the appeal and the additional information are sent to the Marketing and Technology Channel Management manager, USPS Headquarters, who issues the final agency decision.

5.1.15 Cancellation by Mailer

The mailer may cancel an authorization to prepare combined mailings at any time by notifying the administering Post Office in writing.

5.2 Postage

5.2.1 Metered Pieces—First-Class Mail

Metered pieces in a combined mailing must bear postage for the first ounce at the Presorted price or at an automation price for which the pieces are eligible and, if applicable, the full amount of postage due for additional ounces. Additional postage due for metered pieces in a combined mailing is deducted from the mailer's postage due advance deposit account. Full postage at single-piece First-Class Mail prices must be paid on accompanying single-piece price mail using one of the methods under [134.1.0](#). Additional preparation to verify postage due may be required by the USPS.

5.2.2 Metered Pieces—Standard Mail

Metered pieces in a combined mailing must bear postage at a Presorted or automation price for which the pieces are eligible. Additional postage due for metered pieces in a combined mailing is deducted from the mailer's postage due advance deposit account. Full postage at single-piece First-Class Mail prices must be paid on accompanying single-piece price mail using one of the methods under [243.3.0](#), [705.5.0](#), and [134.1.0](#). Additional preparation to verify postage due may be required by the USPS.

5.2.3 Precanceled Pieces—First-Class Mail

Pieces with precanceled stamps in a combined mailing must not weigh more than 1 ounce and must bear postage in any denomination of precanceled stamps permitted in a Presorted or automation price mailing. Additional postage due for precanceled stamp pieces in a combined mailing is deducted from the mailer's postage due advance deposit account. Full postage at the single-piece First-Class Mail price must be paid on accompanying single-piece price mail using one of the methods under [134.1.0](#). Additional preparation to verify postage due may be required by the USPS.

5.2.4 Precanceled Pieces—Standard Mail

Pieces with precanceled stamps in a combined mailing must bear postage in any denomination of precanceled stamp permitted in an automation price mailing. Nonprofit postage may appear only on pieces in a Nonprofit price mailing that are eligible for and claimed at a Nonprofit price. Additional postage due for precanceled stamp pieces in a combined mailing is deducted from the mailer's postage due advance deposit account. Full postage at single-piece First-Class Mail prices must be paid on accompanying single-piece price mail using one of the methods under [243.3.0](#), [243.5.0](#), or [134.1.0](#). Additional preparation to verify postage due may be required by the USPS.

5.2.5 Permit Imprint Pieces—First-Class Mail and Standard Mail

Pieces in a combined mailing may bear the permit imprint of the mailer or the mailer's clients. Postage for the permit imprint part of a combined mailing must be paid from the mailer's permit imprint advance deposit account. Postage is deducted only from this account, regardless of the permit numbers or company permit imprints on pieces in a combined mailing. Full postage at single-piece First-Class Mail prices must be paid on accompanying single-piece price mail using one of the methods under [134.1.0](#) and, for Standard Mail, [243.3.0](#) and [243.5.0](#). Additional preparation to verify postage due may be required by the USPS.

5.3 Producing the Combined Mailing

5.3.1 Mailer Quality Control

Before merging different pieces into a combined presorted mailing, the mailer must have quality control procedures to ensure that:

- a. Meter dates are correct.
- b. Meter impressions are legible.
- c. Permits and licenses are current at office of mailing.
- d. In First-Class Mail mailings, full postage on 2-ounce and 3-ounce metered and precanceled stamped pieces is affixed for the ounces in addition to postage for the first ounce at a price acceptable for inclusion in the mailing.
- e. In Standard Mail mailings, full postage is affixed at a price acceptable for inclusion in the mailing.
- f. Barcodes meet all applicable standards.
- g. Mailings are prepared under the relevant standards.
- h. Source mailing information (on client, job, or segment) is entered accurately into the automated mailing system.
- i. When markings are applied by an MLOCR, they properly show the applicable identifier/price code described in [5.3.2](#) that specifies the product month designator, *MASS/FASTforward* system identifier, the method of postage payment, and the price of postage affixed for metered and precanceled stamp mail or other postage information for permit imprint mail. These markings must be linked by the computer system to the price entered by the mailer when the pieces are run through the MLOCR.

5.3.2 Price and Postage Marking

The following markings must be applied to each piece in the mailing when markings are applied by an MLOCR. These seven-character markings provide the automation price marking information and additional information including the product month designator, MASS/FASTforward (FF) system identifier, manufacturer code, and price marking information. The product month designator is the first character position and represents the product month of the USPS ZIP+4 Product installed with the system’s lookup engine responsible for the ZIP+4 assignment. Each product month is designated by a character “A” through “L” (with “A” meaning January, “B” meaning February, etc.). The MASS/FF System Identifier is characters 2 through 4 and represents the certified system identifier responsible for the ZIP+4 assignment. There is a one-to-one relationship between the certified system serial number and the assigned identifier. The manufacturer code is the fifth character and is assigned at the manufacturer’s discretion with one exception: the character “Z” is assigned when the mailpiece contains a delivery point barcode in the address block and the MLOCR does not perform a lookup but simply reproduces the address block barcode. The price marking is represented in the last two characters according to the chart below. The applicable marking must appear on each mailpiece in one of the locations authorized under 202 for letters, 302 for flats, or 402 for parcels.

a. First-Class Mail:

PRICE MARKING		
Letters	Flats	PRICE AND POSTAGE CATEGORY

* The same code is used regardless of the destination entry price, if any, for which the piece is metered.

5.3.3 Merging Methods and Documentation

During the initial count of each source mailing (i.e., the quantity of mail originated by each of the mailer's clients) by the mailer's automated mailing system, pieces must be grouped by payment method (and, within each for First-Class Mail, by ounce increment). All pieces within each postage-affixed group must have the same amount of postage affixed (for First-Class Mail, the same amount of postage must be affixed for the first ounce). The mailer must keep records of each source that was merged in the combined mailing to allow the USPS to identify each source, the number of pieces by postage payment method, and, within each, by ounce increment (for First-Class Mail), or by amount of postage affixed (for Standard Mail). The mailer must keep these records (in the form of computer-generated printouts or computer media approved by Business Mailer Support) in a central location for 90 days after the mailing date of the combined mailing.

5.3.4 Rejected Pieces

Pieces rejected for any reason by the mailer's automated sorting system and pulled out of the combined mailing stream must be identified by the mailer, specifically accounted for in documentation, and:

- a. If postage-affixed, bear postage or have additional postage affixed to equal a price no lower than:
 1. For First-Class Mail, the correct Presorted First-Class Mail.
 2. For Standard Mail, the correct 5-Digit or AADC (as applicable) Presorted Standard Mail price for letters.
- b. If paid by permit imprint, separately presented to the USPS for verification of postage.

5.4 Documentation

5.4.1 Submission

Mailers are required to submit or generate the following reports:

For each First-Class Mail or Standard Mail combined mailing, the mailer must provide these materials:

- a. For each postage payment method, a complete and accurate postage statement endorsed "Combined Mailing" at the top.
 1. A separate Form(s) 3553.
 2. The USPS qualification report in standardized format detailing by ZIP Code the number of pieces qualifying for each price by presort level. If plant-verified drop shipment (PVDS) is used for Standard Mail, a separate USPS qualification report must be generated for each entry destination.
 3. The USPS Summary ZIP Destination report in one of two standardized formats that lists by tray destination and price category: each mail category, postage payment type, weight, and price affixed (report all postage affixed First-Class Mail pieces as weighing one ounce); number of pieces; dollar amount of postage affixed to those pieces; cumulative postage affixed; total postage; net postage due; cumulative postage due; and a running total of the number of pieces. If plant-verified drop shipment

705.5.4.2

(PVDS) is used for Standard Mail, a separate USPS Summary ZIP Destination report must be generated for each entry destination. This report is not required if there is only one metered price in the mailing. Business Mailer Support may authorize submission of only portions of this report.

4. The USPS Postage Summary in a standardized format. This report shows, by type of payment method, the total postage claimed for all pieces in the mailing by price level and the total postage affixed by price level. It also shows a grand total summary of postage affixed, postage claimed, and total postage due. If plant-verified drop shipment (PVDS) is used for Standard Mail, a separate USPS Postage Summary report must be generated for each entry destination.
 5. Other documentation that may be required by other standards for the price claimed.
- b. The USPS Customer Mail Report must be generated for each mailing but is required to be submitted to the USPS only when requested by USPS personnel for the resolution of errors (shortpaid and potential MLOCR profiling) detected in a specific mailing. The Customer Mail Report must list each customer by name and provide the following information about their mail: price affixed, mail category including postage payment type, weight, total postage, postage affixed, number of pieces, cumulative number of pieces, number of pieces rejected, and total pieces fed.

5.4.2 Permit Imprint

To prepare the postage statement for permit imprint pieces, the mailer multiplies the number of such pieces qualifying for each price level (and, for First-Class Mail, in each weight increment) (as documented by the mailer) by the corresponding price. The result is the net postage due for the permit imprint part of the combined mailing. If the mailing contains nonidentical-weight permit imprint pieces, the postage statement must be so annotated.

5.4.3 Postage Affixed

In completing the separate postage statements for postage-affixed pieces:

- a. Multiply the number of pieces at each price level (which, for First-Class Mail, are treated as weighing 1 ounce or less, regardless of actual weight) by the corresponding price of postage. The product is the postage due before adjustments are made for the value of postage affixed to those pieces.
- b. Multiply the amount of postage (or, for First-Class Mail only, first ounce postage) affixed by the number of pieces at each amount, to determine the total postage already paid.
- c. Set the amount paid against the amount due to find the postage to be paid by or to the mailer for the postage-affixed pieces.

5.4.4 Reporting Results

Any additional postage due is paid through the mailer's advance deposit account for combined mailings. A "value added" refund of any overpayment of meter postage may be requested under [604.9.0](#).

6.0 Combining Mailings of Standard Mail, Package Services, and Parcel Select Parcels

6.1 Basic Standards for Combining Parcels and NFM's

6.1.1 Basic Standards

Standard Mail parcels, NFM's, Package Services, and Parcel Select parcels in combined mailings must meet the following standards:

- a. Each parcel in a combined mailing is subject to the applicable content and price eligibility standards for the price claimed.
- b. Mailers must be authorized under [6.1.4](#).
- c. Mailers must pay all applicable presort mailing and destination entry mailing fees.
- d. Minimum volume requirements for Standard Mail, Parcel Select, Presorted Bound Printed Matter, Presorted Library Mail, and Presorted Media Mail must be met separately and are based solely on the quantity of pieces eligible for each price at the required presort level. Pieces claimed at other prices in the same sack or on the same pallet do not count towards these minimum volume requirements.

6.1.2 Postage Payment

Mailers must pay postage for all pieces with a permit imprint at the Post Office serving the mailer's plant using an approved postage payment system. The applicable system agreement must include procedures for combined mailings approved by Business Mailer Support. Types of permissible postage payment systems are as follows:

- a. Manifest Mailing System (MMS) under [2.0](#). Mailers may document and pay postage using the Electronic Verification System (eVS) under [2.9](#).
- b. Optional Procedure (OP) Mailing System under [3.0](#).
- c. Alternate Mailing System (AMS) under [4.0](#).

6.1.3 Documentation

Mailers must prepare separate postage statements for Standard Mail, Package Services, and Parcel Select pieces for each of the mailings in the combined mailing. At the time of mailing, mailers must provide all postage statements and a Business Mailer Support-approved manifest prepared according to [2.0](#) and this section. Presort documentation is required as applicable for each price claimed if the manifest does not list pieces in presort order.

6.1.4 Authorization

A mailer who wants to present combined parcel mailings must submit a written request to Business Mailer Support (See [608.8.1](#) for address). The request must show the mailer's name and address, the mailing office, evidence of authorization to mail under [2.0](#), procedures for combined mailing, the expected date of first mailing, a sample of the required manifest, and a sample USPS Qualification report. Business Mailer Support will review documentation and provide written authorization, which may not exceed 2 years. A mailer may terminate an

authorization at any time by written notice to the postmaster of the office serving the mailer's location. Business Mailer Support may terminate an authorization, by written notice, if the mailer does not meet the standards.

6.2 Combining Parcels and NFMs—DBMC Entry

Mailers may combine Standard Mail NFMs 6 ounces or more and machinable parcels with Package Services and Parcel Select machinable parcels for entry at a BMC when authorized by the USPS under [6.1.4](#).

6.2.1 Eligible Prices

Combined pieces may be eligible for Standard Mail, Parcel Post, Parcel Select DBMC/ASF, single-piece and Presorted Media Mail, single-piece and Presorted Library Mail, Bound Printed Matter DBMC, and single-piece and Presorted Bound Printed Matter prices. Mailers may not combine Carrier Route Bound Printed Matter with other parcels.

6.2.2 Additional Standards

Standard Mail machinable parcels, NFMs 6 ounces or more, and Package Services and Parcel Select machinable parcels prepared for DBMC entry must meet the following conditions in addition to the basic standards in [6.1](#):

- a. Each piece in a combined Standard Mail, Package Services, and Parcel Select mailing must meet the criteria for machinable parcels in [401.1.5](#) or the criteria in [401.2.2.2](#) for NFMs 6 ounces or more.
- b. Parcel Select machinable parcels must bear a barcode under [708.5.0](#) for the ZIP Code of the delivery address.
- c. Parcels may be claimed at single-piece, Presorted, and DBMC/ASF destination entry prices as applicable.
- d. Mailers must prepare all parcels in sacks under [6.2.3](#), or on pallets or in pallet boxes under [8.0](#), to achieve the finest level of sortation.
- e. Mailers must deposit combined machinable parcels and NFMs at BMCs or ASFs (see [Exhibit 6.2.3](#)) under applicable standards in [15.0](#).

6.2.3 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. *5-digit scheme*, optional, but required for Standard Mail 5-digit price eligibility, 10-piece or 20-pound minimum; labeling:
 1. Line 1: use [L606](#).
 2. Line 2: "STD/PSVC MACH 5D SCH."
- b. *5-digit*, optional, but required for Standard Mail 5-digit price eligibility, 10-piece or 20-pound minimum; labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code on mail (see [8.6.4](#) for overseas military mail).
 2. Line 2: "STD/PSVC MACH 5D."
- c. *ASF*, optional, allowed only for mail deposited at an ASF to claim DBMC price, 10-piece or 20-pound minimum; labeling:

1. Line 1: use [L602](#), Column B. DBMC price eligibility determined by [Exhibit 6.2.3](#).
 2. Line 2: "STD/PSVC MACH ASF."
- d. *BMC*, required, 10-piece or 20-pound minimum; labeling:
1. Line 1: use [L601](#), Column B. DBMC price eligibility determined by [Exhibit 6.2.3](#).
 2. Line 2: "STD/PSVC MACH BMC."
- e. *Mixed BMC*, required, no minimum; labeling:
1. Line 1: "MXD" followed by [L601](#) Column B information for BMC serving 3-digit ZIP Code prefix of entry Post Office.
 2. Line 2: "STD/PSVC MACH WKG."

6.3 Combining Parcels—Parcel Select OBMC Presort, BMC Presort, DSCF, and DDU Prices

6.3.1 Qualification

Combination requirements for specific discounts and prices are as follows:

- a. When claiming Parcel Select OBMC Presort discounts and Parcel Select BMC Presort discounts, machinable Standard Mail parcels and NFMs 6 ounces or more may be combined with machinable Package Services parcels under [6.3](#).
- b. When claiming the DSCF price for Parcel Select, Bound Printed Matter parcels, all Standard Mail parcels and NFMs may be combined with Package Services and Parcel Select parcels under [6.3](#).
- c. All Standard Mail parcels and NFMs may be combined with Package Services and Parcel Select parcels prepared for DDU prices under [6.3](#).

6.3.2 Preparation and Prices

Combined parcels must be prepared as follows:

- a. *Minimum Mailing Volume.* Separate minimum mailing volume requirements must be met for Standard Mail parcels, Package Services, and for Parcel Select parcels.
- b. *Parcel Select or Bound Printed Matter Qualifying for DSCF Prices.* Mailers must prepare the combined mailings under the applicable 5-digit scheme and 5-digit sack requirements in [455.4.2](#) or the applicable 5-digit scheme and 5-digit pallet requirements in [8.0](#) for the Parcel Select DSCF prices. All other requirements for Parcel Select DSCF prices and Standard Mail prices, as applicable, must be met. The following additional requirements apply:
 1. If sacked under [455.4.2](#), the minimum requirement of seven pieces per sack must be met with only Package Services and Parcel Select parcels. After the minimum sack volume has been met, Standard Mail parcels may be included in the sack or in overflow sacks.
 2. If palletized under the option to prepare 5-digit scheme or 5-digit pallets when there are at least 50 pieces and 250 pounds per pallet, this pallet minimum must be met with only Package Services and Parcel Select parcels. After the minimum pallet volume has been met, Standard Mail parcels may be included on the pallet or in overflow sacks.
 3. If palletized under the alternate pallet preparation where no pallet may contain fewer than 35 pieces and 200 pounds provided the average number of pieces on pallets qualifying for the DSCF price is at least 50, Standard Mail parcels may not be combined with Package Services and Parcel Select parcels.
 4. If palletized under the option to prepare 5-digit scheme or 5-digit pallets under the 36-inch-high (mail only) pallet minimum, any combination of Standard Mail, Package Services, and Parcel Select parcels may be used to meet the minimum pallet height requirement.

705.6.4

5. Line 2 of 5-digit scheme pallet and sack labels must read: “STD/PSVC MACH 5D SCH.” Line 2 of 5-digit pallet and sack labels must read: “STD/PSVC MACH 5D.”
6. Standard Mail parcels are eligible for presorted prices according to [443](#).
- c. Parcel Select Qualifying for OBMC Presort or BMC Presort Prices. Mailers must prepare the combined mailings under the BMC pallet requirements in [8.0](#) for machinable parcels at Parcel Select OBMC Presort or BMC Presort prices. All other requirements for Parcel Select OBMC Presort or BMC Presort prices and Standard Mail prices must be met. The following additional requirements apply:
 1. The minimum height requirement for each pallet or pallet box on a pallet may be met using any combination of Standard Mail, Package Services, and Parcel Select parcels.
 2. Line 2 of BMC pallet box labels must read: “STD/PSVC MACH BMC.”
- d. Package Services, Parcel Select, and Standard Mail parcels and NFM parcels qualifying for DDU prices:
 1. The combined mailings must be prepared under the applicable 5-digit scheme and 5-digit sack requirements in [445.4.0](#) or the applicable 5-digit scheme and 5-digit pallet requirements in [8.22](#) for the Parcel Select or Bound Printed Matter DDU prices.
 2. Line 2 of 5-digit scheme container labels must read, “STD/PSVC PARCELS 5D SCH.” Line 2 of 5-digit container labels must read, “STD/PSVC PARCELS 5D.”

6.4 Combining Package Services, Parcel Select, and Standard Mail—Optional 3-Digit SCF Entry

6.4.1 Entry at Designated SCFs

Mailers may deposit pieces otherwise eligible for the Package Services, Parcel Select, and Standard Mail DBMC prices and the Standard Mail DSCF price at an SCF designated by the USPS for destination ZIP Codes listed in labeling list [L607](#).

6.4.2 Qualification and Preparation

Parcel Select and Bound Printed Matter machinable parcels, and Standard Mail parcels and NFM pieces, may be prepared for entry at designated SCFs under these standards:

- a. Standard Mail parcels and NFM pieces that weigh less than 2 ounces and Standard Mail parcels that are tubes, rolls, triangles, and similar pieces may not be included.
- b. Mailers must prepare pieces on 3-digit pallets or in 3-digit pallet boxes, or unload and physically separate the pieces into containers as specified by the destination facility.
- c. Parcel Select and Bound Printed Matter parcels are eligible for the applicable DBMC entry price.

- d. Standard Mail machinable parcels and NFM 6 ounces or more are eligible for the BMC presort level, DBMC price; NFM pieces less than 6 ounces and irregular parcels are eligible for the 3-digit presort level, DSCF price.
- e. All pieces must be for delivery within the service area of the SCF where they are deposited by the mailer.
- f. Postage on all zone-priced parcels deposited at the SCF is computed using the zone chart for that postal facility.

7.0 Combining Package Services and Parcel Select Parcels for Destination Entry

7.1 Combining Parcels—DSCF and DDU Entry

7.1.1 Qualification

Mailers may combine Package Services and Parcel Select parcels in 5-digit scheme and 5-digit sacks or on 5-digit scheme and 5-digit pallets for entry either at a destination sectional center facility (DSCF) or a destination delivery unit (DDU) when authorized by the USPS under 7.5. Mailers must pay all applicable fees for presort and drop shipment and must meet the minimum volume requirements for Presort prices and Parcel Select prices. Combined Package Services and Parcel Select mailings must meet the standards in 455.4.0 and 466.3.0 through 466.6.0, except as provided by this section. Mailers may not combine Carrier Route Bound Printed Matter with other parcels under these standards. Parcels entered at SCFs and DDUs under these standards are not eligible for the barcode discount.

7.1.2 Basic Standards

Package Services and Parcel Select parcels that qualify as machinable, nonmachinable, and irregular under 401 and meet the following conditions may be combined in 5-digit scheme and 5-digit sacks or 5-digit scheme and 5-digit pallets under these conditions:

- a. Minimum volume requirements for Parcel Select, Presorted Bound Printed Matter, Presorted Library Mail, and Presorted Media Mail must be met separately before combining.
- b. Postage must be paid via permit imprint under an approved manifest mailing system as provided in 3.0. For mailings presented under 7.0, mailers may document and pay postage using the Electronic Verification System (eVS) under 2.9.
- c. All parcels must be prepared in sacks under 7.2 or on pallets under 7.3. For mail entered at the DSCF prices, pallet preparation is not permitted for 5-digit ZIP Codes that are unable to handle pallets. Refer to the Drop Ship Product maintained by the National Customer Support Center (NCSC) (see 608.8.0 for address) to determine which 5-digit delivery facilities can handle pallets. If a DDU facility cannot handle pallets, and a mailer transports mail to the DDU facility on pallets, the driver will have to unload the pallets into a container specified by the delivery unit.

705.7.1.3

- d. Pieces may be claimed at single-piece prices, Presorted prices, and destination entry prices under [7.2.1](#) or [7.1.6](#).
- e. Separate postage statements must be prepared for each subclass and destination entry price as appropriate.
- f. The deposit of combined Package Services and Parcel Select at a DSCF or DDU must be in accordance with applicable drop shipment standards.

7.1.3 Combined Parcels Prepared in Sacks—Price Eligibility

In addition to the applicable standards in [455.4.0](#) and [466.3.0](#) through [466.6.0](#) for destination entry Parcel Select and Package Services, the following standards apply for combined parcels prepared in sacks:

- a. Parcel Select DSCF prices apply to parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Parcel Select and Package Services mail, or contained in overflow sacks under [7.2.2](#), provided all other requirements for the DSCF price in [453.3.0](#) and [455.4.2](#) are met. Parcel Select DDU prices apply to parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Parcel Select and Package Services mail, or contained in overflow sacks under [7.2.2](#), provided all other requirements for the DDU price in [453.3.0](#) and [455.4.1](#) are met.
- b. Presorted Bound Printed Matter DSCF prices apply to parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Parcel Select and Package Services mail, or contained in overflow sacks under [7.2.2](#), provided all other requirements for the DSCF price in [466.3.0](#) through [466.6.0](#) are met. Presorted Bound Printed Matter DDU prices apply to parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Parcel Select and Package Services mail, or contained in overflow sacks under [7.2.2](#), provided all other requirements for the DDU price in [466.3.0](#) through [466.6.0](#) are met.
- c. Presorted Library Mail 5-digit prices apply to parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Parcel Select and Package Services mail, or contained in overflow sacks under [7.2.2](#).
- d. Presorted Media Mail 5-digit prices apply to parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Parcel Select and Package Services mail, or contained in overflow sacks under [7.2.2](#).
- e. Single-piece price parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Parcel Select and Package Services mail, or contained in overflow sacks under [7.2.2](#), qualify for single-piece prices.

7.1.4 Sack Preparation

Only 5-digit scheme and 5-digit sacks may be prepared. Each sack of combined Parcel Select and Package Services mail must contain at least 10 pieces. One overflow sack containing fewer than 10 pieces is permitted per 5-digit scheme and 5-digit destination.

7.1.5 Sack Labeling

Sack labels must be prepared as follows:

- a. *5-digit scheme*, optional; labeling:
 1. Line 1: use [L606](#), Column B.
 2. Line 2: "PSVC PARCELS 5D SCH."
- b. *5-digit*, labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination of pieces.
 2. Line 2: "PSVC PARCELS 5D."

7.1.6 Combined Parcels Prepared on Pallets—Price Eligibility

In addition to the applicable standards in [455.4.0](#), [Preparing Destination Entry Parcel Select](#), and [466.3.0](#) through [466.6.0](#) in [Enter and Deposit](#) for destination entry parcels, the following standards apply for combined parcels prepared on pallets:

- a. Parcel Select DSCF prices apply to pieces that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or 36 inches of Parcel Select and Package Services mail, or contained in overflow sacks under [7.1.8](#), and deposited at a DSCF under [455.4.0](#). Parcel Select DDU prices apply to pieces that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or 36 inches of Parcel Select and Package Services mail, or contained in overflow sacks under [7.1.8](#), and deposited at a DDU under [455.4.0](#).
- b. Presorted Bound Printed Matter DSCF prices apply to pieces that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or at least 36 inches of Parcel Select and Package Services mail, or contained in overflow sacks under [7.1.8](#), and deposited at a DSCF under [466.3.0](#) through [466.6.0](#). Presorted Bound Printed Matter DDU prices apply to pieces that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or at least 36 inches of Parcel Select and Package Services mail, or contained in overflow sacks under [7.1.8](#), and deposited at a DDU under [466.3.0](#) through [466.6.0](#).
- c. Presorted Library Mail 5-digit prices apply to pieces that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or 36 inches of Parcel Select and Package Services mail, or contained in overflow sacks under [7.1.8](#).
- d. Presorted Media Mail 5-digit prices apply to pieces that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or 36 inches of Parcel Select and Package Services mail, or contained in overflow sacks under [7.1.8](#).

705.7.1.7

- e. Single-piece price parcels that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or 36 inches of Parcel Select and Package Services mail, or contained in overflow sacks under [7.1.8](#), qualify for single-piece prices.

7.1.7 Pallet Preparation

Only 5-digit scheme and 5-digit pallets may be prepared. Each 5-digit scheme and 5-digit pallet of combined Parcel Select and Package Services must contain at least:

(1) 50 parcels and 250 pounds of mail, or (2) 36 inches of mail (excluding the height of the pallet). Pallets prepared using either minimum requirement may be combined in the same mailing.

7.1.8 Overflow Sacks

After filling pallets to a 5-digit scheme or 5-digit destination, any remaining pieces that do not meet the minimum pallet requirements may be prepared in 5-digit scheme or 5-digit overflow sacks. Overflow sacks must be labeled under [7.2.3](#).

7.1.9 Pallet Labeling

Pallet labels must be prepared as follows:

- a. *5-digit scheme*, optional; labeling:
 - 1. Line 1: use [L606](#), Column B.
 - 2. Line 2: "PSVC PARCELS 5D SCH."
- b. *5-digit*, labeling:
 - 1. Line 1: use city, state, and 5-digit ZIP Code destination of pieces.
 - 2. Line 2: "PSVC PARCELS 5D."

7.2 Combining Parcel Select and Package Services Machinable Parcels for DBMC Entry**7.2.1 Qualification**

Mailers may combine Parcel Select and Package Services machinable parcels for entry at a BMC when authorized by the USPS under [7.5](#). These parcels may be eligible for Parcel Post, Parcel Select DBMC/ASF, single-piece and Presorted Media Mail, single-piece and Presorted Library Mail, Bound Printed Matter DBMC, and single-piece and Presorted Bound Printed Matter prices. Mailers may not combine Carrier Route Bound Printed Matter with other parcels.

7.2.2 Basic Standards

Parcel Select and Package Services parcels must meet the following conditions:

- a. Each piece in a combined machinable parcels mailing must meet the criteria for machinable parcels in [401.1.5](#).
- b. Each parcel in a combined machinable parcels mailing is subject to the applicable content and price eligibility standards for the price claimed.
- c. Parcel Select machinable parcels must bear a barcode under [708.5.0](#) for the ZIP Code of the delivery address.

- d. Postage must be paid via permit imprint under an approved manifest mailing system as provided in 3.0. For mailings presented under 7.0, mailers may document and pay postage using the Electronic Verification System (eVS) under 2.9.
- e. Mailers must pay all applicable presort mailing and destination entry mailing fees.
- f. Minimum volume requirements for Parcel Select, Presorted Bound Printed Matter, Presorted Library Mail, and Presorted Media Mail must be met separately and are based solely on the quantity of pieces eligible for each price at the required presort level. Pieces claimed at other prices in the same sack or on the same pallet do not count toward these minimum volume requirements.
- g. Parcels may be claimed at single-piece, Presorted, and DBMC/ASF destination entry prices as applicable.
- h. Mailers must prepare all parcels in sacks under 6.2.3, or on pallets or in pallet boxes under 8.0, to achieve the finest level of sortation.
- i. Mailers must deposit combined machinable parcels at BMCs under applicable standards in 15.0.

7.2.3 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. *5-digit scheme*, optional, 10-piece or 20-pound minimum; labeling:
 - 1. Line 1: use L606, Column B.
 - 2. Line 2: "PSVC MACH 5D SCH."
- b. *5-digit*, optional except for Bound Printed Matter, required for 5-digit price for Media Mail and Library Mail, 10-piece or 20-pound minimum; labeling:
 - 1. Line 1: use city, state, and 5-digit ZIP Code on mail (see 8.0 for overseas military mail).
 - 2. Line 2: "PSVC MACH 5D."
- c. *ASF*, optional, allowed only for mail deposited at an ASF to claim DBMC price, 10-piece or 20-pound minimum; labeling:
 - 1. Line 1: use L602, Column B. DBMC price eligibility is determined by 6.3.
 - 2. Line 2: "PSVC MACH ASF."
- d. *BMC*, required, 10-piece or 20-pound minimum; labeling:
 - 1. Line 1: use L601, Column B. DBMC price eligibility is determined by 6.3.
 - 2. Line 2: "PSVC MACH BMC."

7.2.4 Pallet Presort and Labeling

Mailers must prepare pallets in the sequence listed below and complete each required level before preparing the next optional or required level. Unless indicated as optional, all sort levels are required under the conditions shown. Destination entry price eligibility applies only to Parcel Select (see 453.3.0 and 455.4.0) and Bound

705.7.3

Printed Matter (see [466.3.0](#)). Mailers may, at their option, prepare all machinable parcels for destination entry (see [7.0](#)). Mailers must label pallets according to the Line 1 and Line 2 information listed below and under [8.0](#).

- a. *5-digit scheme*, optional. Pallet may contain parcels for the same 5-digit scheme under [L606](#). Pallets need not be prepared for all 5-digit scheme destinations. For 5-digit destinations not part of [L606](#), or for which scheme sorts are not performed, prepare 5-digit pallets under [2.4](#). Labeling:
 1. Line 1: use [L606](#), column B.
 2. Line 2: "PSVC MACH 5D," as applicable; followed by "SCHEME" (or "SCH").
- b. *5-digit*, optional except for Bound Printed Matter, required for 5-digit price eligibility for Media Mail and Library Mail. Pallet must contain parcels only for the same 5-digit ZIP Code. Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.0](#) for military mail).
 2. Line 2: "PSVC MACH 5D," as applicable.
- c. *ASF*, required if claiming DBMC prices, otherwise optional. Not available for the Buffalo, NY ASF. Pallets must contain only parcels for the 3-digit ZIP Code groups in [L602](#). Labeling:
 1. Line 1: use [L602](#), column B.
 2. Line 2: "PSVC MACH ASF," as applicable.
- d. *BMC*, required. Pallets must contain only parcels for the 3-digit ZIP Code groups in [L601](#). Labeling:
 1. Line 1: use [L601](#), column B. DBMC price eligibility is determined by [Exhibit 446.3.1](#).
 2. Line 2: "PSVC MACH BMC," as applicable.

7.3 Postage Payment

Postage for all pieces must be paid with permit imprint at the Post Office serving the mailer's plant under [2.0](#).

7.4 Documentation

Mailers must complete separate postage statements for each of the mailings contained within the combined mailing. At the time of mailing, mailers must provide all postage statements and a Business Mailer Support-approved manifest prepared according to [2.0](#) and this section.

7.5 Authorization

A mailer who wants to present combined parcel mailings must submit a written request to Business Mailer Support (See [608.8.1](#) for address). The request must show the mailer's name and address, the mailing office, evidence of authorization to mail under [2.0](#), procedures for combined mailing, the expected date of first mailing, a sample of the required manifest, and a sample USPS Qualification report. Business Mailer Support will review documentation and provide written authorization, which may not exceed 2 years. A mailer may terminate an

authorization at any time by written notice to the postmaster of the office serving the mailer's location. Business Mailer Support may terminate an authorization, by written notice, if the mailer does not meet the standards.

8.0 Preparing Pallets

8.1 Physical Characteristics

8.1.1 Standards

All pallets presented to the USPS, whether USPS-provided or mailer-provided, must meet the standards in 8.1.2 through 8.1.4. Mail on such pallets must meet the standards for the class and price claimed.

8.1.2 Construction

Pallets must be made of high-quality material that can hold loads equal to a gross weight of 2,200 pounds. Pallets must measure 48 by 40 inches and must allow four-way entry by forklift trucks and two-way entry by pallet jacks.

8.1.3 Securing Pallets

Except for stacked pallets under 8.3.1 and pallet boxes under 8.4.3, each loaded pallet of mail must be prepared to maintain the integrity of the mail and the entire pallet load during transport and handling using one of the following methods:

- a. Securing with at least two straps or bands of appropriate material. Wire or metal bands, straps, buckles, seals, and similar metal fastening devices cannot be used.
- b. Wrapping with stretchable or shrinkable plastic.
- c. Securing with at least two straps or bands of appropriate material and wrapping with stretchable or shrinkable plastic. Wire and metal bands and straps, metal buckles, metal seals, and similar metal fastening devices cannot be used.

8.1.4 Nonconforming Mailer

The USPS informs any mailer or mailer's agent who presents palletized mailings, including plant-verified drop shipment (PVDS), when the mailer's pallets fail to meet basic pallet integrity and safety standards. After a mailer is notified and allowed to make changes to improve load integrity, if the mailer's methods, or those of the mailer's agent, do not work, the mailer is considered nonconforming. A nonconforming mailer must meet the specifications for nonconforming mailers for top-cap use, stacking of pallets, pallet box construction, and maximum height/tiers of trays in 8.2 through 8.5, respectively. A mailer is suspended from the pallet program if the mailer's pallets continue to fail to meet the minimum load integrity levels after being notified and allowed to make changes.

8.2 Top Caps

8.2.1 Use

Top caps are used as follows:

705.8.2.2

- a. Except as provided below, all pallets of sacks, trays, parcels, bundles of mail, or pallet boxes must be top-capped if the pallets are stacked two, three, or four tiers high when presented to the USPS for acceptance.
- b. The top pallet need not be top-capped if the strapping or banding securing the stacked pallets together neither damages the mail on the top pallet nor allows the stack to shift.
- c. Lower pallet(s) containing either parcels or bundles of mail need not be top-capped if the top surface of each pallet load provides a sturdy, flat surface, parallel to the pallet base, that allows safe and efficient stacking of pallets placed on top and prevents sliding of the top pallet(s), damage to the loaded mail, or crushing of the load.

8.2.2 Construction

Any material may be used as a top cap if it provides a flat, level surface horizontal to the base pallet, protects the integrity of the mail below it while supporting a loaded pallet above, and allows easy entry of a forklift to remove the upper pallet(s). Flimsy paper or fiberboard (e.g., the ends of paper rolls) or similar material is inadequate and may not be used as a top cap.

8.2.3 Securing

A top cap must be secured to the pallet horizontal to the plane of the base pallet, with either stretchwrap or at least two crossed straps or bands, so that the cap stays in place to protect the mail and maintain the integrity of the pallet load.

8.2.4 Use by Nonconforming Mailer

A nonconforming mailer (see 8.1.4) must use top caps on all pallets of sacks, letter mail trays, parcels, or bundles of mail, regardless of weight, or on pallets containing pallet boxes no more than 60 inches high. Top caps must be approximately 48 by 40 inches and meet one of these construction standards:

- a. Five-wood boards, with uniform edges and nine-leg pallet contact for stacking.
- b. Fiberboard box-end style, with a minimum 3-inch side and wall material of at least double-wall corrugated fiberboard C-flute and/or B-flute.
- c. Fiberboard honeycomb covered on both sides, with heavy linerboard at least 1/2 inch thick.
- d. Corrugated fiberboard C-flute sheet covering the entire top of the load, with standard pallet solid fiberboard corner edge protectors.

8.3 Stacking Pallets**8.3.1 Physical Characteristics**

Pallets may be stacked two, three, or four tiers high if:

- a. The combined gross weight of the stacked pallets (pallets, top caps, and mail) does not exceed 2,200 pounds.
- b. The heaviest pallet is on the bottom and the lightest is on the top.
- c. Individual pallets are secured with straps or stretchable or shrinkable plastic as specified in 8.1.3.

- d. The stack of pallets is secured with at least two straps or bands of appropriate material to maintain the integrity of the stacked pallets during transport and handling. Wire or metal bands, straps, buckles, seals, and similar metal fastening devices cannot be used. The stack of pallets cannot be secured together with stretchable or shrinkable plastic.
- e. Each pallet is top-capped as specified in 8.2.
- f. The combined height of the stacked pallets and their loads does not exceed 84 inches. *Exception:* Pallets prepared for entry at Anchorage or Fairbanks, Alaska, cannot exceed 72 inches (pallets, top caps, and mail).

8.3.2 Pallet Height Restriction for Nonconforming Mailer

A nonconforming mailer (see 8.1.4) who stacks pallets is subject to the requirements of 8.3.1 with the additional restrictions that the combined height of any stacked pallets may not exceed 77 inches and that stacking pallets four tiers high is permitted only for pallets of parcels.

8.4 Pallet Boxes

8.4.1 Use

A mailer may use pallet boxes constructed of single-, double-, or triple-wall corrugated fiberboard placed on pallets to hold sacks or parcels. Pallet boxes must protect the mail and maintain the integrity of the pallet loads throughout transportation, handling, and processing. Single-wall corrugated fiberboard may be used only for light loads (such as lightweight parcels) that do not require transportation by the USPS beyond the entry office, or for Parcel Select DSCF price mail. Mailers must supply their own pallet boxes. The base of the boxes must measure approximately 40 by 48 inches. Pallet standards require the use of pallet boxes meeting the size requirements in 8.4.2 for machinable Parcel Select claiming OBMC Presort and BMC Presort discounts. Pallet standards prohibit use of pallet boxes for nonmachinable Parcel Select claiming OBMC Presort and BMC Presort discounts. Pallet boxes meeting the size dimensions in 8.4.2 also may be used at the mailer's option for Parcel Select DSCF and Parcel Select DDU price mail.

8.4.2 Height

The combined height of a single pallet, pallet box, and mail may not exceed 77 inches. The contents of the box may not extend above the top rim of the box. For all Parcel Select and Package Services mailings entered at a DSCF or DDU, the height of the pallet box may not exceed 60 inches (excluding the pallet). For Parcel Select OBMC Presort and BMC Presort price mailings of machinable pieces, the height of the pallet box must not exceed 69 inches (excluding the pallet).

8.4.3 Securing

Pallet boxes must be secured to the pallet with strapping, banding, stretchable plastic, shrinkwrap, or other material (wire or metal bands, straps, buckles, seals, and similar metal fastening devices cannot be used) that ensures that the pallet can be safely unloaded from vehicles, transported, and processed as a single unit to the point where the contents are distributed with the load intact if:

705.8.4.4

- a. The pallet and its contents are transported by the USPS from the office where the mail is accepted to another postal facility where the contents are distributed; and
- b. The weight of the mail in the box is not sufficient to hold the box in place on the pallet during transportation and processing.

8.4.4 Use by Nonconforming Mailer

Except when mailing Parcel Select claiming a DSCF or DDU price, a nonconforming mailer (see 8.1.4) may use pallet boxes only if the boxes are constructed of triple-wall corrugated fiberboard (C-flute and/or B-flute material) with a maximum height (pallet and box) of 77 inches.

8.5 General Preparation

8.5.1 Presort

Pallet sortation is generally intended to presort the palletized portion of a mailing to at least the finest extent required for the corresponding class of mail and method of preparation. Pallet sortation is sequential from the lowest (finest) level to the highest and must be completed at each required level before the next optional or required level is prepared. Standard preparation terms are defined in the Mail Preparation section for each class of mail, standard presort levels are defined in 8.0, and advanced presort levels are defined in 10.0, 12.0, and 13.0. For sacks, trays, or machinable parcels on pallets, the mailer must prepare all required pallet levels before any mixed ADC or mixed BMC pallets are prepared for a mailing or job. Bundles must not be placed on mixed ADC or mixed BMC pallets. Bundles that cannot be placed on pallets must be prepared in sacks under the standards for the price claimed. The standards for bundle reallocation to protect the SCF, ADC, or BMC pallet (8.11, 8.13, and 8.14) are optional methods of pallet preparation designed to retain as much mail as possible at the SCF, ADC, or BMC level. These standards may result in some bundles of Periodicals flats and irregular parcels and Standard Mail flats that are part of a mailing job prepared in part as palletized flats at automation prices not being placed on the finest level of pallet possible. Mailers must use PAVE-certified presort software to prepare mailings using bundle reallocation (bundle reallocation is optional, but if performed, it must be done for the complete mailing job).

8.5.2 Required Preparation

The following standards apply to Periodicals, Standard Mail, Parcel Select, and Package Services, except Parcel Select mailed at BMC Presort, OBMC Presort, DSCF, and DDU prices.

- a. Mailers must prepare a pallet to the required sortation level(s) for the class of mail when a mailing contains 500 or more pounds of bundles, sacks, or parcels or 72 linear feet or six layers of letter trays for the destination.
- b. For bundles of flat-size mailpieces or bundles of irregular parcels on pallets, after preparing all possible pallets under 8.5.2a, when 250 or more pounds of bundles remain for an ADC (Periodicals) or for a BMC/ASF (Standard Mail, Parcel Select, and Package Services), mailers must prepare the ADC or

BMC/ASF pallet, as applicable for the class of mail. Exception: If there are no ADC or BMC/ASF pallets in a mailing and 250 or more pounds remain for an SCF, mailers must prepare the SCF pallet.

- c. If bundles remain that cannot be prepared on an ADC, BMC/ASF, or SCF pallet, mailers must place those bundles in sacks (8.9.1).

8.5.3 Minimum Load

The following minimum load standards apply to mail prepared on pallets:

- a. For Periodicals, Standard Mail, Parcel Select, and Package Services (except for Parcel Select mailed at BMC Presort, OBMC Presort, DSCF, and DDU prices):
 1. In a single mailing, the minimum load per pallet is 250 pounds of bundles, parcels, or sacks, except as provided in items 2 through 4 below. When preparing letter trays on pallets, the minimum load is 36 linear feet or three layers of trays, except as provided in item 3 below.
 2. There is no minimum load for pallets entered at a destination delivery unit (DDU) if the mail on those pallets is for that unit's service area.
 3. A pallet may contain a minimum of 100 pounds of nonletter-size mail or 12 linear feet of letter trays if it is a BMC or ASF pallet entered at the destination BMC or ASF; an ADC pallet entered at the destination ADC; an SCF pallet entered at the destination SCF; or the only pallet entered at an individual destination BMC or ASF, ADC, or SCF facility.
 4. At an SCF, a 5-digit, 3-digit, or SCF pallet may contain less than the required minimum load of mail for that SCF's service area only if the SCF manager provides written authorization for such preparation.
- b. Parcel Select mailed at BMC Presort, OBMC Presort, DSCF, and DDU prices. A minimum load for the price claimed may be stated in terms of weight, combined piece minimum and weight, or minimum height. There are separate minimum mail heights for machinable parcels and for nonmachinable parcels claimed at OBMC Presort and BMC Presort prices. Mail entered at the Parcel Post DSCF prices and prepared directly on pallets or in pallet boxes on pallets must be prepared under either a minimum height requirement or under one of two options requiring a minimum number of pieces and pounds per pallet. There is no minimum weight requirement for an SCF pallet containing 5-digit scheme and 5-digit sacks prepared for the DSCF price. There are no minimums for the Parcel Select DDU price.

8.5.4 Minimum Height of Mail

The definitions of the minimum height of mail used to qualify for OBMC Presort, BMC Presort, and DSCF Parcel Select prices are as follows:

- a. *Machinable parcels.* The minimum height of mail in a pallet box is the shortest vertical distance measured from the bottom of a pallet box to the top of the lowest mailpiece. The height of the pallet is not included in this measurement.
- b. *Nonmachinable parcels.* The minimum height of mail on a pallet is the shortest vertical distance measured from the top of the pallet to the top of the lowest mailpiece. The height of the pallet is not included in this measurement.

8.5.5 Maximum Load

The maximum weight (mail and pallet) is 2,200 pounds. The maximum height of a single pallet (mail and pallet) is 77 inches for bundles, parcels, sacks, or pallet boxes, or 77 inches or 12 layers of trays (whichever occurs first) for letter trays.

Exception: A single pallet that is prepared for entry at Anchorage or Fairbanks, Alaska, has a maximum height of 72 inches (pallet, top cap, and mail).

8.5.6 Mail on Pallets

[9-11-08] These standards apply to mail on pallets:

- a. Pieces in trays, bundles, and sacks must be prepared under the standards for the class of mail and price claimed.
- b. When two or more Periodicals mailings, two or more Standard Mail mailings, or two or more Bound Printed Matter mailings are placed together on pallets, the mailer must keep records for each mailing as required by the standards for the class of mail.
- c. For letter-size Standard Mail and Periodicals prepared in trays on pallets, mailers must prepare carrier route price mail on separate 5-digit pallets (5-digit carrier routes pallets) from automation price or nonautomation price mail (5-digit pallets).
- d. For determining minimum pallet volume, mail in letter trays is measured in full layers of trays or in linear feet. A 2-foot tray equals 2 linear feet; a 1-foot tray equals 1 linear foot.
- e. Heavier, fuller trays must be placed at the bottom of the load.
- f. For Bound Printed Matter irregular parcels, Presorted and Carrier Route price mail may be combined on all levels of pallet. For Bound Printed Matter flats, Presorted and Carrier Route price mail may be combined on all levels of pallet except as provided in 8.5.6g.
- g. For sacks of Periodicals, Standard Mail, and Bound Printed Matter flats or irregular parcels, carrier route price mail must be prepared on separate 5-digit pallets from automation price and/or presorted price mail.
- h. Periodicals, Standard Mail, and Bound Printed Matter flats or irregular parcels prepared in carrier route and noncarrier route 5-digit bundles may be placed on the same merged 5-digit scheme, merged 5-digit, and 5-digit metro pallet, as appropriate.
- i. All presort bundles on pallets must be placed with the addresses facing up.

8.5.7 Arranging Pieces in a Bundle (“Facing”)

Except as noted in 8.5.8, all pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

8.5.8 Counter-Stacking—Sacked and Palletized Mail

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.

- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling.

8.5.9 Address Visibility

Mailers preparing presort bundles must ensure that the delivery address information on the top mailpiece in each bundle is visible and readable by the naked eye. Mailers using strapping that might cover the address can avoid obstructing visibility by using clear, smooth strapping tightly secured around the bundle. Mailers using barcoded pressure-sensitive bundle labels, optional endorsement lines, carrier route information lines, or carrier route facing slips also must ensure that the information in these presort designations is visible and readable by the naked eye. This standard does not apply to the following:

- a. Customized MarketMail.
- b. Bundles placed in or on 5-digit or 5-digit scheme (L001) sacks or pallets.
- c. Bundles placed in carrier route and 5-digit carrier routes sacks.
- d. Bundles of mailpieces at carrier route prices entered at a destination delivery unit (DDU).
- e. Bundles of Standard Mail flat-size pieces prepared in letter trays under 345.3.4.

8.5.10 Labeling Bundles

[7-3-08] Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under 708.7.0 or with a barcoded pressure-sensitive bundle label. On letter-size mail (including card-size pieces), the bundle label must be placed in the lower left corner of the address side of the top piece in the bundle. On flat-size mail, the label may be placed anywhere on the address side of the top piece in the bundle. Barcoded pressure-sensitive bundle labels must not obscure the delivery address block. Banding or shrinkwrap must not obscure any bundle label. The following colors and presort characters apply to bundle labels:

- a. Firm (Periodicals use only), blue Label F.
- b. 5-digit scheme presort level, red Label 5 SCH.
- c. 5-digit presort level, red Label 5.

705.8.5.11

- d. 3-digit scheme presort level, green Label 3 SCH.
- e. 3-digit presort level, green Label 3.
- f. ADC presort level, pink Label A.
- g. Mixed ADC presort level, tan Label X.

8.5.11 Securing Bundles on Pallets

Bundles must withstand normal transit and handling without breaking and without causing injury to USPS employees or damage to USPS equipment. Mailers must meet the following standards when preparing and securing bundles:

- a. Secure bundles with banding, shrinkwrap, or shrinkwrap supplemented with one or more bands. *Banding* includes plastic bands, rubber bands, twine, string, and similar material. Mailers must meet the following standards when banding bundles:
 - 1. Do not place any bands closer than 1 inch from any bundle edge.
 - 2. When using twine or string to band bundles, secure the knot(s) so the twine or string does not come loose during transit and processing.
 - 3. Do not use wire or metal banding.
 - 4. Do not use any loose banding.
- b. When using only banding to secure bundles, apply banding under the following additional requirements:
 - 1. Use at least one band to encircle the length of the bundle and use at least one band to encircle the girth of the bundle.
 - 2. Use tension sufficient to tighten and depress the edges of the bundle so that pieces do not slip out of the banding during transit and processing.

8.5.12 Sacked Mail

Mail that is not palletized (e.g., the mailer chooses not to prepare BMC pallets, or the bundles do not meet the machinability standards in 8.5.7 through 8.5.11) must be prepared under the standards for the price claimed. For Periodicals, the mailer must separately sack bundles of each publication that are not palletized or that are excluded from palletization. Trays that are not palletized must be bedloaded. Sacks (including sacks of bundles not placed on pallets) containing bundles remaining after all pallets are prepared may be presented with the palletized mail (and reported on the same postage statement) if separated from the palletized portion of the mailing.

8.5.13 Nonconforming

For a nonconforming mailer (see 8.1.4) of letter-size mail in trays, the combined height of a pallet and its load cannot exceed six layers of MM or EMM letter trays.

8.6 Pallet Labels

8.6.1 Placement

At least two clearly visible labels must be affixed on two adjacent sides of each pallet.

8.6.2 Specifications

Pallet labels must be pink for Periodicals mail or white for Standard Mail and Package Services mail. Pallet labels must measure at least 8 inches by 11 inches.

8.6.3 Lettering

Lettering for required information on pallet labels must be at least 1/2 inch high (or at least 48-point type). *Exception:* When customers apply USPS-specified pallet barcodes to pallet labels, the lettering for the required information on line 3 (origin line) must be at least 1/8 inch high (or at least 12-point type). See the “surface visibility” information at <http://ribbs.usps.gov> for more information about pallet barcodes.

8.6.4 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed on the pallet. If the pallet label does not provide enough space for all required Line 1 information, the destination ZIP Code may be placed right-justified on the line immediately below the rest of Line 1 and above Line 2 (content line). A standard abbreviation for the destination city name may be used.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas military mail.* On 5-digit pallets for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail on the pallet.

8.6.5 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Content line information.* Pallet labels must indicate whether the mail on the pallet is barcoded, or not barcoded, or both. The content line (line 2 of required information) must be the second visible line on the label. This line must show the class and processing category of the mail on the pallet and other information as specified by standard. If the content line of a pallet label does not provide enough space for all required information, the content information may be continued right-justified on the line immediately below the content line and above the office of mailing or mailer information line.

705.8.6.6

- b. *Codes.* The codes shown below must be used as appropriate on Line 2 of sack, tray, and pallet labels.

CONTENT TYPE	CODE
Barcoded	BC
Barcoded and Nonbarcoded	BC/NBC
Carrier Route	C (type of route)
Carrier Routes	CR-RT or CR-RTS
Digit	D
Flats	FLTS
General Delivery Unit	G
Highway Contract Route	H
Irregular Parcels	IRREG (Periodicals, Standard Mail, and Package Services only)
Letters	LTR or LTRS
Machinable	MACH
Mixed	MXD
Mixed Machinable and Irregular Parcels	MACH & IRREG (Standard Mail only)
Nonmachinable	NON MACH
Nonbarcoded	NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under 705.9.0)
Nonmachinable Parcels	NON MACH
Package Services	PSVC
Parcels	PARCELS (First-Class Mail and Package Services only)
Periodicals	PER (see 707.21.1.3) NEWS (see 707.21.1.3)
Post Office Box Section	B
Rural Route	R
Scheme	SCH
Standard Mail	STD
Working	WKG

8.6.6 Line 3 (Origin Line)

The office of mailing or mailer information line (line 3 of required information) must be the bottom line of required information unless the pallet or pallet box contains mail prepared under the Electronic Verification System (eVS). Line 3 must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office. Electronic Verification System

All pallets and pallet boxes containing parcels prepared and identified using the Electronic Verification System (eVS) under 2.9 must show “eVS” (or the alternatives “EVS” or “E-VS”) directly below line 3 (origin line) using the same size and lettering used for Line 3.

8.6.7 5-Digit, 5-Digit Carrier Routes, and 5-Digit Scheme Carrier Routes Pallets

All 5-digit carrier routes or 5-digit scheme carrier routes pallets must show the words “CARRIER ROUTES” (or “CR-RTS”) after the processing category description on the content line under 8.0, 10.0, 12.0, and 13.0. 5-digit pallets of Bound Printed Matter that contain only carrier route price mail also must show the words “CARRIER ROUTES” (or “CR-RTS”) after the “5D” pallet level description on the contents line.

8.6.8 Extraneous Information

Extraneous information is permitted on pallet labels if:

- a. The print size is smaller than a 1/2 inch.
- b. It does not consist of a numbered series resembling a ZIP Code or 3-digit ZIP Code prefix.
- c. It does not appear on or between the lines reserved for USPS required information (blank lines are permitted). Exception: For combined mailings of Standard Mail and Package Services machinable parcels, mailer codes and extraneous information may appear between the content line and the office of mailing or mailer information line.
- d. It is below the office of mailing or mailer information line.
- e. A 1-inch clear space is maintained around the lines reserved for USPS required information.
- f. On the office of mailing or mailer information line, the mailer’s name or abbreviation, “Mailer,” “From” (or “FR”), “Entered at,” or a similar notation precedes the required information, or mailer codes or other extraneous information appear to the right of the required information.

8.6.9 Periodicals Publications

Except as provided in 8.16 for copalletized mailings, Periodicals publications must use one of the following for Line 2 class information:

- a. “PER.”
- b. “NEWS” if published weekly or more often or if authorized newspaper treatment as of March 1, 1984.

8.6.10 Pallet Bundle Information

It is recommended that mailers preparing bundles on pallets add to the pallet label, below the office of mailing or mailer information line and according to the provisions of 8.6.8, additional information listing the number of bundles for each bundle sortation and price level on the pallet (i.e., the number of carrier route bundles, the number of 5-digit, 3-digit, and ADC automation price bundles, and the number of 5-digit, 3-digit, and ADC Presorted price bundles on each pallet).

8.7 Copalletized, Combined, or Mixed-Price Level Mailings of Flat-Size Pieces

8.7.1 General

Palletized mailings (including combined, copalletized, and mixed price level mailings) must be prepared under the standards for the class of mail, subject to specific authorization by Business Mailer Support when required.

8.7.2 Application

The mailer (or publisher or agent) must submit a written request to Business Mailer Support to present the types of pallets described in this section. A separate request is required for each type of pallet at each location, but multiple, concurrent applications are acceptable. A mailer who cannot meet the minimum palletization standards without copalletizing, combining, or commingling mixed price mailings might still qualify if the total copalletized, combined, or commingled mailing meets minimum pallet standards. The request must be received at least 30 days before the first mailing and include the names, addresses, and telephone numbers of the mail owner and of the firm or person preparing the mail; a description of the mailing (e.g., size, weight, class, price, volume, mailing frequency, and postage payment method); the type of authorization requested; and a sample of the applicable documentation under [8.0](#), or [10.0](#), [12.0](#), and [13.0](#).

8.7.3 Periodicals Publications

To combine more than one Periodicals publication on pallets, the mailer must merge and presort copies of all the publications into common bundles to achieve the finest presort level for the combined mailing. To copalletize different Periodicals flat-size publications, the mailer must consolidate on pallets all independently sorted bundles for each publication to achieve the finest presort level for the mailing. A combined or copalletized mailing prepared using bundle reallocation under [8.11](#) or [8.13](#) may not always result in all bundles being placed on the finest pallet level possible. Both combined and copalletized publications must be supported by the documentation required in [8.0](#), or [10.0](#), [12.0](#), and [13.0](#). Preferred Periodicals may be combined with Regular Periodicals only as permitted by standard.

8.7.4 Standard Mail

To copalletize different Standard Mail flat-size mailings, the mailer must consolidate on pallets all independently sorted bundles from each mailing to achieve the finest presort level for the mailing, except that a copalletized mailing prepared under [8.11](#) or [8.14](#) using the bundle reallocation option may not always result in all bundles being placed on the finest pallet level possible. At the time of mailing, the mailer must present computer-generated listings required in [8.0](#), or [10.0](#), [12.0](#), and [13.0](#) that include a summary list consolidating the copalletized multiple mailings and a list of the contents of each pallet by ZIP Code and presort level.

8.7.5 Cancellation

An authorization may be canceled by Business Mailer Support if the mailer does not meet the standards for pallets or the prices claimed or the mailer does not submit information on future mailings as requested by Business Mailer Support. A mailer may appeal canceled authorizations through Business Mailer Support to the Business Mail Acceptance manager, USPS Headquarters.

8.8 Basic Uses

These types of mail may be palletized:

- a. Letter-size mail in trays.
- b. Bundles of nonletter-size mail not prepared in sacks.
- c. Bundles or parcels in sacks.
- d. Machinable or irregular parcels.
- e. Copalletized multiple flat-size mailings, subject to [8.0, *Preparing Pallets*](#).
- f. Combined mailings of machinable parcels (Standard Mail and Package Services), subject to [6.0](#).
- g. Two or more Periodicals publications combined or copalletized, subject to [8.0](#).
- h. Combined mailings of Nonprofit Standard Mail mixed price levels, subject to [8.0](#).
- i. Commingled zoned price Parcel Select and Package Services, subject to [455.1.7](#).

8.9 Bundles on Pallets

8.9.1 Applicability

Presort destination bundles of Periodicals, Standard Mail, and Package Services flats and irregular parcels may be placed directly on pallets under [8.9.2](#) through [8.9.5](#) and [8.10](#). Mail that cannot be placed on pallets must be prepared in sacks under the applicable standards. Sacks containing any remaining bundles after all pallets are prepared may be presented with the palletized portion of the mailing job (and, subject to [8.16.5](#), reported on the same postage statement) if the sacked portion is presented separately from the palletized portion.

8.9.2 Basic Bundling Standards

Bundle preparation for Periodicals, Standard Mail, and Package Services mailpieces must meet the applicable standards for each class or subclass of mail. Bundles may be sorted onto pallets under [8.10](#) and [10.0](#), [12.0](#), and [13.0](#).

8.9.3 Periodicals

Bundle size: Six-piece minimum (lower volume bundles permitted under [707.22.0, *Preparing Nonbarcoded \(Presorted\) Periodicals*](#), and [707.23.0, *Preparing Carrier Route Periodicals*](#)), 20-pound maximum, except that:

- a. Firm bundles may contain as few as two copies of a publication. Mailers must not consolidate firm bundles with other bundles to the same 5-digit destination. Only In-County firm bundles may be counted as an addressed piece for presort standards (see [707.22.0](#) and [707.23.0](#)).
- b. All pieces for the same presort destination must be in one bundle if they weigh less than 10 pounds. Otherwise, bundles must weigh from 10 to 20 pounds each.
- c. Carrier route and 5-digit bundles placed on 5-digit or finer pallets may weigh up to 40 pounds when entered at a DDU.
- d. The last bundle to a presort destination may contain less than 10 pounds.

705.8.9.4

8.9.4 Standard Mail

Bundle size: 10-piece or 15-piece minimum as applicable; 20-pound maximum, except that:

- a. All pieces for the same presort destination must be in one bundle if they weigh less than 10 pounds. Otherwise, bundles must weigh from 10 to 20 pounds each.
- b. The last bundle to a presort destination may contain less than 10 pounds.

8.9.5 Bound Printed Matter

Bound Printed Matter on pallets must be bundled as follows:

- a. Minimum Bundle Size. Bundle mail under the minimum bundle size of “10 pieces or 10 pounds, whichever comes first” according to these standards:
 1. For identical-weight pieces, a single-piece weight of 1 pound results in 10 pieces weighing 10 pounds. Identical-weight pieces weighing 1 pound or less must be prepared using the 10-piece minimum; those that weigh more must be prepared using the 10-pound minimum.
 2. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 10-pound minimum applies). Alternatively, bundle by the actual piece count or mail weight for each bundle destination, provided documentation can be presented with the mailing that shows (specifically for each bundle) the number of pieces and their total weight.
 3. Mailers must note on the accompanying postage statement whether they applied the 10-piece or 10-pound threshold, or both.
- b. Presorted and Carrier Route Bound Printed Matter:
 1. Only individual pieces of flats or irregular parcels that weigh less than 10 pounds each may be prepared as bundles on pallets. Presorted price pieces that weigh 10 or more pounds each must be prepared and palletized as machinable parcels under [8.10.3, Package Services Flats—Bundles and Sacks](#), or prepared in sacks under [365.5.0](#) for flats and [465.5.0](#) for parcels. Carrier route pieces that individually weigh 10 or more pounds each must either be prepared and palletized as machinable parcels under [8.10.3, Package Services Flats—Bundles and Sacks](#), and qualify for Presorted prices or be prepared in sacks under [365.6.0](#) for flats and [465.6.0](#) for parcels and qualify for carrier route prices.
 2. Bundles must be prepared under [365.5.0](#) for presorted flats and [465.5.0](#) for presorted parcels, or [11.0](#), as appropriate. The minimum bundle size is 10 addressed pieces or 10 pounds, whichever occurs first, except that the last bundle to a presort destination may contain fewer than 10 pieces or weigh less than 10 pounds. When there are at least 10 pieces but less than 10 pounds for a presort destination, the pieces must be prepared in a single physical bundle. The maximum physical bundle size for pallets prepared under [8.10.3a](#) through [8.10.3d](#), and [8.10.4a](#) through [8.10.4g](#) is

40 pounds. The maximum physical bundle size for pallets prepared under 8.10.3e through 8.10.3i, and 8.10.4h through 8.10.4i is 20 pounds. The total number of bundles for a single presort destination must not exceed the number of 10-pound increments to that destination. Each physical bundle must contain at least two addressed pieces.

8.10 Pallet Presort and Labeling

8.10.1 Periodicals—Bundles, Sacks, or Trays

[7-3-08] Pallets must be prepared under 8.0 in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required under the conditions shown. See 707.29.0 for additional requirements for destination entry prices eligibility. For mailings of sacks or trays on pallets, pallet preparation begins with 8.10.1e. Pallets must be labeled according to the Line 1 and Line 2 information listed below and under 8.6. All pallets prepared under 8.10.1 may contain firm bundles, and pallets prepared under 8.10.1a through 8.10.1i may contain low-volume bundles. Bundles of Periodicals flats and irregular parcels may also be palletized under 10.0, 12.0, or 13.0. For pieces meeting the standards in 707.26.0, mailers may prepare the nonpalletized (residual) portion of a mailing in sacks under 10.0.

- a. *Merged 5-digit scheme*, required, permitted for bundles only. Not permitted for bundles containing noncarrier route automation-compatible flats under 301.3.0. Required for bundles containing all other flats or irregular parcels. Pallet must contain carrier route bundles and noncarrier route 5-digit bundles (automation price and/or Presorted price bundles) for the same 5-digit scheme under L001. For 5-digit destinations not part of L001, merged 5-digit pallet preparation begins with 8.10.1d. Labeling:
 1. Line 1: L001.
 2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS” or “IRREG,” as applicable; followed by “CR/5D”; followed by “SCHEME” (or “SCH”).
- b. *5-digit scheme carrier routes*, required, permitted for bundles only. Pallet must contain only carrier route bundles for the same 5-digit scheme under L001. For 5-digit destinations not part of L001, 5-digit carrier routes pallet preparation begins with 8.10.1e. Labeling:
 1. Line 1: L001.
 2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS” or “IRREG,” as applicable; followed by “CARRIER ROUTES” (or “CR-RTS”); followed by “SCHEME” (or “SCH”).
- c. *5-digit scheme*, required, permitted for bundles only. Not permitted for bundles containing automation-compatible flats under 301.3.0. Required for bundles containing all other flats and irregular parcels. Pallet must contain only 5-digit bundles of automation price and/or Presorted price mail for the same 5-digit scheme under L001. For 5-digit destinations not part of L001, 5-digit pallet preparation begins with 8.10.1f. Labeling:
 1. Line 1: L001.

705.8.10.1

2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS” or “IRREG,” as applicable; followed by “5D”; followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains Presorted price mail; followed by “SCHEME” (or “SCH”).
- d. *Merged 5-digit*, required, permitted for bundles only. Not permitted for bundles containing noncarrier route automation-compatible flats under [301.3.0](#). Required for bundles containing all other flats or irregular parcels. Pallet must contain carrier route bundles and noncarrier route 5-digit bundles (automation price and/or Presorted price bundles) for the same 5-digit ZIP Code. Labeling:
 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
 2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS” or “IRREG,” as applicable; followed by “CR/5D.”
- e. *5-digit carrier routes*, required, except for trays; permitted for bundles, sacks, and trays. Pallet must contain only carrier route mail for the same 5-digit ZIP Code. Labeling:
 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
 2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS,” “IRREG,” or “LTRS,” as applicable; followed by “CARRIER ROUTES” (or “CR-RTS”).
- f. *5-digit*, required, except for trays; permitted for bundles, sacks, and trays. Pallet must contain only automation price and/or Presorted price mail for the same 5-digit ZIP Code or the same 5-digit scheme under [L007](#) (for automation-compatible flats only under [301.3.0](#)). Five-digit scheme bundles are assigned to pallets according to the “label to” 5-digit ZIP Code in [L007](#). Labeling:
 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
 2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS,” “IRREG,” or “LTRS,” as applicable; followed by “5D”; followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains Presorted price mail.
- g. *5-digit metro*, optional, permitted for bundles only. Pallet may contain carrier route, automation price, and/or Presorted price bundles for the 5-digit ZIP Codes in [L006](#), Column A, and for 3-digit ZIP Code groups in [L006](#), Column B. Labeling:
 1. Line 1: [L006](#).
 2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS” or “IRREG,” as applicable; followed by “METRO” (or “MET”); followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted price mail.

- h. *3-digit*, optional, option not available for bundles for 3-digit ZIP Code prefixes marked “N” in [L002](#). Pallet may contain mail for the same 3-digit ZIP Code or the same 3-digit scheme under [L008](#) (for automation-compatible flats only under [301.3.0](#)). Three-digit scheme bundles are assigned to pallets according to the “label to” 3-digit ZIP Code in [L008](#). Labeling:
1. Line 1: [L002](#), Column A.
 2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS,” “IRREG,” or “LTRS,” as applicable; followed by “3D”; followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted price mail.
- i. *SCF*, required, permitted for bundles, sacks, and trays. Pallet may contain carrier route, automation price, and/or Presorted price mail for the 3-digit ZIP Code groups in [L005](#). Mailers may place origin mixed ADC (OMX) sacks on origin SCF pallets. Labeling:
1. Line 1: [L002](#), Column C.
 2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS,” “IRREG,” or “LTRS,” as applicable; followed by “SCF”; followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted price mail.
- j. *ADC*, required, permitted for bundles, sacks, and trays. Pallet may contain carrier route, automation price, and/or Presorted price mail for the 3-digit ZIP Code groups in [L004](#). Labeling:
1. Line 1: [L004](#).
 2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS,” “IRREG,” or “LTRS,” as applicable; followed by “ADC”; followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted price mail.
- k. *Origin Mixed ADC (OMX)*, optional, no minimum, permitted for sacks only. Pallet may contain carrier route, automation price, and/or presorted price mail. Labeling:
1. Line 1: Use the destination information shown in [L201](#), Column C for mail entered at the corresponding entry Post Offices in [L201](#), Column A.
 2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS,” “IRREG,” or “LTRS,” as applicable; followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains nonautomation price mail; followed by “WKG.”
- l. *Mixed ADC*, optional, permitted for sacks and trays only. Pallet may contain carrier route, automation price, and/or presorted price mail. Pallets must not contain origin mixed ADC (OMX) sacks. Labeling:

705.8.10.2

1. Line 1: "MXD" followed by city, state, and ZIP Code information for ADC serving 3-digit ZIP Code prefix of entry Post Office as shown in [L004](#), Column A (label to plant serving entry Post Office if authorized by processing and distribution manager).
2. Line 2: "PER" or "NEWS," as applicable; followed by "FLTS," "IRREG," or "LTRS," as applicable; followed by "BARCODED" (or "BC") if pallet contains automation price mail; followed by "NONBARCODED" (or "NBC") if pallet contains carrier route and/or Presorted price mail; followed by "WKG."

8.10.2 Standard Mail—Bundles, Sacks, or Trays

[7-3-08] Mailers must prepare pallets under [8.0](#) in the sequence listed below and complete each required level before preparing the next optional or required level. Unless indicated as optional, all sort levels are required. For irregular parcels, use this preparation only for pieces in carrier route bundles or in sacks. Palletize unbundled or unsacked irregular parcels under [705.8.10.6](#). Pallets must be labeled according to the Line 1 and Line 2 information listed below and under [8.6](#). Mailers also may palletize bundles of Standard Mail flats under [10.0](#), [12.0](#), or [13.0](#).

- a. *5-digit scheme carrier routes*, required, permitted for bundles only. Pallet must contain only carrier route bundles for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), 5-digit carrier routes pallet preparation begins with [8.10.1e](#). Labeling:
 1. Line 1: [L001](#).
 2. Line 2: "STD" followed by "FLTS" or "IRREG," as applicable; followed by "CARRIER ROUTES" (or "CR-RTS"); followed by "SCHEME" (or "SCH").
- b. *5-digit carrier routes*, required except for trays, permitted for bundles, sacks, and trays. Pallet must contain only carrier route mail for the same 5-digit ZIP Code. Labeling:
 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
 2. Line 2: For flats and irregular parcels, "STD" followed by "FLTS" or "IRREG," as applicable; followed by "CARRIER ROUTES" (or "CR-RTS"). For letters, "STD LTRS"; followed by "CARRIER ROUTES" (or "CR-RTS"); followed by "BC" if pallet contains barcoded letters; followed by "MACH" if pallet contains machinable letters; followed by "MAN" if pallet contains nonmachinable letters.
- c. *5-digit*, required except for trays, permitted for bundles, sacks, and trays. Pallet must contain only automation price and/or Presorted price mail for the same 5-digit ZIP Code or same 5-digit scheme. 5-digit scheme bundles and sacks are assigned to 5-digit pallets according to the "label to" 5-digit ZIP Code. Labeling:
 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).

2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “5D”; followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains Presorted price mail. For letters, “STD LTRS 5D”; followed by “BC” if pallet contains barcoded letters; followed by “MACH” if pallet contains machinable letters; followed by “MAN” if pallet contains nonmachinable letters.
- d. *5-digit metro*, optional, permitted for bundles only. Pallet may contain carrier route, automation price, and/or Presorted price bundles for the 5-digit ZIP Codes in [L006](#), Column A, and for 3-digit ZIP Code groups in [L006](#), Column B. Pallet labeling:
 1. Line 1: [L006](#).
 2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “METRO” (or “MET”); followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted price mail.
- e. *3-digit*, optional, option not available for bundles for 3-digit ZIP Code prefixes marked “N” in [L002](#). Pallet may contain mail for the same 3-digit ZIP Code or the same 3-digit scheme under [L008](#) (for automation-compatible flats only under [301.3.0, Physical Standards for Automation Flats](#)). Three-digit scheme bundles are assigned to pallets according to the “label to” 3-digit ZIP Code in [L008](#). Labeling:
 1. Line 1: [L002](#), Column A.
 2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “3D”; followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted price mail. For letters, “STD LTRS 3D”; followed by “BC” if pallet contains barcoded letters; followed by “MACH” if pallet contains machinable letters; followed by “MAN” if pallet contains nonmachinable letters.
- f. *SCF*, required, permitted for bundles, sacks, and trays. Pallet may contain carrier route, automation price, and/or Presorted price mail for the 3-digit ZIP Code groups in [L005](#). Mailers may, at their option, place AADC trays on SCF pallets when the tray's “label to” 3-digit ZIP Code (from [L801](#)) is within that SCF's service area. Mailers may also, at their option, place mixed ADC or mixed AADC trays, labeled per [L010](#), on an SCF pallet entered at the SCF facility responsible for the processing of mixed ADC or mixed AADC trays for that BMC/ASF facility. Labeling:
 1. Line 1: [L002](#), Column C.
 2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “SCF”; followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or

Presorted price mail. For letters, “STD LTRS SCF”; followed by “BC” if pallet contains barcoded letters; followed by “MACH” if pallet contains machinable letters; followed by “MAN” if pallet contains nonmachinable letters.

- g. *ASF*, required unless bundle reallocation used under 8.13, permitted for bundles, sacks, and trays. Pallet may contain carrier route, automation price, and/or Presorted price mail for the 3-digit ZIP Code groups in L602. ADC bundles, sacks, or trays are assigned to pallets according to the “label to” ZIP Code in L004 or L603, as appropriate. AADC trays are assigned to pallets according to the “label to” ZIP Code in L801. At the mailer’s option, appropriate mixed ADC bundles and sacks of flats; and mixed ADC and mixed AADC trays of letters, may be sorted to ASF pallets according to the “label to” ZIP Code in L010. Mixed ADC sacks of irregular parcels may be sorted to ASF pallets according to the “label to” ZIP Code in L604. All mixed ADC bundles, sacks, and trays and mixed AADC trays must contain only pieces destinating within the ASF in 6.3. Labeling:
1. Line 1: L602.
 2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “ASF”; followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted price mail. For letters, “STD LTRS ASF”; followed by “BC” if pallet contains barcoded letters; followed by “MACH” if pallet contains machinable letters; followed by “MAN” if pallet contains nonmachinable letters.
- h. *BMC*, required, permitted for bundles, sacks, and trays. Pallet may contain carrier route, automation price, and/or Presorted price mail for the 3-digit ZIP Code groups in L601. ADC bundles, sacks, or trays are assigned to pallets according to the “label to” ZIP Code in L004 or L603, as appropriate. AADC trays are assigned to pallets according to the “label to” ZIP Code in L801. At the mailer’s option, appropriate mixed ADC bundles and sacks of flats; and mixed ADC trays and mixed AADC trays of letters, may be sorted to BMC pallets according to the “label to” ZIP Code in L010. Mixed ADC sacks of irregular parcels may be sorted to ASF pallets according to the “label to” ZIP Code in L604. All mixed ADC bundles, sacks, and trays and mixed AADC trays must contain only pieces destinating within the BMC service area. Labeling:
1. Line 1: L601.
 2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “BMC”; followed by “BARCODED” (or “BC”) if pallet contains automation price mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted price mail. For letters, “STD LTRS BMC”; followed by “BC” if pallet contains barcoded letters; followed by “MACH” if pallet contains machinable letters; followed by “MAN” if pallet contains nonmachinable letters.

- i. *Mixed BMC*, optional, permitted for sacks and trays only. Pallet may contain carrier route, automation price, and/or Presorted price mail. Labeling:
 1. Line 1: "MXD" followed by information in [L601](#), Column B, for BMC serving 3-digit ZIP Code prefix of entry Post Office (label to plant serving entry Post Office if authorized by processing and distribution manager).
 2. Line 2: For flats and irregular parcels, "STD" followed by "FLTS" or "IRREG," as applicable; followed by "BARCODED" (or "BC") if pallet contains automation price mail; followed by "NONBARCODED" (or "NBC") if pallet contains carrier route and/or Presorted price mail; followed by "WKG." For letters, "STD LTRS"; followed by "BC" if pallet contains barcoded letters; followed by "MACH" if pallet contains machinable letters; followed by "MAN" if pallet contains nonmachinable letters; followed by "WKG."

8.10.3 Package Services Flats—Bundles and Sacks

[7-3-08] Pallets must be prepared under [8.0](#) in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required under the conditions shown. Carrier route mail and Presorted price mail with a barcode apply only to Bound Printed Matter mailings. Destination entry price eligibility also applies only to Bound Printed Matter (see [366](#) for flats). At the mailer's option, all Package Services flats may be prepared for destination entry. For mailings of sacks on pallets, pallet preparation begins with [8.10.3b](#). Pallets must be labeled according to the Line 1 and Line 2 information listed below and under [8.6](#).

- a. *5-digit scheme carrier routes*, required, permitted for bundles only. Pallet must contain only carrier route bundles for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), 5-digit carrier routes pallet preparation begins with [8.10.3b](#). Labeling:
 1. Line 1: [L001](#).
 2. Line 2: "PSVC FLTS"; followed by "CARRIER ROUTES" (or "CR-RTS"); followed by "SCHEME" (or "SCH").
- b. *5-digit carrier routes*, required, permitted for bundles and sacks. Pallet must contain only carrier route mail for the same 5-digit ZIP Code. Labeling:
 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
 2. Line 2: "PSVC FLTS"; followed by "CARRIER ROUTES" (or "CR-RTS").
- c. *5-digit*, required, permitted for bundles and sacks. Pallet must contain only Presorted price mail with or without a barcode for the same 5-digit ZIP Code or same 5-digit scheme under [L007](#) (for automation-compatible flats only under [301.3.0](#)). Five-digit scheme bundles are assigned to pallets according to the "label to" 5-digit ZIP Code in [L007](#). Labeling:
 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).

2. Line 2: "PSVC FLTS 5D"; followed by "BARCODED" (or "BC") if pallet contains Presorted price mail with a barcode; followed by "NONBARCODED" (or "NBC") if pallet contains Presorted price mail without a barcode.
- d. *5-digit metro*, optional, permitted for bundles only. Pallet may contain carrier route and/or Presorted price mail with or without a barcode for the 5-digit ZIP Codes in L006, Column A, and for the 3-digit ZIP Code groups in L006, Column B. Labeling:
 1. Line 1: L006.
 2. Line 2: "PSVC FLTS"; followed by "METRO" (or "MET"); followed by "BARCODED" (or "BC") if pallet contains Presorted price mail with a barcode; followed by "NONBARCODED" (or "NBC") if pallet contains carrier route and/or Presorted price mail without a barcode.
- e. *3-digit*, optional, option not available for bundles for 3-digit ZIP Code prefixes marked "N" in L002. Pallet may contain mail with or without a barcode for the same 3-digit ZIP Code or the same 3-digit scheme under L008 (for automation-compatible flats only under 301.3.0). Three-digit scheme bundles are assigned to pallets according to the "label to" 3-digit ZIP Code in L008. Labeling:
 1. Line 1: L002, Column A.
 2. Line 2: "PSVC FLTS 3D"; followed by "BARCODED" (or "BC") if pallet contains Presorted price mail with a barcode; followed by "NONBARCODED" (or "NBC") if pallet contains carrier route and/or Presorted price mail without a barcode.
- f. *SCF*, required, permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted price mail with or without a barcode for the 3-digit ZIP Code groups in L005. Labeling:
 1. Line 1: L002, Column C.
 2. Line 2: "PSVC FLTS SCF"; followed by "BARCODED" (or "BC") if pallet contains Presorted price mail with a barcode; followed by "NONBARCODED" (or "NBC") if pallet contains carrier route and/or Presorted price mail without a barcode.
- g. *ASF*, required, permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted price mail with or without a barcode for the 3-digit ZIP Code groups in L602. ADC bundles or sacks are assigned to pallets according to the "label to" ZIP Code in L004. At the mailer's option, appropriate mixed ADC bundles or sacks may be sorted to ASF pallets according to the "label to" ZIP Code in L010. All mixed ADC bundles and sacks must contain only pieces destinating within the ASF in 6.3. Labeling:
 1. Line 1: L602.
 2. Line 2: "PSVC FLTS ASF"; followed by "BARCODED" (or "BC") if pallet contains Presorted price mail with a barcode; followed by "NONBARCODED" (or "NBC") if pallet contains carrier route and/or Presorted price mail without a barcode.

- h. *BMC*, required, permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted price mail with or without a barcode for the 3-digit ZIP Code groups in [L601](#). ADC bundles or sacks are assigned to pallets according to the “label to” ZIP Code in [L004](#). At the mailer’s option, appropriate mixed ADC bundles or sacks may be sorted to BMC pallets according to the “label to” ZIP Code in [L010](#). All mixed ADC bundles and sacks must contain only pieces destinating within the BMC in [6.3](#). Labeling:
 - 1. Line 1: [L601](#).
 - 2. Line 2: “PSVC FLTS BMC”; followed by “BARCODED” (or “BC”) if pallet contains Presorted price mail with a barcode; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted price mail without a barcode.
- i. *Mixed BMC*, optional, permitted for sacks only. Pallet may contain carrier route and/or Presorted price mail with or without a barcode. Labeling:
 - 1. Line 1: “MXD” followed by information in [L601](#), Column B, for BMC serving 3-digit ZIP Code prefix of entry Post Office (label to plant serving entry Post Office if authorized by processing and distribution manager).
 - 2. Line 2: “PSVC FLTS WKG.”

8.10.4 Package Services Irregular Parcels—Bundles and Sacks

Pallets must be prepared under [8.0](#) in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required under the conditions shown. Carrier route ([8.10.4a](#), [8.10.4b](#), [8.10.4d](#), and [8.10.4e](#)) applies to Bound Printed Matter mailings only. Destination entry price eligibility applies only to Parcel Select (see [456](#)) and Bound Printed Matter (see [466](#) for parcels). At the mailer’s option, all Package Services irregular parcels also may be prepared for destination entry (see [7.0](#)). For mailings of sacks on pallets, pallet preparation begins with [8.10.4e](#). Pallets must be labeled according to the Line 1 and Line 2 information listed below and under [8.6](#).

- a. *Merged 5-digit scheme*, required, permitted for bundles only. Pallet must contain carrier route bundles and noncarrier route 5-digit bundles (Presorted price bundles) for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), merged 5-digit pallet preparation begins with [8.10.4d](#). Labeling:
 - 1. Line 1: [L001](#).
 - 2. Line 2: “PSVC IRREG CR/5D”; followed by “SCHEME” (or “SCH”).
- b. *5-digit scheme carrier routes*, required, permitted for bundles only. Pallet must contain only carrier route bundles for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), 5-digit carrier routes pallet preparation begins with [8.10.4e](#). Labeling:
 - 1. Line 1: [L001](#).
 - 2. Line 2: “PSVC IRREG”; followed by “CARRIER ROUTES” (or “CR-RTS”); followed by “SCHEME” (or “SCH”).

705.8.10.4

- c. *5-digit scheme*, required, permitted for bundles only. Pallet must contain only 5-digit bundles of Presorted price mail for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), 5-digit pallet preparation begins with [8.10.4d](#). Labeling:
 - 1. Line 1: [L001](#).
 - 2. Line 2: "PSVC IRREG 5D"; followed by "SCHEME" (or "SCH").
- d. *Merged 5-digit*, required, permitted for bundles only. Pallet must contain carrier route bundles and noncarrier route 5-digit bundles (Presorted price bundles) for the same 5-digit ZIP Code. Labeling:
 - 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
 - 2. Line 2: "PSVC IRREG CR/5D."
- e. *5-digit carrier routes*, required, permitted for bundles and sacks. Pallet must contain only carrier route mail for the same 5-digit ZIP Code. Labeling:
 - 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
 - 2. Line 2: "PSVC IRREG"; followed by "CARRIER ROUTES" (or "CR-RTS").
- f. *5-digit*, required, permitted for bundles and sacks. Pallet must contain only Presorted price mail for the same 5-digit ZIP Code. Labeling:
 - 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
 - 2. Line 2: "PSVC IRREG 5D."
- g. *5-digit metro*, optional, permitted for bundles only. Pallet must contain carrier route and/or Presorted price bundles for the 5-digit ZIP Codes in [L006](#), Column A, and for the 3-digit ZIP Code groups in [L006](#), Column B. Labeling:
 - 1. Line 1: [L006](#).
 - 2. Line 2: "PSVC IRREG"; followed by "METRO" (or "MET").
- h. *3-digit*, optional, option not available for bundles for 3-digit ZIP Code prefixes marked "N" in [L002](#). Pallet must contain parcels only for the same 3-digit ZIP Code. Labeling:
 - 1. Line 1: [L002](#), Column A.
 - 2. Line 2: "PSVC IRREG 3D."
- i. *SCF*, required, permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted price mail for the 3-digit ZIP Code groups in [L005](#). Labeling:
 - 1. Line 1: [L002](#), Column C.
 - 2. Line 2: "PSVC IRREG SCF."
- j. *ASF*, required, permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted price mail for the 3-digit ZIP Code groups in [L602](#). ADC bundles or sacks are assigned to pallets according to the "label to" ZIP Code in [L004](#). At the mailer's option, appropriate mixed ADC bundles or sacks may be

sorted to ASF pallets according to the “label to” ZIP Code in [L010](#). All mixed ADC bundles and sacks must contain only pieces destinating within the ASF in [6.3](#). Labeling:

1. Line 1: [L602](#).
 2. Line 2: “PSVC IRREG ASF.”
- k. *BMC*, required, permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted price mail for the 3-digit ZIP Code groups in [L601](#). ADC ([L004](#)) bundles or sacks are assigned to pallets according to the “label to” ZIP Code in [L004](#). At the mailer’s option, appropriate mixed ADC bundles or sacks may be sorted to BMC pallets according to the “label to” ZIP Code in [L010](#). All mixed ADC bundles and sacks must contain only pieces destinating within the BMC in [6.3](#). Labeling:
1. Line 1: [L601](#).
 2. Line 2: “PSVC IRREG BMC.”
- l. *Mixed BMC*, optional, permitted for sacks only. Pallet may contain carrier route and/or Presorted price mail. Labeling:
1. Line 1: “MXD” followed by information in [L601](#), Column B, for BMC serving 3-digit ZIP Code prefix of entry Post Office (or labeled to plant serving entry Post Office if authorized by processing and distribution manager).
 2. Line 2: “PSVC IRREG WKG.”

8.10.5 Package Services, Parcel Select, and Standard Mail Machinable Parcels, and Not Flat-Machinable Pieces Weighing 6 Ounces or More

Pallets must be prepared under [8.0](#) in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required under the conditions shown. At the mailer’s option, Inter-BMC/ASF and Intra-BMC/ASF Parcel Select and Parcel Post mailings may be prepared on pallets under this section. Destination entry price eligibility applies only to Standard Mail (see [446](#) for parcels and NFMs that weigh 6 ounces or more), Parcel Select (see [456](#)), and Bound Printed Matter (see [466](#)). Combined mailings of Standard Mail, Parcel Select, and Package Services machinable parcels also must meet the standards in [6.0](#). Pallets must be labeled according to the Line 1 and Line 2 information listed below and under [8.6](#).

- a. *5-digit scheme, required*. Pallet must contain parcels or NFMs for the same 5-digit scheme under [L606](#). For 5-digit destinations not part of [L606](#), or for which scheme sorts are not performed, 5-digit pallets are prepared under [8.10.5b](#). Labeling:
1. Line 1: Use [L606](#).
 2. Line 2: “STD MACH 5D,” “STD NFM MACH 5D,” or “PSVC MACH 5D,” as applicable; followed by “SCHEME” (or “SCH”).
- b. *5-digit, required*. Pallet must contain parcels or NFMs only for the same 5-digit ZIP Code. Labeling:
1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).

705.8.10.6

2. Line 2: “STD MACH 5D,” “STD NFM MACH 5D,” or “PSVC MACH 5D,” as applicable.
- c. *ASF, optional, but required for DBMC prices.* Not available for the Buffalo NY ASF in [L602](#). Pallets must contain only parcels or NFMs for the 3-digit ZIP Code groups in [L602](#). Labeling:
 1. Line 1: Use [L602](#).
 2. Line 2: “STD MACH ASF,” “STD NFM MACH ASF,” or “PSVC MACH ASF,” as applicable.
- d. *BMC, required.* Pallets must contain only parcels or NFMs for the 3-digit ZIP Code groups in [L601](#). Labeling:
 1. Line 1: Use [L601](#).
 2. Line 2: “STD MACH BMC,” “STD NFM MACH BMC,” or “PSVC MACH BMC,” as applicable.
- e. *Mixed BMC, optional.* Labeling:
 1. Line 1: “MXD” followed by information in [L601](#), Column B, for BMC serving 3-digit ZIP Code prefix of entry Post Office (or labeled to plant serving entry Post Office if authorized by processing and distribution manager).
 2. Line 2: “STD MACH WKG,” “STD NFM MACH WKG,” or “PSVC MACH WKG,” as applicable.

8.10.6 Standard Mail Irregular Parcels Weighing 2 Ounces or More

Mailers who palletize unbundled or unsacked irregular parcels must make pallets or pallet boxes when there are 250 pounds or more for the destination levels below. Pallets or pallet boxes of irregular parcels (except tubes, rolls, and similar pieces) weighing 2 ounces or more must be prepared under 8.0 in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required. Label pallets or pallet boxes according to the Line 1 and Line 2 information listed below and under [8.6](#). Mailers may not prepare tubes, rolls, and similar pieces or pieces that weigh less than 2 ounces on pallets or in pallet boxes, except for pieces in carrier route bundles or in sacks under [8.10.2](#).

- a. *5-digit scheme, required.* Pallet or pallet box must contain parcels only for the same 5-digit scheme under [L606](#). Mailers may combine NFMs under 6 ounces with irregular parcels under [8.10.6](#). For 5-digit destinations not part of [L606](#) prepare 5-digit pallets under [8.10.5b](#). Labeling:
 1. Line 1: Use [L606](#).
 2. Line 2: “STD IRREG 5D; followed by “SCHEME” (or “SCH”).
- b. *5-digit, required.* Pallet or pallet box must contain parcels only for the same 5-digit ZIP Code. Labeling:
 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
 2. Line 2: “STD IRREG 5D.”

- c. *3-digit, optional*, option not available for bundles for 3-digit ZIP Code prefixes marked “N” in [L002](#). Pallet or pallet box must contain parcels only for the same 3-digit ZIP Code. Labeling:
 - 1. Line 1: Use [L002](#), Column A.
 - 2. Line 2: “STD IRREG 3D.”
- d. *ADC, required*. Pallet or pallet box must contain parcels for the 3-digit ZIP Code groups in [L004](#). Labeling:
 - 1. Line 1: Use [L004](#).
 - 2. Line 2: “STD IRREG ADC.”
- e. *Mixed ADC, optional*. Labeling:
 - 1. Line 1: “MXD” followed by city, state, and ZIP Code information for ADC serving 3-digit ZIP Code prefix of entry Post Office as shown in [L009](#), Column A.
 - 2. Line 2: “STD IRREG WKG.”

8.10.7 Standard Mail Not Flat-Machinable Pieces Weighing Less Than 6 Ounces

Mailers must prepare pieces on pallets or in pallet boxes when there are 250 pounds or more of NFM pieces for the destination levels below. Prepare pallets or pallet boxes of NFM pieces weighing less than 6 ounces under [8.0](#) in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required. The height of a 5-digit bundle must be at least 1 inch less than the longest dimension of the individual mailpiece. For example, a mailpiece measuring 7 inches long, 5 inches high, and 1/2 inch thick must be placed in a bundle no higher than 6 inches. Mailers may combine NFMs under 6 ounces with irregular parcels over 2 ounces (that are not tubes or rolls) under [8.10.6](#). Label pallets or pallet boxes according to the Line 1 and Line 2 information listed below and under [8.6](#).

- a. *5-digit scheme, required*. Pallet or pallet box must contain NFMs only for the same 5-digit scheme under [L606](#). For 5-digit destinations not part of [L606](#) prepare 5-digit pallets under [8.10.6b](#). Labeling:
 - 1. Line 1: Use [L606](#).
 - 2. Line 2: “STD NFM 5D”; followed by “SCHEME” (or “SCH”).
- b. *5-digit, required*. Pallet or pallet box must contain NFMs only for the same 5-digit ZIP Code. Labeling:
 - 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
 - 2. Line 2: “STD NFM 5D.”
- c. *3-digit, optional*, option not available for bundles for 3-digit ZIP Code prefixes marked “N” in [L002](#). Pallet or pallet box must contain NFMs only for the same 3-digit ZIP Code. Labeling:
 - 1. Line 1: Use [L002](#), Column A.

705.8.11

2. Line 2: "STD NFM 3D."
- d. *ADC, required.* Pallet or pallet box must contain NFMs for the 3-digit ZIP Code groups in [L004](#). Labeling:
 1. Line 1: Use [L004](#).
 2. Line 2: "STD NFM ADC."
- e. *Mixed ADC, optional.* Labeling:
 1. Line 1: "MXD" followed by city, state, and ZIP Code information for ADC serving 3-digit ZIP Code prefix of entry Post Office as shown in [L009](#), Column A.
 2. Line 2: "STD NFM WKG."

8.11 Bundle Reallocation to Protect SCF Pallet for Periodicals Flats and Irregular Parcels and Standard Mail Flats on Pallets

8.11.1 Basic Standards

Bundle reallocation to protect the SCF pallet is an optional preparation method (if performed, bundle reallocation must be done for the entire mailing job); only PAVE-certified presort software may be used to create pallets under the standards in [8.11.2](#) through [8.11.4](#). Presort software determines if mail for an SCF service area would fall beyond the SCF level if all finer level pallets are prepared. Reallocation is performed only when there is mail for the SCF service area that would fall beyond the SCF pallet level (e.g., to an ADC or BMC pallet). The amount of mail required to bring the mail that would fall beyond the SCF level back to an SCF level is the minimum volume that will be reallocated. For the purposes of reallocation, 5-digit metro pallets are considered to be 3-digit pallets (because they contain subsets of mail for a 3-digit ZIP Code area).

8.11.2 General Rules

Reallocation rules are as follows:

- a. Bundle preparation is not affected by the reallocation process. Reallocate only complete bundles and only the minimum number of bundles necessary to create an SCF pallet meeting the minimum pallet weight. Based on the weight of individual pieces within a bundle and bundling parameters, the weight of mail that is reallocated may be slightly more than the minimum volume required to create an SCF pallet.
- b. Reallocate bundles from the highest (least fine) pallet level possible. If it is not possible to reallocate some mail from a 3-digit pallet first, then attempt to eliminate a 3-digit pallet and reallocate all mail from that pallet to create an SCF pallet; if mail cannot be reallocated from a 3-digit pallet, then attempt to reallocate some mail from any 5-digit level pallet.
- c. The reallocation process may result in the elimination of a 3-digit pallet to create an SCF pallet, but a 5-digit level pallet may not be eliminated to create an SCF pallet.

- d. When reallocating mail to create an SCF pallet, reallocate mail from only one more finely sorted pallet. This may be accomplished by reallocating a portion of a 3-digit pallet, reallocating all mail from a 3-digit pallet, or reallocating a portion of one of the following pallets: 5-digit, 5-digit carrier routes, merged 5-digit, 5-digit scheme, 5-digit scheme carrier routes, or merged 5-digit scheme.
- e. Mailers may use any minimum pallet weight(s) permitted by standards and may use different minimum weights for different pallet levels in conjunction with bundle reallocation.

8.11.3 Reallocation of Bundles If Optional 3-Digit Pallets Are Prepared

Reallocation rules are as follows:

- a. Attempt to identify a 3-digit pallet of adequate weight that can support reallocation of one or more bundles to bring the mail that has fallen through the SCF level back to the SCF level without eliminating the pallet. A sufficient volume of mail must remain on the 3-digit pallet after reallocation to meet the 3-digit pallet weight minimum established by the mailer in compliance with applicable standards. If a 3-digit pallet of adequate weight is available, create an SCF pallet by combining the reallocated mail from the 3-digit pallet with the mail that would fall beyond the SCF pallet level.
- b. If no single 3-digit pallet within the SCF service area contains an adequate volume of mail to allow reallocation of a portion of the mail on a pallet as described in the previous step, then eliminate one 3-digit pallet and reallocate all of the mail to create an SCF pallet by combining it with the mail that would fall beyond the SCF pallet level. As a result, the software will not prepare one 3-digit pallet for the SCF service area if it is detrimental to the SCF pallet.
- c. If preparation is under [8.0](#) and there are no 3-digit pallets, attempt to identify a 5-digit level pallet of adequate weight to support reallocation of one or more bundles to bring the mail that would fall beyond the SCF pallet level back to the SCF level. If preparation is under [10.0](#), [12.0](#), or [13.0](#) and there are no 3-digit pallets, attempt to identify a 5-digit level pallet of adequate weight to support reallocation of one or more bundles to bring the mail that would fall beyond the SCF pallet level back to the SCF level. A sufficient volume of mail must remain on the applicable pallet after reallocation to meet the pallet weight minimum established by the mailer in compliance with applicable standards. If a 5-digit level pallet of adequate weight is available, create an SCF pallet by combining the reallocated bundles with the mail that would fall beyond the SCF pallet level.
- d. If no single 5-digit level pallet within the SCF service area contains an adequate volume of mail to allow reallocation of a portion of the mail on a pallet as described in [8.11.3c](#), then no bundles will be reallocated and an SCF pallet will not be prepared; the mail that falls beyond the SCF pallet level must be placed on the next appropriate pallet (ADC, ASF, or BMC) or in the next appropriate sack.

8.11.4 Reallocation of Bundles If Optional 3-Digit Pallets Are Not Prepared

Reallocation rules are as follows:

705.8.11.5

- a. Attempt to identify a 5-digit level pallet of adequate weight to support reallocation of one or more bundles to bring the mail that would fall beyond the SCF pallet level back to the SCF level. A sufficient volume of mail must remain on the 5-digit level pallet after reallocation to meet the pallet weight minimum established by the mailer in compliance with applicable standards. If a 5-digit level pallet of adequate weight is available, create an SCF pallet by combining the reallocated bundles with the mail that would fall beyond the SCF pallet level.
- b. If no single 5-digit level pallet within the SCF service area contains an adequate volume of mail to allow reallocation of a portion of the mail on a pallet as described in [8.11.4a](#), then no bundles will be reallocated and an SCF pallet will not be prepared; the mail that falls beyond the SCF pallet level must be placed on the next appropriate pallet (ADC, ASF, or BMC) or in the next appropriate sack.

8.11.5 Documentation

Mailings must be supported by documentation produced by PAVE-certified software meeting the standards in [708.1.0](#).

8.12 Bundle Reallocation to Protect ADC Pallet for Periodicals Flats and Irregular Parcels on Pallets

8.12.1 Basic Standards

Bundle reallocation to protect the ADC pallet is an optional preparation method authorized for mailers using PAVE-certified presort software and may be used to create pallets under the standards in [8.12.2](#) and [8.12.3](#). Presort software determines if mail for an ADC service area falls beyond the ADC level if all finer level pallets are prepared. Reallocation is performed only when there is mail for the ADC service area that falls beyond the ADC pallet level (e.g., to sacks). Reallocate only the minimum number of bundles necessary to create an ADC pallet at the minimum required weight.

8.12.2 General Rules

Reallocation rules are as follows:

- a. Bundle preparation is not affected by the reallocation process. Reallocate only complete bundles and only the minimum number of bundles necessary to create an ADC pallet meeting the minimum pallet weight. Based on the weight of individual pieces within a bundle and bundling parameters, the weight of mail that is reallocated may be slightly more than the minimum volume required to create an ADC pallet.
- b. Reallocate only bundles of an SCF pallet from the same city and state as the ADC ([L005](#), Column B). This may be accomplished by reallocating a portion of the bundles from an SCF pallet or reallocating all mail from the SCF pallet. Bundles may be reallocated from a protected SCF (PSCF) pallet prepared under [8.11](#).
- c. Mailers may use any minimum pallet weight(s) permitted by standards and may use different minimum weights for different pallet levels in conjunction with bundle reallocation.

8.12.3 Documentation

Mailings must be supported by documentation produced by PAVE-certified software meeting the standards in [708.1.0](#).

8.13 Bundle Reallocation to Protect BMC Pallet for Standard Mail Flats on Pallets

8.13.1 Basic Standards

Bundle reallocation to protect the BMC pallet level is an optional preparation method (if performed, bundle reallocation must be done for the complete mailing job); only PAVE-certified presort software may be used to create pallets under the standards in [8.13.2](#) through [8.13.4](#). The software will determine if mail for a BMC service area would fall beyond the BMC level when ASF pallets are prepared. Reallocation is performed only when there is mail for the BMC service area that would fall beyond the BMC pallet level as a result of an ASF pallet being prepared. The amount required to bring the mail back to the BMC level is the minimum volume that would be reallocated from an ASF pallet, when possible. The following “parent” BMCs can be protected with bundle reallocation by using mail from the ASF “child” pallets indicated in [Exhibit 8.13.1](#).

Exhibit 8.13.1 “Parent” BMC/“Child” ASF

“PARENT” BMC SERVICE AREAS	“CHILD” ASF ZIP CODE AREAS SERVED
Pittsburgh BMC	Buffalo ASF: 130-136; 140-149
Denver BMC	Albuquerque ASF: 865, 870-875, 877-879, 881-884 Phoenix ASF: 850, 852, 853, 855, 859, 860, 863, 864 Salt Lake City ASF: 832-834, 836, 837, 840-847, 898, 979 Billings ASF: 590-599, 821
Dallas BMC	Oklahoma City ASF: 730, 731, 734-738, 740, 741, 743-746, 748, 749
Des Moines BMC	Sioux Falls ASF: 570-577
Minneapolis BMC	Fargo ASF: 565, 567, 580-588

8.13.2 General Rules

In general, when reallocating:

- a. The reallocation process does not affect bundle preparation. Reallocate only complete bundles and only the minimum number of bundles necessary to create a BMC pallet that meets the minimum pallet weight. Based on the weight of individual pieces within a bundle and bundling parameters, the weight of mail that is reallocated may be slightly more than the minimum volume required to create a BMC pallet.
- b. Use [Exhibit 8.13.1](#) to reallocate bundles from the ASF pallet to create a BMC pallet. The ASF pallet may be eliminated to protect the BMC pallet.
- c. Reallocate mail only from one ASF pallet. Bundle reallocation is to be used only between the “parent” BMC and the “child” ASF. Mail from finer levels of pallets (e.g., SCF pallets) may not be reallocated.

705.8.13.3

- d. Mailers may use any minimum pallet weight(s) permitted by standard and may use different minimum weights for different pallet levels in conjunction with bundle reallocation.

8.13.3 Reallocation of Bundles From ASF Pallets

When reallocating bundles from ASF pallets:

- a. Use [Exhibit 8.13.1](#) to identify an ASF pallet of adequate weight that can support reallocation of one or more bundles to bring the mail that has fallen through the BMC level back to the BMC level without eliminating the ASF pallet. A sufficient amount of mail must remain on the ASF pallet after reallocation to meet the minimum ASF pallet weight. If an ASF pallet of adequate weight is available, then create a BMC pallet by combining the reallocated mail from the ASF pallet with the mail that would fall beyond the BMC pallet level.
- b. If no single ASF pallet within the BMC service area contains an adequate volume of mail to allow reallocation of the portion of the mail on a pallet as described in [8.13.3a](#), then eliminate one ASF pallet and reallocate all of the mail to create a BMC pallet.

8.13.4 Documentation

Mailings must be supported by documentation produced by PAVE-certified software meeting the standards in [708.1.0](#).

8.14 Pallets of Bundles, Sacks, and Trays

8.14.1 Periodicals

Additional pallet preparation:

- a. *Combined mailings.* When two or more publications are part of a combined mailing, the mailer must keep records for each mailing (publication) as required by standard.
- b. *Destination Delivery Unit prices.* Pieces claimed at destination delivery unit prices do not require separation from pieces claimed at other prices on the same pallet.
- c. *Carrier route mail on separate 5-digit pallets.* Carrier route sorted pieces must be prepared on separate 5-digit pallets (5-digit carrier routes or 5-digit scheme carrier routes pallets). *Exception:* When flats are prepared as bundles on pallets under [10.0](#), [12.0](#), or [13.0](#), then carrier route mail, 5-digit machinable barcoded price mail, and 5-digit machinable nonbarcoded price mail may be placed on the same merged 5-digit pallet or on the same merged 5-digit scheme pallet for those 5-digit ZIP Codes for which 1) there are “A” or “C” indicators in the City State Product under [10.0](#), or 2) the 5-digit bundles are within the 5% threshold requirement under [12.0](#), or 3) the 5-digit bundles are either all for 5-digit ZIP Codes that have an “A” or “C” indicator in the City State Product or are for 5-digit ZIP Codes with a “B” or “D” indicator in the City State Product and the pieces in such 5-digit bundles meet the 5% threshold under [13.0](#).

8.14.2 Standard Mail

Additional pallet preparation:

- a. *Combined mailings.* Nonprofit Standard Mail may be included in the same mailing or palletized on the same pallet as Regular Standard Mail only as permitted by standard. Mailers may include machinable parcels, irregular parcels, and Not Flat-Machinable pieces on 5-digit pallets.
- b. *Destination Delivery Unit prices.* Pieces claimed at destination delivery unit prices do not require separation from pieces claimed at other prices on the same pallet.
- c. *Carrier route mail on separate 5-digit pallets.* Carrier route price pieces must be prepared on separate 5-digit pallets (5-digit carrier routes or 5-digit scheme carrier routes pallets) from automation price and/or Presorted price pieces (prepared on 5-digit pallets or 5-digit scheme pallets). *Exception:* When flat-size pieces are prepared as bundles on pallets under [10.0](#), [12.0](#), or [13.0](#), then carrier route sorted mail, 5-digit sorted automation price mail, and 5-digit sorted Presorted price mail may be placed on the same merged 5-digit pallet or on the same merged 5-digit scheme pallet for those 5-digit ZIP Codes for which 1) there are “A” or “C” indicators in the City State Product under [10.0](#), or 2) the 5-digit bundles are within the 5% threshold requirement under [12.0](#), or 3) the 5-digit bundles are either all for 5-digit ZIP Codes that have an “A” or “C” indicator in the City State Product, or are for 5-digit ZIP Codes with a “B” or “D” indicator in the City State Product and the pieces in such 5-digit bundles meet the 5% threshold under [13.0](#).

8.14.3 BMC and Mixed BMC Pallets

Bundles placed on BMC pallets must be machinable on BMC parcel sorting equipment. Line 2 on pallet labels must reflect the processing category of the pieces. A BMC or mixed BMC (trays and sacks only) pallet may include pieces that are eligible for the DBMC price and others that are ineligible.

8.14.4 Commingled Zones

Pieces of Parcel Select and Package Services for different zones may be commingled only under [455.1.7](#) for Parcel Select parcels or [365.5.3.3](#) or [365.6.3.3](#) for Bound Printed Matter flats or [465.5.1.3](#) or [465.6.1.3](#) for Bound Printed Matter parcels.

8.14.5 Securing Trays

Trays must be sleeved and strapped under [235.3.0](#) for First-Class Mail letters, [245.3.0](#) for Standard Mail letters, [335.3.0](#) for First-Class Mail flats, [345.3.0](#) for Standard Mail flats, [365.3.0](#) for Bound Printed Matter flats, [375.3.0](#) for Media Mail flats, [385.3.0](#) for Library Mail flats, *except that* strapping is not required for any letter tray placed on a 5-digit, 3-digit, or SCF pallet secured with stretchwrap. In addition, if the processing and distribution manager gives a written waiver, strapping is not required for any letter tray that originates and destines in the same SCF (mail processing plant) service area.

8.15 Sacks

All sacks remaining after all pallets are prepared may be presented with the palletized mailing (on the same postage statement) if the sacks are set apart from the palletized portion of the mailing.

705.8.16

8.16 Copalletized Flat-size Pieces—Periodicals or Standard Mail

8.16.1 Basic Standards

Copalletized flat-size mailings must meet the applicable standards in [8.0](#). In addition, if copalletized under [10.0](#), [12.0](#), or [13.0](#), the provisions of one of those preparation options must also be met. Any combination of automation price mailings and nonautomation price mailings is subject to the restrictions in [8.14](#). Bundles in a copalletized mailing qualify for the appropriate presort level price, regardless of the pallet level on which they are placed.

8.16.2 Periodicals

Additional standards are as follows:

- a. Periodicals eligible for preferred prices (In-County, Nonprofit, Classroom, and Science-of-Agriculture) may be combined with Periodicals eligible for Outside-County prices.
- b. All pallets in a copalletized mailing are identified on the content line (Line 2) of the label with only “NEWS” (see [8.6](#)) or “PER” as the class designation under these conditions:
 1. If at least 51% of the total number of copies in the copalletized mailing can qualify for “NEWS” treatment, then all pallets in such a mailing are labeled “NEWS,” unless the mailer chooses to use “PER.”
 2. If less than 51% of the total number of copies in a copalletized mailing can qualify for “NEWS” treatment, then all pallets in such a mailing are labeled “PER.”
- c. Documentation meeting the basic standard in [708.1.0](#) must be provided with each mailing. Before copalletizing, the mailer must obtain the written approval of the Business Mailer Support manager. Approval is based on the mailer’s demonstrated ability to provide documentation meeting these standards:
 1. Documentation by bundle and by publication and edition showing the number of addressed pieces and copies in each bundle and the per piece presort price claimed, or a listing by pallet showing (by presort level and destination) the number of copies and pieces for each publication and edition. For large volume mailing jobs reported on a single listing, the mailer may provide the abbreviated documentation in [708.b](#).
 2. Documentation showing the number of copies and pieces claimed at the SCF price.
 3. Documentation showing that bundles are sorted to the appropriate finest pallet level in the mailing.
 4. Documentation showing that 5-digit, 3-digit, SCF, and ADC pallets are prepared when the applicable minimum volume is developed in the copalletized mailing for these destinations.
 5. A listing showing the destination of pallets in the copalletized mailing.
 6. If the sacked portion of the mailing is presented with the copalletized portion, a report by sack showing the number of pieces (and copies) at each presort level.

8.16.3 Standard Mail

Additional standards are as follows:

- a. Nonprofit Standard mailings may be copalletized with one another but not with mailings at other prices unless permitted by standard.
- b. Nonidentical-weight pieces may be copalletized only if the correct postage is affixed to each piece or if otherwise authorized by Business Mailer Support.
- c. All pieces in mailings to be copalletized must be subject to the minimum per piece price, or all subject to the per pound price, unless otherwise authorized by Business Mailer Support.
- d. All pieces must have postage paid with permit imprint, or all pieces must have postage affixed.
- e. When requested, the mailer must present pallets selected by USPS employees for verification.

8.16.4 Pallet Labels

Pallet labels for copalletized mailings must meet the provisions of [8.6](#) and [8.10](#), or if applicable, [8.6](#) and [10.0](#), [12.0](#), or [13.0](#).

8.16.5 Postage Statement

Separate postage statements are required:

- a. For Periodicals, a separate postage statement is required for each publication and/or edition that is part of the copalletized mailing. The mailer must note on or in an attachment to the postage statement the name and issue date of the publications with which each publication and/or edition was copalletized.
- b. For Standard Mail, a separate postage statement must be prepared for each mailing that is part of a single copalletized shipment, *except that* copalletized Regular and Enhanced Carrier Route mailings (or Nonprofit and Nonprofit Enhanced Carrier Route mailings) produced as part of the same job may be reported on the same postage statement.

8.17 Pallets of Machinable Parcels**8.17.1 Standard Mail**

Pieces may be eligible for the 3/5 price when prepared under [8.10.5a](#) through [8.10.5d](#). This eligibility includes pieces sorted under [8.10.5c](#) and [8.10.5d](#) to the service area of the *entry* ASF/BMC.

8.17.2 DBMC Price

A BMC pallet may include pieces that are eligible for the DBMC price and pieces that are ineligible.

8.17.3 Top Caps

When top caps are used, the mailer must write the tare weight of the top cap on the pallet label or in another prominent location.

8.18 Parcel Select—Bulk Mail Center (BMC) Presort Discount**8.18.1 Machinable Parcels**

To qualify for the BMC Presort discount:

705.8.18.2

- a. Machinable pieces must be sorted to BMCs under [L601](#) in 69-inch pallet boxes. Each pallet box must contain at least 52 inches of mail (not including pallet) for a BMC. Overflow pallet boxes are not permitted. Preparation in sacks, directly on pallets, or in other containers is not permitted.
- b. Pallet box preparation and Line 1 labeling: destination BMC (required); for Line 1 use [L601](#).
- c. Pallet box Line 2 labeling: "PSVC MACH BMC."

8.18.2 Nonmachinable Parcels

To qualify for the BMC Presort discount:

- a. Nonmachinable pieces must be sorted to BMCs and ASFs under [L605](#) directly on pallets. Each pallet for a BMC or ASF destination must have a minimum height of 42 inches of mail (not including the height of the pallet). Overflow pallets are not permitted. Preparation in sacks, pallet boxes, or in other containers is not permitted.
- b. Pallet preparation and Line 1 labeling: destination BMC or destination ASF, required; for Line 1, use [L605](#).
- c. Pallet Line 2 labeling: "PSVC NON MACH BMC" or "PSVC NON MACH ASF" as applicable.

8.19 Parcel Select—Origin Bulk Mail Center (OBMC) Presort Discount**8.19.1 Machinable Parcels**

To qualify for the OBMC Presort discount:

- a. Machinable pieces must be sorted to BMCs under [L601](#) in 69-inch pallet boxes. Each pallet box must contain at least 52 inches of mail (not including pallet) for a BMC. Overflow pallet boxes are not permitted. Preparation in sacks, directly on pallets, or in other containers is not permitted.
- b. Pallet box preparation and Line 1 labeling: destination BMC, required; for Line 1, use [L601](#).
- c. Pallet box Line 2 labeling: "PSVC MACH BMC."

8.19.2 Nonmachinable Parcels

To qualify for the OBMC Presort discount:

- a. Nonmachinable pieces must be sorted to BMCs and ASFs under [L605](#) directly on pallets. Each pallet for a BMC or ASF destination must have a minimum height of 42 inches of mail (not including the height of the pallet). Overflow pallets are not allowed. Preparation in sacks, pallet boxes, or in other containers is not permitted.
- b. Pallet preparation and Line 1 labeling: destination BMC or destination ASF, required; for Line 1, use [L605](#).
- c. Pallet Line 2 labeling: "PSVC NON MACH BMC" or "PSVC NON MACH ASF" as applicable.

8.20 Parcel Select DSCF Prices—Parcels on Pallets

8.20.1 Basic Preparation, Parcels on Pallets

Unless prepared under [8.20.2](#), or in sacks, mail must be prepared for the DSCF price as follows:

- a. *General.* Parcels for each SCF area must be sorted to 5-digit scheme, 5-digit, or 3-digit (nonmachinable) destinations on pallets. For purposes of this section, the term “pallets” includes preparation of parcels directly on pallets and in pallet boxes on pallets. Except when prepared under [8.20.2](#), each 5-digit scheme, 5-digit, and 3-digit pallet must meet a minimum volume requirement under one of the criteria in [8.20.1b](#). Machinable and nonmachinable pieces may be combined on the same pallet or in the same overflow sack when sorted to 5-digit scheme or 5-digit destinations. In a single mailing mailers may prepare some pallets under the minimum volume requirement in [8.20.1b1](#) and some pallets under the minimum volume requirement in [8.20.1b2](#). A mailing entered at a destination SCF facility containing pallets prepared under [8.20.1](#) also may include mail that is sacked for the DSCF price. Double-stacking is permitted if the requirements of [8.3](#) are met.
- b. *Minimum volume.* The minimum volume per 5-digit scheme, 5-digit, and 3-digit pallet can be met in one of the following ways:
 1. Pieces may be placed on 5-digit scheme, 5-digit, and 3-digit pallets, each containing at least 50 pieces and 250 pounds.
 2. Pieces may be placed on 5-digit scheme, 5-digit, and 3-digit pallets, each having a minimum height of 36 inches of mail (excluding the height of the pallet) (see [8.5.4](#)).
- c. *Overflow.* After filling a pallet(s) to a 5-digit scheme, 5-digit, or 3-digit destination, any remaining pieces that do not meet the minimum pallet requirements may be prepared in one or both of the following ways:
 1. Placed in 5-digit scheme, 5-digit, or 3-digit overflow sacks (no minimum number of pieces per sack) that are labeled in accordance with the 5-digit scheme, 5-digit, or 3-digit sacking requirements for the DSCF price in [455.4.2](#). Overflow pieces sacked in this manner are eligible for the DSCF prices.
 2. Placed on a 5-digit scheme, 5-digit, or 3-digit pallet labeled under [8.20.1d](#) that does not meet the minimums for the DSCF price. Overflow pieces palletized in this manner are not eligible for the DSCF prices but are eligible for the DBMC prices.
- d. *5-digit scheme.* Pallet labeling:
 1. Line 1: use [L606](#), Column B.
 2. Line 2: “PSVC PARCELS 5D SCH.”
- e. *5-digit.* Pallet labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination of contents.
 2. Line 2: “PSVC PARCELS 5D.”

705.8.20.2

- f. *3-digit*. Pallet labeling:
 - 1. Line 1: use [L002](#), Column C.
 - 2. Line 2: “PSVC PARCELS 3D.”
- g. *Separation*. If sacks prepared under [455](#) are included in the same mailing as pallets prepared under this section, at the time of acceptance the mailer must separate sacks that are overflow from palletized mail from those sacks that were prepared under the provisions of [455](#).

8.20.2 Alternate Preparation, Parcels on Pallets

DSCF price mailings not prepared under [8.20.1](#) may be prepared as follows:

- a. *General*. All DSCF price mail in the mailing must be sorted to 5-digit scheme, 5-digit, or 3-digit destinations under [8.20.2](#) (i.e., mail prepared under [8.20.1](#) and mail sacked under [455.4.2](#) must not be included in a mailing prepared under [8.20.2](#)). For purposes of this section, the term “pallets” includes preparation of parcels directly on pallets and in pallet boxes on pallets. Machinable and nonmachinable pieces may be combined on the same pallet. Double-stacking is permitted if the requirements of [8.3](#) are met.
- b. *Minimum volume*. To qualify for the DSCF price, no pallet may contain fewer than 35 pieces and 200 pounds, and for the entire mailing the average number of DSCF price pieces per 5-digit scheme, 5-digit, or 3-digit destination must be at least 50.
- c. *Overflow*. After filling pallets to a 5-digit scheme, 5-digit, or 3-digit destination, any remaining pieces that do not meet the minimum pallet requirements may be prepared in one or both of the following ways:
 - 1. Placed in 5-digit scheme, 5-digit, or 3-digit overflow sacks (no minimum number of pieces per sack) that are labeled in accordance with the DSCF sacking requirements in [455.4.2](#). Overflow pieces sacked in this manner are eligible for the DSCF prices.
 - 2. Placed on a 5-digit scheme, 5-digit, or 3-digit pallet labeled under [8.20.2d](#) that does not meet the minimums for the DSCF price. Overflow pieces palletized in this manner are not eligible for the DSCF prices but are eligible for the DBMC prices.
- d. *5-digit scheme*. Pallet labeling:
 - 1. Line 1: use [L606](#), Column B.
 - 2. Line 2: “PSVC PARCELS 5D SCH.”
 - 3. In the mailer area below Line 3: use the pallet ID number.
- e. *5-digit*. Pallet labeling:
 - 1. Line 1: city, state, and 5-digit ZIP Code destination of contents.
 - 2. Line 2: “PSVC PARCELS 5D.”
 - 3. In mailer area below line 3: use the pallet ID number.
- f. *3-digit*. Pallet labeling:
 - 1. Line 1: use [L002](#), Column C.

2. Line 2: "PSVC PARCELS 3D."
 3. In the mailer area below Line 3: use the pallet ID number.
- g. *Documentation.* A list of each 5-digit scheme, 5-digit, and 3-digit pallet in the mailing that qualifies for the DSCF price must be submitted. The pallets in the mailing that qualify for the DSCF price must be renumbered sequentially, and this pallet identification number must be printed below Line 3 on the pallet label. The documentation must list each pallet in sequential order by pallet identification number. For each pallet, the listing must show: the pallet identification number, the applicable 5-digit scheme, 5-digit, or 3-digit destination of the pallet, the total weight of pieces on the pallet, the total number of pieces on the pallet, and the running total of pieces (i.e., the number equal to the number of pieces for that pallet plus the sum of the pieces on all pallets listed before it). This documentation must not include: pieces prepared in overflow sacks at the DSCF prices, pieces prepared on overflow pallets at the DBMC prices, or pieces claimed at any other price in the mailing.

8.20.3 5-Digit ZIP Codes for Which Pallets May Not Be Prepared

Refer to the Drop Shipment Product available from the National Customer Support Center (NCSC) (see [608.8.0](#)) to determine if the facility serving the 5-digit ZIP Code destination can handle pallets. If a facility cannot handle pallets, the DSCF price is not applicable unless the mail can be prepared under the sacking requirement in [455.4.2](#).

8.21 Parcel Select DSCF Prices—Sacks on Pallets

Mailers who prepared DSCF price mail in 5-digit scheme or 5-digit sacks under [455.4.2](#) may place 5-digit sacks for the same SCF area on an SCF pallet (including a pallet box on a pallet). Mailers who prepare overflow from pallets under [8.20.1](#) or [8.20.2](#) may place 5-digit scheme or 5-digit sacks for the same SCF area on an SCF pallet (including a pallet box on a pallet). See [8.20.1g](#) for requirements concerning separation of sacks prepared under [455.4.2](#) from sacks prepared under [8.20.1](#). There are no pallet minimums for such pallets. Mailers may prepare such SCF pallets without preparing all possible 5-digit scheme and 5-digit pallets. The pallets must be labeled in the following manner:

- a. *5-digit scheme pallets*, optional; labeling:
 1. Line 1: use [L606](#), Column B.
 2. Line 2: "PSVC PP 5D SCHEME" or "PSVC PP 5D SCH."
- b. *5-digit pallets*, labeling:
 1. Line 1: use [L002](#), Column C.
 2. Line 2: "PSVC PP 5D."

8.22 Parcel Select and Bound Printed Matter DDU Prices

Parcels may be bedloaded, sacked, or palletized. For purposes of this section the term "pallets" includes preparation of parcels directly on pallets and preparation of parcels in pallet boxes on pallets. There are no preparation or presort requirements for DDU price mailings other than separation by 5-digit scheme and 5-digit destination. Machinable and nonmachinable pieces may be combined. Refer to the

705.9.1

Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.0](#)) and the information in [455.4.1](#). If a DDU facility cannot handle pallets, and a mailer transports mail to the DDU facility on pallets, the driver must unload the pallets into a container specified by the delivery unit. If pieces are sacked or palletized, they must be prepared to 5-digit scheme (optional) and 5-digit destinations, and labeled as follows:

- a. *5-digit scheme sacks or pallets*, optional; labeling:
 1. Line 1: use [L606](#), Column B.
 2. Line 2: "PSVC PARCELS 5D SCH."
- b. *5-digit sacks or pallets*, labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination of pieces.
 2. Line 2: "PSVC PARCELS 5D."

9.0 Combining Bundles of Automation and Nonautomation Flats in Trays and Sacks

9.1 First-Class Mail

9.1.1 Basic Standards

Bundles of flats in an automation price mailing prepared under [335.6.5](#) must be cotrayed with bundles of flats in a Presorted price mailing under the following conditions:

- a. The automation price pieces and Presorted price pieces are part of the same mailing job and reported on the same postage statement.
- b. Pieces in the automation price mailing must meet the criteria for a flat under [301.3.0](#). Pieces in the Presorted price mailing must meet the criteria for a flat under [301.1.1](#).
- c. The automation price mailing must meet the eligibility criteria in [333.5.0](#), except that the traying criteria in [9.1.4](#) must be met rather than the traying criteria in [335.6.0](#).
- d. The Presorted price mailing must meet the eligibility criteria in [333.3.0](#), except that the traying and documentation criteria in [9.1.1](#) and [9.1.4](#) must be met rather than the traying and documentation criteria in [335.6.0](#).
- e. The prices for pieces in the automation price mailing are applied based on the level of bundle to which they are sorted under [333.5.2, Price Application—Bundle-Based Flats](#), and [333.5.3, Price Application—Tray-Based Flats](#).
- f. The pieces must be marked according to [302](#).
- g. The bundles prepared from the automation price mailing and the bundles prepared from the Presorted price mailing must be sorted into the same trays as described in [9.1.4](#).

- h. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures. In addition to the applicable postage statement, documentation produced by PAVE-certified software or standardized documentation under [708.1.0](#) must be submitted with each cotrayed mailing job that describes for each tray sortation level the number of pieces qualifying for each applicable automation price and the number of pieces qualifying for the Presorted price.
- i. Barcoded tray labels under [708.6.0](#) must be used to label the trays.

9.1.2 Bundle Preparation

Except for mail prepared under the cobundling option in [9.1.3](#), the automation price mailing must be bundled and labeled under [335.6.5](#). The Presorted price mailing must be bundled and labeled under [335.5.0](#).

9.1.3 Optional Cobundling Preparation

As an option to the basic bundling requirements in [9.1.2](#), a mailer may choose to cobundle automation price and Presorted price flat-size pieces, subject to the conditions in [11.0](#).

9.1.4 Tray Preparation and Labeling

Presorted price and automation price bundles prepared under [9.1.2](#) or [9.1.3](#) must be presorted together into trays (cotrayed) in the sequence listed below. Trays must be labeled using the following information for Lines 1 and 2 and [335.4.0](#) for other sack label criteria.

- a. *5-digit*, required, full trays only (no overflow trays); labeling:
 - 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [335.4.3](#) for military mail).
 - 2. Line 2: "FCM FLTS 5D BC/NBC."
- b. *3-digit*, required, full trays only (no overflow trays); labeling:
 - 1. Line 1: use [L002](#), Column A.
 - 2. Line 2: "FCM FLTS 3D BC/NBC."
- c. *Origin/entry 3-digit*, required for each 3-digit ZIP Code served by the SCF of the origin (verification) office, optional for each 3-digit ZIP Code served by the SCF of an entry office other than the origin office, no minimum; labeling:
 - 1. Line 1: use [L002](#), Column A.
 - 2. Line 2: "FCM FLTS 3D BC/NBC."
- d. *ADC*, required, full trays only (no overflow trays); use [L004](#) to determine ZIP Codes served by each ADC; labeling:
 - 1. Line 1: use [L004](#), Column B.
 - 2. Line 2: "FCM FLTS ADC BC/NBC."
- e. *Mixed ADC*, required, no minimum; labeling:

705.9.2

1. Line 1: use L201; for mail originating in ZIP Code areas in Column A, use “MXD” followed by the city, state, and 3-digit ZIP Code prefix in the corresponding row in Column C (use “MXD” instead of “OMX” in the destination line and ignore Column B).
2. Line 2: “FCM FLTS BC/NBC WKG.”

9.2 Periodicals

9.2.1 Basic Standards

Bundles of flat-size pieces in a machinable barcoded (automation) price mailing must be cosacked with bundles of flat-size pieces in a machinable nonbarcoded price mailing under the following conditions:

- a. The pieces in the machinable barcoded price mailing and in the machinable nonbarcoded price mailing must be part of the same mailing job and must be reported on the appropriate postage statement(s).
- b. The machinable barcoded price mailing must meet the eligibility criteria in [707.14.0](#), except that the sacking and documentation criteria in [9.2.1](#), [9.2.3](#), and [9.2.4](#) must be met rather than the sacking and documentation criteria in [707.25.0](#).
- c. The machinable nonbarcoded price mailing must meet the eligibility criteria in [707.12.0](#), except that the sacking and documentation criteria in [9.2.1](#), [9.2.3](#), and [9.2.4](#) must be met rather than the sacking and documentation criteria in [707.25.0](#).
- d. The bundles prepared from the machinable barcoded price mailing and the bundles prepared from the machinable nonbarcoded price mailing must be sorted into the same sacks as described in [9.2.3](#) and [9.2.4](#).
- e. A complete, signed, appropriate postage statement(s), using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures. In addition to the applicable postage statement, documentation produced by PAVE-certified software or standardized documentation under [708.1.0](#) must be submitted with each cosacked mailing job that describes for each sack sortation level the number of pieces qualifying for each applicable price.
- f. Barcoded sack labels under [708.6.0](#) must be used to label sacks.

9.2.2 Bundle Preparation

The machinable barcoded price mailing must be bundled and labeled under [707.25.0](#) (all bundle levels) and the machinable nonbarcoded price mailing must be bundled and labeled under [707.22.0](#) (excluding carrier route bundles).

9.2.3 Bundles With Fewer Than Six Pieces

5-digit and 3-digit bundles prepared under [707.22.0](#) and [707.25.0](#) may contain fewer than six pieces when the publisher determines that such preparation improves service. These low-volume bundles may be placed in 5-digit, 3-digit, and SCF sacks that contain at least 24 pieces or on 5-digit, 3-digit, or SCF pallets. Pieces in low-volume bundles must claim the applicable mixed ADC price (Outside-County) or basic price (In-County).

9.2.4 Sack Preparation and Labeling

Machinable barcoded price and machinable nonbarcoded price bundles must be presorted together into sacks (cosacked) in the sequence listed below. Sacks must be labeled using the following information for Lines 1 and 2 and [707.21.0](#) for other sack label criteria. If, due to the physical size of the mailpieces, the machinable barcoded price pieces are considered flat-size under [301.3.0](#) and the machinable nonbarcoded price pieces are considered irregular parcels under [401.1.6](#), the processing category shown on the sack label must show “FLTS.”

- a. *5-digit/scheme*, required; scheme sort required only for pieces meeting the criteria in [301.3.0](#); 24-piece minimum, fewer pieces not permitted; labeling:
 1. Line 1: For 5-digit scheme sacks, use L007, Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code destination on pieces.
 2. Line 2: “PER” or “NEWS” as applicable and, for 5-digit scheme sacks, “FLT 5D SCH BC/NBC”; for 5-digit sacks, “FLT 5D BC/NBC.”
- b. *3-digit*, required at 24 pieces, fewer pieces not permitted; labeling:
 1. Line 1: use [L002](#), Column A.
 2. Line 2: “PER” or “NEWS” as applicable and “FLTS 3D BC/NBC.”
- c. *SCF*, required at 24 pieces, fewer pieces not permitted; labeling:
 1. Line 1: use [L002](#), Column C.
 2. Line 2: “PER” or “NEWS” as applicable and “FLTS SCF BC/NBC.”
- d. *Origin/entry SCF*, required for the SCF of the origin (verification) office, optional for the SCF of an entry office other than the origin office, no minimum; labeling:
 1. Line 1: use [L002](#), Column C.
 2. Line 2: “PER” or “NEWS” as applicable and “FLTS SCF BC/NBC.”
- e. *ADC*, required at 24 pieces, fewer pieces not permitted (bundles of fewer than six pieces are not permitted); labeling:
 1. Line 1: use [L004](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable and “FLTS ADC BC/NBC.”
- f. *Origin mixed ADC*, required for any remaining pieces for destinations in [L201](#), Column B, corresponding to the origin ZIP Code in Column A. There is no minimum for the number of pieces in the sack, but bundles of fewer than six pieces at 5-digit, 3-digit, and ADC bundle levels are not permitted.
 1. Line 1: Use [L201](#), Column C.
 2. Line 2: “PER” or “NEWS” as applicable, followed by “FLTS WKG W FCM.”
- g. *Mixed ADC*, required, no minimum, except that bundles of fewer than six pieces at 5-digit, 3-digit, and ADC bundle levels are not permitted. Labeling:
 1. Line 1: use [L009](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable and “FLTS BC/NBC WKG.”

9.2.5 Optional Tray Preparation—Machinable Flat-Size Pieces

As an option, mailers may place in flats trays (see 707.20.4) machinable pieces meeting the criteria in 301.3.0 that would normally be placed in sacks. Mailers must either bundle or group all pieces as specified in 707.25.0 and 707.22.0 for each 5-digit scheme, 5-digit, 3-digit scheme, 3-digit, SCF, and ADC destination. Bundling is not permitted unless it achieves a finer presort than the presort destination of the tray. The trays are subject to a container charge, and any bundles are subject to a bundle charge. Tray preparation, sequence, and labeling:

- a. *5-digit scheme* (required), 24-piece minimum, labeling:
 1. Line 1: L007, Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “5D SCH BC/NBC.”
- b. *5-digit* (required), 24-piece minimum, labeling:
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see 708.6.1.2 for overseas military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “5D BC/NBC.”
- c. *3-digit* (required), 24-piece minimum, labeling:
 1. Line 1: L002, Column A.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “3D BC/NBC.”
- d. *SCF* (required), 24-piece minimum, labeling:
 1. Line 1: L002, Column C.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “SCF BC/NBC.”
- e. *Origin SCF* (required) and *entry SCF(s)* (optional), no minimum, labeling:
 1. Line 1: L002, Column C.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “SCF BC/NBC.”
- f. *ADC* (required), 24-piece minimum, no overflow tray allowed, labeling:
 1. Line 1: use L004, Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “ADC”; followed by “ BC/NBC.”
- g. *Origin mixed ADC* (required), no minimum, for any remaining pieces for destinations in L201, Column B, of the origin ZIP Code in Column A, labeling:
 1. Line 1: Use L201, Column C.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “WKG W FCM.”
- h. *Mixed ADC* (required), no minimum, labeling:

1. Line 1: Use [L009](#).
2. Line 2: "PER" "NEWS" as applicable; followed by "FLTS"; followed by "BC/NBC WKG."

9.3 Standard Mail

9.3.1 Basic Standards

Bundles of flats in an automation price mailing must be cosacked with bundles of flats in a Presorted price mailing under the following conditions:

- a. The automation price pieces and the Presorted price pieces are part of the same mailing job and are reported on the same postage statement.
- b. Pieces in the automation price mailing must meet the criteria for a flat under [301.3.0](#). Pieces in the Presorted price mailing must meet the criteria for a flat under [301.1.1](#).
- c. The automation price mailing must meet the eligibility criteria in [343.7.0](#), except that the sacking and documentation criteria in [9.3.1](#), [9.3.4](#), and [9.3.5](#) must be met rather than the sacking and documentation criteria in [345.7.0](#).
- d. The Presorted price mailing must meet the eligibility criteria in [343.2.0](#) and [343.3.0](#), except that the sacking and documentation criteria in [9.3.1](#), [9.3.4](#), and [9.3.5](#) must be met rather than the sacking and documentation criteria in [345.5.0](#).
- e. The prices for pieces in the automation price mailing are applied based on the number of pieces in the bundle and the level of bundle to which they are sorted under [343.7.0](#). The prices for pieces in the Presorted price mailing are based on the number of pieces in the bundle and the level of sack in which they are placed under [343.3.6](#) and [343.3.7](#).
- f. The pieces must be marked according to [302](#).
- g. The bundles prepared from the automation price mailing and the bundles prepared from the Presorted price mailing must be sorted into the same sacks as described in [9.3.4](#) and [9.3.5](#).
- h. A complete, signed postage statement(s), using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures. In addition to the applicable postage statement, documentation produced by PAVE-certified software or standardized documentation under [708.1.0](#) must be submitted with each cosacked mailing job that describes for each sack sortation level the number of pieces qualifying for each applicable automation price and the number of pieces qualifying for each applicable Presorted price.
- i. Barcoded sack labels under [708.6.0](#) must be used to label the sacks.

9.3.2 Bundle Preparation

Except for mail prepared under the cobundling option in [9.3.3](#), the automation price mailing must be bundled and labeled under [345.7.0](#) and the Presorted price mailing must be bundled and labeled under [345.5.0](#). Loose packing under [345.5.0](#) is not permitted.

9.3.3 Optional Cobundling Preparation

As an option to the basic bundling requirements in 9.3.2, a mailer may choose to cobundle automation price and Presorted price flat-size pieces, subject to the conditions in 11.0.

9.3.4 Sacking Under 125-Piece or 15-Pound Rules

When the minimum quantity of 125 pieces or 15 pounds of mail is specified for a sack sortation level in 9.3.5, the provisions of 345.7.4.2 apply.

9.3.5 Sack Preparation and Labeling

Presorted price and automation price bundles prepared under 9.3.2 and 9.3.3 must be presorted together into sacks (cosacked) in the sequence listed below. Sacks must be labeled using the following information for Lines 1 and 2, and 345.4.0 for other sack label criteria.

- a. 5-digit/scheme, required; scheme sort required, only for pieces meeting the automation-compatibility criteria in 301.3.0; 125-piece/15-pound minimum; labeling:
 1. Line 1: For 5-digit scheme sacks, use L007, Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code destination on pieces.
 2. Line 2: For 5-digit scheme sacks, "STD FLT 5D SCH BC/NBC"; for 5-digit sacks, "STD FLT 5D BC/NBC."
- b. 3-digit, required, 125-piece/15-pound minimum; labeling:
 1. Line 1: use L002, Column A.
 2. Line 2: "STD FLTS 3D BC/NBC."
- c. *Origin/entry 3-digit*, required for each 3-digit ZIP Code served by the SCF of the origin (verification) office, optional for each 3-digit ZIP Code served by the SCF of an entry office other than the origin office, no minimum; labeling:
 1. Line 1: use L002, Column A.
 2. Line 2: "STD FLTS 3D BC/NBC."
- d. *ADC*, required, 125-piece/15-pound minimum; use L004 to determine ZIP Codes served by each ADC; labeling:
 1. Line 1: use L004, Column B.
 2. Line 2: "STD FLTS ADC BC/NBC."
- e. *Mixed ADC*, required, no minimum; labeling:
 1. Line 1: use L009, Column B.
 2. Line 2: "STD FLTS BC/NBC WKG."

9.3.6 Tray Preparation and Labeling

Presorted price and automation price bundles meeting the standards in 345.3.0 for letter trays and prepared under 9.3.2 must be presorted together into trays (cotrayed) in the sequence in 9.3.5. Trays must be labeled using the information for Lines 1 and 2 and 345.4.0 for other tray label criteria. Cobundling under this option is not permitted.

9.4 Bound Printed Matter

9.4.1 Basic Standards

Bundles of flat-size pieces in a Presorted price mailing qualifying for and claiming the barcode discount under [363.2.0](#), [363.3.0](#), and [363.5.0](#) must be cosacked with bundles of flat-size pieces from a Presorted price mailing (not claiming the barcode discount) under the following conditions:

- a. The Presorted price pieces qualifying for and claiming the barcode discount and the Presorted price pieces must be part of the same mailing job and be reported on the same postage statement.
- b. The Presorted price pieces qualifying for and claiming the barcode discount must meet the criteria for flat-size mail under [301.3.0](#). Pieces in the Presorted price mailing must meet the criteria for flat-size mail under [301.2.0](#).
- c. The Presorted price mailing qualifying for and claiming the barcode discount must meet the eligibility criteria in [363.2.0](#), [363.3.0](#), and [363.5.0](#), the mail preparation standards in [365.7.0](#), the sacking requirements in [9.4.4](#), and the documentation criteria in [9.4.1h](#).
- d. The Presorted price mailing must meet the eligibility criteria in [363.2.0](#), [363.3.0](#), and [363.5.0](#), the mail preparation standards in [365.5.0](#), the sacking requirements in [9.4.4](#), and the documentation criteria in [9.4.1h](#).
- e. The prices for pieces in the Presorted price mailing qualifying for and claiming the barcode discount are applied based on meeting the sortation requirements in [365.7.0](#), and when applicable, the zone. The prices for pieces in the Presorted price mailing are based on meeting the sortation requirements in [365.5.0](#), and when applicable, the zone.
- f. The pieces must be marked according to [302](#).
- g. The bundles prepared from the Presorted price mailing qualifying for the barcode discount and the bundles prepared from the Presorted price mailing must be sorted into the same sacks as described in [9.4.4](#).
- h. A complete, signed postage statement(s), using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures. In addition to the applicable postage statement, standardized documentation under [708.1.0](#) must be submitted with each cosacked mailing job that describes for each sack sortation level the number of pieces qualifying for the barcode discount and the number of pieces qualifying for each applicable Presorted price.
- i. Barcoded sack labels under [708.6.0](#) must be used to label the sacks.

9.4.2 Bundle Preparation

Except for mail prepared under the cobundling option in [9.4.3](#), the Presorted price mailing qualifying for and claiming the barcode discount must be bundled and labeled under [365.7.0](#), and the Presorted price mailing must be bundled and labeled under [365.5.0](#).

9.4.3 Optional Cobundling Preparation

As an alternative to the basic bundling requirements in 9.4.2, flat-size Presorted price pieces qualifying for and claiming the barcode discount may be cobundled with flat-size Presorted price pieces, subject to 11.0.

9.4.4 Sack Preparation and Labeling

Bundles of Presorted price pieces qualifying for and claiming the barcode discount and Presorted price pieces prepared under 9.4.2 or 9.4.3 must be presorted together into sacks (cosacked) using the following preparation sequence, sack size, and labeling:

- a. *5-digit/scheme*, required; scheme sort required, only for pieces meeting the automation-compatibility criteria in 301.3.0; minimum 20 addressed pieces; labeling:
 1. Line 1: For 5-digit scheme sacks, use L007, Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code destination on pieces.
 2. Line 2: For 5-digit scheme sacks, "PSVC FLT 5D SCH BC/NBC"; for 5-digit sacks, "PSVC FLT 5D BC/NBC."
- b. *3-digit*, required, except for optional bundles with 3-digit ZIP Code prefixes indicated by an "N" in L002, when optional SCF sacks are prepared; minimum 20 addressed pieces; labeling:
 1. Line 1: L002, Column A.
 2. Line 2: "PSVC FLTS 3D BC/NBC."
- c. *SCF*, optional, minimum 20 addressed pieces; labeling:
 1. Line 1: L005, Column B.
 2. Line 2: "PSVC FLTS SCF BC/NBC."
- d. *ADC*, required, minimum 20 addressed pieces (use L004 to determine ZIP Codes served by each ADC); labeling:
 1. Line 1: L004, Column B.
 2. Line 2: "PSVC FLTS ADC BC/NBC."
- e. *Mixed ADC*, required, no minimum; labeling:
 1. Line 1: use L009, Column B.
 2. Line 2: "PSVC FLTS BC/NBC WKG."

10.0 Merging Bundles of Flats in Sacks and Pallets Using the City State Product

10.1 Periodicals

10.1.1 Basic Standards

Carrier route bundles in a carrier route price mailing may be placed in the same sack or on the same pallet as 5-digit bundles from a machinable barcoded price mailing and 5-digit bundles from a machinable nonbarcoded price mailing (including pieces cobundled under 11.0) under the following conditions:

- a. A carrier route mailing must be part of the mailing job, unless cobundled under 11.0 using 5-digit scheme (L007) or 3-digit scheme (L008) bundle preparation, and sacked under 10.1.4.
- b. The pieces in the carrier route mailing, the machinable barcoded price mailing, and the machinable nonbarcoded price mailing must be part of the same mailing job.
- c. Pieces in the machinable price mailing must meet the flats criteria in 301.3.0; pieces that meet the flats criteria in 707.26.0 also may be sacked under this option. Pieces in the machinable nonbarcoded price mailing and the carrier route mailing must be flat-size.
- d. Mailers must use the Carrier Route Indicators field in the City State Product (see 509.1.2) to prepare the mailing and enter the mailing no later than 90 days after the release date of the City State Product used.
- e. Carrier route bundles may be cosacked or copalletized with machinable barcoded price 5-digit bundles, machinable nonbarcoded price 5-digit bundles, and cobundled 5-digit bundles only for those 5-digit ZIP Codes that have an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product indicating eligibility for such cosacking or copalletization. Containers of mail sorted in this manner are called “merged 5-digit” sacks or pallets. Containers of mail sorted in this manner for which scheme (L001) sortation is also performed are called “merged 5-digit scheme” sacks or pallets. Pieces in 5-digit scheme (L007) bundles may not be placed in merged 5-digit containers.
- f. If sortation under this section is performed, merged 5-digit sacks or pallets must be prepared for all 5-digit ZIP Codes with an “A” or “C” indicator in the City State Product that permits such preparation when there is enough volume for the 5-digit ZIP Code to prepare such a sack under 10.1.4 or such a pallet under 10.1.5. In addition, all possible merged 5-digit scheme sacks must be prepared under 10.1.4, or all possible merged 5-digit scheme and 5-digit scheme pallets must be prepared under 10.1.5.
- g. For mailings prepared in sacks, mailers may not combine firm bundles and 5-digit scheme pieces in 5-digit scheme bundles or in 5-digit scheme sacks. Firm bundles must be placed in a separate individual 5-digit sack under 10.1.4g to maintain 5-digit price eligibility. Mailers may combine firm bundles with 5-digit scheme, 3-digit scheme, and other presort destination bundles in carrier route, 5-digit, 3-digit, SCF, ADC, and mixed ADC sacks. Only an In-County firm bundle can contribute toward the six-piece minimum for price eligibility.

705.10.1.2

- h. The bundles from each separated mailing must be sorted together into sacks (cosacked) under [10.1.4](#) or on pallets (copalletized) under [10.1.5](#) using presort software that is PAVE-certified.
- i. A complete, signed postage statement(s), using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures. In addition to the postage statement(s), documentation prepared by PAVE-certified software must be submitted with each cosacked or copalletized mailing job that describes for each sack sortation level and sack, or each pallet sortation level and pallet, the number of pieces qualifying for each applicable price.
- j. Barcoded sack labels under [708.6.0](#) must be used to label sacks.

10.1.2 Bundle Preparation

Bundles must be prepared as follows:

- a. *Sacked mailings.* The carrier route mailing must be bundled and labeled under [707.23.0](#). Except when prepared under the cobundling option in [11.0](#), the barcoded price mailing must be bundled and labeled under [707.25.0](#) and the nonbarcoded price mailing must be bundled and labeled under [707.22.0](#).
- b. *Palletized mailings.* Bundles placed on pallets must be prepared under the standards in [8.9](#).

10.1.3 Bundles With Fewer Than Six Pieces

Carrier route, 5-digit scheme, 5-digit, 3-digit scheme, and 3-digit bundles may contain fewer than six pieces when the publisher determines that such preparation improves service. Pieces in these low-volume bundles must be claimed at the applicable mixed ADC price (Outside-County) or basic price (In-County).

Low-volume bundles are permitted only when they are sacked or prepared on pallets as follows:

- a. Place low-volume carrier route, 5-digit, 3-digit scheme, and 3-digit bundles in only the following containers:
 - 1. Carrier route, merged 5-digit scheme, 5-digit scheme carrier routes, merged 5-digit, 5-digit carrier routes, 5-digit, 3-digit, and SCF sacks that contain at least 24 pieces.
 - 2. Merged 3-digit sacks that contain at least one six-piece carrier route bundle.
 - 3. Origin/entry SCF sacks.
 - 4. On merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, merged 5-digit, 5-digit carrier routes, 5-digit, 5-digit metro, 3-digit, or SCF pallets, as appropriate.
- b. Place low-volume 5-digit scheme bundles in only 5-digit scheme, 3-digit, and SCF sacks that contain at least 24 pieces, or in origin/entry SCF sacks, or on 3-digit or SCF pallets, as appropriate.

10.1.4 Sack Preparation and Labeling

Mailers must prepare sacks containing the individual carrier route and 5-digit bundles from the carrier route, barcoded, and nonbarcoded price mailings in the mailing job in the following manner and sequence. All carrier route bundles must be placed in sacks under [10.1.4a](#) through [10.1.4e](#) and [10.1.4h](#) as described below. When sorting is performed under this section, mailers must prepare merged 5-digit scheme sacks, 5-digit scheme carrier routes sacks, and merged 5-digit sacks for all possible 5-digit schemes or 5-digit ZIP Codes as applicable, using [L001](#) (merged 5-digit scheme and 5-digit scheme carrier routes sort only) and the Carrier Route Indicators field in the City State Product when there is enough volume for the 5-digit scheme or 5-digit ZIP Code to prepare such sacks under [10.1.4, Sack Preparation and Labeling](#). Mailers must label sacks according to the Line 1 and Line 2 information listed below and under [707.20.1, Basic Standards](#). If, due to the physical size of the mailpieces, the barcoded pieces are considered flat-size under [707.26.0](#), and the carrier route pieces and nonbarcoded pieces are considered irregular parcels under [401.1.6](#), “FLTS” must be shown as the processing category on the sack label. If a mailing job does not contain barcoded price pieces and the carrier route pieces and the nonbarcoded pieces are irregular parcel shaped, use “IRREG” for the processing category on the contents line of the label.

- a. *Carrier route*, required, may contain only carrier route bundles. Must be prepared when there are 24 or more pieces for the same carrier route. Smaller volume not permitted. Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [707.21.1.2](#) for military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR” for basic price, “WSH” for high-density price, or “WSS” for saturation price; followed by the route type and number.
- b. *Merged 5-digit scheme*, required at 24 pieces, fewer pieces not permitted. Must contain at least one 5-digit ZIP Code in the scheme with an “A” or “C” indicator in the City State Product. May contain carrier route bundles for any 5-digit ZIP Code(s) in a single scheme listed in [L001](#) as well as machinable barcoded price 5-digit bundles and machinable nonbarcoded price 5-digit bundles for those 5-digit ZIP Codes in the schemes that have an “A” or “C” indicator in the City State Product. For 5-digit ZIP Code(s) in a scheme that has a “B” or “D” indicator in the City State Product, prepare sack(s) under [10.1.4g](#) and [10.1.4h](#). For 5-digit ZIP Codes not included in a scheme, prepare sacks under [10.1.4d](#) through [10.1.4h](#). Labeling:
 1. Line 1: use [L001](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable, followed by “FLTS” or “IRREG” as applicable, followed by “CR/5D SCH.”
- c. *5-digit scheme carrier routes*, required at 24 pieces, fewer pieces not permitted. May contain only carrier route bundles for 5-digit ZIP Code(s) in a single scheme listed in [L001](#) when all the 5-digits in the scheme have a “B” or “D” indicator in the City State Product. Mailers must prepare this sack if there are any carrier route bundle(s) for such a scheme. Labeling:

705.10.1.4

1. Line 1: use [L001](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable, followed by “FLTS” or “IRREG” as applicable, followed by “CR-RTS SCH.”
- d. *Merged 5-digit*, required at 24 pieces, fewer pieces not permitted. Must be prepared only for those 5-digit ZIP Codes that are not part of a scheme and that have an “A” or “C” indicator in the City State Product. May contain carrier route bundles, machinable barcoded price 5-digit bundles, and machinable nonbarcoded price 5-digit bundles. Labeling:
1. Line 1: use city, state, and 5-digit ZIP Code destination (see [707.21.1.2](#) for military mail).
 2. Line 2: “PER” or “NEWS” as applicable, followed by “FLTS” or “IRREG” as applicable, followed by “CR/5D.”
- e. *5-digit carrier routes*, required at 24 pieces, fewer pieces not permitted. Include only carrier route bundles for a 5-digit ZIP Code remaining after preparing sacks under [10.1.4a](#) through [10.1.4d](#). May contain only carrier route bundles for any 5-digit ZIP Code that is not part of a scheme listed in [L001](#) and that has a “B” or “D” indicator in the City State Product. Labeling:
1. Line 1: use city, state, and 5-digit ZIP Code destination (see [707.21.1.2](#) for military mail).
 2. Line 2: “PER” or “NEWS” as applicable, followed by “FLTS” or “IRREG” as applicable, followed by “CR-RTS.”
- f. *5-digit scheme*, required at 24 pieces, fewer pieces not permitted. May contain only machinable barcoded price and cobundled machinable barcoded and nonbarcoded price 5-digit scheme bundles for the same 5-digit scheme destination. Labeling:
1. Line 1: [L007](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable, followed by “FLTS 5D SCH BC.”
- g. *5-digit*, required at 24 pieces, fewer pieces not permitted, except as provided in [10.1.1g](#) for firm bundles. May contain only barcoded price 5-digit bundles and nonbarcoded price 5-digit bundles for the same 5-digit ZIP Code for any 5-digit ZIP Code that has a “B” or “D” indicator in the City State Product. Labeling:
1. Line 1: use city, state, and 5-digit ZIP Code destination (see [707.21.1.2](#) for military mail).
 2. Line 2: “PER” or “NEWS” as applicable, followed by “FLTS 5D BC/NBC,” except if there are no barcoded price bundles in the mailing job, label under [707.22.6](#).
- h. *Merged 3-digit*. May contain carrier route bundles, any 5-digit and 5-digit scheme bundles remaining after preparing sacks under [10.1.4a](#) through [10.1.4g](#), and any 3-digit and 3-digit scheme bundles. When preparation of this sack level is permitted, mailers must prepare a sack if there are any remaining carrier route bundles for the 3-digit area. Required with at least one six-piece carrier route bundle. Must contain at least one carrier route bundle for the

3-digit area, or a minimum of 24 pieces. As an option to preparing bundles in merged 3-digit sacks, mailers may place those bundles in flats trays (see [707.20.4](#)). Labeling:

1. Line 1: use [L002](#), Column A.
 2. Line 2: “PER” or “NEWS” as applicable, followed by “FLTS” or “IRREG” as applicable, followed by “CR/5D/3D.” If there are no barcoded price bundles in the mailing job, label under [707.22.6](#).
- i. *SCF through mixed ADC.* Any 5-digit scheme and 5-digit bundles remaining after preparing sacks under [10.1.4a](#) through [10.1.4h](#) and all 3-digit, 3-digit scheme, ADC, origin mixed ADC, and mixed ADC bundles must be sacked and labeled under [9.2](#) for cosacking of barcoded price and nonbarcoded price bundles, except if there are no barcoded price bundles in the mailing job, sack and label under [707.22.6](#), or if there are no nonbarcoded price bundles in the mailing job, sack and label under [707.25.4](#).

10.1.5 Pallet Preparation and Labeling

[7-3-08] Mailers must prepare pallets of bundles in the manner and sequence listed below and under [8.0, Preparing Pallets](#). When sortation under this option is performed, mailers must prepare all merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, and merged 5-digit pallets that are possible in the mailing based on the volume of mail to the destination using [L001](#) and/or the City State Product. Mailers must label pallets according to the Line 1 and Line 2 information listed below and under [8.6, Pallet Labels](#).

- a. *Merged 5-digit scheme*, required and permitted only when there is at least one 5-digit ZIP Code in the scheme that has an “A” or “C” indicator in the City State Product. May contain carrier route bundles for any 5-digit ZIP Code(s) in a single scheme listed in [L001](#) as well as machinable barcoded price 5-digit bundles and machinable nonbarcoded price 5-digit bundles for those 5-digit ZIP Codes in the scheme that have an “A” or “C” indicator in the City State Product. For schemes in which all of the 5-digit ZIP Codes have a “B” or “D” indicator in the City State Product, begin preparing pallets under [10.1.5c](#) (5-digit scheme carrier routes pallet). For 5-digit ZIP Codes not included in a scheme, begin preparing pallets under [10.1.5c](#) (merged 5-digit pallet). Labeling:
 1. Line 1: use [L001](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “CR/5D SCHEME.”
- b. *5-digit scheme carrier routes*, required. May contain only carrier route bundles for carrier routes in an [L001](#) scheme for which all of the 5-digit ZIP Codes in the scheme have a “B” or “D” indicator in the City State Product. Labeling:
 1. Line 1: use [L001](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “CR-RTS SCHEME.”

705.10.1.5

- c. *Merged 5-digit*, required. May contain carrier route bundles, machinable barcoded price 5-digit bundles, and machinable nonbarcoded price 5-digit for those 5-digit ZIP Codes that are not part of a scheme and that have an “A” or “C” indicator in the City State Product. Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “CR/5D.”
- d. *5-digit carrier routes*, required. May contain only carrier route price bundles for the same 5-digit ZIP Code for those 5-digit ZIP Codes that are not part of a scheme and that have a “B” or “D” indicator in the City State Product. Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “CARRIER ROUTES” or “CR-RTS.”
- e. *5-digit*, required. May contain only machinable barcoded price 5-digit bundles and machinable nonbarcoded price 5-digit bundles for the same 5-digit ZIP Code with a “B” or “D” indicator in the City State Product, or 5-digit scheme ([L007](#)) bundles. Five-digit scheme bundles are assigned to 5-digit pallets according to the “label to” 5-digit ZIP Code in [L007](#). Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “5D”; followed by “BARCODED” or “BC” if the pallet contains machinable barcoded mail; followed by “NONBARCODED” or “NBC” if the pallet contains machinable nonbarcoded mail.
- f. *5-digit metro*, optional. May contain carrier route, machinable barcoded, and machinable nonbarcoded price bundles for the 5-digit ZIP Codes listed in [L006](#), Column A, and for the 3-digit ZIP Code areas listed in [L006](#), Column B. Labeling:
 1. Line 1: use [L006](#), Column C.
 2. Line 2: “PER” or “NEWS”; followed by “FLTS”; followed by “METRO” or “MET”; followed by “BARCODED” or “BC” if the pallet contains machinable barcoded price mail; followed by “NONBARCODED” or “NBC” if the pallet contains machinable nonbarcoded price and/or carrier route mail.
- g. *3-digit*, optional. Option not available for 3-digit ZIP Code prefixes marked “N” in [L002](#). May contain carrier route price, machinable barcoded price, and machinable nonbarcoded price mail, including 3-digit scheme ([L008](#)) bundles. Three-digit scheme bundles are assigned to 3-digit pallets according to the “label to” 3-digit ZIP Code in [L008](#). Labeling:
 1. Line 1: use [L002](#), Column A.

2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “3D,” followed by “BARCODED” or “BC” if the pallet contains machinable barcoded price mail; followed by “NONBARCODED” or “NBC” if the pallet contains machinable nonbarcoded price mail and/or carrier route mail.
- h. *SCF*, required. May contain carrier route price, machinable barcoded price, and machinable nonbarcoded price bundles. Labeling:
 1. Line 1: use [L002](#), Column C.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “SCF”; followed by “BARCODED” or “BC” if the pallet contains machinable barcoded price mail; followed by “NONBARCODED” or “NBC” if the pallet contains machinable nonbarcoded price mail and/or carrier route mail.
- i. *ADC*, required. May contain carrier route price, machinable barcoded price, and machinable nonbarcoded price bundles. Labeling:
 1. Line 1: use [L004](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “ADC”; followed by “BARCODED” or “BC” if the pallet contains machinable barcoded price mail; followed by “NONBARCODED” or “NBC” if the pallet contains machinable nonbarcoded price mail and/or carrier route mail.

10.2 Standard Mail

10.2.1 Basic Standards

Carrier route bundles from a carrier route price mailing may be placed in the same sack or on the same pallet as 5-digit bundles from an automation price mailing and 5-digit bundles from a Presorted price mailing (including pieces cobundled under [11.0](#)) under the following conditions:

- a. A carrier route mailing must be part of the mailing job, unless cobundled under [11.0](#) utilizing 5-digit scheme ([L007](#)) or 3-digit scheme ([L008](#)) bundle preparation and sacked under [10.1.4](#).
- b. The pieces in the carrier route price mailing, the automation price mailing, and the Presorted price mailing must be part of the same mailing job, and all three mailings must be reported on the same postage statement.
- c. Pieces in the automation price mailing must meet the criteria for a flat under [301.3.0](#). Pieces in the Presorted price mailing and the carrier route mailing must meet the criteria for a flat under [301.1.0](#).
- d. Mailers must use the Carrier Route Indicators field in the City State Product to prepare the mailing and enter the mailing no later than 90 days after the release date of the City State Product used.
- e. Carrier route bundles may be cosacked or copalletized with automation price 5-digit bundles, Presorted price 5-digit bundles, and cobundled 5-digit bundles only for those 5-digit ZIP Codes that have an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product indicating eligibility for such cosacking or copalletization. Containers of mail sorted in this manner are called “merged 5-digit” sacks or pallets. Containers of mail sorted in this manner for

705.10.2.2

which scheme (L001) sortation is also performed are called “merged 5-digit scheme” sacks or pallets. Pieces in 5-digit scheme (L007) bundles may not be placed in merged 5-digit containers.

- f. If sortation under this section is performed, merged 5-digit sacks or pallets must be prepared for all 5-digit ZIP Codes with an “A” or “C” indicator in the City State Product that permits such preparation when there is enough volume for the 5-digit ZIP Code to prepare that sack or pallet.
- g. For sacked mailings, the prices for pieces in the carrier route mailing are based on the criteria in 343.6.0, the prices for pieces in the automation price mailing are applied based on the number of pieces in the bundle and the level of bundle to which they are sorted under 343.7.0, and the prices for pieces in the Presorted price mailing are based on the number of pieces in the bundle and the level of sack to which they are sorted under 343.5.0.
- h. The pieces in each separate mailing must bear the applicable markings required under 345.5.0, 345.6.0, or 345.7.0 and under 302.
- i. For palletized mailings, the prices are based on the level of bundle that the pieces are contained in under 343.6.0 and 343.7.0.
- j. The bundles from each separate mailing must be sorted together into sacks (cosacked) under 10.2.3 and 10.2.4 or on pallets (copalletized) under 10.2.5 using presort software that is PAVE-certified.
- k. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures.
- l. In addition to the applicable postage statement, documentation produced by PAVE-certified software must be submitted with each cosacked or copalletized mailing job that describes for each sack sortation level and sack, or each pallet sortation level and pallet, the number of pieces qualifying for each applicable carrier route price, each applicable automation price, and each applicable Presorted price.
- m. Barcoded sack labels under 708.6.0 must be used to label sacks.

10.2.2 Bundle Preparation

Bundles must be prepared as follows:

- a. *Sacked mailings.* The carrier route mailing must be bundled and labeled under 345.6.0. Except when prepared under the cobundling option in 11.0, the automation price mailing must be bundled and labeled under 345.7.0 and the Presorted price mailing must be bundled and labeled under 345.5.0.
- b. *Palletized mailings.* Bundles placed on pallets must be prepared under the standards in 8.0, *Preparing Pallets*.

10.2.3 Sacking Under 125-Piece or 15-Pound Rules

When the minimum quantity of 125 pieces or 15 pounds of mail is specified for a sack sortation level in 10.2.4, the provisions of 345.7.4.2 apply.

10.2.4 Sack Preparation and Labeling

Mailers must prepare sacks in the following manner and sequence. All carrier route bundles must be placed in sacks under [10.2.4a](#) through [10.2.4e](#) as described below. Mailers must prepare all merged 5-digit scheme sacks, 5-digit scheme carrier routes sacks, and merged 5-digit sacks that are possible in the mailing based on the volume of mail to the destination using [L001](#) and the Carrier Route Indicators field in the City State Product. Mailers must label sacks according to the Line 1 and Line 2 information listed below and under [345.4.0, Sack and Tray Labels](#).

- a. *Carrier route*, required, may contain only carrier route bundles. Must be prepared when there are 125 pieces or 15 pounds of pieces for the same carrier route. Smaller volume not permitted. Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [345.f](#) for military mail).
 2. Line 2: “STD FLTS”; followed by “ECRLOT,” “ECRWSH,” or “ECRWSS” as applicable for basic, high-density, and saturation price mail; followed by the route type and number.
- b. *Merged 5-digit scheme*, required and permitted only when there is at least one 5-digit ZIP Code in the scheme with an “A” or “C” indicator in the City State Product. May contain carrier route bundles for any 5-digit ZIP Code(s) in a single scheme listed in [L001](#) as well as automation price 5-digit bundles and Presorted price 5-digit bundles for those 5-digit ZIP Codes in the scheme with an “A” or “C” indicator in the City State Product. When preparation of this sack level is permitted, a sack must be prepared if there are any carrier route bundle(s) for the scheme. If there is not at least one carrier route bundle for any 5-digit destination in the scheme, preparation of this sack is required when there are at least 125 pieces or 15 pounds of pieces in 5-digit bundles for any of the 5-digit ZIP Codes in the scheme that have an “A” or “C” indicator in the City State Product (smaller volume not permitted). For a 5-digit ZIP Code(s) in a scheme with a “B” or “D” indicator in the City State Product, prepare sack(s) for the automation price and Presorted price bundles under [10.2.4g](#) and [10.2.4h](#). For 5-digit ZIP Codes not included in a scheme, prepare sacks under [10.2.4d](#) through [10.2.4h](#). Labeling:
 1. Line 1: use [L001](#), Column B.
 2. Line 2: “STD FLTS CR/5D SCH.”
- c. *5-digit scheme carrier routes*, required, may contain only carrier route bundles for 5-digit ZIP Code(s) in a single scheme listed in [L001](#) when all the 5-digit ZIP Codes in the scheme have a “B” or “D” indicator in the City State Product. Must be prepared if there are any carrier route bundle(s) for such a scheme. Labeling:
 1. Line 1: use [L001](#), Column B.
 2. Line 2: “STD FLTS CR-RTS SCH.”
- d. *Merged 5-digit*, required. Must be prepared only for those 5-digit ZIP Codes that are not part of a scheme and that have an “A” or “C” indicator in the City State Product. May contain carrier route bundles, automation price 5-digit bundles, and Presorted price 5-digit bundles. Must be prepared if there are any

705.10.2.5

carrier route bundles for the 5-digit destination. If there is not at least one carrier route bundle for the 5-digit destination, must be prepared when there are at least 125 pieces or 15 pounds of pieces in 5-digit bundles for the same 5-digit destination (smaller volume not permitted). Labeling:

1. Line 1: use city, state, and 5-digit ZIP Code destination (see [345.f.](#) for military mail).
 2. Line 2: "STD FLTS CR/5D."
- e. *5-digit carrier routes*, required. Sack only carrier route bundles for a 5-digit ZIP Code remaining after preparing sacks under [10.2.4a](#) through [10.2.4d](#) to this level. May contain only carrier route bundles for any 5-digit ZIP Code that is not part of a scheme listed in [L001](#) and that has a "B" or "D" indicator in the City State Product. No sack minimum. Labeling:
1. Line 1: use city, state, and 5-digit ZIP Code destination (see [345.f.](#) for military mail).
 2. Line 2: "STD FLTS CR-RTS."
- f. *5-digit scheme*, required. May contain automation price, Presorted price, and cobundled automation and Presorted price 5-digit scheme bundles for the same 5-digit scheme destination. Must be prepared when there are at least 125 pieces or 15 pounds of pieces for the 5-digit scheme destination. Smaller volume not permitted. Labeling:
1. Line 1: [L007](#), Column B.
 2. Line 2: "STD FLTS 5D SCH BC/NBC."
- g. *5-digit*, required, may contain only automation price 5-digit bundles and Presorted price 5-digit bundles for a 5-digit ZIP Code that has a "B" or "D" indicator in the City State Product. Must be prepared when there are at least 125 pieces or 15 pounds of pieces for the 5-digit ZIP Code. Smaller volume not permitted. Labeling:
1. Line 1: use city, state, and 5-digit ZIP Code destination (see [345.f.](#) for military mail).
 2. Line 2: "STD FLTS 5D BC/NBC," except if there are no automation price bundles in the mailing job, use "STD FLTS 5D NON BC."
- h. *3-digit through mixed ADC sacks*. Any 5-digit scheme and 5-digit bundles remaining after preparing sacks under [10.2.4a](#) through [10.2.4g](#), and all 3-digit, ADC, and Mixed ADC bundles, must be sacked and labeled according to the applicable requirements under [9.3](#) for cosacking of automation price and Presorted price bundles, except if there are no automation price bundles in the mailing job, sack and label under [345.5.7](#), or, if there are no Presorted price bundles in the mailing job, sack and label under [345.7.4.3](#).

10.2.5 Pallet Preparation and Labeling

[7-3-08] Mailers must prepare pallets in the manner and sequence listed below and under [8.0](#). Mailers must prepare all merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, and merged 5-digit pallets that are possible in the mailing

based on the volume of mail to the destination using [L001](#) and/or the City State Product. Mailers must label pallets according to the Line 1 and Line 2 information listed below and under [8.6](#).

- a. *Merged 5-digit scheme*, required and permitted only when there is at least one 5-digit ZIP Code in the scheme that has an “A” or “C” indicator in the City State Product. May contain carrier route bundles for any 5-digit ZIP Code(s) in a single scheme listed in [L001](#) as well as automation price 5-digit bundles and Presorted price 5-digit bundles for those 5-digit ZIP Codes in the scheme that have an “A” or “C” indicator in the City State Product. For schemes in which all of the 5-digit ZIP Codes have a “B” or “D” indicator in the City State Product, begin preparing pallets under [10.2.5b](#) (5-digit scheme carrier routes pallet). For 5-digit ZIP Codes not included in a scheme, begin preparing pallets under [10.2.5c](#) (merged 5-digit pallet). Labeling:
 1. Line 1: use [L001](#), Column B.
 2. Line 2: “STD FLTS CR/5D SCHEME.”
- b. *5-digit scheme carrier routes*, required, may contain only carrier route bundles for carrier routes in an [L001](#) scheme for which all of the 5-digit ZIP Codes in the scheme have a “B” or “D” indicator in the City State Product. Labeling:
 1. Line 1: use [L001](#), Column B.
 2. Line 2: “STD FLTS CR-RTS SCHEME.”
- c. *Merged 5-digit*, required, may contain carrier route price bundles, automation price 5-digit bundles, and Presorted price 5-digit bundles for those 5-digit ZIP Codes that are not part of a scheme and that have an “A” or “C” indicator in the City State Product. Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
 2. Line 2: “STD FLTS CR/5D.”
- d. *5-digit carrier routes*, required, may contain only carrier route price bundles for the same 5-digit ZIP Code for those 5-digit ZIP Codes that are not part of a scheme and that have a “B” or “D” indicator in the City State Product. Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
 2. Line 2: “STD FLTS,” followed by “CARRIER ROUTES” or “CR-RTS.”
- e. *5-digit*, required, may contain only automation price 5-digit bundles and Presorted price 5-digit bundles for the same 5-digit ZIP Code with a “B” or “D” indicator in the City State Product, or 5-digit scheme ([L007](#)) bundles (automation price and cobundled automation and Presorted price pieces only). Five-digit scheme bundles are assigned to 5-digit pallets according to the “label to” 5-digit ZIP Code in [L007](#). Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).

705.10.2.5

2. Line 2: “STD FLTS 5D”; followed by “BARCODED” or “BC” if the pallet contains automation price mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted price mail.
- f. *5-digit metro*, optional, may contain carrier route, automation, and Presorted price bundles for the 5-digit ZIP Codes listed in [L006](#), Column A, and for the 3-digit ZIP Code areas listed in [L006](#), Column B. Labeling:
 1. Line 1: use [L006](#), Column C.
 2. Line 2: “STD FLTS” followed by “METRO” or “MET”; followed by “BARCODED” or “BC” if the pallet contains automation price mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted price and/or carrier route mail.
- g. *3-digit*, optional, option not available for 3-digit ZIP Code prefixes marked “N” in [L002](#). May contain carrier route price, automation price, and Presorted price mail, including 3-digit scheme ([L008](#)) bundles (automation and cobundled automation and Presorted price pieces only). Three-digit scheme bundles are assigned to 3-digit pallets according to the “label to” 3-digit ZIP Code in [L008](#). Labeling:
 1. Line 1: use [L002](#), Column A.
 2. Line 2: “STD FLTS 3D”; followed by “BARCODED” or “BC” if the pallet contains automation price mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted price mail and/or carrier route price mail.
- h. *SCF*, required, may contain carrier route price, automation price, and Presorted price bundles. Labeling:
 1. Line 1: use [L002](#), Column C.
 2. Line 2: “STD FLTS SCF”; followed by “BARCODED” or “BC” if the pallet contains automation price mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted price mail and/or carrier route price mail.
- i. *ASF*, required, except that an ASF sort may not be required if using bundle reallocation under [8.13.3](#). May contain carrier route price, automation price, and/or Presorted price bundles. Sort ADC bundles to ASF pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L004](#). At the mailer’s option, sort appropriate mixed ADC bundles to ASF pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L010](#). All optional mixed ADC bundles on ASF pallets must contain only pieces destinating within the ASF as shown in [6.3](#). See [346.3.0](#) for additional requirements for DBMC price eligibility. Labeling:
 1. Line 1: use [L602](#), Column B.
 2. Line 2: “STD FLTS ASF”; followed by “BARCODED” or “BC” if the pallet contains automation price mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted price mail and/or carrier route price mail.
- j. *BMC*, required, may contain carrier route price, automation price, and/or Presorted price bundles. Sort ADC bundles to BMC pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L004](#). At the mailer’s

option, sort appropriate mixed ADC bundles to BMC pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L010](#). All optional mixed ADC bundles on BMC pallets must contain only pieces destinating within the BMC as shown in [6.3](#). See [346.3.0](#) for additional requirements for DBMC price eligibility. Labeling:

1. Line 1: use [L601](#), Column B.
2. Line 2: “STD FLTS BMC”; followed by “BARCODED” or “BC” if the pallet contains automation price mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted price mail and/or carrier route price mail.

11.0 Combining Automation Price and Nonautomation Price Flats in Bundles

11.1 First-Class Mail

11.1.1 Basic Standards

Mailers may choose to cobundle (see [335.1.4m](#)) automation price and nonautomation price pieces as an option to the basic bundling requirements in [9.0](#), *Combining Bundles of Automation and Nonautomation Flats in Trays and Sacks*, subject to the following conditions:

- a. The pieces in the automation price mailing and the nonautomation price mailing must be part of the same mailing job and must be reported on the appropriate postage statement.
- b. The pieces in the mailing job must be flat-size and meet any other size and mailpiece design requirements applicable to the price category for which they are prepared.
- c. The basic standards in [9.0](#) must be met.
- d. A minimum of 500 automation price pieces and 500 nonautomation price pieces are required. The total number of automation price and nonautomation price pieces must be used to meet the minimum volume requirements for bundles and containers to a presort destination.
- e. Nonautomation price pieces must contain a 5-digit barcode and be cobundled with automation price pieces for the same presort destination. If this optional preparation method is used, all automation price and nonautomation price pieces in the same mailing job and reported on the same postage statement must be cobundled.
- f. Mailers must sort automation price pieces and nonautomation price pieces for each presort destination so that only one physical bundle for each logical presort destination (see [335.1.4l](#)) includes both automation price pieces (containing a ZIP+4 or delivery point barcode) and nonautomation price pieces (containing a 5-digit barcode).

11.1.2 Bundle Preparation

Preparation sequence, bundle size, and labeling:

705.11.2

- a. *5-digit*, required, 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. *3-digit*, required, 10-piece minimum; green Label 3 or OEL.
- c. *ADC*, required, 10-piece minimum; pink Label A or OEL.
- d. *Mixed ADC*, required, no minimum; tan Label X or OEL.

11.2 Periodicals

11.2.1 Basic Standards

Mailers may choose to cobundle (see [707.18.4aa](#)) barcoded price and nonbarcoded price flat-size pieces as an option to the basic bundling requirements in [707.22.0](#) and [707.25.0](#). 5-digit scheme and 3-digit scheme bundles also must meet the additional standards in [707.18.4i](#) and [707.18.4r](#). Mailing jobs (for flats meeting the criteria in [301.3.0](#)) prepared using the 5-digit scheme and/or the 3-digit scheme bundle preparation must be sacked under [9.0](#) or [10.0](#) or palletized under [10.0](#), [12.0](#), or [13.0](#). All bundles are subject to the following conditions:

- a. The pieces in the barcoded price mailing and the nonbarcoded price mailing must be part of the same mailing job and must be reported on the appropriate postage statement.
- b. Mailings prepared in sacks must meet the basic standards in [9.0](#) or [10.0](#).
- c. Mailings prepared on pallets must meet the basic standards in [8.0](#), [10.0](#), [12.0](#), or [13.0](#).
- d. The total number of barcoded price and nonbarcoded price pieces must be used to meet the minimum volume requirements for bundles and containers.
- e. Nonbarcoded price pieces must contain a 5-digit barcode and be cobundled with barcoded price pieces for the same presort destination. All pieces in the mailing job are reported on the same postage statement and must be cobundled.
- f. Within a bundle, all pieces must meet the machinable flats requirements in [301.3.0](#) or all pieces must meet the nonmachinable flats requirements in [707.26.0](#).
- g. Mailers must sort pieces for each presort destination so that only one physical bundle for each logical presort destination (see [707.18.4z](#)) includes both barcoded price pieces (containing a ZIP+4 or delivery point barcode) and nonbarcoded price pieces (containing a 5-digit barcode).

11.2.2 Bundle Preparation

[7-3-08] Pieces meeting the criteria in [301.3.0](#) must be prepared in 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#) and in 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). Preparation sequence, bundle size, and labeling:

- a. *Firm*, two-piece minimum; blue Label F or optional endorsement line (OEL).
- b. *5-digit scheme*, required for pieces prepared under [301.3.0](#), six-piece minimum, fewer pieces permitted under [11.2.3](#); red Label 5 SCH, or OEL.

- c. *5-digit*, required, six-piece minimum, fewer pieces permitted under [11.2.3](#); red Label 5 or OEL.
- d. *3-digit scheme*, required for pieces prepared under [301.3.0](#), six-piece minimum, fewer pieces permitted under [11.2.3](#); green Label 3 SCH or OEL.
- e. *3-digit*, required, six-piece minimum, fewer pieces permitted under [11.2.3](#); green Label 3 or OEL.
- f. *ADC*, required, six-piece minimum; pink Label A or OEL.
- g. *Origin mixed ADC*, required, no minimum; for any remaining pieces for destinations in [L201](#), Column B, corresponding to the origin ZIP Code in Column A; tan Label X or OEL.
- h. *Mixed ADC*, required, no minimum; tan Label X or OEL.

11.2.3 Bundles With Fewer Than Six Pieces

5-digit scheme, 5-digit, 3-digit scheme, and 3-digit bundles may contain fewer than six pieces when the publisher determines that such preparation improves service. Pieces in these low-volume bundles must be claimed at the applicable mixed ADC price (Outside-County) or basic price (In-County). Low-volume bundles are permitted only when they are sacked or prepared on pallets as follows:

- a. Place low-volume 5-digit and 3-digit bundles in only 5-digit scheme, 5-digit, 3-digit, and SCF sacks that contain at least 24 pieces; or in origin/entry SCF sacks; or on merged 5-digit scheme, 5-digit scheme, merged 5-digit, 5-digit, 5-digit metro, 3-digit, or SCF pallets, as appropriate.
- b. Place low-volume 5-digit scheme and 3-digit scheme bundles in only 5-digit scheme, 3-digit, and SCF sacks that contain at least 24 pieces, or in origin/entry SCF sacks, or on 3-digit or SCF pallets, as appropriate.

11.3 Standard Mail

11.3.1 Basic Standards

Mailers may choose to cobundle (see [345.1.4u](#)) automation price and nonautomation price flat-size pieces as an option to the basic bundling requirements in [345.5.0](#) and [345.7.0](#). All pieces in the same bundle must meet the standards in [301.3.0](#). 5-digit scheme and 3-digit scheme bundles must meet the additional standards in [345.1.4f](#). and [345.1.4n](#). Mailing jobs prepared using the 5-digit scheme and/or 3-digit scheme bundle preparation (for flats meeting the criteria in [301.3.0](#)) must be sacked under [10.0](#) or palletized under [10.0](#), [12.0](#), or [13.0](#). All bundles are subject to the following conditions:

- a. The pieces in the automation price mailing and the nonautomation price mailing must be part of the same mailing job and must be reported on the appropriate postage statement.
- b. Mailings prepared in sacks must meet the basic standards in [9.0](#) or [10.0](#).
- c. Mailings prepared on pallets must meet the basic standards in [8.0](#), [10.0](#), [12.0](#), or [13.0](#).

705.11.3.2

- d. A minimum of 200 pieces or 50 pounds of automation price pieces are required; the nonautomation price mailing may meet the residual volume requirements in [343.3.6](#). The total number of automation price and nonautomation price pieces must be used to meet the minimum volume requirements for bundles and containers.
- e. Nonautomation price pieces must contain a 5-digit barcode and be cobundled with automation price pieces for the same presort destination. If this optional preparation method is used, all automation price and nonautomation price pieces in the same mailing job and reported on the same postage statement must be cobundled.
- f. Mailers must sort nonautomation price pieces and automation price pieces for each presort destination so that only one physical bundle for each logical presort destination (see [345.1.4t](#)) includes both nonautomation price pieces (containing a 5-digit barcode) and automation price pieces (containing a ZIP+4 or delivery point barcode).

11.3.2 Bundle Preparation

[7-3-08] Pieces meeting the criteria in [301.3.0](#) must be prepared in 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#) and in 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). Preparation sequence, bundle size, and labeling:

- a. 5-digit scheme, required:
 1. For mailings containing only pieces weighing 5 ounces (0.3125 pound) or less: 15-piece minimum; red Label 5 SCH or OEL.
 2. For mailings containing any pieces weighing more than 5 ounces (0.3125 pound): 10-piece minimum; red Label 5 or OEL.
- b. *5-digit*, required:
 1. For mailings containing only pieces weighing 5 ounces (0.3125 pound) or less and measuring 3/4 inch thick or less: 15-piece minimum; red Label 5 or OEL.
 2. For mailings containing any pieces weighing more than 5 ounces (0.3125 pound) or measuring more than 3/4 inch thick: 10-piece minimum; red Label 5 or OEL.
- c. *3-digit scheme*, required, 10-piece minimum; green Label 3 SCH or OEL.
- d. *3-digit*, required, 10-piece minimum; green Label 3 or OEL.
- e. *ADC*, required, 10-piece minimum; pink Label A or OEL.
- f. *Mixed ADC*, required, no minimum; tan Label X or OEL.

11.4 Bound Printed Matter**11.4.1 Basic Standards**

Mailers may choose to cobundle (see [365.1.5l](#)) nonautomation price flat-size with and without a barcode, as an option to the basic bundling requirements in [365.5.0](#) and [365.7.0](#), subject to the following conditions:

- a. The pieces in the nonautomation price mailing qualifying for and claiming the barcode discount and the pieces in the nonautomation price mailing must be part of the same mailing job and reported on the same postage statement.
- b. The mailing job must consist entirely of automation-compatible pieces meeting the criteria in [301.3.0](#), and may be prepared in 5-digit scheme bundles using [L007](#) and 3-digit scheme bundles using [L008](#).
- c. Cobundled pieces must be cosacked under [9.0](#) or palletized under [8.0](#).
- d. A separate minimum of 300 nonautomation price pieces qualifying for and claiming the barcode discount and a separate minimum of 300 nonautomation price pieces are required. The combined total number of pieces qualifying for and claiming the barcode discount and the nonautomation price must be used to meet the minimum volume requirements for bundles and sacks.
- e. Nonautomation price pieces must contain a 5-digit barcode and be cobundled with nonautomation price pieces qualifying for and claiming the barcode discount for the same presort destination.
- f. Unless presented using an approved manifest mailing system under [2.0](#), nonautomation price pieces qualifying for and claiming the barcode discount and nonautomation price pieces for each presort destination must be sorted so that only one physical bundle for each logical presort destination includes both nonautomation price pieces qualifying for the barcode discount (containing a ZIP+4 or delivery point barcode) and nonautomation price pieces (containing a 5-digit barcode).

11.4.2 Bundle Preparation

[7-3-08] Preparation sequence, bundle size, and labeling:

- a. *5-digit scheme*, optional, minimum 10 addressed pieces or 10 pounds, maximum bundle weight 20 pounds; red Label 5 SCH or OEL.
- b. *5-digit*, required, minimum 10 addressed pieces or 10 pounds, maximum bundle weight 20 pounds; red Label 5 or optional endorsement line (OEL).
- c. *3-digit scheme*, optional, minimum 10 addressed pieces or 10 pounds, maximum bundle weight 20 pounds; green Label 3 SCH or OEL.
- d. *3-digit*, required, minimum 10 addressed pieces or 10 pounds, maximum bundle weight 20 pounds; green Label 3 or OEL.
- e. *ADC*, required, minimum 10 addressed pieces or 10 pounds, maximum bundle weight 20 pounds; pink Label A or OEL.
- f. *Mixed ADC*, required, no minimum, maximum bundle weight 20 pounds; tan Label X or OEL.

705.12.1

12.0 Merging Bundles of Flats on Pallets Using a 5% Threshold

12.1 Periodicals

12.1.1 Basic Standards

Five-digit scheme bundles (under [L007](#)) and 3-digit scheme bundles (under [L008](#)) must be prepared according to standards in [12.1.5](#). However, neither 5-digit scheme bundles nor 3-digit scheme bundles may be copalletized on any merged pallets. Five-digit bundles from a barcoded price mailing and 5-digit bundles from a nonbarcoded price mailing (including pieces cobundled under [11.0](#)) may be placed on the same pallet as carrier route bundles under the following conditions:

- a. A carrier route mailing must be part of the same mailing job as the barcoded price mailing and/or the nonbarcoded price mailing.
- b. Pieces in the barcoded price mailing must meet the criteria for a flat under [301.3.0](#) or [707.26.0](#). These two types of flats cannot be combined in the same bundle.
- c. When firm bundles, carrier route bundles, and 5-digit bundles are placed together on the same merged 5-digit scheme or merged 5-digit pallet, pieces in 5-digit bundles (other than firm bundles) must not exceed the 5% limit described in [12.1.4](#).
- d. All possible merged 5-digit scheme and 5-digit scheme pallets must be prepared according to standards in [12.1.5](#).
- e. The bundles from each separate mailing must be sorted together on pallets (copalletized) under [12.1.5](#) using presort software that is PAVE-certified.
- f. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing job. In addition, documentation prepared by PAVE-certified software must be submitted with each mailing job. Documentation, under [708.1.0](#), must describe for each “logical” pallet sortation level and each physical pallet the number of addressed pieces qualifying for each carrier route price, each Presorted price, and each automation price. Within the body of the documentation beneath the listing for the last physical pallet for each logical pallet presort destination, a separate 5% threshold summary also must be provided for each merged 5-digit scheme and each merged 5-digit logical pallet destination. *Note:* The separate 5% threshold summary must be for the mail on all of the physical pallets (i.e., the “logical” pallet) for that presort destination. This summary must describe for each 5-digit ZIP Code:
 1. The total number of all addressed pieces.
 2. The total number of addressed pieces sorted in carrier route bundles and firm bundles (each firm bundle is claimed as one addressed piece).
 3. The total number of addressed pieces sorted in 5-digit bundles (other than firm bundles).
 4. Of the total number of all addressed pieces in [12.1.1f1](#), the percentage of addressed pieces sorted in 5-digit bundles (other than firm bundles).
- g. Portions of the mailing job that cannot be palletized must be prepared in sacks.

12.1.2 Bundle Preparation

Bundles must be prepared under the standards in [8.0](#).

12.1.3 Low-Volume Bundles

Carrier route and 5-digit bundles may contain fewer than six pieces when the publisher determines that such preparation improves service. Pieces in these low-volume bundles must be claimed at the applicable mixed ADC price (Outside-County) or basic price (In-County).

12.1.4 5% Threshold

Firm bundles (claimed as one addressed piece), carrier route bundles, and 5-digit bundles may be placed together on the same merged 5-digit scheme or merged 5-digit logical pallet under [12.1.5](#) if all of the following conditions in items [12.1.4a](#) through [12.1.4e](#) below are met:

- a. For the purpose of calculating the 5% threshold, firm bundles (regardless of the price claimed) are added together with the number of addressed pieces in carrier route bundles.
- b. The number of pieces prepared in 5-digit bundles (other than firm bundles) for any single 5-digit ZIP Code on a “logical” merged 5-digit scheme or merged 5-digit pallet must not exceed 5% of the total number of addressed pieces for the 5-digit ZIP Code on the logical pallet for that presort destination.
- c. The 5% threshold is calculated separately for each 5-digit ZIP Code. For example, if a scheme contains four different 5-digit ZIP Codes, a separate 5% threshold applies to each 5-digit ZIP Code for the scheme on a merged 5-digit scheme pallet. Since 5-digit scheme bundles may not be placed on merged pallets, pieces in 5-digit scheme bundles do not count as 5-digit sorted pieces for purposes of determining the 5% limit.
- d. When firm bundles, other than those claimed at carrier route prices, are placed on a merged 5-digit scheme or a merged 5-digit pallet, addressed pieces in all corresponding 5-digit bundles up to 5% also must be merged. If the number of addressed pieces placed in 5-digit bundles (for an individual 5-digit ZIP Code) exceeds the 5% threshold, the mailer may place a portion of the addressed pieces (up to 5%) on a merged 5-digit scheme or a merged 5-digit pallet. Mailers are encouraged, but not required, to include such pieces on a merged pallet in this sequence: nonbarcoded price bundles, followed by barcoded price bundles.
- e. For the purpose of determining the 5% threshold, addressed pieces in low-volume carrier route bundles count as carrier route sorted pieces, and addressed pieces in low-volume 5-digit bundles count as 5-digit sorted pieces, even though the mixed ADC price (Outside-County) or basic price (In-County) is paid for such pieces.

12.1.5 Pallet Preparation and Labeling

[\[7-3-08\]](#) Mailers must prepare pallets of bundles in the manner and sequence listed below and under [8.0](#). Mailers must prepare all merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, and merged 5-digit pallets that are possible in the mailing based on the volume of mail to the destination using [L001](#) and the 5% threshold, as applicable. Mailers must label pallets according to the Line 1 and Line

705.12.1.5

2 information listed below and under 8.6. If, due to the physical size of the mailpieces, the barcoded price pieces are considered flat-size under 301.3.0 and the carrier route sorted pieces and nonbarcoded price pieces are considered irregular parcels under 401.1.6, “FLTS” must be shown as the processing category on the pallet label. If a mailing contains no barcoded price pieces and the carrier route mailing and the nonbarcoded price mailing are irregular parcels, use “IRREG” for the processing category on the contents line of the pallet label.

- a. *Merged 5-digit scheme*, required; permitted only when 5-digit bundles for at least one 5-digit ZIP Code in the scheme may be merged with carrier route bundles under the 5% threshold standard in 12.1.4. May contain carrier route bundles for any 5-digit ZIP Code in a single scheme listed in L001. May also contain barcoded price 5-digit bundles and nonbarcoded price 5-digit bundles up to a maximum of 5% of the total number of pieces for each 5-digit ZIP Code in the scheme under 12.1.4. For 5-digit ZIP Codes not included in a scheme, begin preparing pallets under 12.1.5d (merged 5-digit pallet). Labeling:
 1. Line 1: use L001, Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR/5D SCHEME.”
- b. *5-digit scheme carrier routes*, required; may contain only carrier route bundles for all carrier routes in an L001 scheme when a merged 5-digit scheme pallet could not be prepared under 12.1.5a. Labeling:
 1. Line 1 use L001, Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR-RTS SCHEME.”
- c. *5-digit scheme*, not permitted for flats that meet the dimension, weight, and flexibility criteria for automation flats in 301.3.0 (including pieces in merged bundles) and not permitted for sacks or trays. Required for all other flats and irregular parcels. Five-digit scheme bundles are assigned to 5-digit pallets according to the “label to” 5-digit ZIP Code in L007. Labeling:
 1. Line 1: use L001, Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “5D”; followed by “BARCODED” or “BC” if the pallet contains barcoded price mail; followed by “NONBARCODED” or “NBC” if the pallet contains nonbarcoded price mail; followed by “SCHEME” or “SCH.”
- d. *Merged 5-digit*, required; permitted only when 5-digit bundles may be merged with carrier route bundles under the 5% threshold standard in 12.1.4 for a 5-digit ZIP Code that is not part of an L001 scheme. May contain carrier route bundles, barcoded price 5-digit bundles, and nonbarcoded price 5-digit bundles. The number of pieces in 5-digit bundles is limited to 5% of the total number of pieces placed on the pallet under 12.1.4. Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see 8.6.4 for military mail).

2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or IRREG” as applicable; followed by “CR/5D.”
- e. *5-digit carrier routes*, required; may contain only carrier route price bundles for the same 5-digit ZIP Code that is not part of a scheme for which a merged 5-digit pallet could not be prepared under [12.1.5d](#). Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CARRIER ROUTES” or “CR-RTS.”
- f. *5-digit*, required; may contain only barcoded price 5-digit bundles and nonbarcoded price 5-digit bundles for the same 5-digit ZIP Code that could not be placed on a merged 5-digit pallet, or 5-digit scheme ([L007](#)) bundles (barcoded price and cobundled barcoded and nonbarcoded price pieces only). Five-digit scheme bundles are assigned to 5-digit pallets according to the OEL “label to” 5-digit ZIP Code. Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “5D”; followed by “BARCODED” or “BC” if the pallet contains barcoded price mail; followed by “NONBARCODED” or “NBC” if the pallet contains nonbarcoded price mail.
- g. *5-digit metro*, optional; may contain carrier route, barcoded, and nonbarcoded price bundles for the 5-digit ZIP Codes listed in [L006](#), Column A, and for the 3-digit ZIP Code areas listed in [L006](#), Column B. Labeling:
 1. Line 1: use [L006](#), Column C.
 2. Line 2: “PER” or “NEWS”; followed by “FLTS” or “IRREG”; followed by “METRO” or “MET”; followed by “BARCODED” or “BC” if the pallet contains barcoded price mail; followed by “NONBARCODED” or “NBC” if the pallet contains nonbarcoded price and/or carrier route mail.
- h. *3-digit*, optional; option not available for 3-digit ZIP Code prefixes marked “N” in [L002](#). May contain carrier route price, barcoded price, and nonbarcoded price mail, including 3-digit scheme ([L008](#)) bundles (barcoded and cobundled barcoded and nonbarcoded price pieces only). Three-digit scheme bundles are assigned to 3-digit pallets according to the “label to” 3-digit ZIP Code in [L008](#). Labeling:
 1. Line 1: use [L002](#), Column A.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “3D”; followed by “BARCODED” or “BC” if the pallet contains barcoded price mail; followed by “NONBARCODED” or “NBC” if the pallet contains nonbarcoded price mail and/or carrier route mail.
- i. *SCF*, required; may contain carrier route price, barcoded price, and nonbarcoded price bundles. Labeling:

705.12.2

1. Line 1: use [L002](#), Column C.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “SCF”; followed by “BARCODED” or “BC” if the pallet contains barcoded price mail; followed by “NONBARCODED” or “NBC” if the pallet contains nonbarcoded price mail and/or carrier route mail.
- j. ADC, required; may contain carrier route price, barcoded price, and nonbarcoded price bundles. Labeling:
1. Line 1: use [L004](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “ADC”; followed by “BARCODED” or “BC” if the pallet contains barcoded price mail; followed by “NONBARCODED” or “NBC” if the pallet contains nonbarcoded price mail and/or carrier route mail.

12.2 Standard Mail

12.2.1 Basic Standards

Five-digit scheme bundles (under [L007](#)) and 3-digit scheme bundles (under [L008](#)) must be prepared. Five-digit scheme bundles may not be copalletized on any merged pallets. Five-digit bundles from an automation price mailing and 5-digit bundles from a Presorted price mailing (including pieces cobundled under [11.0](#)) may be placed on the same pallet as carrier route bundles under the following conditions:

- a. A carrier route mailing must be part of the mailing job.
- b. The pieces in the carrier route price mailing, the automation price mailing, and the Presorted price mailing must be part of the same mailing job and all three mailings must be reported on the same postage statement.
- c. Pieces in the automation price mailing must meet the criteria for a flat under [301.3.0](#). Pieces in the Presorted price mailing and the carrier route mailing must meet the criteria for a flat under [301.1.0](#).
- d. Automation price 5-digit bundles, Presorted price 5-digit bundles, and cobundled 5-digit bundles may be copalletized with carrier route bundles only when the pieces in the 5-digit bundles do not exceed the 5% limit described in [12.2.3](#). Pallets of mail sorted in this manner are called “merged 5-digit” pallets. Pallets of mail sorted in this manner for which scheme sortation is also performed are called “merged 5-digit scheme” pallets. Since 5-digit scheme bundles cannot be placed on merged pallets, pieces in 5-digit scheme bundles do not count as 5-digit sorted pieces for purposes of determining the 5% limit.
- e. If sortation under this section is performed, merged 5-digit scheme pallets must be prepared whenever there is enough volume of carrier route and 5-digit bundles under [8.0](#) and [12.2.3](#) to prepare such pallets.
- f. The carrier route mailing must meet the eligibility criteria in [343.6.0](#), the automation price mailing must meet the eligibility criteria in [343.7.0](#), and the Presorted price mailing must meet the eligibility criteria in [343.5.0](#).

- g. The prices are based on the level of bundle that the pieces are contained in under [343.5.0](#) and [343.7.0](#).
- h. The bundles from each separate mailing must be sorted together on pallets (copalletized) using presort software that is PAVE-certified.
- i. The pieces in each separate mailing must bear the applicable markings required under [345.5.0, Preparing Nonautomation Flats](#), [345.6.0, Preparing Enhanced Carrier Route Flats](#), or [345.7.0, Preparing Automation Price Flats](#), and under [302, Elements on the Face of a Mailpiece](#).
- j. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures.
- k. In addition to the postage statement(s), documentation prepared by PAVE-certified software must be submitted with each copalletized mailing job that describes for each pallet sortation level and pallet the number of pieces qualifying for each applicable carrier route price, each applicable automation price, and each applicable Presorted price under [708.1.0](#). A separate 5% threshold summary also must be provided under [708.1.0](#) for each “logical” merged 5-digit scheme or “logical” merged 5-digit pallet presort destination. This 5% threshold summary must show for each 5-digit ZIP Code on the logical merged 5-digit scheme or logical merged 5-digit pallet: the total number of pieces on the pallet for the 5-digit ZIP Code; the total number of pieces sorted in carrier route bundles for the 5-digit ZIP Code; the total number of pieces sorted in 5-digit bundles for the 5-digit ZIP Code, and; of the total number of pieces for the 5-digit ZIP Code, the percentage of pieces sorted in 5-digit bundles for that 5-digit ZIP Code. This additional 5% threshold summary must appear within the body of the documentation beneath the pallet price listing for the last physical pallet for the logical pallet presort destination. Note: If there are two or more physical pallets for the same presort destination, for example, the same merged 5-digit pallet destination, these two or more physical pallets would be considered as one “logical pallet.” The separate pallet summary must be for the mail on all of the physical pallets (the “logical pallet”) for that presort destination.
- l. Portions of the mailing job that cannot be palletized must be prepared in sacks.

12.2.2 Bundle Preparation

Bundles placed on pallets must be prepared under the standards in [8.0, Preparing Pallets](#).

12.2.3 5%-Threshold Standard

Five-digit bundles and carrier route bundles may be placed on the same merged 5-digit scheme and merged 5-digit pallet if all of the following conditions are met:

- a. The number of pieces prepared in 5-digit bundles for any single 5-digit ZIP Code on a logical merged 5-digit or merged 5-digit scheme pallet does not exceed 5% of the total number of pieces for the 5-digit ZIP Code on the pallet(s) for the presort destination. That is, the total number of pieces for a 5-digit ZIP Code in 5-digit and carrier route bundles must not be greater than the number of pieces in carrier route bundles divided by 0.95.

705.12.2.3

- b. The 5% threshold is calculated separately for each 5-digit ZIP Code. For example, if a scheme contains four different 5-digit ZIP Codes, a separate 5% threshold applies to each 5-digit ZIP Code for the scheme on a merged 5-digit scheme pallet. Since 5-digit scheme bundles may not be placed on merged pallets, pieces in 5-digit scheme bundles do not count as 5-digit sorted pieces for purposes of determining the 5% limit.
- c. Except when bundles are prepared under the cobundling option in [11.0](#), all the mail in a logical 5-digit bundle must be able to be placed on the logical pallet under the 5% rule. A logical 5-digit bundle is all pieces for a mailing (price level) prepared in a 5-digit bundle or bundles for the same 5-digit destination. For each 5-digit ZIP Code, it is possible to have a logical 5-digit bundle of automation price mail and a logical 5-digit bundle of Presorted price mail. If the total number of pieces in a logical 5-digit bundle exceeds the 5% limit, none of the pieces for that 5-digit bundle level may be placed on a merged 5-digit or merged 5-digit scheme pallet. For some ZIP Codes, the total number of pieces prepared in logical 5-digit bundles (both an automation price 5-digit bundle and a Presorted price 5-digit bundle) may exceed 5% of the total mail for that ZIP Code, but the number of pieces for an individual automation price logical 5-digit bundle for that ZIP Code does not exceed the 5% limit nor does an individual Presorted price logical 5-digit bundle for that ZIP Code exceed the 5% limit. In such instances, mailers may choose to place all of the pieces in a logical 5-digit bundle for a single price category on the logical merged 5-digit or merged 5-digit scheme pallet so that the 5% threshold is not exceeded.
- d. Except for bundles prepared under the cobundling option in [11.0](#), if the total number of pieces in both the logical 5-digit automation price bundle and the logical 5-digit Presorted price bundle each separately exceed 5% of the total number of pieces for the 5-digit ZIP Code, none of the pieces in 5-digit bundles may be merged with carrier route bundles on a merged 5-digit or merged 5-digit scheme pallet.
- e. For mailing jobs prepared using the cobundling option in [11.0](#), if the total number of pieces prepared in a logical 5-digit bundle (containing automation price and Presorted price pieces) exceeds the 5% limit for a 5-digit ZIP Code in [12.2.3a](#), a mailer may, for each 5-digit ZIP Code, choose to place a portion of the pieces prepared in the logical 5-digit bundle on a merged 5-digit or 5-digit scheme pallet using one of the options below. Regardless of the option selected, a minimum of 10 pieces or 15 pieces as applicable must be prepared in 5-digit bundle(s) placed on the merged pallet and a minimum of 10 or 15 remaining pieces as applicable prepared in 5-digit bundle(s) not placed on the merged pallet, with the total number of pieces not exceeding the 5% limit. The options are:
 - 1. Place either all automation price pieces or all Presorted price pieces for the 5-digit ZIP Code on the merged pallet.
 - 2. Place a portion of either the automation price pieces or the Presorted price pieces for the 5-digit ZIP Code on the merged pallet.

3. Place either all the automation price pieces plus a portion of the Presorted price pieces or all the Presorted price pieces plus a portion of the automation price pieces for the 5-digit ZIP Code on the merged pallet.

12.2.4 Pallet Preparation and Labeling

[7-3-08] Mailers must prepare pallets of bundles in the manner and sequence listed below and under 8.0. Mailers must prepare all merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, and merged 5-digit pallets that are possible in the mailing based on the volume of mail to the destination using L001 and the 5% threshold. Mailers must label pallets according to the Line 1 and Line 2 information listed below and under 8.6.

- a. *Merged 5-digit scheme*, required, permitted only when 5-digit bundles for at least one 5-digit ZIP Code in the scheme may be merged with carrier route bundles under the 5% threshold standard in 12.2.3. May contain carrier route bundles for any 5-digit ZIP Code in a single scheme listed in L001. May also contain automation price 5-digit bundles and Presorted price 5-digit bundles up to a maximum of 5% of the total number of pieces for each 5-digit ZIP Code in the scheme under 12.2.3. For 5-digit ZIP Codes not included in a scheme, begin preparing pallets under 12.2.4c (merged 5-digit pallet). Labeling:
 1. Line 1: use L001, Column B.
 2. Line 2: "STD FLTS CR/5D SCHEME."
- b. *5-digit scheme carrier routes*, required, may contain only carrier route bundles for all carrier routes in an L001 scheme when a merged 5-digit scheme pallet could not be prepared under 12.2.4a. Labeling:
 1. Line 1: use L001, Column B.
 2. Line 2: "STD FLTS CR-RTS SCHEME."
- c. *Merged 5-digit*, required, permitted only when 5-digit bundles may be merged with carrier route bundles under the 5% threshold standard in 12.2.3 for a 5-digit ZIP Code that is not part of an L001 scheme. May contain carrier route price bundles, automation price 5-digit bundles, and Presorted price 5-digit bundles. The number of pieces in 5-digit bundles is limited to 5% of the total number of pieces placed on the pallet under 12.2.3. Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see 8.6.4 for military mail).
 2. Line 2: "STD FLTS CR/5D."
- d. *5-digit carrier routes*, required, may contain only carrier route price bundles for the same 5-digit ZIP Code that is not part of a scheme and for which a merged 5-digit pallet could not be prepared under 12.2.4c. Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see 8.6.4 for military mail).
 2. Line 2: "STD FLTS"; followed by "CARRIER ROUTES" or "CR-RTS."
- e. *5-digit*, required, may contain only automation price 5-digit bundles and Presorted price 5-digit bundles for the same 5-digit ZIP Code that could not be placed on a merged 5-digit pallet, or 5-digit scheme (L007) bundles

705.12.2.4

(automation price and cobundled automation and Presorted price pieces only). Five-digit scheme bundles are assigned to 5-digit pallets according to the “label to” 5-digit ZIP Code in [L007](#). Labeling:

1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
 2. Line 2: “STD FLTS 5D”; followed by “BARCODED” or “BC” if the pallet contains automation price mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted price mail.
- f. *5-digit metro*, optional, may contain carrier route, automation, and Presorted price bundles for the 5-digit ZIP Codes listed in [L006](#), Column A, and for the 3-digit ZIP Code areas listed in [L006](#), Column B.
1. Line 1: use [L006](#), Column C.
 2. Line 2: “STD FLTS” followed by “METRO” or “MET”; followed by “BARCODED” or “BC” if the pallet contains automation price mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted price and/or carrier route mail.
- g. *3-digit*, optional, option not available for 3-digit ZIP Code prefixes marked “N” in [L002](#). May contain carrier route price, automation price, and Presorted price mail, including 3-digit scheme ([L008](#)) bundles (automation and cobundled automation and Presorted price pieces only). Three-digit scheme bundles are assigned to 3-digit pallets according to the “label to” 3-digit ZIP Code in [L008](#). Labeling:
1. Line 1: use [L002](#), Column A.
 2. Line 2: “STD FLTS 3D”; followed by “BARCODED” or “BC” if the pallet contains automation price mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted price mail and/or carrier route price mail.
- h. *SCF*, required, may contain carrier route price, automation price, and Presorted price bundles. Labeling:
1. Line 1: use [L002](#), Column C.
 2. Line 2: “STD FLTS SCF”; followed by “BARCODED” or “BC” if the pallet contains automation price mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted price mail and/or carrier route price mail.
- i. *ASF*, required, except that an ASF sort may not be required if using bundle reallocation under [8.13.3](#). May contain carrier route price, automation price, and/or Presorted price bundles. Sort ADC bundles to ASF pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L004](#). At the mailer’s option, sort appropriate mixed ADC bundles to ASF pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L010](#). All optional mixed ADC bundles on ASF pallets must contain only pieces destinating within the ASF as shown in [6.3](#). See [346.3.0](#) for additional requirements for DBMC price eligibility. Labeling:
1. Line 1: use [L602](#), Column B.

2. Line 2: "STD FLTS ASF"; followed by "BARCODED" or "BC" if the pallet contains automation price mail; followed by "NONBARCODED" or "NBC" if the pallet contains Presorted price mail and/or carrier route price mail.
- j. *BMC*, required, may contain carrier route price, automation price, and/or Presorted price bundles. Sort ADC bundles to BMC pallets based on the "label to" ZIP Code for the ADC destination of the bundle in [L004](#). At the mailer's option, sort appropriate mixed ADC bundles to BMC pallets based on the "label to" ZIP Code for the ADC destination of the bundle in [L010](#). All optional mixed ADC bundles on BMC pallets must contain only pieces destinating within the BMC as shown in [6.3](#). See [346.3.0](#) for additional requirements for DBMC price eligibility. Labeling:
 1. Line 1: use [L601](#), Column B.
 2. Line 2: "STD FLTS BMC"; followed by "BARCODED" or "BC" if the pallet contains automation price mail; followed by "NONBARCODED" or "NBC" if the pallet contains Presorted price mail and/or carrier route price mail.

13.0 Merging Bundles of Flats on Pallets Using the City State Product and a 5% Threshold

13.1 Periodicals

13.1.1 Basic Standards

Five-digit scheme bundles (using [L007](#)) and 3-digit scheme bundles (using [L008](#)) must be prepared according to standards in [13.1.4](#). Five-digit scheme bundles and 3-digit scheme bundles may not be copalletized on any merged pallets. Five-digit bundles from a barcoded price mailing and 5-digit bundles from a nonbarcoded price mailing (including pieces cobundled under [11.0](#)) may be placed on the same pallet as carrier route bundles under the following conditions:

- a. A carrier route mailing must be part of the same mailing job as the barcoded price mailing and/or the nonbarcoded price mailing.
- b. Pieces in the barcoded price mailing must meet the criteria for a flat under [301.3.0](#) or [707.26.0](#). These two types of flats cannot be combined in the same bundle.
- c. Mailers must use the Carrier Route Indicators field in the City State Product and the 5% limit criteria in [13.1.4](#) to prepare the mailing. The mailing must be entered no later than 90 days after the release date of the City State Product used.
- d. When firm bundles, carrier route bundles, and 5-digit bundles are placed together on the same merged 5-digit scheme or merged 5-digit pallet according to standards in [13.1.4](#) and [13.1.5](#), the following conditions also apply:

705.13.1.2

1. For 5-digit ZIP Codes identified with an “A” or “C” indicator in the City State Product, merged 5-digit scheme and merged 5-digit pallets may be prepared with no limit to the number of addressed pieces placed in 5-digit bundles.
 2. For 5-digit ZIP Codes identified with a “B” or “D” indicator in the City State Product, the number of addressed pieces placed in 5-digit bundles (other than firm bundles) must not exceed 5% of the total number of addressed pieces placed on the merged 5-digit scheme or merged 5-digit pallet, for each corresponding 5-digit ZIP Code. For merged 5-digit scheme pallets, the 5% threshold is calculated separately for each individual 5-digit ZIP Code.
- e. All possible merged 5-digit scheme, 5-digit scheme carrier routes, and 5-digit scheme pallets must be prepared according to standards in [13.1.5](#).
 - f. The bundles from each separate mailing must be sorted together on pallets (copalletized) under [13.1.5](#) using presort software that is PAVE-certified.
 - g. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing job. In addition, documentation produced by PAVE-certified software must be submitted with each mailing job. Documentation, under [708.1.0](#), must describe for each “logical” pallet sortation level and each physical pallet the number of addressed pieces qualifying for each carrier route price, each nonbarcoded price, and each barcoded price. Within the body of the documentation beneath the listing for the last physical pallet for each logical pallet presort destination, a separate 5% threshold summary also must be provided for each merged 5-digit scheme and each merged 5-digit logical pallet destination that contains mail for one or more 5-digit ZIP Codes with a “B” or “D” indicator in the City State Product.
Note: The separate 5% threshold summary must be for the mail on all of the physical pallets (i.e., the “logical” pallet) for that presort destination. This summary must describe for each 5-digit ZIP Code:
 1. The total number of all addressed pieces.
 2. The total number of addressed pieces sorted in carrier route bundles and firm bundles (each firm bundle is claimed as one addressed piece).
 3. The total number of addressed pieces sorted in 5-digit bundles (other than firm bundles).
 4. Of the total number of all addressed pieces in [13.1.1g1](#), the percentage of addressed pieces sorted in 5-digit bundles (other than firm bundles).
 - h. Portions of the mailing job that cannot be palletized must be prepared in sacks.

13.1.2 Bundle Preparation

Bundles must be prepared under the standards in [8.0](#).

13.1.3 Low-Volume Bundles

Carrier route and 5-digit bundles may contain fewer than six pieces when the publisher determines that such preparation improves service. Pieces in these low-volume bundles must be claimed at the applicable mixed ADC price (Outside-County) or basic price (In-County).

13.1.4 5% Threshold—5-Digit ZIP Codes Identified with a “B” or “D” Indicator

Firm bundles (claimed as one addressed piece), carrier route bundles, and 5-digit bundles may be placed together on the same merged 5-digit scheme or merged 5-digit logical pallet under 13.1.5 if all of the following conditions in items 13.1.4a through 13.1.4e below are met:

- a. For the purpose of calculating the 5% threshold, firm bundles (regardless of the price claimed) are added together with the number of addressed pieces in carrier route bundles.
- b. The number of pieces prepared in 5-digit bundles (other than firm bundles) for any single 5-digit ZIP Code with a “B” or “D” indicator (in the City State Product) on a logical merged 5-digit scheme or merged 5-digit pallet must not exceed 5% of the total number of addressed pieces for the 5-digit ZIP Code on the logical pallet for the presort destination. Five-digit ZIP Codes with an “A” or “C” indicator (in the City State Product) are not subject to the 5% limit.
- c. The 5% threshold is calculated separately for each 5-digit ZIP Code with a “B” or “D” indicator. For example, if a scheme contains four different 5-digit ZIP Codes, a separate 5% threshold applies to each 5-digit ZIP Code with a “B” or “D” indicator for the scheme on a merged 5-digit scheme pallet. (5-digit ZIP Codes with an “A” or “C” indicator are not subject to the 5% limit.) Since 5-digit scheme bundles may not be placed on merged pallets, pieces in 5-digit scheme bundles do not count as 5-digit sorted pieces for purposes of determining the 5% limit.
- d. When firm bundles, other than those claimed at carrier route prices, are placed on a merged 5-digit scheme or a merged 5-digit pallet, addressed pieces in all corresponding 5-digit bundles up to 5% also must be merged. If the number of addressed pieces placed in 5-digit bundles (for an individual 5-digit ZIP Code) exceeds the 5% threshold, the mailer may place a portion of the addressed pieces (up to 5%) on a merged 5-digit scheme or a merged 5-digit pallet. Mailers are encouraged, but not required, to include such pieces on a merged pallet in this sequence: presorted price bundles, followed by cobundles (if using 11.0), followed by automation price bundles.
- e. For the purpose of determining the 5% threshold, addressed pieces in low-volume carrier route bundles count as carrier route sorted pieces, and addressed pieces in low-volume 5-digit bundles count as 5-digit sorted pieces, even though the mixed ADC price (Outside-County) or basic price (In-County) is paid for such pieces.

13.1.5 Pallet Preparation and Labeling

[7-3-08] Mailers must prepare pallets of bundles in the manner and sequence listed below and under 8.0. Mailers must prepare all merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, and merged 5-digit pallets that are possible in the mailing based on the volume of mail to the destination (8.0) using L001, the City State Product, and the 5% threshold (13.1.4), as applicable. Mailers must label pallets according to the Line 1 and Line 2 information listed below and under 8.6. If, due to the physical size of the mailpieces, the barcoded price pieces are considered flat-size under 301.3.0 and the carrier route sorted pieces and nonbarcoded price

705.13.1.5

pieces are considered irregular parcels under [401.1.6](#), “FLTS” must be shown as the processing category on the pallet label. If a mailing contains no barcoded price pieces and the carrier route mailing and the nonbarcoded price mailing are irregular parcels, use “IRREG” for the processing category on the contents line of the pallet label.

- a. *Merged 5-digit scheme*, required; for schemes that contain at least one 5-digit ZIP Code that has an “A” or “C” indicator in the City State Product, the pallet contains 1) carrier route bundles for all 5-digit ZIP Codes in the scheme, 2) 5-digit barcoded price and 5-digit nonbarcoded price bundles for those 5-digit ZIP Codes in the scheme with an “A” or “C” indicator in the City State Product, and 3) 5-digit barcoded price and/or 5-digit nonbarcoded price bundles for those 5-digit ZIP Codes in the scheme with a “B” or “D” indicator when the number of pieces in the 5-digit bundle(s) does not exceed 5% of the total number of pieces for that 5-digit ZIP Code under [13.1.4](#). For schemes in which all 5-digit ZIP Codes have “B” or “D” indicators and for which there is at least one 5-digit ZIP Code for which 5-digit bundles may be placed on the pallet under the 5% limit in [13.1.4](#), place all carrier route bundles plus the 5-digit bundles within the 5% limit on the pallet. For schemes in which all 5-digit ZIP Codes have “B” or “D” indicators and for which there are no 5-digit ZIP Codes for which 5-digit bundles may be placed on the pallet under the 5% limit, do not prepare a merged 5-digit scheme pallet (sort bundles to pallets under [13.1.5b](#) through [13.1.5j](#)). Labeling:
 1. Line 1: use [L001](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; and followed by “CR/5D SCHEME.”
- b. *5-digit scheme carrier routes*, required, may contain only carrier route bundles for all carrier routes in an [L001](#) scheme for which all 5-digit ZIP Codes in the scheme have a “B” or “D” indicator and for which no 5-digit bundles could be placed on a merged 5-digit scheme pallet with the carrier route bundles because the 5-digit bundles exceeded the 5% threshold. Labeling:
 1. Line 1: use [L001](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; and followed by “CR-RTS SCHEME.”
- c. *5-digit scheme*, not permitted for flats that meet the dimension, weight, and flexibility criteria for automation flats in [301.3.0](#) (including pieces in merged bundles) and not permitted for sacks or trays. Required for all other flats and irregular parcels. May contain only 5-digit bundles of barcoded price and nonbarcoded price mail for the same 5-digit scheme under [L001](#) for which one or more 5-digit ZIP Codes in the scheme had a “B” or “D” indicator in the City State Product, and the 5-digit bundles could not be placed on a merged 5-digit scheme pallet (the pieces exceeded the 5% threshold). Labeling:
 1. Line 1: use [L001](#), Column B.

2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “5D”; followed by “BARCODED” or “BC” if the pallet contains barcoded price mail; followed by “NONBARCODED” or “NBC” if the pallet contains nonbarcoded price mail; and followed by “SCHEME” or “SCH.”
- d. *Merged 5-digit*, required, may contain carrier route bundles, barcoded price 5-digit bundles, and nonbarcoded price 5-digit bundles for those 5-digit ZIP Codes that are not part of a scheme. For 5-digit ZIP Codes with an “A” or “C” indicator in the City State Product, there is no limit on the number of pieces in 5-digit bundles that may be placed on the pallet and a merged 5-digit pallet is prepared even if there are no 5-digit bundles for that ZIP Code. For those 5-digit ZIP Codes with a “B” or “D” indicator in the City State Product, the number of pieces in 5-digit bundles is limited to 5% of the total number of pieces for the 5-digit pallet destination under [13.1.4](#). However, if no 5-digit bundles for ZIP Codes with “B” or “D” indicators can be placed on this level pallet under the 5% limit, do not prepare this a merged 5-digit pallet (sort bundles under [13.1.5e](#) through [13.1.5j](#)). Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; and followed by “CR/5D.”
- e. *5-digit carrier routes*, required, may contain only carrier route price bundles for the same 5-digit ZIP Code that is not part of a scheme and that could not be placed on a merged 5-digit pallet. Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; and followed by “CARRIER ROUTES” or “CR-RTS.”
- f. *5-digit*, required, may contain only barcoded price 5-digit bundles and nonbarcoded price 5-digit bundles for the same 5-digit ZIP Code that could not be placed on a merged 5-digit pallet, or 5-digit scheme ([L007](#)) bundles (barcoded price and cobundled barcoded and nonbarcoded price pieces only). Five-digit scheme bundles are assigned to 5-digit pallets according to the “label to” 5-digit ZIP Code in [L007](#). Labeling:
 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “5D”; followed by “BARCODED” or “BC” if the pallet contains barcoded price mail; and followed by “NONBARCODED” or “NBC” if the pallet contains nonbarcoded price mail.
- g. *5-digit metro*, optional, may contain carrier route, barcoded, and nonbarcoded price bundles for the 5-digit ZIP Codes listed in [L006](#), Column A, and for the 3-digit ZIP Code areas listed in [L006](#), Column B. Labeling:
 1. Line 1: use [L006](#), Column C.

2. Line 2: “PER” or “NEWS”; followed by “FLTS” or “IRREG”; followed by “METRO” or “MET”; followed by “BARCODED” or “BC” if the pallet contains barcoded price mail; followed by “NONBARCODED” or “NBC” if the pallet contains nonbarcoded price and/or carrier route mail.
- h. *3-digit*, optional, option not available for 3-digit ZIP Code prefixes marked “N” in [L002](#). May contain carrier route price, barcoded price, and nonbarcoded price mail, including 3-digit scheme ([L008](#)) bundles (barcoded and cobundled barcoded and nonbarcoded price pieces only). Three-digit scheme bundles are assigned to 3-digit pallets according to the “label to” 3-digit ZIP Code in [L008](#). Labeling:
 1. Line 1: use [L002](#), Column A.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “3D”; followed by “BARCODED” or “BC” if the pallet contains barcoded price mail; and followed by “NONBARCODED” or “NBC” if the pallet contains nonbarcoded price mail and/or carrier route mail.
- i. *SCF*, required, may contain carrier route price, barcoded price, and nonbarcoded price bundles. Labeling:
 1. Line 1: use [L002](#), Column C.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “SCF”; followed by “BARCODED” or “BC” if the pallet contains barcoded price mail; and followed by “NONBARCODED” or “NBC” if the pallet contains nonbarcoded price mail and/or carrier route mail.
- j. *ADC*, required, may contain carrier route price, barcoded price, and nonbarcoded price bundles. Labeling:
 1. Line 1: use [L004](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “ADC”; followed by “BARCODED” or “BC” if the pallet contains barcoded price mail; and followed by “NONBARCODED” or “NBC” if the pallet contains nonbarcoded price mail and/or carrier route mail.

13.2 Standard Mail

13.2.1 Basic Standards

Five-digit scheme bundles (under [L007](#)) and 3-digit scheme bundles (under [L008](#)) must be prepared. Five-digit scheme bundles may not be copalletized on any merged pallets. Five-digit bundles from an automation price mailing and 5-digit bundles from a Presorted price mailing (including pieces cobundled under [11.0](#)) may be placed on the same pallet as carrier route bundles under the following conditions:

- a. A carrier route mailing must be part of the mailing job.

- b. The pieces in the carrier route price mailing, the automation price mailing, and the Presorted price mailing must be part of the same mailing job, and all three mailings must be reported on the same postage statement.
- c. Pieces in the automation price mailing must meet the criteria for a flat under [301.3.0](#). Pieces in the Presorted price mailing and the carrier route mailing must meet the criteria for a flat under [301.1.1](#).
- d. Mailers must use the Carrier Route Indicators field in the City State Product and the 5% limit criteria in [13.2.3](#) to prepare the mailing. The mailing must be entered no later than 90 days after the release date of the City State Product used.
- e. Automation price 5-digit bundles, Presorted price 5-digit bundles, and cobundled 5-digit bundles may be copalletized with carrier route bundles and firm bundles on merged 5-digit or merged 5-digit scheme pallets as follows:
 - 1. For 5-digit ZIP Codes with an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product, carrier route and 5-digit bundles may be merged with no limit on the number of pieces in 5-digit bundles placed on the pallet. 5-digit scheme bundles may not be used.
 - 2. For 5-digit ZIP Codes with a “B” or “D” indicator in the Carrier Route Indicators field in the City State Product, the pieces in the 5-digit bundles must not exceed 5% of the total number of pieces for each individual 5-digit ZIP Code on the pallet as described in [13.2.3](#). Since 5-digit scheme bundles cannot be placed on merged pallets, pieces in 5-digit scheme bundles do not count as 5-digit sorted pieces for purposes of determining the 5% limit.
- f. If sortation under this section is performed, then merged 5-digit scheme pallets must be prepared whenever there is enough volume of carrier route and 5-digit bundles under [8.0](#) to prepare such pallets using the criteria in [13.2.1e](#) and the sortation criteria in [13.2.4](#).
- g. The carrier route mailing must meet the eligibility criteria in [343.6.0](#), the automation price mailing must meet the eligibility criteria in [343.7.0](#), and the Presorted price mailing must meet the eligibility criteria in [343.5.0](#).
- h. The prices are based on the level of bundle that the pieces are contained in under [343.5.0](#) and [343.7.0](#).
- i. The pieces in each separate mailing must bear the applicable markings required under [345.5.0](#), [345.6.0](#), or [345.7.0](#) and under [302, Elements on the Face of a Mailpiece](#).
- j. The bundles from each separate mailing must be sorted together on pallets (copalletized) using presort software that is PAVE-certified.
- k. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures.
- l. In addition to the applicable postage statement, documentation produced by PAVE-certified software must be submitted with each copalletized mailing job that describes for each pallet sortation level and pallet the number of pieces

705.13.2.2

qualifying for each applicable carrier route price, each applicable automation price, and each applicable Presorted price. A separate 5% threshold summary also must be provided under [708.1.0](#) for each “logical” merged 5-digit scheme or “logical” merged 5-digit pallet presort destination that contains mail for one or more 5-digit ZIP Codes with a “B” or “D” indicator in the City State Product. This 5% threshold summary must show for each 5-digit ZIP Code with a “B” or “D” indicator on the logical merged 5-digit scheme or logical merged 5-digit pallet: the total number of pieces on the pallet for the 5-digit ZIP Code; the total number of pieces sorted in carrier route bundles for the 5-digit ZIP Code; the total number of pieces sorted in 5-digit bundles for the 5-digit ZIP Code, and; of the total number of pieces for the 5-digit ZIP Code, the percentage of pieces sorted in 5-digit bundles for that 5-digit ZIP Code. This additional 5% threshold summary must appear within the body of the documentation beneath the pallet price listing for the last physical pallet for the logical pallet presort destination. *Note:* If there are two or more physical pallets for the same presort destination, for example, the same merged 5-digit pallet destination, these two or more physical pallets would be considered as one “logical pallet.” The separate pallet summary must be for the mail on all of the physical pallets (the “logical pallet”) for that presort destination.

- m. Portions of the mailing job that cannot be palletized must be prepared in sacks.

13.2.2 Bundle Preparation

Bundles placed on pallets must be prepared under the standards in [8.0](#).

13.2.3 5% Threshold Standard

Five-digit bundles, carrier route bundles, and firm bundles may be placed on the same merged 5-digit scheme or merged 5-digit pallet under [13.2.4](#) if all of the following conditions are met:

- a. The number of pieces prepared in 5-digit bundles for any single 5-digit ZIP Code with a “B” or “D” indicator on a logical merged 5-digit or merged 5-digit scheme pallet does not exceed 5% of the total number of pieces for the 5-digit ZIP Code on the logical pallet for the presort destination. That is, the total number of pieces for a 5-digit ZIP Code in 5-digit and carrier route bundles must not be greater than the number of pieces in carrier route bundles divided by 0.95. 5-digit ZIP Codes with an “A” or “C” indicator are not subject to the 5% limit.
- b. The 5% threshold is calculated separately for each 5-digit ZIP Code with a “B” or “D” indicator. For example, if a scheme contains four different 5-digit ZIP Codes, a separate 5% threshold applies to each 5-digit ZIP Code with a “B” or “D” indicator for the scheme on a merged 5-digit scheme pallet. (Five-digit ZIP Codes with an “A” or “C” indicator are not subject to the 5% limit.) Since 5-digit scheme bundles cannot be placed on merged pallets, pieces in 5-digit scheme bundles do not count as 5-digit sorted pieces for purposes of determining the 5% limit.
- c. Except when bundles are prepared under the cobundling option in [11.0](#), all mail in a logical 5-digit bundle for a 5-digit ZIP Code with a “B” or “D” indicator must be able to be placed on the logical pallet under the 5% rule. A logical 5-digit bundle is all pieces for a mailing (price level) prepared in a 5-digit bundle or

bundles for the same 5-digit destination. For each 5-digit ZIP Code, it is possible to have a logical 5-digit bundle of automation price mail and a logical 5-digit bundle of Presorted price mail. If the total number of pieces in a logical 5-digit bundle exceeds the 5% limit, none of the pieces for that 5-digit bundle level may be placed on a merged 5-digit or merged 5-digit scheme pallet. For some ZIP Codes, the total number of pieces prepared in logical 5-digit bundles (both an automation price logical 5-digit bundle and a Presorted price logical 5-digit bundle) may exceed 5% of the total mail for that ZIP Code, but the number of pieces for an individual automation price logical 5-digit bundle for that ZIP Code does not exceed the 5% limit nor does an individual Presorted price logical 5-digit bundle for that ZIP Code exceed the 5% limit. In such instances, mailers may choose to place all of the pieces in a logical 5-digit bundle for a single price category on the logical merged 5-digit or merged 5-digit scheme pallet so that the 5% threshold is not exceeded.

- d. Except for bundles prepared under the cobundling option in 11.0, if the total number of pieces in both the logical 5-digit automation price bundle and the logical 5-digit Presorted price bundle each separately exceed 5% of the total number of pieces for the 5-digit ZIP Code with a “B” or “D” indicator, none of the pieces in 5-digit bundles may be merged with carrier route bundles on a merged 5-digit or merged 5-digit scheme pallet.
- e. For mailing jobs prepared using the cobundling option in 11.0, if the total number of pieces prepared in a logical 5-digit bundle (containing automation price and Presorted price pieces) exceeds the 5% limit for a 5-digit ZIP Code in 13.2.3a, a mailer may, for each 5-digit ZIP Code, choose to place a portion of the pieces prepared in the logical 5-digit bundle on a merged 5-digit or 5-digit scheme pallet using one of the options below. Regardless of the option selected, a minimum of 10 pieces or 15 pieces as applicable must be prepared in 5-digit bundle(s) placed on the merged pallet and a minimum of 10 or 15 remaining pieces as applicable prepared in 5-digit bundle(s) not placed on the merged pallet, with the total number of pieces not exceeding the 5% limit. The options are:
 1. Place either all automation price pieces or all Presorted price pieces for the 5-digit ZIP Code on the merged pallet.
 2. Place a portion of either the automation price pieces or the Presorted price pieces for the 5-digit ZIP Code on the merged pallet.
 3. Place either all the automation price pieces plus a portion of the Presorted price pieces or all the Presorted price pieces plus a portion of the automation price pieces for the 5-digit ZIP Code on the merged pallet.

13.2.4 Pallet Preparation and Labeling

[7-3-08] Mailers must prepare pallets of bundles in the manner and sequence listed below and under 8.0. Mailers must prepare all merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, and merged 5-digit pallets that are possible in the mailing based on the volume of mail to the destination using L001, the City State Product, and the 5% threshold. Mailers must label pallets according to the Line 1 and Line 2 information listed below and under 8.6.

705.13.2.4

- a. *Merged 5-digit scheme*, required; for schemes that contain at least one 5-digit ZIP Code that has an “A” or “C” indicator in the City State Product, the pallet contains: carrier route bundles for all 5-digit ZIP Codes in the scheme; 5-digit automation price and 5-digit Presorted price bundles for those 5-digit ZIP Codes in the scheme with an “A” or “C” indicator in the City State Product; and 5-digit automation price and/or 5-digit Presorted price bundles for those 5-digit ZIP Codes in the scheme with a “B” or “D” indicator when the number of pieces in the 5-digit bundle(s) does not exceed 5% of the total number of pieces for that 5-digit ZIP Code under [13.2.3](#). For schemes in which all 5-digit ZIP Codes have “B” or “D” indicators and for which there is at least one 5-digit ZIP Code for which 5-digit bundles may be placed on the pallet under the 5% limit in [13.2.3](#), place all carrier route bundles plus the 5-digit bundles within the 5% limit on the pallet. For schemes in which all 5-digit ZIP Codes have “B” or “D” indicators and for which there are no 5-digit ZIP Codes for which 5-digit bundles may be placed on the pallet under the 5% limit, do not prepare a merged 5-digit scheme pallet (sort bundles to pallets under [13.2.4b](#) through [13.2.4j](#)). Labeling:
 1. Line 1: use [L001](#), Column B.
 2. Line 2: “STD FLTS CR/5D SCHEME.”
- b. *5-digit scheme carrier routes*, required, may contain only carrier route bundles for all carrier routes in an [L001](#) scheme for which all 5-digit ZIP Codes in the scheme have a “B” or “D” indicator and for which no 5-digit bundles could be placed on a merged 5-digit scheme pallet with the carrier route bundles because the 5-digit bundles exceeded the 5% threshold. Labeling:
 1. Line 1: use [L001](#), Column B.
 2. Line 2: “STD FLTS CR-RTS SCHEME.”
- c. *Merged 5-digit*, required, may contain carrier route bundles, automation price 5-digit bundles, and Presorted price 5-digit bundles for those 5-digit ZIP Codes that are not part of a scheme. For 5-digit ZIP Codes with an “A” or “C” indicator in the City State Product, there is no limit on the number of pieces in 5-digit bundles that may be placed on the pallet, and a merged 5-digit pallet is prepared even if there are no 5-digit bundles for that ZIP Code. For those 5-digit ZIP Codes with a “B” or “D” indicator in the City State Product, the number of pieces in 5-digit bundles is limited to 5% of the total number of pieces for the 5-digit pallet destination under [13.2.3](#). However, if no 5-digit bundles for ZIP Codes with “B” or “D” indicators can be placed on this level pallet under the 5% limit, do not prepare a merged 5-digit pallet (sort bundles to pallets under [13.2.4d](#) through [13.2.4j](#)). Labeling:
 1. Line 1: use city, state abbreviation, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
 2. Line 2: “STD FLTS CR/5D.”
- d. *5-digit carrier routes*, required, may contain only carrier route price bundles for the same 5-digit ZIP Code that is not part of a scheme and that could not be placed on a merged 5-digit pallet. Labeling:

1. Line 1: use city, state, and 5-digit ZIP Code destination (see 8.6.4 for military mail).
 2. Line 2: "STD FLTS," followed by "CARRIER ROUTES" or "CR-RTS."
- e. *5-digit*, required, may contain only automation price 5-digit bundles and Presorted price 5-digit bundles for the same 5-digit ZIP Code that could not be placed on a merged 5-digit pallet, or 5-digit scheme (L007) bundles (automation price and cobundled automation and Presorted price pieces only). Five-digit scheme bundles are assigned to 5-digit pallets according to the "label to" 5-digit ZIP Code in L007. Labeling:
1. Line 1: use city, state, and 5-digit ZIP Code destination (see 8.6.4 for military mail).
 2. Line 2: "STD FLTS 5D"; followed by "BARCODED" or "BC" if the pallet contains automation price mail; and followed by "NONBARCODED" or "NBC" if the pallet contains Presorted price mail.
- f. *5-digit metro*, optional, may contain carrier route, automation, and Presorted price bundles for the 5-digit ZIP Codes listed in L006, Column A, and for the 3-digit ZIP Code areas listed in L006, Column B. Labeling:
1. Line 1: use L006, Column C.
 2. Line 2: "STD FLTS" followed by "METRO" or "MET"; followed by "BARCODED" or "BC" if the pallet contains automation price mail; followed by "NONBARCODED" or "NBC" if the pallet contains Presorted price and/or carrier route mail.
- g. *3-digit*, optional, option not available for 3-digit ZIP Code prefixes marked "N" in L002. May contain carrier route price, automation price, and Presorted price mail, including 3-digit scheme (L008) bundles (automation and cobundled automation and Presorted price pieces only). Three-digit scheme bundles are assigned to 3-digit pallets according to the "label to" 3-digit ZIP Code in L008. Labeling:
1. Line 1: use L002, Column A.
 2. Line 2: "STD FLTS 3D"; followed by "BARCODED" or "BC" if the pallet contains automation price mail; and followed by "NONBARCODED" or "NBC" if the pallet contains Presorted price mail and/or carrier route price mail.
- h. *SCF*, required, may contain carrier route price, automation price, and Presorted price bundles. Labeling:
1. Line 1: use L002, Column C.
 2. Line 2: "STD FLTS SCF"; followed by "BARCODED" or "BC" if the pallet contains automation price mail; and followed by "NONBARCODED" or "NBC" if the pallet contains Presorted price mail and/or carrier route price mail.
- i. *ASF*, required, except that an ASF sort may not be required if using bundle reallocation under 8.13.3. May contain carrier route price, automation price, and/or Presorted price bundles. Sort ADC bundles to ASF pallets based on the

705.13.2.4

“label to” ZIP Code for the ADC destination of the bundle in [L004](#). At the mailer’s option, sort appropriate mixed ADC bundles to ASF pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L010](#). All optional mixed ADC bundles on ASF pallets must contain only pieces destinating within the ASF as shown in [6.3](#). See [346.3.0](#) for additional requirements for DBMC price eligibility. Labeling:

1. Line 1: use [L602](#), Column B.
 2. Line 2: “STD FLTS ASF”; followed by “BARCODED” or “BC” if the pallet contains automation price mail; and followed by “NONBARCODED” or “NBC” if the pallet contains Presorted price mail and/or carrier route price mail.
- j. *BMC*, required, may contain carrier route price, automation price, and/or Presorted price bundles. Sort ADC bundles to BMC pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L004](#). At the mailer’s option, sort appropriate mixed ADC bundles to BMC pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L010](#). All optional mixed ADC bundles on BMC pallets must contain only pieces destinating within the BMC as shown in [6.3](#). See [363.3.0](#) for additional requirements for DBMC price eligibility. Labeling:
1. Line 1: use [L601](#), Column B.
 2. Line 2: “STD FLTS BMC,” followed by “BARCODED” or “BC” if the pallet contains automation price mail; and followed by “NONBARCODED” or “NBC” if the pallet contains Presorted price mail and/or carrier route price mail.

14.0 Plant Load Mailings

14.1 Basic Information

14.1.1 Purpose

In a plant load operation, the USPS receives mail at a mailer's plant and transports it to bypass handling otherwise required at one or more postal facilities. Plant loads are authorized if they benefit the USPS. The USPS selects the appropriate mode of transportation and determines responsibility as shown below.

TYPE	WHO ARRANGES, PAYS TRANSPORT	RESPONSIBILITY	POSTAGE PAID FROM	ADDITIONAL FORMS ¹
Collection ²	USPS	USPS	Affixed/Mailer Plant	None
Pickup ³	USPS with fee	USPS	Affixed/Mailer Plant	Form 5541
Drop Shipment ⁴	Mailer/USPS	USPS	Acceptance Post Office	None
Drop Shipment Metered Mail	Mailer	Mailer	Post Office of License	None/Endorsement
Business Mail Entry Unit (BMEU)	Mailer	Mailer	BMEU Post Office	None
Destination Entry (drop shipment)	Mailer	Mailer	Entry Office	Form 8125
Periodicals Additional Entry	Mailer	Mailer	Entry Office	Form 3510
Periodicals Exceptional Dispatch	Mailer	Mailer	Entry Office	Statements
Periodicals Airport Mail Facility	Mailer	Mailer	Entry Office	Form 3510
Plant Load	USPS	USPS	Mailer Plant	None
Expedited Plant Load Shipment	Mailer	Mailer	Mailer Plant	Form 8017

1. Postage statements and other appropriate mailing documentation forms are required.

2. Collection applies to mail that is part of an approved collection service and may include Presorted First-Class Mail and all automation price mail. It generally does not apply to mailings at bulk prices.

3. Express Mail, Priority Mail, and scheduled Parcel Post only.

4. Express Mail or Priority Mail service to expedite other class. Only at designated postal facilities; mailers must submit/present shipment to acceptance unit designated by postmaster (mailer transportation). USPS transports by Express Mail or Priority Mail from origin Post Office to destination Post Office of the shipment. If authorized, the shipment is accepted at mailer plant acceptance unit and transported from mailer plant with other mail on USPS transportation.

14.1.2 Service Objectives

The service objectives for the class of mail transported apply to the plant-loaded mail. Plant-loaded mail may have deferred service objectives if provided in the plant load agreement.

705.14.1.3

14.1.3 Service Not Provided

The USPS does not hold, store, or delay the dispatch of plant-loaded mail released to the USPS, except under the plant load agreement with the mailer. The USPS does not relocate trailers on the mailer's premises.

14.2 Application for Plant Load Privileges**14.2.1 Application**

To have mail plant-loaded, the mailer must complete Form 3815 and submit it to the postmaster of the Post Office serving the mailer's plant.

14.2.2 Approval

Generally, a plant load application is approved if transportation is available and cost savings to the USPS are shown. If the application is approved, the mailer must enter into a plant load agreement with the USPS.

14.2.3 Denial and Appeal

If the application is denied, the mailer may appeal through the local postmaster within 10 calendar days of the mailer's receipt of the denial notice to the vice president of area operations for the area in which the mailer's plant is located, giving the reasons why the application should be approved.

14.3 Plant Load Operations**14.3.1 Mixed Mail Classes**

A mailer may combine Periodicals, Standard Mail, Parcel Select, and Package Services in a single vehicle if the mailings are physically separated, a postage statement is submitted for each mailing, and the service standards are met for each class of mail combined in the vehicle or trailer.

14.3.2 Compliance

The mailer must meet all relevant mailing standards and the terms of the plant load agreement. Destination loads must be prepared under [14.5](#) through [14.7](#) and as specified by the postmaster administering the plant load.

14.3.3 Reimbursement by Mailer

Under the plant load privileges and the terms of the plant load agreement, the mailer must reimburse the USPS for services it furnished while providing plant load service, including:

- a. Detention charges when trailers furnished by the USPS are held up for some action or inaction of the mailer.
- b. Costs for bobtailing, deadheading, or waiting/holding, if such charges are incurred by the USPS to provide plant load service for some action or inaction of the mailer.

14.4 Expedited Plant Load Shipment**14.4.1 Definition**

Under an expedited plant load shipment authorization, the USPS verifies and receives postage payment for mailable matter at the mailer's plant, after which the mailer transports the shipment (at the mailer's expense) to a destination postal facility.

14.4.2 Authorization

Only an authorized plant load mailer may prepare and transport expedited plant load shipments. Authorization is by written request to the postal official who authorized the plant load. The request must state, for each destination to which mail is to be transported, the material to be deposited as an expedited plant load shipment (e.g., the class, characteristics, and quantity), the frequency of mailing, and whether the request is for one or for a series of mailings. The mailer must meet all conditions in the authorization, if approved.

14.4.3 Liability

The mailer assumes all liability and responsibility for any loss or damage to the shipment before it is deposited in and accepted at a postal facility, whether or not a third party is used to transport the shipment. The USPS is not liable or responsible for any loss of or damage to an expedited plant load shipment before it is deposited in and accepted at a postal facility.

14.4.4 Postage Refund

The USPS does not refund postage for any failure to provide service caused in whole or in part by any event that occurs before the shipment is deposited in and accepted at a postal facility, except under the applicable standards for refunds.

14.5 Mailer Responsibilities**14.5.1 General**

The plant load mailer must meet the terms of the plant load agreement and the standards that apply to the class of mail prepared, prices claimed, and method of paying postage used.

14.5.2 Verification at USPS Facility

If mail verification does not occur at the mailer's plant, the mailer must:

- a. Keep a plant load control log with a copy of each postage statement, numbered sequentially; the number of each vehicle used to transport plant-loaded mail; and the name of the postal facility where verification is to occur.
- b. Not shrinkwrap or otherwise secure the mail to inhibit verification.
- c. Correct preparation errors found in the mail when verified or pay additional postage at the price for which it qualifies.

14.5.3 Postage

Unless otherwise permitted by standard, the mailer must pay all applicable postage and fees to the origin Post Office before a plant-loaded mailing is dispatched.

14.6 Intradistrict Plant-Loaded Shipments

Intradistrict plant-loaded shipments must fill 50% or more of a vehicle by weight or cube (a minimum of 23,000 pounds or 1,600 cubic feet).

14.7 Interdistrict Plant-Loaded Shipments**14.7.1 One Mailing**

The mailer must prepare interdistrict plant-loaded vehicles containing one mailing under [14.7.2](#) through [14.7.4](#) as appropriate to the class of mail.

14.7.2 First-Class Mail

For plant-loaded shipments of First-Class Mail:

- a. If there is enough mail for the same SCF service area to fill 60% or more of a vehicle by weight or by cube (a minimum of 28,000 pounds or 2,000 cubic feet), the mailer must prepare a direct vehicle for that SCF.
- b. After making up all possible SCF vehicles, if there is enough mail for the same ADC service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that ADC.

14.7.3 Periodicals

For plant-loaded shipments of Periodicals:

- a. If there is enough mail for the same SCF service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that SCF.
- b. After making up all possible SCF vehicles, if there is enough mail for the same ADC service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that ADC.
- c. After making up all possible SCF and ADC vehicles, if there is enough mail for the same transfer hub service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that transfer hub.

14.7.4 Standard Mail, Parcel Select, and Package Services

For plant-loaded shipments of Standard Mail, Parcel Select, and Package Services:

- a. If there is enough mail for the same SCF service area to fill 60% or more of a vehicle by weight or by cube (a minimum of 28,000 pounds or 2,000 cubic feet), the mailer must prepare a direct vehicle for that SCF.
- b. After making up all possible SCF vehicles, if there is enough mail for the same ASF or BMC service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that BMC or ASF.

14.7.5 Two or More Mailings

The mailer must prepare interdistrict plant-loaded vehicles containing two or more mailings under [14.7.6](#) and [14.7.7](#) as appropriate to the class of mail.

14.7.6 Insufficient Volume

Two or more mailings that independently have insufficient volume to require direct destination vehicles to be prepared may be combined to make up an origin vehicle without meeting the standards in [14.7.7](#).

14.7.7 Sufficient Volume

Two or more mailings, which independently have sufficient volume to require destination vehicles to be prepared, must meet these standards when combined:

- a. For First-Class Mail, if there is enough mail for the same ADC service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for the ADC.

- b. For Periodicals, if there is enough mail for the service area of the same transfer hub to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that transfer hub.
- c. For Standard Mail, Parcel Select, and Package Services, if there is enough mail for the same ASF or BMC service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that ASF or BMC.

14.7.8 Destination

The preparation standards for plant-loaded vehicles are determined by the destination of the mailings accepted by the USPS at the mailer's plant.

14.7.9 Two Options

If a plant-loaded mailing does not meet the preparation standards for plant-loaded vehicles under 14.7.1 through 14.7.8, the mailer has two options:

- a. Rework the mailing so that it meets the applicable standard. If the mailing is verified and accepted as mail by the USPS at the mailer's plant and then it is determined that the vehicle preparation standards are not met, the mailer must rework the mailing.
- b. Transport the mailing at the mailer's expense to a postal facility within the origin service area designated by the origin postmaster and with the capability to process that class of mail. If this option is chosen, all applicable postage statements must be provided with the mailings.

15.0 Plant-Verified Drop Shipment

15.1 Description

15.1.1 Purpose

Plant-verified drop shipment (PVDS) enables origin verification and postage payment for shipments transported by a mailer (or third party) at the mailer's expense, on the mailer's own or contracted vehicle, to destination USPS facilities for acceptance as mail. The mailings may be prepared for deposit at a destination entry price, or they may be claimed at the applicable prices from the destination entry facility.

15.1.2 Function

Under PVDS:

- a. Mailings are verified at origin by USPS employees assigned to a detached mail unit (DMU) at a mailer's plant or at the business mail entry unit (BMEU) at the origin Post Office serving the mailer's plant. The shipments are then released for transportation to destination USPS facilities.
- b. For Periodicals, postage is paid at a valid original entry or additional entry Post Office serving the mailer's plant, unless an alternative postage payment method is authorized.
- c. For Standard Mail, Parcel Select, and Package Services, postage and fees are paid under a valid permit at the Post Office serving the mailer's plant, or as designated by the district manager.

705.15.1.3

- d. The shipment is deposited at the destination USPS facility, by the mailer or the mailer's agent, where it is verified and accepted as mail by USPS employees and released for processing.

15.1.3 Other Mailings

The following mailings must be verified, accepted, and paid for at the destination USPS facility:

- a. Periodicals mailings not verified at origin under PVDS or under the Centralized Postage Payment System (see [707.16.0](#) and [707.17.0](#)). The destination USPS facility must be a valid original entry or additional entry Post Office if mailings are submitted there for postal verification.
- b. Standard Mail, Parcel Select, and Package Services mailings not verified and paid for at origin under PVDS. Mailers must have a valid permit at the destination USPS facility for postage payment.

15.1.4 Dates

The postage statement may be submitted before or at the time a shipment is presented to the origin Post Office DMU or BMEU. The date shown by the mailer and the Post Office round stamp date on the postage statement and Form 8125 represents the date the origin Post Office DMU or BMEU verified the shipment and cleared it for dispatch by the mailer to the destination USPS facility. It does not necessarily represent the date the USPS accepts the PVDS at the USPS destination facility as mail.

15.1.5 Postage Refund

The USPS does not refund postage for any failure to provide service caused by any event that occurs before the shipment is deposited and accepted into the mailstream and becomes mail at a destination postal facility, except under [604.9.0](#).

15.2 Program Participation**15.2.1 Mailer Responsibility**

A mailer participating in PVDS must comply with [15.0](#). If the mailer does not meet these requirements, the mailer may be prohibited from participating in PVDS by the local postmaster. Any mailer denied a request for PVDS may file an appeal under [607.2.0](#).

15.2.2 Verification at Mailer's Plant

Before PVDS verification can be performed at the mailer's plant, the mailer must have either a USPS plant load authorization for that plant or a postage payment agreement with the USPS that establishes a detached mail unit (DMU) at that plant. The DMU must be separate from the mailer's activities, in an enclosed, secure, and safe work area with a telephone. The work area must be approved by the USPS. The mailer may submit a letter to the postmaster serving the plant and request PVDS verification at the plant. The postmaster may agree to the mailer's request to verify PVDS shipments at the plant on an as-needed basis, if an approved DMU is established and staffing can be accommodated.

15.2.3 Verification at Origin BMEU

PVDS verification can be performed at the origin business mail entry unit (BMEU) under these conditions:

- a. There is no detached mail unit (DMU) at the mailer's plant.
- b. The mailer is in the service area of the Post Office where the PVDS is to be verified and where postage is to be paid, unless another postal facility is designated by the district manager.
- c. Each vehicle contains only one mailer's shipment(s), each physically separated.
- d. A completed postage statement and Form 8125 accompanies each PVDS (or segment, if the PVDS is contained in more than one vehicle).
- e. If an alternate method of paying postage with permit imprint is used, in addition to 15.2.3d, (additional) required documentation must accompany each PVDS (or segment, if the PVDS is contained in more than one vehicle).
- f. The PVDS can be physically verified at the origin BMEU. Shipments to be verified may not be wrapped or otherwise prepared if a presort and postage verification cannot be performed without destroying the physical integrity of the shipment.
- g. The BMEU has enough space and staff to handle verification, and scales to calculate per piece and gross weights are available. If the Post Office serving the mailer's plant lacks resources, another postal facility may be designated by the district manager.
- h. The mailer must transport all shipments to the Post Office, unload them for verification. When cleared for dispatch, reload the shipments back onto the mailer's vehicle for transportation to the destination USPS facility.

15.2.4 Periodicals

Periodicals postage must be paid at the Post Office verifying the copies or as designated by the district. Postage is calculated from the destination USPS facility where the mail is deposited and accepted (or from the facility where the Express Mail or Priority Mail Open and Distribute destinates). The publisher must ensure that sufficient funds are on deposit to pay for all mailings before their release. A publisher authorized under an alternative postage payment system must pay postage under the corresponding standards.

15.2.5 Standard Mail, Parcel Select, and Package Services

The mailer must pay any applicable permit fees, mailing fees, and postage for Standard Mail, Parcel Select, and Package Services PVDS at either the Post Office serving the mailer's plant or the Post Office that does BMEU verification as designated by the district. If permit imprints are used to pay postage, the mailer must ensure that sufficient funds are on deposit to pay for all shipments before their release. For Nonprofit Standard Mail prices, a valid authorization must be on file at the Post Office where postage is paid. No permit, fees, or authorizations are required at the destination USPS facility where PVDS mailings are deposited.

15.2.6 Postage Statement—Periodicals

The mailer must submit a Form 3541 for each edition of each issue of each publication prepared for deposit at each destination USPS facility when the corresponding copies are presented to the DMU or the Post Office BMEU for verification. When required by the USPS, the mailer must submit consolidated postage statements and a postage statement register.

15.2.7 Postage Statement—Standard Mail

At the time mail is presented for verification, the mailer must submit an appropriate Form 3602 representing all the pieces from the mailing job and Form 3602-C (or postage statement register) for all PVDS verified at the mailer's DMU or the Post Office BMEU. The mailer must enter the required information on Form 3602-C for each PVDS to be deposited at each destination USPS facility, in lieu of providing a separate Form 3602 for each PVDS.

15.2.8 Postage Statement—Parcel Select and Package Services

At the time mail is presented for verification, the mailer must submit an appropriate postage statement for each PVDS mailing destined for each destination USPS facility. When required by the USPS, the mailer must submit consolidated postage statements and a postage statement register.

15.2.9 Form 8125 and Form 8125-C

Form 8125 is used to report a single PVDS that the mailer will transport from origin to a destination USPS facility. Computer-generated Form 8125-C (format available at www.usps.com) provides for reporting multiple PVDS mailings that are prepared by an individual mailer and that are cleared at origin on the same day for entry at a single destination USPS facility on the same vehicle (see [15.2.11](#)). The mailer must submit a completed Form 8125 (signed and dated by the DMU or BMEU) for each PVDS to the destination USPS facility. The form must be submitted in duplicate, or in triplicate if the mailer desires a signed and dated copy returned to its representative when depositing the mail at the destination USPS facility. Form 8125 is not required for PVDS sent via Express Mail or Priority Mail Open and Distribute under [16.0](#).

15.2.10 Facsimile Forms 8125 and 8125-C

Facsimile Forms 8125 may be used in lieu of the USPS form. Formats must be approved in advance by the district manager of Business Mail Entry or designee. Formats must include all required information, including the correct title (preceded by the word "facsimile") and edition date, in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information relating to the PVDS, and other extraneous information that appears on the USPS form, do not have to be included. Form 8125-C must always be computer-generated. Form 8125-C may omit the "Number of Pieces" and "Piece Weight" columns for mailings prepared in sacks, trays, or on pallets if there is sufficient information for the origin Post Office and destination USPS facility to identify the mailings and to compare the information on the form with the physical mail. The mailer must report the number of pieces in each mailing on Form 8125-C if the mailings consist of individual mailpieces that are not prepared in containers (e.g., bedloaded parcels). For mailings consisting of identical-weight pieces, mailers should report the piece weight where possible.

15.2.11 Mailer Transport of PVDS

Using any means of transportation, including Express Mail or Priority Mail Open and Distribute shipment, the mailer must transport PVDS mailings from origin to the destination USPS facility. The mailer must not transport PVDS mailings on the same vehicle with shipments not entered as PVDS. For Standard Mail, Parcel Select, and Package Services PVDS, the mailer must meet the scheduling standards for mail deposit at destination USPS facilities. If a vehicle contains mail paid at Parcel Select destination entry prices, the applicable standards for scheduling of deposits and

unloading of vehicles apply to any other mail on the same vehicle for the same destination USPS facility. Any material classified as hazardous under [601.10.0](#) may not be carried in the same vehicle as PVDS mailings.

15.2.12 Separation of PVDS Mailings

When a vehicle contains more than one PVDS for a single destination USPS facility, the shipments must be separated to allow reconciliation with each accompanying Form 8125. Vehicles containing shipments for multiple destination USPS facilities must be kept physically separated. Where applicable, a single Form 8125 that identifies all the mail for a single facility must be prepared for a shipment of copalletized or combined mailings.

15.2.13 PVDS Seal

The mailer may ask that a PVDS band seal secure the vehicle containing verified mailings before dispatch to the destination facility.

15.3 Liability

The mailer assumes all responsibility and liability for any loss or damage to PVDS mailings before they are deposited and accepted as mail at destination USPS facilities, including third party transportation.

15.4 Standard Mail Documentation

15.4.1 Same Day

All mailings or segments of the same job submitted for verification and release on the same day under PVDS must be reported on a single postage statement and Form 3602-C (or postage statement register).

15.4.2 Documentation

In addition to the documentation required in [708.1.0](#), the mailer must also submit the documentation below at the time the first mailing identified on Form 3602-C is presented for verification:

- a. Form 3602-C, which serves as the postage statement register, along with the appropriate postage statement. All mailing volumes, weights, and postage for each price category are entered on the postage statement and used to debit the mailer's account for permit imprint mailings and to enter data on postage-affixed mailings.
- b. A separate Form 8125 for each PVDS listed on Form 3602-C (or postage statement register). Each PVDS must be identified with a unique statement number (e.g., the date and a sequential three-digit suffix) on the Form 3602-C (or postage statement register) and the corresponding Form 8125, as appropriate.
- c. A separate postage statement showing the mailing Post Office is the same as the Post Office of PVDS origin for any portion of a job accepted by the local verifying office under a standard plant load arrangement. Plant load mailings are not considered a PVDS and are not reported on Forms 3602-C and 8125.

15.5 Parcel Select and Package Services PVDS Option

15.5.1 General Standards

Under this option, in addition to the individual postage statements required for each Parcel Select or Package Services mailing, the mailer may be required to submit postage statement registers and consolidated postage statements for PVDS mailings. A single, unique USPS mailing number must be on all related individual postage statements and postage statement register listing these individual statements, and the associated consolidated postage statement. When a mailer is required to submit consolidated postage statements, the information on these statements is used to debit the mailer's account.

15.5.2 Individual Postage Statements

The mailer must submit a complete postage statement for each mailing for each destination USPS facility when the mailing is presented for verification and postage payment. In addition to the information required on all individual postage statements, if the mailer is required to submit consolidated postage statements (for three or more entry Post Offices) for debiting of the advance deposit account, each individual postage statement must include a uniquely assigned postage statement sequence number that must not exceed nine digits. The numbers must be sequential within a job or mailing cycle for mailings verified, paid for, and cleared for dispatch on the same day. The statements must also include a unique USPS mailing number corresponding to the number on the related postage statement register and consolidated postage statement.

15.5.3 Postage Statement Register

A postage statement register is a computer-generated line item listing of all individual postage statements for PVDS permit imprint mailings verified and released for dispatch on a single day from a job or mailing cycle. All postage statements listed on a postage statement register must be represented by a corresponding consolidated postage statement. The total postage charge on the postage statement register must be identical to the total postage charge on the corresponding consolidated statement. The following information must appear on each postage statement register:

- a. At the top of the first page the endorsement "Register of Postage Statements"; name and location of the mailing agent; date mailings are verified and cleared for dispatch; the permit imprint number; the unique USPS mailing number corresponding to the number on related postage statements; and the related consolidated statement.
- b. Each line item must include (based on the individual postage statement on that line) the unique postage statement sequence number; destination USPS facility; and, for that statement, total postage, weight, and number of pieces.
- c. The sum of the total postage charges must appear with total weight, and total pieces must be listed from each postage statement. The total postage charge on the register must match total postage charge on the related consolidated statement.

- d. If necessary, manual corrections may be made to the postage statement register listing the data from any revised individual statement. These corrections must be documented by the DMU, and the corrected register must be signed and dated by both the mailer and the USPS representative approving the changes. The changes on the register must be reflected on the associated consolidated postage statement.

15.5.4 Submitting Register

The mailer must submit the postage statement register to the DMU before or when presenting the first individual mailing on the register to the DMU for verification and dispatch.

15.5.5 Consolidated Postage Statement

The consolidated postage statement assembles data from the individual postage statements representing permit imprint mailings verified, paid for, and released for dispatch on a single day from a job or mailing cycle. The consolidated postage statement must be a computer-generated facsimile similar in format to the appropriate USPS postage statement. The mailer must sign and date the consolidated statement. Certain data elements not on the individual postage statements must be reflected on the consolidated statement, including the range of unique individual statement sequence numbers, the number of individual statements represented, and the endorsement "Consolidated Postage Statement." Other data elements on individual statements, such as each Post Office of deposit for PVDS mailings, are not shown on the consolidated statement. Each individual statement must contain a USPS mailing number that corresponds to the USPS mailing number on the related consolidated statement. The consolidated statements are used to debit the mailer's account. The following information must be identical for each individual statement consolidated onto a single (consolidated) postage statement:

- a. Mailing date.
- b. Name and location of mailing agent.
- c. Processing category.
- d. Permit imprint number.
- e. Job or mailing cycle description.
- f. Unique USPS mailing number corresponding to the number on related individual postage statements.

15.5.6 Calculating and Reporting Data

Each field on the consolidated postage statement represents the sum of the figures in that field from the individual postage statements. The figures reported on the consolidated statement must be rounded in accordance with [604.7.1.3](#). All fields containing data on the individual statements must be rolled up to the consolidated statement. The total postage on the consolidated statement must be the sum of the total postage for all individual postage statements. This total is used to debit the mailer's account.

705.15.5.7

15.5.7 Submitting Statement

The mailer must submit the consolidated postage statement to the DMU at or before the time the last individual postage statement it represents is submitted to the DMU for the day's mailing.

16.0 Express Mail Open and Distribute and Priority Mail Open and Distribute**16.1 Prices and Fees****16.1.1 Basis of Price**

Mailers must pay Express Mail and Priority Mail postage based on the weight of the entire contents of the Express Mail or Priority Mail shipment. Do not include the tare weight of the external container. Do not apply Priority Mail dimensional weight pricing or Periodicals container prices to the external container.

16.1.2 Zone Prices

Compute zone prices for Priority Mail from the accepting Post Office to the destination facility for the container (not the destination Post Office for the enclosed mail).

16.1.3 Enclosed Mail

The mail enclosed in an Express Mail or Priority Mail Open and Distribute container must be either entirely single-piece price matter or entirely presorted matter that is part of the same mailing.

16.1.4 Calculating Payment for Enclosed Mail

Mailers must prepay postage and fees for the enclosed mail under the applicable standards. When the enclosed mail is zone-priced, the zone is computed from the postal facility where the Express Mail Open and Distribute or Priority Mail Open and Distribute container destines.

16.1.5 Payment Method

Postage on the enclosed mail may be paid by any method permitted for that mail class, except for ordinary postage stamps requiring cancellation. Express Mail postage must be paid under 114. Priority Mail postage must be paid with adhesive stamps or meter stamps affixed to green Tag 161, pink Tag 190, or orange Label 23 or with a permit imprint through a manifest mailing system, optional procedure mailing system, or alternate mailing system authorized under 2.0, 3.0, or 4.0. If a permit imprint is used for Priority Mail postage, the permit imprint must be affixed to or hand-stamped on the Tag 161, Tag 190, or Label 23, or be part of the address label.

16.1.6 Postage Statement for Enclosed Mail

The mailer must provide the correct postage statement for the enclosed mail. The postage statement must show the total number of Express Mail Open and Distribute or Priority Mail Open and Distribute containers used for the mailing in addition to the number of sacks, trays, or other enclosed containers. If the enclosed mail is zone-priced, the mailer must either provide documentation that details the pieces and postage, by zone for each Express Mail Open and Distribute or Priority

Mail Open and Distribute shipment destination, or provide a separate postage statement for each Express Mail Open and Distribute or Priority Mail Open and Distribute shipment destination. The mailer must always present the mailing to the designated USPS acceptance unit for verification of postage and fees. A postage statement is not required for the Express Mail or Priority Mail portion of the Open and Distribute shipment, unless Priority Mail postage is paid by permit imprint.

16.1.7 Authorization

No authorization is required for Express Mail Open and Distribute or Priority Mail Open and Distribute. The mailer must pay all applicable fees, obtain necessary authorizations for the enclosed mail, and pay postage at the Post Office where the Express Mail Open and Distribute or Priority Mail Open and Distribute shipment is mailed.

16.2 Basic Standards

16.2.1 Description of Express Mail Open and Distribute and Priority Mail Open and Distribute

Express Mail Open and Distribute and Priority Mail Open and Distribute provide alternatives for mailers who want to expedite mailings of other classes of mail to destination postal facilities. Mailers prepare the mailings according to standards for the enclosed class of mail, enclose the mail in containers for expedited service as either Express Mail Open and Distribute or Priority Mail Open and Distribute, and present the mailings to a postal acceptance unit by the critical entry time for USPS shipment under 16.0. Mailers may use Express Mail Open and Distribute or Priority Mail Open and Distribute for all or part of their mailings.

16.2.2 Content Standards

The Express Mail or Priority Mail shipment and the enclosed mail must meet all corresponding eligibility and preparation standards (see 110 for Express Mail standards and 120 for Priority Mail standards). For mail enclosed in an Express Mail Open and Distribute container, available extra services are indicated in 16.3.2. For mail enclosed in a Priority Mail Open and Distribute container, available extra services are indicated in 16.4.2. Mailpieces requiring cancellation may not be included in an Express Mail Open and Distribute or a Priority Mail Open and Distribute shipment. Mailers are not required to place bundles of mail in sacks or trays when all of the mail enclosed in an Open and Distribute container is destined to a 5-digit facility.

16.3 Additional Standards for Express Mail Open and Distribute

16.3.1 Service Objectives

The Express Mail service guarantee for an Express Mail Open and Distribute shipment ends upon receipt of the Express Mail container at the destination postal facility of the shipment. The service guarantee does not apply to the delivery of the enclosed mail to the addressees.

16.3.2 Extra Services

No extra services may be added to the Express Mail segment of an Express Mail Open and Distribute shipment, and the enclosed mail may receive only the following extra services:

705.16.4

- a. First-Class Mail pieces may be sent with Certified Mail service or special handling or, for parcels only, Delivery Confirmation or Signature Confirmation service.
- b. Priority Mail pieces may be sent with Certified Mail service, special handling, Delivery Confirmation, or Signature Confirmation service.
- c. Standard Mail parcels and NFMs (except Customized *MarketMail* pieces) may be sent with electronic option Delivery Confirmation service.
- d. Parcel Select and Package Services mail may be sent with special handling or, for parcels only, Delivery Confirmation or Signature Confirmation service.

16.4 Additional Standards for Priority Mail Open and Distribute

16.4.1 Service Objectives

All Priority Mail Open and Distribute containers receive expeditious handling and transportation. The USPS follows uniform guidelines for delivering the containers to a destination postal facility but does not guarantee delivery within a specified time.

16.4.2 Extra Services

[7-3-08] No extra services are available for Priority Mail Open and Distribute containers. The mail enclosed in the container may receive only the following services:

- a. First-Class Mail pieces may be sent with Certified Mail service or special handling or, for parcels only, Delivery Confirmation or Signature Confirmation service.
- b. Standard Mail parcels and NFMs (except Customized *MarketMail* pieces) may be sent with electronic option Delivery Confirmation service.
- c. Parcel Select and Package Services mail may be sent with special handling or, for parcels only, Delivery Confirmation or Signature Confirmation service.

16.5 Preparation

16.5.1 Containers for Expedited Transport

[9-11-08] Acceptable containers for expedited transport are as follows:

- a. An Express Mail Open and Distribute shipment must be contained in a USPS-approved sack using Tag 157, except as provided in [16.5.1c](#) and [16.5.1d](#).
- b. A Priority Mail Open and Distribute shipment must be contained in either a USPS-approved sack using Tag 161 or Tag 190 or in a letter-size tray using Label 23, except as provided in [16.5.1c](#) and [16.5.1d](#).
- c. An Express Mail or Priority Mail Open and Distribute shipment destined to a DDU may be contained in a USPS-provided Express Mail flat-rate envelope using Tag 157 or Priority Mail flat-rate envelope or boxes using Tag 190.
- d. Customized *MarketMail* (CMM) pieces may be contained in USPS-provided Express Mail or Priority Mail envelopes and boxes or in any properly labeled container supplied by the mailer.

16.5.2 Express Mail and Priority Mail Container Labels

Sack and tray labels for Express Mail or Priority Mail sacks and trays containing Open and Distribute shipments must be barcoded and meet the requirements in [708.6.0](#). All lines of information must be completely visible when inserted into the label holder. Label sacks and trays as follows:

- a. Line 1 (destination line) provides information on the destination entry office where the enclosed mail is to be distributed. For destination delivery unit (DDU) distribution, use the facility name and ZIP Code found in the Drop Shipment Address File available at the USPS FAST Web site at: <https://fast.usps.com>. (click on “Resources” in the left-hand navigation bar, then “Drop Ship Product File Download”).
 1. For SCF distribution, use the destination in [L005](#), Column B. For ADC distribution, use the destination in [L004](#), Column B. For BMC distribution, use the destination in [L601](#), Column B. For ASF distribution, use [L602](#), Column B.
 2. For Line 2 (content line), print “EXPRESS MAIL OPEN AND DIST” or “PRIORITY MAIL OPEN AND DIST,” as applicable.
 3. For Line 3 (origin line), show the city and state of the entry Post Office or the mailer’s name and the city and state of the mailer’s location. It is recommended that the mailer’s name also appear with the city and state of the entry Post Office. See [708.6.1.5](#) for additional standards.

16.5.3 Tag 157—Express Mail Open and Distribute

[\[9-11-08\]](#) In addition to the Express Mail sack label, mailers must place the proper Express Mail mailing labels in EP-13 envelopes and attach the envelope to a black-and-white Tag 157 to each sack or container to identify it as an Express Mail Open and Distribute shipment. This tag or an approved facsimile also must be affixed to containers used for Express Mail Open and Distribute shipments prepared under [16.5.1c](#) or [16.5.1d](#).

16.5.4 Tags 161 and 190—Priority Mail Open and Distribute

[\[9-11-08\]](#) [\[7-3-08\]](#) Tag 161 and Tag 190 (or approved facsimiles) provide a place to affix Priority Mail postage and the address label for the destination facility. Tag 161 or Tag 190 must be attached to each Priority Mail sack, in addition to the Priority Mail sack label, or container to identify it as a Priority Mail Open and Distribute shipment as follows:

- a. Attach Tag 161 to sacks used as Priority Mail Open and Distribute containers to a BMC, ASF, ADC, or SCF facility.
- b. Attach Tag 190 to sacks used as Priority Mail Open and Distribute containers to a DDU. This tag or an approved facsimile also must be affixed to containers used for Priority Mail Open and Distribute shipments prepared under [16.5.1c](#) or [16.5.1d](#).

16.5.5 Label 23—Priority Mail Open and Distribute

As an alternative to sacks for Priority Mail Open and Distribute shipments, mailers may use letter trays (or mailer-supplied containers for CMM pieces) as follows:

705.16.5.6

- a. Label 23 is affixed to the letter tray or mailer-supplied container. A single Label 23 may be used to identify two letter trays strapped together. Mailer-supplied containers may not be strapped together.
- b. If two letter trays are strapped together, each tray must be of identical size and individually strapped under 235.3.4. Label 23 must be affixed to the sleeve of the top tray before strapping. The trays must be strapped securely around the length of the two trays.
- c. The total weight of two trays strapped together or mailer-supplied containers used for CMM may not exceed 70 pounds.

16.5.6 Address Labels

[7-3-08] In addition to Tag 157, Label 23, Tag 161, or Tag 190, USPS-supplied containers and envelopes and mailer-supplied containers used for Express Mail Open and Distribute or Priority Mail Open and Distribute must bear an address label that states "OPEN AND DISTRIBUTE AT:" followed by the facility name. Find the facility name and other information for addressing the labels, according to the type of facility, in 16.5.8 through 16.5.12.

16.5.7 Address Label Service Barcode Requirement

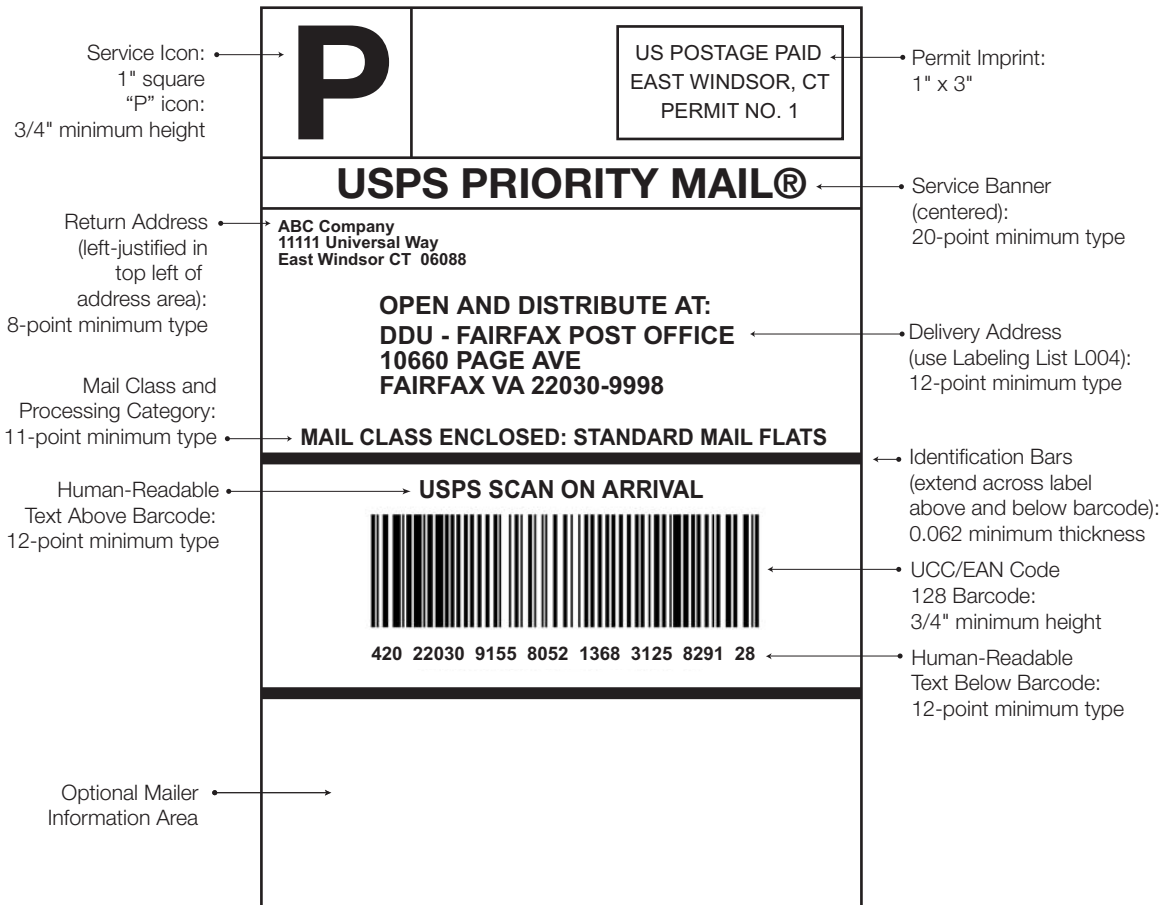

[7-3-08] An electronic Service barcode using the concatenated UCC/EAN Code 128 symbology must be incorporated in the address label. Mailers must prepare address labels using the formats in 16.5.8 through 16.5.12, including the service type code "55" to identify the service and the human-readable text "USPS SCAN ON ARRIVAL" above the barcode. USPS certification is required from the National Customer Support Center (NCSC) for each printer used to print barcoded open and distribute address labels, except for barcodes created using USPS Shipping Assistant. NCSC contact information, formatting specifications for barcodes and electronic files, and certification, are included in Publication 91, *Confirmation Services Technical Guide*. Mailers can use any of the following options available to create a label with a Service barcode for Priority Mail Open and Distribute address labels:

- a. Select a service software developer from the list of companies that have met Postal Service specifications for the electronic file and barcode available at <http://www.usps.com/shipping/shipsystems.htm>.
- b. Register and download the USPS Shipping Assistant desktop application available at <http://www.usps.com/shippingassistant/>.
- c. Register and integrate the USPS Web Tools Application Program Interface (API) for Priority Mail Open and Distribute using your own developers, available at <http://www.usps.com/webtools/>.
- d. Use Publication 91, *Confirmation Services Technical Guide*, for technical specifications and requirements.

16.5.8 DDU Address Labels

[7-3-08] For the DDU address label, use the name of the DDU on the top line; the street address of the facility on the next line; and city, state, and ZIP+4 code on the last line of the address block. For the DDU address label, use the destination facility name, the street address, city, state, and ZIP+4 found in the Drop Entry Point View File available at USPS' FAST Web site: <https://fast.usps.com> (click on Reports>Mail Direction Search>Drop Entry Point View). Directly below the address, indicate the class and processing category of the enclosed mail. See Exhibit 16.5.8 for an example of a DDU address label.

Exhibit 16.5.8 DDU Address Label

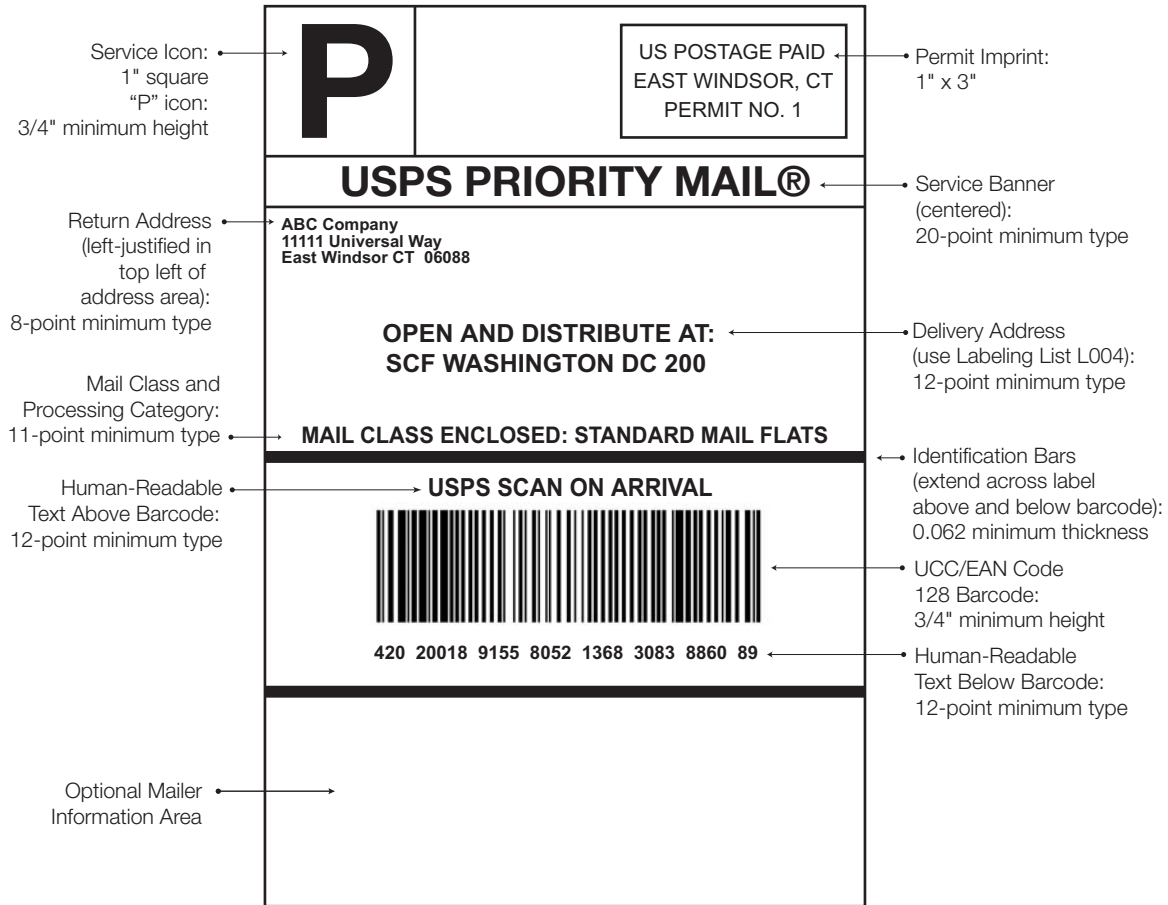

Label:
4" x 6"

705.16.5.9

16.5.9 SCF Address Labels

[7-3-08] For the SCF address label, use SCF followed by the city, state, and ZIP Code found in the Drop Entry Point View File available at USPS' FAST Web site: <https://fast.usps.com>. Directly below the SCF facility name, indicate the class and processing category of the enclosed mail. See Exhibit 16.5.9 for an example of an SCF address label.

Exhibit 16.5.9 SCF Address Label

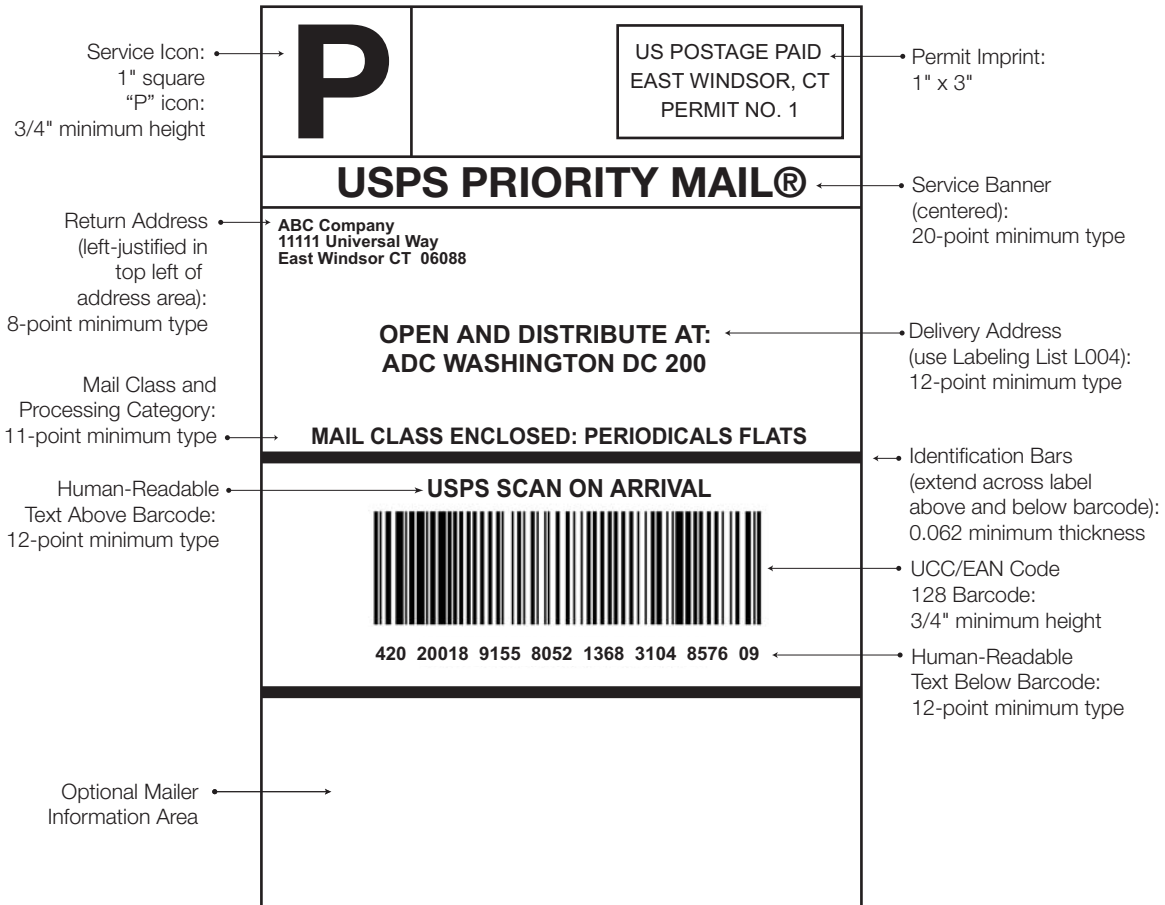

Label:
4" x 6"

16.5.10 ADC Address Labels

[7-3-08] For the ADC address label, use ADC followed by the city, state, and ZIP Code found in the Drop Entry Point View File available at USPS' FAST Web site: <https://fast.usps.com>. Directly below the ADC facility name, indicate the class and processing category of the enclosed mail. See Exhibit 16.5.10 for an example of an ADC address label.

Exhibit 16.5.10 ADC Address Label

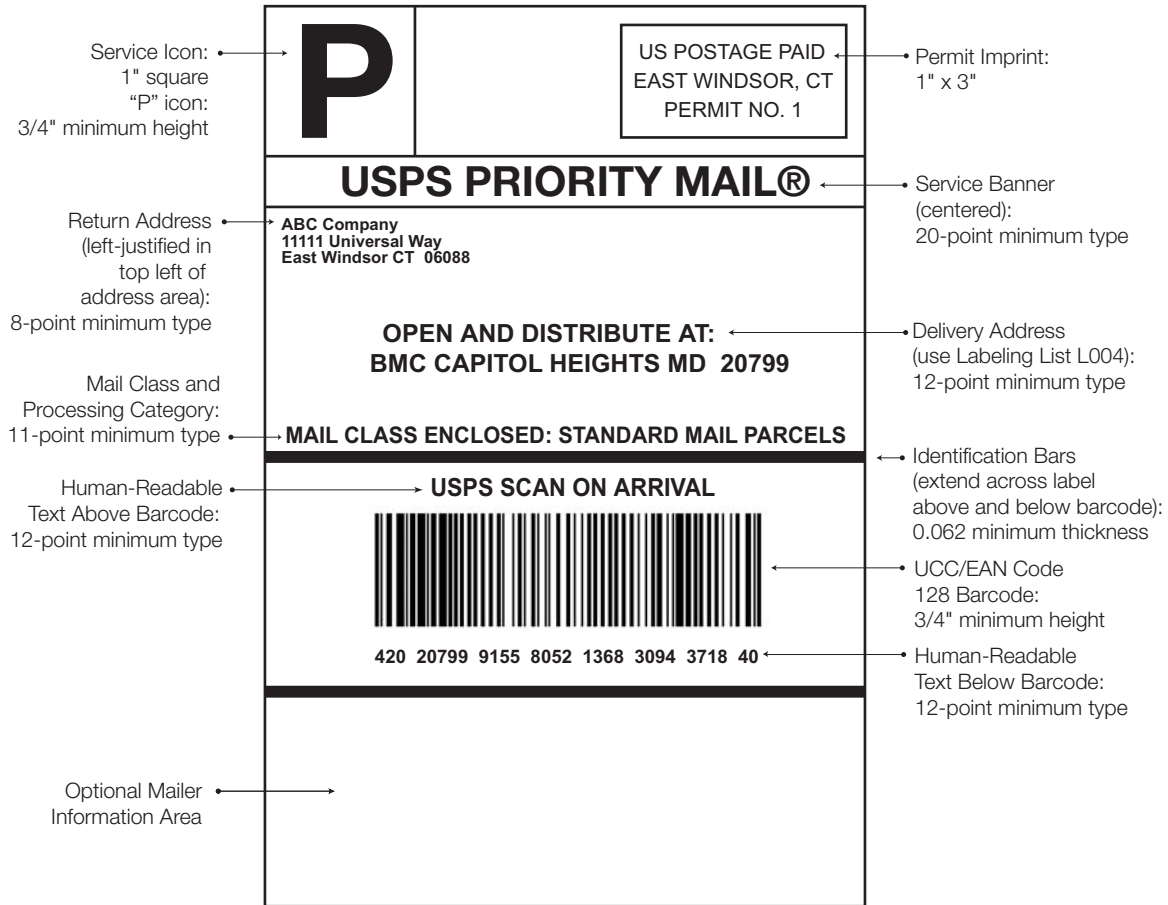

Label:
4" x 6"

705.16.5.11

16.5.11 BMC Address Labels

[7-3-08] For the BMC address label, use BMC followed by the city, state, and ZIP Code found in the Drop Entry Point View File available at USPS' FAST Web site: <https://fast.usps.com>. Directly below the facility name, indicate the class and processing category of the enclosed mail. See Exhibit 16.5.11 for an example of a BMC address label.

Exhibit 16.5.11 BMC Address Label

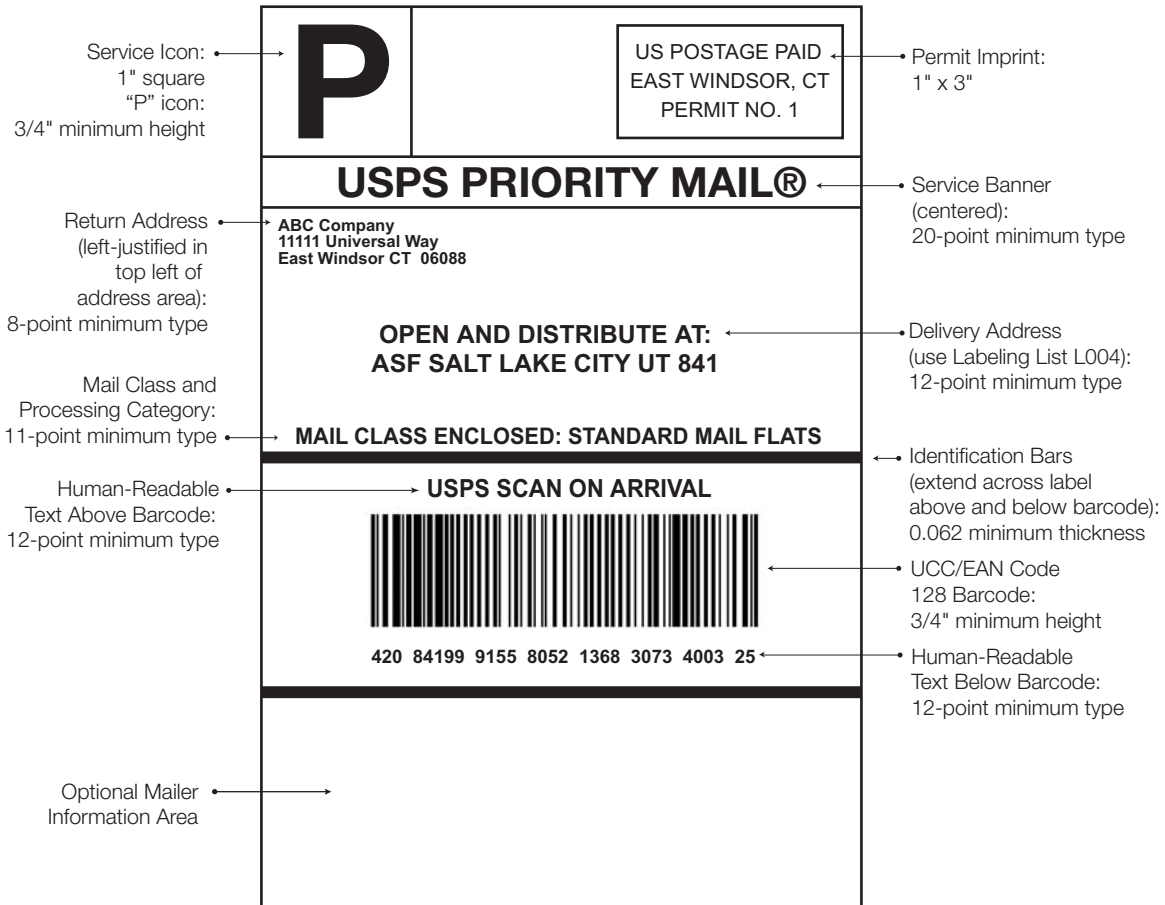

Label:
4" x 6"

16.5.12 ASF Address Labels

[7-3-08] For the ASF address label, use ASF followed by the city, state, and ZIP Code found in the Drop Entry Point View File under BMC available at USPS' FAST Web site: <https://fast.usps.com>. Directly below the address, indicate the class and processing category of the enclosed mail. See Exhibit 16.5.12, *ASF Address Label* for an example of an ASF address label.

Exhibit 16.5.12 ASF Address Label

Label:
4" x 6"

705.16.5.13

16.5.13 Markings on Enclosed Mail

The enclosed mail may show one of the optional markings below. The optional marking must be placed directly below or to the left of the postage area. The optional marking may appear in any type font. When an optional marking is used, the type size of the required price marking (see 202 for letters, 302 for flats, or 402 for parcels) must be at least 8 points.

**16.6 Enter and Deposit****16.6.1 Verification and Entry**

Mailers must prepare Express Mail Open and Distribute and Priority Mail Open and Distribute shipments under 16.2 and 16.5 and present shipments at a business mail entry unit (BMEU) or other location designated by the postmaster to accept both the enclosed mail and when applicable, Express Mail. Mailers must present shipments to the BMEU with enough time for acceptance, processing, and dispatch, before the facility's critical entry time for Express Mail or Priority Mail.

17.0 Express Mail Reshipment Service**17.1 Basic Information****17.1.1 General**

The USPS gathers mail addressed to Post Office boxes or business street addresses and dispatches it as a Custom Designed or Next Day Service shipment under a service agreement (PS Form 5637) between the USPS and the mailer, subject to these standards:

- a. Service frequency is scheduled.
- b. The mailer is charged a Pickup on Demand fee each time mail is collected for reshipment from a Post Office no matter how many Post Office boxes or business street addresses the mailer may have at that office.

- c. Express Mail postage and fees are paid by Express Mail Corporate Account or federal agency “Postage and Fees Paid” indicia. The sack or container and its contents are considered a single piece for calculation of the Express Mail price of postage and must not exceed 70 lbs.
- d. The mailer must keep a postage-due, merchandise return service, or business reply mail account at the postal facility where the Post Office box or business street address is located for any shortpaid, merchandise return service, or business reply mail. The service agreement (PS Form 5637) must state that such an account exists.
- e. Express Mail reshipment service is not available for Registered Mail, Certified Mail, COD, insured, or Express Mail items. The mailer must give instructions for redirecting such items on PS Form 1093, Application for Post Office Box or Caller Service, for mail originally addressed to Post Office boxes, or on PS Form 5637 for mail originally addressed to business street addresses.
- f. The service agreement must list the Business Development Team at the originating office as the “Firm Representative” and show the pickup time is when the USPS employee gathers the mail and prepares it for dispatch as Express Mail.
- g. Commencement and termination of service agreements are subject to the standards for Express Mail Custom Designed Service.

18.0 Metered Mail Drop Shipment

18.1 Basic Information

18.1.1 General

A customer may affix postage using a postage meter (postage evidencing system) licensed at one Post Office (licensing Post Office) and deposit that mail at another Post Office (entry Post Office) only if prior authorization is obtained from the USPS under one of the procedures described below. Such authorization may be revoked under [18.2.6](#) when the USPS determines that information or circumstances supporting the original authorization may no longer be accurate, complete, or applicable. ([604.4.0](#) provides an exception to this standard for metered Express Mail, Priority Mail, and single-piece price metered mail.) These general conditions apply:

- a. The meter stamp or indicium must show the name of the licensing Post Office.
- b. Metered mailpieces that bear meter impressions or other endorsements containing the wrong Post Office name, authorization number (as applicable), or other required information are not accepted.
- c. A metered mail drop shipment must be deposited at the time and place and under any additional condition specified by the USPS.
- d. Annual mailing fees, as applicable for the class of mail, must be paid at the office(s) where mailings will be entered, as required under [233.3.4](#) or [243.3.4](#).

705.18.1.2

18.1.2 Effect on Service

The USPS assumes no responsibility for the material presented until it is accepted into the mail. The USPS is not responsible for service delays when the mailer does not meet the applicable preparation or entry requirements. Entry of mail by drop shipment may adversely affect the USPS's ability to achieve the applicable service objectives.

18.1.3 Changes

A mailer authorized to drop ship metered mail must inform the approving official of all changes to the information originally provided as part of the application. When the USPS asks, the mailer must submit additional information supporting that authorization. Failure to provide this information is grounds to revoke the authorization.

18.2 Authorization**18.2.1 Options 1 & 2**

Authorizations under Options 1 and 2 in [18.3, Option 1: Deposit at P&DC/F](#), and [18.4, Option 2: Deposit at Another Post Office](#), are granted to meter license holders. The meter license holder must apply in writing to the district manager of business mail entry whose district includes the licensing Post Office of the meter holder.

18.2.2 Options 3 & 4

Authorization under Option 3 in [18.5, Option 3: Consolidated Drop Shipment With Endorsement](#), is granted to mailers intending to present mail for other meter license holders (including their own mail, if applicable) at one location other than the licensing office(s), whereas authorization under Option 4 in [18.6, Option 4: Consolidated Drop Shipment Without Endorsement](#), is granted for mailings presented at more than one location. For authorization under Option 3, the mailer or consolidator must apply in writing to the district manager of business mail entry whose district includes the Post Office(s) where the mailings are verified for presort preparation and payment of postage. Applications under Option 4 must be submitted to the manager, Business Mailer Support.

18.2.3 Application

The application must describe the classes of mail to be deposited and the volume, processing category, frequency of mailing, and requested deposit schedule of each. The application must also state how the mail to be entered meets applicable eligibility and service standards and must identify any third party preparing and presenting the mail. The application must be prepared on the mailer's letterhead and signed by an authorized manager or representative. There is no USPS form for this purpose. Additional information is required for Options 3 and 4. Mailers seeking authorization under Option 4 must contact Business Mailer Support, USPS Headquarters, for guidance (see [608.8.0](#) for address).

18.2.4 Notification

The manager of business mail entry (or the manager, Business Mailer Support under Option 4) notifies the applicant in writing of approval or conditions of approval, including the drop shipment (DS) authorization number, or denial.

18.2.5 Application Denial

A decision denying an application for operational reasons may be appealed within 15 days of its receipt to the area manager of processing and distribution. If denied because of noncompliance with applicable eligibility standards, the applicant may appeal the denial under [607.2.0](#).

18.2.6 Revocation

An authorization may be revoked:

- a. When it is determined that the authorized entry no longer reduces postal handling or improves service, or is not in the best interests of the USPS.
- b. For nonuse during any consecutive 12 months.
- c. When used in operating any unlawful scheme or enterprise, or for any noncompliance with the regulations governing the use of postage meters.

18.2.7 USPS Authorities

Authorization is revoked by:

- a. The manager of business mail entry of the district originally issuing authorization or the manager, Business Mailer Support.
- b. The postmaster of the licensing Post Office (under any option) when it is used in operating any unlawful scheme or enterprise, or for any noncompliance with the regulations for postage meters.

18.2.8 Nonuse

If revocation is for nonuse, and the mailer shows that use is to resume within 90 days after the revocation notice, revocation may be deferred for a period not to exceed 90 days from the date of the original revocation notice.

18.2.9 Appeal

Written appeal of the revocation notice may be made within 15 days of its receipt, under [607.2.0](#).

18.3 Option 1: Deposit at P&DC/F

Metered mail of any class may be entered and deposited by the licensed meter holder or an agent at the local processing and distribution center/facility (P&DC/F) making the initial originating distribution of mail deposited at the Post Office where the meter license is held. Mail must be prepared under the standards for the class and price claimed and as specified in the drop shipment authorization. The mailer may be required to prepare and deposit the mail in an additional manner that best enhances postal handling as specified in the drop shipment authorization. Any such requirements are modified to reflect changes in the mailings subsequently presented by the mailer. Failure to meet these standards may lead to revocation of the authorization.

18.4 Option 2: Deposit at Another Post Office**18.4.1 Eligibility**

Metered mail of any class may be entered and deposited by the licensed meter holder or an agent at a Post Office other than the licensing Post Office or P&DC/F serving the licensing Post Office. Mail must be prepared under the standards for the

class and price claimed and as specified in the drop shipment authorization. The mailer may be required to perform additional preparation and meet specific deposit schedules to enhance postal handling. Any such requirements are specified in the drop shipment authorization and may be modified to reflect changes in the mailings subsequently presented by the mailer. Failure to meet these standards may lead to revocation of the authorization.

18.4.2 Endorsement

Each mailpiece deposited under this option must contain an endorsement with the city and state of the entry Post Office, the words “Drop Shipment Authorization” (or the abbreviation “D/S AUTH”), and the unique authorization number issued by the district manager of business mail entry serving the entry Post Office. If the abbreviation “D/S AUTH” is not used, the mailing office ZIP Code may be used instead of the city and state of mailing. The endorsement must be included in digital indicia or placed outside the indicium boundary in 8-point or larger type by a computer or mechanical method providing a clear and legible impression. For letter press indicia, the endorsement must appear in the ad plate area. The application and the endorsement format must be approved by the district manager of business mail entry before mail is deposited under this option.

EXAMPLES

Full Endorsement – Mailing Office City and State

MAILED AT CHICAGO IL	DROP SHIPMENT
DROP SHIPMENT	AUTHORIZATION 48
AUTHORIZATION 12	MAILED AT YAKIMA
	WA

Full Endorsement – Mailing Office ZIP Code

MAILED AT 606	DROP SHIPMENT
DROP SHIPMENT	AUTHORIZATION 48
AUTHORIZATION 12	MAILED AT 98901

Abbreviated Format

CHICAGO IL	D/S AUTH 48
D/S AUTH 12	YAKIMA WA

18.4.3 Not Valid

Drop shipment endorsements authorized before March 19, 1989, are no longer valid.

18.4.4 Price and Class Marking

The drop shipment endorsement placed in the ad plate area or within the indicium boundary may include the marking required by the standards for the price claimed if that marking is placed directly below the drop ship endorsement and meets the standards in [202](#) for letters, [302](#) for flats, and [402](#) for parcels. The marking may also be provided separately directly below the indicium boundary if the marking meets the relevant size and legibility standards.

18.5 Option 3: Consolidated Drop Shipment With Endorsement

18.5.1 General

A mailer presenting a consolidated mailing may apply to collect metered mail bearing postage from meters licensed at different Post Offices and present such mailings at one Post Office, subject to the conditions and limitations in 18.5. All conditions for presenting presort mailings must be met as applicable for the class of mail. All applicable conditions under 604.9.4, *Value Added Refunds*, and 5.0, *First-Class Mail or Standard Mail Mailings With Different Payment Methods*, must also be met.

18.5.2 Barcoded and Nonbarcoded Portions

The majority of the mail consolidated for entry under Option 3 must be prepared in a single mailing (with a single postage statement) in which all pieces, regardless of price claimed, have the correct barcode (ZIP+4 for flats, delivery point for letters and cards) and are physically compatible with automated mail processing equipment. The entry Post Office may reject a mailing if all pieces do not have the correct barcode. A minor portion of the consolidated mail may be prepared as a second, separate mailing (with its own postage statement) in which the pieces do not bear the correct barcode (or are not compatible with automated processing equipment) but do meet the standards that apply to the prices claimed.

18.5.3 Service Objective

When a mailpiece is part of a consolidated mailing, the service objective that applies must be the same as or better than that which would have applied had the piece been entered at the licensing Post Office. As part of the application, documentation must be provided by the mailer to show compliance with this standard to USPS satisfaction. (Typical documentation lists the service objective that applies to each licensing Post Office from whose area mail is to be consolidated and the standard that applies to that mail when it is entered under Option 3.)

18.5.4 Information

An application under Option 3 must be submitted by the mailer (i.e., the party to present the consolidated mailing to the USPS). In addition to the information detailed in 18.2.3, the application must identify the meter licensees whose mail is to be consolidated and the serial numbers of each licensee's meters.

18.5.5 Notice to Licensees

After receiving an authorization notice, the mailer must give written notice to each licensee whose mail is to be consolidated under the authorization. The mailer's notice must include a copy of the authorization, a full explanation of preparation requirements, and a reminder that consolidation of their mail can adversely affect service. The mailer must give copies of each licensee notice to the entry office and licensing office postmasters.

18.5.6 Additional Standards

Metered mail deposited under Option 3 must be prepared as specified by the USPS. This preparation may extend beyond that which is required to qualify for the price paid for the mail, and may require the mail to be configured and its deposit scheduled to enhance USPS handling. Failure to meet these standards can lead to revocation of the authorization.

18.5.7 Endorsement

Each mailpiece deposited under this option must be endorsed with the letters “DS,” followed by a unique drop shipment authorization number (issued by the manager of business mail entry of the district in which the mail is entered) and the words “MAILED AT,” followed by the 3-digit ZIP Code prefix of the entry Post Office. The endorsement may also include the correct mailing date. (Including this date does not relieve the meter licensee(s) from meeting the standards for correct dating of metered mail.) The endorsement must be printed immediately below the meter stamp or indicium or in the lower left corner of the mailpiece, in 8-point or larger type, by a computer or another mechanical method providing a clear and legible endorsement. The district manager of business mail entry issuing the authorization number must approve the endorsement before drop shipment mailings may be made under this option.

EXAMPLES

DS12 MAILED AT 606 – 04/01/04

MAILED AT 606 DS12 – 04/01/04

DS48 MAILED AT 981

MAILED AT 981 DS48

18.5.8 Placement

The drop shipment endorsement must not interfere with the barcode clear zone or any other marking.

18.5.9 Preparation

The preparation and documentation standards that apply to the prices claimed in the mailing remain unaffected by entry under Option 3.

18.5.10 Consolidation

Mail collected from licensees for mailing under Option 3 may not be further collected or consolidated by any other mailer or consolidator.

18.6 Option 4: Consolidated Drop Shipment Without Endorsement**18.6.1 General**

A mailer presenting a consolidated mailing may apply to collect metered mail bearing postage from meters licensed at different Post Offices and consolidate that mail for mailing (entry and deposit) at other entry Post Offices, subject to the conditions and limitations in [18.6](#). All conditions for presenting presort mailings must be met as applicable for the class of mail. All applicable conditions under [604.9.4](#), [Value Added Refunds](#), and [5.0](#), [First-Class Mail or Standard Mail Mailings With Different Payment Methods](#), must also be met.

18.6.2 Barcoded and Nonbarcoded Portions

The majority of the mail consolidated for entry under Option 4 must be prepared in a single mailing (with a single postage statement) in which all pieces, regardless of price claimed, have the correct barcode (ZIP+4 for flats, delivery point for letters and cards) and are physically compatible with automated mail processing equipment. The entry Post Office may reject a mailing if all pieces do not have the correct barcode. A minor portion of the consolidated mail may be prepared as a second,

separate mailing (with its own postage statement) in which the pieces do not bear the correct barcode (or are not compatible with automated processing equipment) but do meet the standards that apply to the prices claimed.

18.6.3 Service Objective

When a mailpiece is part of a consolidated mailing, the service objective that applies must be the same as or better than that which would have applied had the piece been entered at the licensing Post Office. As part of the application, documentation must be provided by the mailer to show compliance with this standard to USPS satisfaction. (Typical documentation lists the service objective that applies to each pair of origin/destination 3-digit ZIP Codes in the consolidated mailing, both if entered at the licensing Post Office and if entered as authorized under Option 4.)

18.6.4 Information

An application under Option 4 must be submitted by the mailer (i.e., the party to present the consolidated mailing to the USPS). The information in [18.2, Authorization](#), must be provided for each Post Office at which mail is to be entered under Option 4. The application must also detail: the meter licensees whose mail is to be consolidated and the serial numbers of each licensee's meters; the mailer's method of sortation, documentation, and quality control; and the mailer's procedures for ensuring that all pieces in the consolidated mailing are entered to meet or exceed the service objectives for the place of origin.

18.6.5 Notice to Licensees

After receiving the authorization notice, the mailer must give written notice to each licensee whose mail is to be consolidated under the authorization. The mailer's notice must include a copy of the authorization, a full explanation of preparation requirements, and a reminder that consolidation of their mail can adversely affect service. The mailer must give copies of each licensee notice to the entry office and licensing office postmasters.

18.6.6 Additional Standards

Metered mail deposited under Option 4 must be prepared in segments for entry at postal facilities according to schemes and schedules provided by the USPS. Further, each segment must be prepared for dispatch without additional postal processing or handling, and deposited at places and times specified by the USPS. The USPS may stipulate preparation beyond that required to qualify for the price paid for the mail. Failure to meet these standards can lead to revocation of the authorization.

18.6.7 Transportation

The mailer must provide transportation for the consolidated mailing, unless the USPS provides plant load service.

18.6.8 Endorsement

A drop shipment endorsement is not required on pieces mailed under Option 4.

18.6.9 Preparation

The preparation and documentation standards that apply to the prices claimed in the mailing remain unaffected by entry under Option 4.

705.18.6.10

18.6.10 Consolidation

Mail collected from licensees for mailing under Option 4 may not be further collected or consolidated by any other mailer or consolidator.

18.6.11 Documentation

The mailer/consolidator must keep documentation supporting each consolidated mailing, including the volume collected from each meter licensee, for at least 1 year from the date of mailing, and make it available for postal inspection on request.

19.0 Postage Due Weight Averaging Program**19.1 Basic Information****19.1.1 Description**

The Postage Due Weight Averaging (PDWA) program is a comprehensive, statistically valid program to calculate postage due returns in bulk, rather than rating each individual piece. This program, subject to application, approval, and service agreement, is available for customers who receive a minimum of 50,000 combined postage due parcels and flats, Merchandise Return Service (MRS), or Bulk Parcel Return Service (BPRS) pieces. The PDWA program applies a postage due cost factor, generated through a 4-week rolling average sampling period, to assess postage and fees based upon the net weight of each container. A new postage due cost factor is calculated and applied weekly, based on the previous 4 weeks of sampling data. The 4-week rolling average is not applicable if a new PDWA system is implemented or if there is a postage price change. When these circumstances occur, the new postage due cost factor is determined through the sampling in the first week. That new postage due cost factor is then applied in the first 2 weeks. After the fourth week of sampling, the postage due cost factor is a complete 4-week rolling average. PDWA is designed to significantly reduce processing time and provide for shorter verification time for customers.

19.1.2 General Qualification

A PDWA program may be authorized for applicants who receive a minimum of 50,000 combined returns per year. Returns can include all classes of mail where postage due fees are assessed, including MRS and BPRS return pieces. Only parcels and flats may be processed through the PDWA program. See [19.2](#) for application process.

19.1.3 Quality Control

PDWA customers may elect to establish and conduct a quality control program to ensure that all missorted and accountable mail (including certified, collect on delivery (COD), return receipt for merchandise, Delivery Confirmation service, and Signature Confirmation services pieces) is identified and returned to the servicing Post Office prior to being opened. The program must include:

- a. Training all employees who process returns on how to identify accountable items.
- b. Permanently displaying examples of accountable return items in full view of employees responsible for the identification of accountable returns.

- c. Instructional material pertaining to identifying accountable returns.
- d. The random selection and tracking of individual sample pieces within the customer's operational process to assure that they are identified.

If the customer elects to not implement a quality control program, the customer must assume all responsibility for claims filed by clients who returned their product to them via accountable mail.

19.1.4 Service Agreement

A service agreement must be signed by the customer and agent, the postmaster, plant manager, district manager, marketing manager, and Business Mailer Support manager. The service agreement must specify, among other things, the customer's quality control procedures and procedures for handling missorted and accountable mail.

19.2 Authorization

19.2.1 Application

The customer or agent must submit a PDWA application to the postmaster of the office through which delivery service is provided. The customer must provide information including current permits, authorizations, and average volume figures. The postmaster will provide input regarding staffing, hours of operation, standard operating procedures, and recommendations or comments for approval.

19.2.2 Approval

The Business Mailer Support manager, USPS Headquarters, approves or denies applications for PDWA systems.

19.2.3 Denial

If the PDWA application is not approved, the Business Mailer Support manager will send a written notice to the applicant with the reason for denial.

19.2.4 Authorization Period

Authorization remains in effect until the Business Mailer Support manager or the customer cancels the agreement. If Postal Service periodic reviews or customer-supplied information indicates a need for modification of the authorization, then the authorization will be amended with concurrence of the Business Mailer Support manager and the customer.

19.2.5 USPS Suspension

The Business Mailer Support manager may suspend a PDWA service agreement at any time if the agreement does not provide adequate revenue protection, or the customer (or agent) fails to meet the criteria established by the agreement.

19.2.6 Mailer Cancellation

The customer may cancel a PDWA agreement by writing to the Business Mailer Support manager (see DMM 608.8.0 for address).

705.20.1

20.0 Optional Combined Parcel Mailings

20.1 **Basic Standards for Combining Parcel Select, Package Services, and Standard Mail Parcels**

20.1.1 **Basic Standards**

Package Services parcels, Parcel Select parcels, Standard Mail parcels and Not Flat-Machinables (NFM) in a combined parcel mailing must meet the following standards:

- a. Each parcel in a combined mailing is subject to the applicable content and price eligibility standards for the price claimed.
- b. Mailers must be authorized under [8.1.4](#).
- c. Mailers must pay all applicable presort mailing and destination entry mailing fees.
- d. Combined mailings must meet the following minimum volume requirements:
 1. Standard Mail—Minimum 200 pieces or 50 pounds of Standard Mail parcels and NFM combined.
 2. Package Services and Parcel Select—Minimum 50 parcels of Parcel Post, Parcel Select, Bound Printed Matter, Library Mail, and Media Mail parcels combined.
 3. If claiming Presorted BPM, Media Mail or Library Mail prices—Minimum 300 parcels per subclass.

20.1.2 **Postage Payment**

Mailers must pay postage for all pieces with a permit imprint at the Post Office serving the mailer's plant using an approved Manifest Mailing System (MMS) under [2.0](#). The MMS agreement must include procedures for combined mailings approved by Business Mailer Support. Mailers may document and pay postage using the Electronic Verification System (eVS) under [2.9](#).

20.1.3 **Documentation**

Mailers must prepare separate postage statements for Standard Mail, Parcel Select, and Package Services pieces in the combined mailing. At the time of mailing, mailers must provide all postage statements and a Business Mailer Support-approved manifest prepared according to [2.0](#) and this section. Presort documentation is required as applicable for each price claimed if the manifest does not list pieces in presort order.

20.1.4 **Authorization**

A mailer who wants to present combined parcel mailings must submit a written request to the Manager, Business Mailer Support (See [608.8.1](#) for address). The request must show the mailer's name and address, the mailing office, evidence of authorization to mail under [2.0](#), procedures for the combined parcel mailing, the expected date of first mailing, a sample of the required manifest, and a sample USPS Qualification report. Business Mailer Support will review the documentation and provide written authorization when approved. A mailer may terminate an

authorization at any time by written notice to the postmaster of the office serving the mailer's location. Business Mailer Support may terminate an authorization, by written notice, if the mailer does not meet the standards.

20.2 Price Eligibility

20.2.1 Eligible Prices

Combined parcels may be eligible for Standard Mail, Parcel Post, Parcel Select, single-piece and Presorted Media Mail, single-piece and Presorted Library Mail, single-piece and Presorted Bound Printed Matter, and destination entry prices and discounts as applicable. Inter-BMC Parcel Select may be eligible for BMC presort and OBMC presort discounts.

20.2.2 Price Application

Apply prices based on the criteria in 400 and the following standards:

- a. Standard Mail machinable parcels, irregular parcels and NFM prices are based on the container level and entry. See [443.5.0, Additional Eligibility Standards for Presorted Standard Mail Pieces](#).
- b. Bound Printed Matter parcels qualify for single-piece prices or Presorted Bound Printed Matter prices as follows:
 1. Presorted prices for BPM pieces prepared in other than MXD ADC/MXD BMC containers when there are at least 300 pieces of BPM in the combined mailing.
 2. Single-piece prices for pieces prepared in MXD ADC/MXD BMC containers and when there are less than 300 pieces of BPM in the combined mailing.
 3. Destination entry prices based on entry.
- c. Media Mail parcels qualify for single-piece, basic, or 5-digit prices as follows:
 1. 5-digit prices for pieces prepared in 5-digit/scheme containers when there are at least 300 pieces of Media Mail in the combined mailing.
 2. Basic prices for pieces prepared in 3-digit, ADC, and BMC containers when there are at least 300 pieces of Media Mail in the combined mailing.
 3. Single-piece prices for pieces prepared in MXD ADC/MXD BMC containers and when there are less than 300 pieces of Media Mail in the combined mailing.
- d. Library Mail parcels qualify for single-piece, basic, or 5-digit prices as follows:
 1. 5-digit prices for pieces prepared in 5-digit/scheme containers when there are at least 300 pieces of Library Mail in the combined mailing.
 2. Basic prices for pieces prepared in 3-digit, ADC, and BMC containers when there are at least 300 pieces of Library Mail in the combined mailing.
 3. Single-piece prices for pieces in MXD ADC/MXD BMC containers and when there are less than 300 pieces of Library Mail in the combined mailing.
- e. Parcel Select prices are based on the following:

705.20.3

1. Destination entry for pieces in 5-digit, 3-digit, ADC, or BMC containers.
 2. BMC presort discounts for origin entered (other than a BMC) Parcel Select pieces placed in 5-digit, 3-digit, ADC, or BMC containers.
 3. OBMC presort discounts for origin BMC entered Parcel Select pieces placed in 5-digit, 3-digit, ADC, or BMC containers.
- f. Parcel Post prices are based on Intra-BMC and Inter-BMC prices for pieces placed in MXD ADC/MXD BMC containers.

20.3 Mail Preparation

20.3.1 Basic Standards

Prepare combined mailings as follows:

- a. Different parcel types must be prepared separately for combined parcel mailings as indicated below:
 1. Standard Mail, Parcel Select, and Package Services Machinable Parcels and NFMs 6 ounces or more, or as provided under [401.1.5.2](#) for lightweight machinable parcels. Use “STD/PSVC MACH” for line 2 content labeling.
 2. Standard Mail, Parcel Select, and Package Services Irregular Parcels and NFMs weighing at least 2 ounces and up to, but not including, 6 ounces (APPS-machinable pieces), except for tubes, rolls, triangles, and other similarly irregularly-shaped pieces. Use “STD/PSVC” for line 2 content labeling.
 3. Standard Mail, Parcel Select, and Package Services tubes, rolls, triangles, and similarly irregularly-shaped parcels; and all parcels and NFMs weighing under 2 ounces (not APPS-machinable pieces). Use “STD/PSVC IRREG” for line 2 content labeling.
 4. All parcel types and NFM pieces may be combined in 5-digit and 5-digit scheme containers. Use “STD/PSVC PARCELS” for line 2 content labeling.
- b. Mailers must prepare all parcels in sacks under [445.5.0](#), or on pallets, or in pallet boxes under [8.0](#) to achieve the finest level of sortation.

20.3.2 Combining Standard Mail, Parcel Select, and Package Services Machinable Parcels and NFM's 6 Ounces or More

Prepare and enter combined machinable parcels as shown in the table below:

COMBINED PREPARATION			
Entry	5-Digit/Scheme ¹	BMC/ASF (Required)	Mixed BMC (Required)
Origin	Sacks - 15-piece or 30-lb minimum Pallets - 250-lb minimum	Sacks - 10-piece or 20-lb minimum Pallets - 250-lb minimum	Sacks - No minimum Pallets - 250-lb minimum
DBMC	Sacks - 15-piece or 30-lb minimum Pallets - 100-lb minimum	Sacks - 10-piece or 20-lb minimum Pallets - 100-lb minimum	
DSCF	Sacks - 10-piece or 10-lb minimum Pallets - 100-lb minimum		
DDU	Sacks - No minimum Pallets - No minimum		

1. All parcel types may be combined in 5-digit containers to meet minimum volumes.

20.3.3 Combining Standard Mail, Parcel Select, and Package Services Parcels and NFM's 2 up to 6 Ounces (APPS-Machinable)

Prepare and enter combined APPS-machinable parcels (pieces weighing at least 2 ounces and up to, but not including, 6 ounces that are not tubes, rolls, triangles or similarly irregularly-shaped parcels) as shown in the table below.

COMBINED PREPARATION				
Entry	5-Digit/Scheme ¹	3-Digit (Required)	ADC (Required)	Mixed ADC (Required)
Origin	Sacks - 15-piece or 30-lb minimum Pallets - 250-lb minimum	Sacks - 10-piece or 20-lb minimum Pallets - 250-lb minimum	Sacks - 10-piece or 20-lb minimum Pallets - 250-lb minimum	Sacks - No minimum Pallets - 250-lb minimum
DBMC	Sacks - 15-piece or 30-lb minimum Pallets - 100-lb minimum	Sacks - 10-piece or 20-lb minimum Pallets - 100-lb minimum	Sacks - 10-piece or 20-lb minimum Pallets - 100-lb minimum	
DSCF	Sacks - 10-piece or 10-lb minimum Pallets - 100-lb minimum	Sacks - 10-piece or 20-lb minimum Pallets - 100-lb minimum		
DDU	Sacks - No minimum Pallets - No minimum			

1. All parcel types may be combined in 5-digit containers to meet minimum volumes.

20.3.4 Combining Standard Mail, Parcel Select, and Package Services Irregular Parcels and NFM's under 2 Ounces (Not APPS-Machinable)

Prepare and enter combined not APPS-machinable parcels as shown in the table below.

705.21.1

COMBINED PREPARATION				
Entry	5-Digit/Scheme ¹	3-Digit (Required)	ADC (Required)	Mixed ADC (Required)
Origin	Sacks - 15-piece or 30-lb minimum Pallets - 250-lb minimum	Sacks - 10-piece or 20-lb minimum Pallets - 250-lb minimum	Sacks - 10-piece or 20-lb minimum Pallets - 250-lb minimum	Sacks - No minimum Pallets - 250-lb minimum
DBMC	Sacks - 15-piece or 30-lb minimum Pallets - 100-lb minimum	Sacks - 10-piece or 20-lb minimum Pallets - 100-lb minimum	Sacks - 10-piece or 20-lb minimum Pallets - 100-lb minimum	
DSCF	Sacks - 10-piece or 10-lb minimum Pallets - 100-lb minimum	Sacks - 10-piece or 20-lb minimum Pallets - 100-lb minimum		
DDU	Sacks - No minimum Pallets - No minimum			

1. All parcel types may be combined in 5-digit containers to meet minimum volumes.

21.0 Repositionable Notes (RPNs)

21.1 Use

RPNs must meet all of the following standards:

- RPNs may be attached to letter- and flat-size commercial First-Class Mail, Standard Mail, and Periodicals mailpieces.
- For letter-size mailpieces, attach a single RPN to the address side of the mailpiece as specified in [Exhibit 21.1b](#).

Exhibit 21.1b Placing RPNs on Letters

Repositionable Notes (RPNs) may be placed only within the specified area of the letter.

- For flat-size mailpieces, a single RPN may be attached to either the address side or nonaddress side of the mailpiece and attached in the locations described and shown in [Exhibit 21.3g1](#) and [Exhibit 21.3g2](#).
- RPNs are included as an integral part of the mailpiece for weight and postage price computation purposes.

- e. The written and graphic characteristics of the notes are considered when determining eligibility of mailpieces mailed at the Standard Mail and Nonprofit Standard Mail prices.
- f. Attach the RPNs to all pieces in the mailing.

21.2 Mailpiece Characteristics

Each mailpiece must:

- a. Not be in a plastic wrapper (e.g., polybag, polywrap, or shrinkwrap).
- b. Be letter-size (including cards) or flat-size.

21.3 RPN Characteristics

RPNs must:

- a. Measure 3 inches by 3 inches, plus or minus 1/8 inch for either dimension.
- b. Not contain phosphorescent or red fluorescent colorants.
- c. Be adhered with a minimum of 3/4 inch (with a tolerance of 1/16 inch) adhesive strip across the top portion on the reverse side of the note.
- d. Not be placed in a manner that interferes with the delivery address, price markings, or postage and must not display a specific address or ZIP Code. References to general landmarks are permissible.
- e. Not be manually affixed.
- f. On letter-size mailpieces:
 - 1. Position the RPN parallel with the length of the mailpiece.
 - 2. Affix RPNs with labeling equipment to ensure adequate adhesion; do not affix RPNs manually.
 - 3. Place the RPN to the left of the delivery address, no closer than 3/8 inch from the left edge of the delivery address.
 - 4. Place the RPN at least 1/2 inch (with a tolerance of 1/8 inch) from the bottom and left edges of the mailpiece.
- g. On flat-size mailpieces:
 - 1. If the RPN is placed on the address side of the mailpiece, position the RPN according to [Exhibit 21.3g1](#).

Exhibit 21.3g1 Placing RPNs on Flats—Address Side

Repositionable Notes (RPNs) may be placed only within the specified gray areas of the flat.

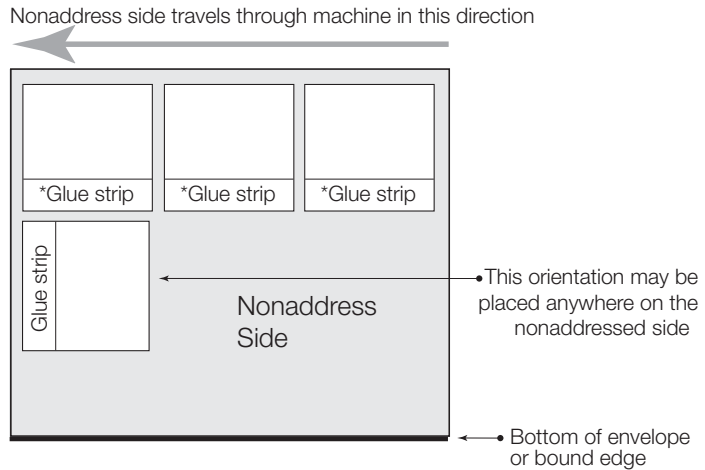

2. If the RPN is placed on the nonaddressed side of the mailpiece, position the RPN according to [Exhibit 21.3g2](#).

Exhibit 21.3g2 Placing RPNs on Flats—Nonaddress Side

Repositionable Notes (RPNs) may be placed only within the specified gray areas of the flat.

**The RPNs marked with a * represent the only allowable positions for RPNs on the non-address side with the glue strip orientation shown.*

21.4 RPNs on Automation-Price Mailpieces

21.4.1 Letter-Size Mailpieces

Letter-size mailpieces with RPNs claiming automation prices must meet the standards in 1.0 through 3.0, 201.3.0, and the following additional standards:

- a. Each mailpiece must be rectangular and have a surface smoothness of 195 Sheffield Units or smoother.
- b. *Enveloped mailpieces.* Each mailpiece prepared in an envelope must be constructed from paperstock having a basis weight of 20 pounds or greater. Window envelopes must have a closed panel made of polystyrene or glassine. Each enveloped mailpiece is limited to the following dimensions:
 1. For height, no less than 4-1/8 inches and no more than 6 inches high.
 2. For length, no less than 8 inches and no more than 9-1/2 inches long.
 3. For thickness, no less than 0.02 inch and no more than 0.125 inch thick.*Oversize cards.* Each mailpiece prepared as an oversize card is limited to the following dimensions:
 4. For height, no less than 4-1/2 inches and no more than 6 inches high.
 5. For length, no less than 8-1/2 inches and no more than 9 inches long.
 6. For thickness, no less than 0.009 inch thick (cards 5-3/4 inches or more in height must be no less than 0.012 inch thick.)

21.4.2 Flat-Size Mailpieces

Flat-size mailpieces with RPNs claiming automation prices must meet the standards in [1.0](#) through [3.0](#) and [301.3.0](#).

21.5 Prices

Commercial First-Class Mail - \$0.005

Standard Mail and Periodicals - \$0.015

21.6 Compliance

Mailers must comply as follows:

- a. RPNs must be obtained from an approved RPN vendor (see www.usps.com for a listing of approved vendors). Prospective vendors can obtain USPS standards and test procedures from USPS Engineering (see [608.8.0](#) for address). Testing must be performed by a certified independent laboratory.
- b. Mailers must present evidence at the time of mailing to show that their RPNs have been supplied by an approved vendor. The vendor name on the reverse side of the note will be sufficient as evidence; in lieu of the vendor name printed on the notes, an invoice from the approved vendor for purchase of the RPNs will constitute such evidence.
- c. As part of each mailing, mailers must include two pieces addressed to the manager, USPS Engineering Letter Technology, Attn: RPN Sample (see [608.8.0](#) for address).

Origin	27.748	23.660	19.161	2.306	1.956	1.853	\$0.432

1.1.5 Discounts

Discounts for nonadvertising content, for each 1% of nonadvertising: \$0.00094 per addressed piece.

1.1.6 Nonprofit Publications

Authorized nonprofit publications receive a discount of 5% off the total Outside-County postage excluding the postage for advertising pounds. The 5% discount does not apply to commingled nonsubscriber or nonrequester copies in excess of the 10% allowance provided under [7.0](#).

1.1.7 Classroom Publications

Authorized Classroom publications receive a discount of 5% off the total Outside-County postage excluding the postage for advertising pounds. The 5% discount does not apply to commingled nonsubscriber or nonrequester copies in excess of the 10% allowance provided under [7.0](#).

1.1.8 Limited Circulation Publications

Publications, excluding Nonprofit, Classroom, and Limited Circulation Science-of-Agriculture publications receive a 5% discount off the total Outside-County postage, excluding the postage for advertising pounds, if eligible copies are mailed at In-County prices and the total number of Outside-County copies mailed for that issue is less than 5,000. Nonsubscriber or nonrequester copies claiming the Limited Circulation discount are subject to the standards in [7.0](#).

1.1.9 Limited Circulation Science-of-Agriculture Publications

Publications meeting the requirements of 11.2.2 receive a 5% discount off the total Outside-County postage, excluding the postage for advertising pounds, if eligible copies are mailed at In-County prices and the total number of Outside-County copies mailed for that issue is less than 5,000. Nonsubscriber or nonrequester copies claiming the Limited Circulation discount are subject to the standards in [7.0](#).

707.1.2

1.2 In-County

1.2.1 Pound Prices

Per pound or fraction:

LETTERS, FLATS, & PARCELS	
Zone	Price
DDU	\$0.136
None	0.176

1.2.2 Piece Prices

Per addressed piece:

Presort Level	AUTOMATION		NONAUTOMATION
	Letters	Flats	Letters, Flats, and Parcels
Carrier Route			
<i>Saturation</i>	---	---	\$0.029
<i>High Density</i>	---	---	0.042
<i>Basic</i>	---	---	0.057

3-Digit	0.047	0.102	0.113
Basic	0.056	0.110	0.125

1.2.3 Discount

Destination delivery unit discount for each addressed piece: \$0.008.

1.3 Ride-Along Price

Price per ride-along piece: \$0.159.

1.4 Fees

Per application:

- a. Original entry: \$510.00.
- b. News agent registry: \$50.00.
- c. Additional entry: \$80.00.
- d. Reentry: \$60.00.

2.0 Price Application and Computation

2.1 Price Application

2.1.1 Price Elements

Postage for Periodicals mail includes a pound price charge, a piece price charge, bundle and container price charges for Outside-County mail, and any discounts for which the mail qualifies under the corresponding standards.

2.1.2 Applying Outside-County Piece Prices

The per piece charge applies to each copy and each firm bundle in the mailing. Outside-County piece prices are based on the shape of the mailpiece (letter, flat, or parcel); the characteristics of the mailpiece (machinable or nonmachinable, see [18.4ab](#) and [18.4ac](#)); the application of a barcode; and the bundle presort level. Firm bundles and carrier route pieces pay separate piece prices that do not vary based on these criteria. For pieces properly prepared loose in trays, the price is based on the tray presort level. Apply piece prices for Outside-County mail as follows:

a. *Letters.*

1. Apply the “Letters—Barcoded” prices to pieces that meet all of the standards for automation letters in [201.3.0](#) and include a barcode.
2. Apply the “Letters—Nonbarcoded” prices to pieces that meet the standards for all letters in [201](#) but do not include a barcode. Apply these prices also to pieces that are barcoded but do not meet all of the automation letter standards in [201.3.0](#).

b. *Machinable flats.*

1. Apply the “Machinable Flats—Barcoded” prices to pieces that meet all of the standards for automation flats in [301.3.0](#) and include a barcode. Apply the 5-digit price also to barcoded pieces prepared under the alternative flats criteria in [26.0](#) and placed in 5-digit bundles.
2. Apply the “Machinable Flats—Nonbarcoded” prices to pieces that meet all of the standards for automation flats in [301.3.0](#) but do not include a barcode.

c. *Nonmachinable flats.*

1. Apply the “Nonmachinable Flats—Barcoded” prices to pieces that meet all of the alternative standards for flats in [26.0](#) and include a barcode. Exception: Barcoded pieces prepared under [26.0](#) and placed in 5-digit bundles pay the “Machinable Flats—Barcoded” 5-digit price.
2. Apply the “Nonmachinable Flats—Nonbarcoded” prices to pieces that meet all of the alternative standards for flats in [26.0](#) but do not include a barcode. Apply these prices also to all nonmachinable flats, whether or not a barcode is used.

d. *Parcels.* Apply the “Parcels” prices to all parcels, whether or not a barcode is used.

2.1.3 Applying In-County Piece Prices

An *addressed piece* can be a single individually addressed copy or a firm bundle containing unaddressed or individually addressed copies for the same address. The per piece charge is based on the number of addressed pieces (not the number of copies). For In-County mail, piece prices apply to each addressed piece, based on the sorting done by the publisher. Piece prices for automation mailings are based on the bundle level (or tray level for unbundled pieces in trays); piece prices for nonautomation mailings are based on the tray or sack level.

2.1.4 Applying Pound Price

Apply pound prices to the weight of the pieces in the mailing as follows:

- a. Outside-County (including Science-of-Agriculture) pound prices are based on the weight of the advertising portion sent to each postal zone (as computed from the entry office) or destination entry zone, and the weight of the nonadvertising portion to a destination entry zone or a single price to all other zones.
- b. In-County pound prices consist of a DDU entry price and an unzoned price for eligible copies delivered to addresses within the county of publication.

2.1.5 Computing Weight of Advertising and Nonadvertising Portions

The pound price charge is the sum of the charges for the computed weight of the advertising portion of copies to each destination entry and zone, plus the sum of the charges for the computed weight of the nonadvertising portion of copies to each destination entry and all other zones. The following standards apply:

- a. The minimum pound price charge for any zone to which copies are mailed is the 1-pound price. For example, three 2-ounce copies for a zone are subject to the minimum 1-pound charge.
- b. Authorized Nonprofit and Classroom publications with an advertising percentage that is 10% or less are considered 100% nonadvertising. When computing the pound prices and the nonadvertising adjustment, use "0" as the advertising percentage. Authorized Nonprofit and Classroom publications claiming 0% advertising must pay the nonadvertising pound price for the entire weight of all copies to all zones.

2.1.6 Per Piece Charge

Piece prices apply to each addressed piece, based on the sortation done by the publisher. An *addressed piece* can be a single individually addressed copy, a bundle of unaddressed copies with a single delivery address for the bundle, or a firm bundle containing unaddressed or individually addressed copies for the same address. The per piece charge is based on the number of addressed pieces (not the number of copies).

2.1.7 Discounts

Discounts and reductions apply as specified in [2.0](#), [10.0](#), and [29.0](#).

2.1.8 Applying Outside-County Bundle Prices

For Outside-County mail prepared in bundles, mailers pay the bundle price according to the presort level of the bundle and the presort level of the container that the bundle is placed in or on. Firm bundles pay a firm bundle price that is based only on the presort level of the container. Bundle prices do not apply to barcoded letter-size mail prepared in full letter trays or to flat-size mail prepared in flat trays under the optional tray preparation in [22.7](#) and [25.5](#). The bundle prices are in addition to the container prices. The following additional standards apply:

- a. Bundles of fewer than six pieces under [25.1.4](#) (including single-piece bundles) must each pay the applicable bundle charge.
- b. For bundles with both In-County and Outside-County pieces, mailers do not pay the bundle charge for carrier route and 5-digit/scheme bundles.

2.1.9 Applying Outside-County Container Prices

For Outside-County mail prepared in trays, sacks, pallets, and other USPS-approved containers, mailers pay the container price according to the type of container, the presort level of the container, and where the mail is entered. The container level is determined by the least-finely presorted bundle that container could contain according to standards (for example, a “5-digit metro pallet” may contain 3-digit and/or 5-digit bundles and would always pay the 3-digit/SCF pallet price). For mailer-supplied air freight containers, mailers pay the container charge based on the original presort of the mail before it is transferred to the airfreight container. The container prices are in addition to the bundle prices. The following additional standards apply:

- a. For mailings prepared in trays or sacks, mailers pay the container price for each tray or sack based on container level and entry.
- b. For mailings prepared on pallets under [705.8.0](#):
 1. For bundles placed directly on pallets, mailers pay the container price for each pallet.
 2. For trays or sacks on pallets, mailers pay the container price for each tray or sack, and not for the pallets. The container price for each tray or sack is based on the tray or sack level and where the pallet is entered.
- c. For containers with both In-County and Outside-County pieces, mailers do not pay the container price for carrier route, 5-digit carrier routes, and 5-digit/scheme pallets, sacks, and trays.

2.2 Computing Postage

2.2.1 Percentage of Advertising

The percentage of advertising shown on the postage statement must be based on the marked copy of the corresponding issue or edition provided as required. If necessary, round off the computed percentage of advertising to two decimal places. Advertising percentages also may be calculated through the Periodicals Accuracy, Grading, and Evaluation (PAGE) Program using the procedures in [16.0, Postage Payment](#), and [17.0, Documentation](#).

2.2.2 Weight Per Copy

To determine the weight per copy, select and weigh a random sample of 10 or more copies and divide the total sample weight by the number of pieces in the sample. Express the weight per copy in decimal pounds rounded off to four decimal places. Per-copy weights also may be calculated through the Periodicals Accuracy, Grading, and Evaluation (PAGE) Program using the procedures in [16.0](#) and [17.0](#).

2.2.3 Computing Other Weights

To find the total weight of mailed copies per zone or price level, multiply the corresponding number of copies by the computed weight per copy. Round off each result to the nearest whole pound, except that when the result is under 0.5 pound, round to 1 pound. To find the weight of the advertising portion for each zone, where applicable, multiply the total weight of copies for that zone by the percentage of advertising. Round off each result to the nearest whole pound, except that when the result is under 0.5 pound, round to 1 pound. To find the weight of the nonadvertising

707.2.2.4

portion, subtract the total weight of the advertising portion to all zones from the total weight of copies to all zones. To find the weight of In-County price copies, multiply the number of copies by the weight per copy and round off the total weight to the nearest whole pound, except that when the result is less than 0.5 pound, round to 1 pound.

2.2.4 Pound Price

To compute the pound price postage for Regular and Preferred Outside-County copies, multiply the weight of the advertising and nonadvertising portions by the corresponding prices, add the *unrounded* results, and subtract all applicable discounts. To compute the pound price postage for In-County price copies, multiply their total weight by the corresponding price per pound.

2.2.5 Piece Price

Determine the piece price postage as follows:

- a. *Outside-County*. Multiply the number of copies by the appropriate price, based on the criteria in 2.1.2a. For firm bundles, multiply the number of firm bundles by the firm bundle piece price.
- b. *In-County*. Multiply the number of addressed pieces (not copies) by the appropriate price, based on the presort of the pieces as mailed. An addressed piece can be a single individually addressed copy or a firm bundle containing multiple copies for the same address.

2.2.6 Nonadvertising Adjustment

To compute the nonadvertising adjustment (where applicable), subtract the advertising percentage from 100, multiply the remainder by the nonadvertising adjustment per piece, multiply the *unrounded* product by the number of pieces, and round off the product to four decimal places.

2.2.7 Outside-County Bundle and Container Charges

The Outside-County bundle charge is the sum of the number of bundles for each bundle level and container level in the mailing subject to the Outside-County bundle prices (see 1.1.3), multiplied by the applicable bundle prices. The Outside-County container charge is the sum of the number of containers for each container type, container level, and entry level in the mailing subject to the Outside-County container prices (see 1.1.4), multiplied by the applicable container prices. Mailers must document the number of bundles and containers required for the prices claimed. If the documentation shows more bundles and containers are required than are presented for mailing, the mailer must pay the charges according to the documentation. Mailers cannot reduce the bundle and container charges by preparing fewer bundles and containers than standards require. Mailers who prepare Periodicals publications as a combined mailing by merging copies or bundles of copies under 27.0 may pay the Outside-County bundle and container charges in one of the following ways:

- a. On one publisher's Form 3541.
- b. On one consolidated Form 3541. Under this option, the consolidator must complete the appropriate sections of the form and pay the charges from the consolidator's own advance deposit account.

- c. Apportioned on each publisher's Form 3541. The following standards apply:
 1. The qualification report must be submitted electronically via Mail.dat. See [708.1.0](#) for additional documentation requirements.
 2. The total charges on all Form 3541s in a combined mailing must equal the total charges for all bundles and containers subject to the Outside-County container prices presented for mailing.
 3. Apportion the bundle charge for each title or edition by determining how many of each type of bundle that title or edition is in. Next calculate the percentage of copies in each of those bundles and convert to four decimal places, rounding if necessary (for example, convert 20.221% to 0.2022). Add the decimal values for each type of bundle in the mailing and multiply the total by the applicable bundle price in [1.1.3](#). Add the bundle charges to determine the total for each title or edition.
 4. Apportion the container charge for each title or edition by determining how many of each type of container that title or edition is in. Next calculate the percentage of copies in each of those containers and convert to four decimal places, rounding if necessary (for example, convert 20.221% to 0.2022). Add the decimal values for each type of container in the mailing and multiply the total by the applicable container price in [1.1.4](#). Add the container charges to determine the total for each title or edition.

2.2.8 Total Postage

Total Outside-County postage is the sum of the per pound and per piece charges, the bundle charges, the container charges, and any Ride-Along and Repositionable Notes charges; minus all discounts; rounded off to the nearest whole cent. Total In-County postage is the sum of the per pound and per piece charges, and any Ride-Along and Repositionable Notes charges, less all discounts, rounded off to the nearest whole cent.

3.0 Physical Characteristics and Content Eligibility

3.1 Physical Characteristics

3.1.1 General

See [201](#) for the physical characteristics for letter-size Periodicals, [301](#) for flat-size Periodicals, and [401](#) for parcel-size Periodicals.

3.2 Addressing

3.2.1 General

Each addressed piece, including the top copy of a firm bundle, must bear the addressee's name and address. The address must include the correct ZIP+4 code or 5-digit ZIP Code.

3.2.2 Address Label

White or other light-colored paper must be used for the address label. To identify the mailpiece as Periodicals, the mailer may place, vertically along the left-hand side of the label, a 1/4-inch or narrower strip of solid pink or of pink "PER" characters.

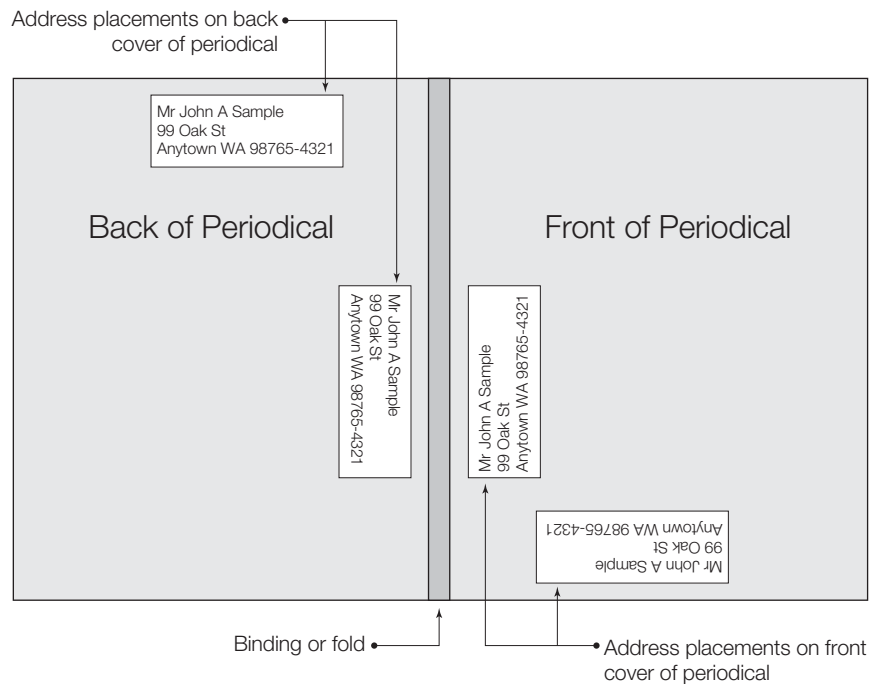

3.2.3 Address Placement

The delivery address must be clearly visible on or through the outside of the mailpiece, whether placed on a label or directly on the host publication, a component, or the mailing wrapper. If placed on the mailing wrapper, the address must be on a flat side, not on a fold (see [Exhibit 3.2.4](#)). If a polybag is used, the address must not appear on a component that rotates within the bag, and the address must remain visible throughout the addressed component's range of motion.

3.2.4 Return Address

The return address must appear on any mailing wrapper that is endorsed "Address Service Requested."

Exhibit 3.2.4 Address Placement for Periodicals

3.3 Permissible Mailpiece Components

3.3.1 Pages

Pages are the printed sheets forming the publication or one of the mailpiece's components, bearing advertising, nonadvertising, or both, including pages with text and graphics, blank spaces for writing or marking, and material to be completed or used by the reader. A minor portion of the pages in a Periodicals mailpiece may have unusual characteristics, such as a different size, shape, or construction, or portions that may be wholly or partially separable, and pages prepared for folding out. No page may have dimensions (when folded, if folded) that exceed the dimensions of the publication. Pages are also subject to these standards:

- a. Multilayer pages (including pages formed by sheets glued together and pages that have unusual shapes, such as cutouts, movable flaps, or “pop-ups”) may include small amounts of fastening material such as grommets, string, or rubber bands as needed to assemble the page. Multilayer pages may also be formed as pouches or pockets but may contain only permissible loose enclosures (see [3.3.4](#)) or other securely affixed permissible components.
- b. Multiple pages may be held together by staples or other means separate from and in addition to the regular binding of the publication.
- c. Oversized pages may be used for illustrations, charts, maps, and other advertising and nonadvertising content.

3.3.2 Parts and Sections

Parts and sections are pages that are physically separate subdivisions of the publication, as identified by the publisher. Each part or section must show the publication title, and the number of parts or sections in the issue must be stated on the cover of the first part or section. Parts or sections produced by someone other than the publisher may not be mailed at Periodicals prices if these parts or sections are prepared by or for advertisers or if they are provided to the publisher free or at a nominal charge. On request, the publisher must submit contracts entered into with producers of parts or sections.

3.3.3 Enclosures at First-Class Mail or Standard Mail Prices

Material paid at First-Class Mail or Standard Mail prices may be enclosed in a Periodicals mailpiece subject to these conditions:

- a. The total weight of all enclosed Standard Mail material must be less than 16 ounces.
- b. Postage and fee payment is subject to [703.9.8](#), [703.9.8](#) and [707.16.3](#). A permit imprint that may appear on a First-Class Mail or Standard Mail enclosure must not be visible when the mailpiece is prepared for mailing.
- c. When enclosing nonincidental First-Class Mail or any Standard Mail, combination envelopes or containers with separate parts for the two classes of mail may be used. If both the sender's and addressee's names and addresses are not on both pieces, the sender's name and address must be placed on one piece and the addressee's name and address on the other. Combination containers with inseparable parts may bear the names and addresses on only one part.
- d. The applicable “First-Class Mail Enclosed” or “Standard Mail Enclosed” marking must be placed on or in the host publication if it contains any nonincidental First-Class Mail or any Standard Mail enclosure. See [703.9.7.2](#).

3.3.4 Loose Enclosures at Periodicals Prices

[5-12-08] Only the following material may be included loose as an enclosure in a Periodicals mailpiece and be paid at Periodicals prices, subject to the corresponding conditions:

- a. An incidental First-Class Mail piece must be closely related but secondary to the Periodicals publication with which it is enclosed. If the publication otherwise consists entirely of nonadvertising material, an incidental First-Class Mail

707.3.3.5

enclosure may be treated as nonadvertising material. In all other cases, an incidental First-Class Mail enclosure is considered part of the advertising portion of the publication. Examples of an incidental First-Class Mail enclosure are a bill for the publication, a statement of account for past publication purchases, or a personal message or greeting included with the publication.

- b. A receipt, request, or order for a subscription may be printed or written; prepared as a reply mail card or envelope for any authorized Periodicals publication (or a publication pending Periodicals authorization); or inserted in an envelope within the publication. The receipt or request may be part of, or accompanied by, printed material containing information related exclusively to a receipt or request or order for a subscription provided the printed material does not advertise, promote, or offer for sale other products or services.
- c. A card or form for the recipient's use in providing address correction information to the publisher may be printed or written; prepared as a card or envelope, including business reply, or as a combination form for two or more Periodicals publications issued by the same publisher; inserted in an envelope that is attached to, bound in, or loose within the publication; or prepared as a detachable part of another permissible enclosure.
- d. A publisher's printed letter, including facsimile signature as a permissible loose enclosure with a Periodicals publication provided the printed letter is limited to the publisher promoting the publication; or announcing or describing changes to the publication, e.g. title, format, frequency, terms or conditions of a subscription; or other business of the publication, as long as the printed letter includes no other advertising for the publisher or any other party.
- e. Enclosures listed in [3.3.4b](#) and [3.3.4c](#) are not counted when determining the percentage of advertising in the publication, but they are included in the total weight of the publication reported on the postage statement.

3.3.5 Supplement

A supplement is one or more pages (subject to [3.3.1](#)) formed by one or more printed sheets that are not bound into a publication. A supplement may be devoted to a single topic and may contain material different from that in the host publication. The external dimensions of a supplement (its length and height) may not exceed those of the host publication except when the host publication and the supplement are contained in an envelope, polybag, or other complete wrapper. Supplements are also subject to these conditions as applicable:

- a. A loose supplement to a bound Periodicals publication must contain at least 25% nonadvertising material and bear the endorsement "Supplement to" followed by the title of the publication; the name of the publisher; or "Periodicals Publication." A bound publication with one or more supplements must be enclosed in a wrapper. If a supplement to a bound publication is formed of more than one sheet, all sheets making up the supplement must be bound together.
- b. A supplement to an unbound publication must be combined with and inserted within the publication under [3.5.4](#). If the supplement is included loose outside the unbound publication, the publication and its supplement must be enclosed

in a wrapper or envelope, and the supplement must bear the endorsement “Supplement to” followed by the title of the publication; the name of the publisher; or “Periodicals Publication.”

3.3.6 Cover and Protective Cover

A cover may be placed on the outside of a Periodicals publication. A protective cover is an additional cover placed around the outside of a publication; preparation is subject to 3.5.6. Advertising, nonadvertising, or both may be printed on the cover or protective cover. The cover and protective cover on a publication are included when measuring advertising percentage. Nothing may be attached to the cover or protective cover except as permitted under 3.3.8.

3.3.7 Mailing Wrapper

A mailing wrapper is an envelope, sleeve, partial wrapper, or polywrap used to enclose the mailpiece. Advertising may be printed on the mailing wrapper and is included when measuring advertising percentage. Nothing may be attached to the mailing wrapper except as permitted under 3.3.8.

3.3.8 Attachment

[1-3-08] Mailers may attach the following material to a cover, protective cover, or mailing wrapper of a publication:

- a. Stickers of any size and shape.
- b. Material allowed as a loose enclosure described in 3.3.3, *Enclosures at First-Class Mail or Standard Mail Prices*, or 3.3.4, *Loose Enclosures at Periodicals Prices*. When nonincidental First-Class Mail and/or Standard Mail enclosures (see 3.3.3) are attached, the marking “First-Class” or “Letter Enclosed” must be on a First-Class Mail attachment; “Standard” or “STD,” on a Standard Mail attachment.
- c. Material normally allowed within the contents of the publication composed of advertising, nonadvertising, or a combination of both may be attached to the cover or protective cover only when the publication and attached material are enclosed in a wrapper or prepared under 3.5.4. No portion of the publication title may be obscured.

3.3.9 Printed Addition

Only the following may be printed on a copy of a Periodicals publication after it is printed or placed on its cover, protective cover, or mailing wrapper:

- a. The name and address of the intended recipient or of the publisher or sender.
- b. The printed title of the publication and its place of publication.
- c. The expiration date of the subscription.
- d. The request for address correction information from the addressee.
- e. The words “Sample Copy” (if the copy is a sample), “Marked Copy” (if the copy contains a marked item or article), or “Address Service Requested” (if the copy is to be returned to the sender if undeliverable as addressed).
- f. The number of copies enclosed in a bundle (on the outside of the bundle) or a bundle count such as “2 of 4” (on the bundle wrapper).

707.3.3.10

- g. Corrections of typographical errors or a mark, except by written or printed words, to call attention to a word or passage.
- h. Printed messages not required to be mailed as First-Class Mail or Express Mail.

3.3.10 Label Carrier

A label carrier may be used to carry the delivery address for the mailpiece and must consist of a single unfolded, uncreased sheet of card or paper stock, securely affixed to the cover of the publication or large enough so that it does not rotate inside the wrapper, subject to these conditions:

- a. The label carrier must include the following elements:
 - 1. The title of the Periodicals publication or the name and address of the publisher. Mailers may also include incidental graphics of the host Periodicals publication, other Periodicals publications of the publisher, or Periodicals publications of one or more affiliates or subsidiaries of the publisher (or any combination thereof), provided that all of the publications are under common 100% ownership. If such graphics are used they are treated as advertising, and mailers must use an area no larger than 3 inches by 5 inches to show the title of the Periodicals publication or the name and address of the publisher and the graphic or graphics.
 - 2. The Periodicals imprint “Periodicals Postage Paid at...” or the word “Periodicals” in the upper right corner of the address side (unless “Periodicals” is printed on the address side of the polybag).
 - 3. The address to which the mailpiece can be returned if undeliverable, if endorsed “Address Service requested.”
- b. The label carrier may bear a request for address correction from the addressee. It also may bear information about requesting or subscribing to any Periodicals publication (or a publication pending Periodicals authorization), including a request or subscription form.
- c. As applicable, the label carrier may show the endorsement “First-Class Mail Enclosed,” “Standard Mail Enclosed,” or “Ride-Along Enclosed,” or the permit imprint used to pay postage for the First-Class Mail or Standard Mail enclosure if that permit imprint is below the Periodicals imprint or the word “Periodicals.”
- d. Other printed information, whether advertising or nonadvertising, is permitted only on the back of the label carrier and is subject to measurement and postage payment accordingly. Incidental text calling attention to information on the reverse, or to information within the contents of the Periodicals publication, may be placed on the front of the label carrier. If any information referred to on the reverse of the label carrier or within the contents of the Periodicals publication is advertising, the incidental text on the front also is treated as advertising.

3.4 Impermissible Mailpiece Components**3.4.1 General**

Regardless of preparation or characteristics, the materials described in [3.4.2](#) through [3.4.4](#) are not eligible for Periodicals prices.

3.4.2 Prohibited Material

Material that contains any one of the following printed items or that is referred to in a component of the Periodicals mailpiece (by the use of one of these items) is ineligible to be mailed at Periodicals prices:

- a. A separate price or subscription instructions different from those of the host publication.
- b. The word “catalog.”
- c. A First-Class Mail, Standard Mail, Parcel Select, or Package Services permit imprint.
- d. An ISBN (International Standard Book Number).
- e. An ISSN (International Standard Serial Number) or USPS number different from that of the host publication.

3.4.3 Products

Products may not be mailed at Periodicals prices. Examples include stationery (such as pads of paper or blank printed forms); cassettes; floppy disks; merchandise; envelopes containing enclosures, other than receipts, orders for subscriptions, and incidental First-Class Mail material; and wall, desk, and blank calendars. Printed pages, including oversized pages and calendars, are not considered products if they are not offered for sale.

3.4.4 Package Services and Parcel Select

Neither Package Services or Parcel Select mail pieces may be combined with a Periodicals publication.

3.4.5 Nonprinted Sheets

Any matter not formed of printed sheets (except as permitted under [3.3.1a](#)) is not eligible for Periodicals prices.

3.5 Mailpiece Construction

3.5.1 Bound/Unbound

Publications may be prepared in either a bound or unbound form, with or without wrappers unless required by [3.5.7](#). A bound publication is a publication in which pages are securely held together by two or more staples, spiral binding, glue, stitching, or other permanent fastening. All other publications are unbound, including folded multisheet and single-sheet publications and those in which pages are loose and collated (“nested”) or in which pages are held together by a single staple.

3.5.2 Size and Weight

[\[7-15-07\]](#) Periodicals mail may not weigh more than 70 pounds or measure more than 108 inches in length and girth combined. Additional size and weight limits apply to letters and machinable and nonmachinable flat-size pieces.

3.5.3 Uniformity

Flat-size pieces must remain uniformly thick. Cover attachments, tabbed or glued half covers, flat-surfaced ride-along enclosures, loose subscription materials, and flat-surfaced enclosures of other classes may be included as long as the overall uniform thickness of the flat is maintained.

3.5.4 Without Mailing Wrapper

When the mailpiece does not have a mailing wrapper, all the components of an unbound publication must be combined with and inserted inside the publication. Only enclosures mailable at Periodicals prices under [3.3.4](#) may be included loose inside a bound unwrapped publication. An enclosure under [3.3.3c, Enclosures at First-Class Mail or Standard Mail Prices](#), or [3.3.4, Loose Enclosures at Periodicals Prices](#), or a single sheet prepared as an attachment under [3.3.8c](#), may be securely attached along the bound edge on the outside of an unwrapped publication if it does not exceed any dimension of the cover of the publication and comes within 3/4 inch of the edge opposite the fold or binding.

3.5.5 With Mailing Wrapper

Except as provided in [3.3.5, Supplement](#), when the mailpiece is completely enclosed in a mailing wrapper, the components may be placed anywhere within that wrapper. When a sleeve or other partial wrapper is used, the components must be secured so that they do not fall out during handling. Bound publications carrying loose supplements or prepared in physically separate parts or sections must be either completely enclosed in an envelope, plastic wrapper (polybag), or paper wrapper or inserted within a sleeve so that the component parts do not become separated while in the mail.

3.5.6 Cover Page and Protective Cover

If the piece is not completely enclosed in a mailing wrapper, then any protective cover or cover page must cover both the front and back of the host publication and extend to within at least 3/4 inch of the edge opposite the fold or binding.

Exception: Flat-size pieces may have short covers as provided in [301.3.5.2](#). If the host publication is bound, the protective cover must be permanently attached to the publication.

3.5.7 APO/FPO Copy

Any single copy of an unbound publication that includes any enclosure, supplement, or more than one part or section and that is mailed to an APO/FPO address must be completely enclosed in a mailing wrapper.

3.5.8 Postal Inspection

Periodicals mail must be prepared so that it can be easily examined. The mailing of publications at Periodicals postage prices represents consent by the sender to USPS inspection of the contents whether loose or inserted in envelopes, wrappers, or other covers. Mailers who want to ensure that publications are not opened for postal inspection must pay First-Class Mail prices and mark such mail accordingly.

3.6 Printed Features

3.6.1 Publication Title and Address Notice

The publication title must be displayed prominently on the publication and any protective cover. The title or the name and address of the publisher must be displayed prominently on any opaque mailing wrapper. The publication title, followed immediately by the USPS publication number (or ISSN if one has been assigned), and the mailing address to which undeliverable copies or change-of-address notices are to be sent may be shown in the upper left corner of the address side of a mailing wrapper or directly on the outside of the host publication if it can be read when the mailing wrapper is in place. The publication number includes an alpha prefix and is to be within parentheses, for example, THE NATIONAL WEEKLY (ISSN 9876-543X) or THE COMMUNITY (USPS 123-456).

3.6.2 Periodicals Imprint

Mailing wrappers that completely enclose the host publication must bear the Periodicals imprint “Periodicals Postage Paid at...” or the word “Periodicals” in the upper right corner of the address area. If a clear plastic wrapper is used, those words may appear anywhere on the address side of the wrapper or the topmost item inside.

3.6.3 Advertising

Advertising may be printed on the pages of any component of a publication, subject to the corresponding standards. Regardless of location, an advertisement must be prepared as an integral part of the publication. Except for advertisements in supplements, all advertisements in a bound publication must be permanently attached. Except as provided in 3.3.4e, all advertising must be included in the advertising portion of the issue measured under 16.0 and 17.0. Different advertising may occupy the same space in different editions of the same issue.

3.6.4 Marking of Paid Reading Matter

Under 18 USC 1734, if a valuable consideration is paid, accepted, or promised for the publication of any editorial or other reading matter in a Periodicals publication, that matter must be plainly marked “advertisement” by the publisher. When a single item of paid editorial or other reading matter occupies more than one page, it need only be marked “advertisement” on the first page. The word “advertisement” may be included in a statement that explains why the material is marked “advertisement.” Such a statement must be prominent on the first page of the material and the word “advertisement” in the statement must be in bold or italicized print or otherwise emphasized so that it can be plainly seen. Editors or publishers who print such matter without plainly marking it “advertisement” are subject to a fine of not more than \$500.

707.4.1

4.0 Basic Eligibility Standards

4.1 **Second-Class Mail**

On July 1, 1996, Second-Class Mail was renamed “Periodicals.”

4.2 **Qualification Categories**

All Periodicals publications must be authorized Periodicals mailing privileges under one of five qualification categories (general publications, publications of institutions and societies, publications of state departments of agriculture, requester publications, and foreign publications). These publications are subject to the general standards below and the standards for each respective category.

4.3 **General**

Only newspapers and periodical publications meeting the mailability standards in 601 and the general and applicable specific standards in 4.0 through 15.0 and 29.0 may be authorized mailing at the Periodicals prices.

4.4 **Periodical Publications**

4.4.1 **Definition and Characteristics**

For Periodicals purposes, *periodical publication* or *periodical* is one published at a stated frequency with the intent to continue publication indefinitely, with these characteristics:

- a. The continuity of the periodical must show from issue to issue. Continuity is shown by serialization of articles or by successive issues carrying the same style, format, theme, or subject matter.
- b. The primary purpose of the periodical must be the transmission of information.
- c. The content of the periodical may consist of original or reprinted articles on one topic or many topics, listings, photographs, illustrations, graphs, a combination of advertising and nonadvertising matter, comic strips, legal notices, editorial material, cartoons, or other subject matter.
- d. The primary distribution of each issue must be made before that of each succeeding issue.

4.4.2 **Other Publication Types**

The following types of publications also qualify as periodical publications:

- a. Any catalog or other course listing (including mail announcements of legal texts that are part of post-bar admission education) issued by any institution of higher education or by a nonprofit organization engaged in continuing legal education.
- b. Any loose-leaf page or report (including any index, filing instruction, table, or sectional identifier that is part of such report) designed as part of a loose-leaf reporting service on developments in the law or public policy.
- c. Any transportation guide containing schedules, fares, and related information.

4.4.3 Restriction

Material that has been, or is intended to be, distributed primarily as a book may not be converted into an issue of a periodical by merely placing a periodical's title on it, placing the material within a periodical's cover, or using similar superficial methods. This restriction does not prohibit excerpts or condensations of books from being proper subject matter for periodicals.

4.5 Printed Sheets

Periodicals publications must be formed of printed sheets. Sheets may be die cut or deckle-edged and may be made of paper, cellophane, foil, or other similar materials. They may not be reproduced by stencil, mimeograph, or hectograph. Reproduction by any other process is permitted. Any style of type may be used.

4.6 Known Office of Publication**4.6.1 Location**

The publisher of a Periodicals publication must maintain a known office of publication at the location where the original entry for Periodicals mailing privileges is authorized.

4.6.2 Purpose

The known office of publication must be a public office for transacting the business of the publication during normal business hours. It must also be the office where the publication's circulation records are kept or can be available for USPS examination.

4.7 Regular Issuance**4.7.1 Frequency**

Each Periodicals publication must be issued at a regular frequency of at least four times a year.

4.7.2 Statement of Frequency

The publisher must adopt a statement of frequency showing how many issues are to be published each year and at which regular intervals (for example: daily; weekly; quarterly; four times a year in January, February, October, and November; weekly during school year; monthly except during July and August).

4.7.3 Compliance With Frequency

All issues must be published regularly as called for by the statement of frequency. To change the number of issues scheduled or the statement of frequency, the publisher must file an application for reentry. If a publication does not maintain regular issuance according to its stated frequency, even after USPS notice, the PCSC revokes the publication's Periodicals mailing privileges.

4.8 Eligible Formats**4.8.1 Complete Copies**

Complete copies of the regular issues of a Periodicals publication may be mailed at the applicable Periodicals prices. Incomplete copies (for example, those lacking pages or parts of pages) are subject to the applicable First-Class Mail, Standard Mail, or Package Services prices.

707.4.8.2

4.8.2 Issues and Editions

Issues and editions of a Periodicals publication may be mailed at the applicable Periodicals prices if they show continuity and meet the applicable standards in [4.9, Issues](#), or [4.10, Editions](#).

4.9 Issues**4.9.1 Regular Issues**

Regular issues must be published according to the publication's stated frequency. The publication of regular issues of general and requester publications must be reflected in the publication's identification statement and (where applicable) in the subscription price. For requester publications, copies must be distributed to requesters.

4.9.2 Extra Issues

Extra issues, not shown in the publication's stated frequency, published for communicating news and information received too late for insertion in the regular issue, but not for advertising purposes, may be mailed occasionally at Periodicals prices. The original entry Post Office must receive written notice of these issues before they are mailed.

4.9.3 Content

Issues may include annual reports, directories, buyers' guides, lists, and similar material prepared as part of the content if copies of these issues bear the publication title and are included in the regular subscription price.

4.9.4 Mailing Issues—Same Day

For determining Periodicals eligibility and postage, an issue of a newspaper or other periodical that is published at a regular frequency, more often than once a month, on the same day as another regular issue of the same publication, is deemed to be a separate publication that must independently meet the applicable standards for Periodicals mailing privileges if:

- a. More than 10% of the total copies of the issue is distributed on a regular basis to nonsubscribers or nonrequesters.
- b. The number of copies of the issue distributed to nonsubscribers or nonrequesters is more than twice the number of nonsubscriber or nonrequester copies of the other issue distributed on that same day.

4.9.5 Mailing Issues—Different Day

For determining Periodicals eligibility and postage, an issue of a newspaper or other periodical that is published at a regular frequency, more often than once a month, but not on the same day as another regular issue of the same publication, is deemed to be a separate publication that must independently meet the applicable standards for Periodicals mailing privileges if:

- a. More than 10% of the total copies of the issue is distributed on a regular basis to nonsubscribers or nonrequesters.

- b. The number of copies of the issue distributed to nonsubscribers or nonrequesters is more than twice the number of nonsubscriber or nonrequester copies of any other issue distributed during the period between the distribution of each of the issues whose eligibility is being examined.

4.10 Editions

4.10.1 Types

Issues mailed at Periodicals prices may be prepared in editions (such as demographic or morning). Subscribers and requesters must not routinely receive more than one edition of any issue.

4.10.2 Extra Editions

Extra editions may be mailed at Periodicals prices to communicate news and information received too late for the regular edition. Extra editions may not be intended for advertising.

4.10.3 Content

Editions may differ in content, but not so much that they constitute separate and independent publications. A separate publication is not acceptable as an edition of another publication.

4.11 Back Issues and Reprints

Periodicals prices may be paid on mailings of unbound back issues (if the publication's Periodicals entry is in effect), reprint copies of daily publications printed within 1 week of the issue date, and reprint copies of other than daily publications printed before the next issue is printed. Other mailings of back issues or reprint copies, including permanently bound back issues or reprint copies, are subject to the applicable First-Class Mail, Standard Mail, or Package Services prices.

4.12 Identification

4.12.1 Title

The publication title must be shown on the front or cover page in a position and in a type style and size that distinguish the title from the publisher's name or other items.

4.12.2 Identification Statement

An identification statement, in an easily read type, must be included in all copies of publications authorized Periodicals mailing privileges and in all copies mailed pending approval of Periodicals mailing privileges.

4.12.3 Unbound Publication

In an unbound publication, the identification statement must be shown conspicuously in one of the following places:

- a. On one of the first five pages.
- b. On the table of contents page.
- c. In the masthead on the editorial page, if the location of the editorial page is shown in the table of contents on the front page of the publication.

4.12.4 Bound Publication

In a bound publication (one secured with two or more staples, spiral binding, glue, stitching, or other permanent fastening), the identification statement must be shown conspicuously as described in [4.12.3](#) or on one of the last three nonadvertising pages inside the back cover.

4.12.5 Identification Statement Content

The identification statement must contain:

- a. The publication title and number. The publication number includes an alpha prefix and must be within parentheses immediately after or below the publication title. If an International Standard Serial Number (ISSN) is assigned, it must appear in the identification statement (for example, "THE WEEKLY JOURNAL" (ISSN 9876-543X)). If an ISSN is not assigned, the USPS number assigned by the PCSC must appear in the identification statement within 90 days after being provided (for example, "THE CIVIC BULLETIN" (USPS 876-690)). The publication number may be on the front or cover page instead of in the identification statement.
- b. The issue date. The date may be omitted if it is on the front or cover page.
- c. A statement of frequency, such as described in [4.7.2](#).
- d. The issue number. Every issue of each publication must be numbered consecutively in a series that may not be broken by assigning numbers to issues unavoidably omitted. The issue number may be omitted if it is on the front or cover page.
- e. At the publisher's option, the subscription price, if the publication has one.
- f. The name and address of the known office of publication, including street number, street name, and the ZIP+4 or 5-digit ZIP Code. The street name and number are optional if there is no letter carrier service. The known office of publication must be clearly distinguishable from the name of other offices of the publication. For foreign publications, the address of the publisher's agent must be shown as the known office of publication.
- g. The imprint "Periodicals Postage Paid at..." or, if mailed at two or more offices, "Periodicals Postage Paid at... and at additional mailing offices." A notice of pending application is shown instead if copies are mailed while an application is pending: "Application to Mail at Periodicals Postage Prices is Pending at..."
- h. The mailing address for change-of-address orders, in the normal text type of the publication: "POSTMASTER: Send address changes to [publication title and mailing address]." Publications that are wrapped may use an alternative measure under [3.3.7](#) and [3.3.10](#). Change-of-address information may also be shown on the label carrier or container of publications prepared in envelopes, closed wrappers, or polybags.

4.13 Advertising Standards**4.13.1 Definition of Advertising**

Advertising is restricted or prohibited by [6.1.3](#) and [6.2.3](#) for the categories of Periodicals authorization. For these standards, the term *advertising* includes:

- a. All material for the publication of which a valuable consideration is paid, accepted, or promised, that calls attention to something to get people to buy it, sell it, seek it, or support it.
- b. Reading matter or other material for the publication of which an advertising price is charged.
- c. Articles, items, and notices in the form of reading matter inserted by custom or understanding that textual matter is to be inserted for the advertiser or the advertiser's products in the publication in which a display advertisement appears.
- d. A newspaper's or periodical's advertisement of its own services or issues, or any other business of the publisher, whether in display advertising or reading matter.

4.13.2 Definition of Public Service Announcement

The term *public service announcement* means any announcement for which no valuable consideration is received by the publisher, which does not include any material related to the business interests of the publisher, and which promotes programs, activities, or services of federal, state, or local governments or of nonprofit organizations, or matters generally regarded as in the public interest. A public service announcement is not treated as advertising.

4.14 Fees

4.14.1 Fee Required

The required fee must accompany an application for:

- a. Periodicals mailing privileges (original entry).
- b. News agent registry.
- c. Additional entry (unless excepted in [4.14.2](#) or [4.14.3](#)).
- d. Reentry (unless excepted in [4.14.2](#) or [4.14.3](#)) to request a:
 1. Change in title, frequency of issuance, or original entry office.
 2. Change in qualification category.
 3. Change in eligibility from preferred prices or the preferred price discount to regular Outside-County prices.
 4. Modification or cancellation of an additional entry.

4.14.2 No Fee

No fee is charged if reentry is only to change eligibility to preferred prices or the preferred price discount.

4.14.3 Single Fee

Only one fee is charged for a single complete additional or reentry application that requests establishing, modifying, or canceling one or more additional entries if the effective dates for the requested actions do not exceed 30 calendar days.

4.14.4 Return of Fee

After an application is filed with the USPS, no part of the fee is returned to the applicant.

707.4.14.5

4.14.5 Address Correction

The fee for manual or automated address correction service is charged per notice issued.

5.0 Applying for Periodicals Authorization**5.1 Original Entry Application****5.1.1 General Publications**

To apply for Periodicals mailing privileges in the general publication category:

- a. Form 3500 must be completed and filed at the Post Office serving the known office of publication. Part B may be left blank when submitted under the “New Launch” procedure.
- b. If the frequency of the publication includes more than one regular issue on any day, the publisher also must complete Form 3541-C. If the frequency of the publication includes more than one regular issue per month, but not on the same day, the publisher also must complete Form 3541-E. The applicable form must be submitted with Form 3500.
- c. The publisher must provide all supporting information required on the application and must keep (and make available for USPS examination) records that establish that the publication is not designed primarily for free or nominal price circulation.

5.1.2 Publications of Institutions and Societies

To apply for Periodicals mailing privileges in the publications of institutions and societies category:

- a. Form 3500 must be completed and filed at the Post Office serving the known office of publication.
- b. When a publication issued by an institution or society carries general advertising, individual subscriptions or receipts are not required; a resolution is acceptable (for example: “*Resolved: That a copy of each issue of [publication title] shall be sent to each member of [organization name] and that [\$] of each member’s annual dues of [\$] shall be for a year’s subscription to that publication.*”). Records must be kept accordingly. The written assurance of a responsible official that such records are kept must accompany the application on Form 3500, with a certified copy of the resolution adopted.
- c. The information required on the form must be submitted with the application.

5.1.3 Publications of State Departments of Agriculture

To apply for Periodicals mailing privileges in the publications of state departments of agriculture category:

- a. Form 3500 must be completed and filed at the Post Office serving the known office of publication.
- b. Evidence that the publication is issued by a state department of agriculture must accompany the application.

5.1.4 Requester Publications

To apply for Periodicals mailing privileges in the requester publication category:

- a. Form 3500 must be completed and filed at the Post Office serving the known office of publication. Part C may be left blank when submitted under the “New Launch” procedure.
- b. If the frequency of the publication includes more than one regular issue on any day, the publisher also must complete Form 3541-C. If the frequency of the publication includes more than one regular issue per month, but not on the same day, the publisher also must complete Form 3541-E. The applicable form must be submitted with Form 3500.
- c. The publisher must provide all information required on the application and must keep (and make available for USPS examination) records showing that the primary distribution of the publication is to persons who have requested it.

5.1.5 Foreign Publications

To apply for Periodicals mailing privileges in the foreign publication category:

- a. Form 3500 must be completed and filed at the Post Office serving the known office of publication.
- b. The publisher or publisher’s agent must have available for USPS verification all information on the form.

5.1.6 News Agent Registry

To apply for news agent registry:

- a. Form 3500 must be completed and filed at each Post Office where mailings are to be made.
- b. Evidence must be given to the postmaster at the mailing office that copies of publications offered for mailing are entitled to Periodicals prices and that the copies are sent to actual subscribers or other news agents for sale or distribution to requesters. The evidence provided in support of the application must include a listing of the publishers, the corresponding titles, and the publication numbers for the qualifying Periodicals publications.

5.1.7 Publication Copies

Applications under [5.1.1](#) through [5.1.5](#) must be accompanied by two copies of the issue published nearest to the date of application. These copies must be identified as required in [4.12](#), marked to show the advertising content, and the percentage of advertising must be shown on the cover.

5.1.8 Translation

If a publication is printed in a foreign language, a brief translation of the contents of the copies (a synopsis of each article and advertisement) must accompany the application.

5.1.9 Fee

The applicable fee must accompany an application for Periodicals mailing privileges or news agent registry. The fee is not refundable.

707.5.1.10

5.1.10 Location

The location shown on the application as the original entry Post Office must be a Post Office. Other postal facilities (such as branches, stations, contract offices, and processing hubs) may not be authorized as original entries.

5.2 Mailing While Application Pending**5.2.1 Mailing Before Approval**

A publisher or news agent may not mail at Periodicals prices before the PCSC approves the application for Periodicals mailing privileges. Postage at the applicable First-Class Mail, Standard Mail, or Package Services prices must be paid while the application is pending.

5.2.2 Record of Deposits

If postage is paid by advance deposit account, the USPS keeps a record of deposits and mailings made while an application is pending. The amount that would be charged at the applicable Standard Mail or Package Services prices must be paid until final action is taken on the application. No record is kept of postage paid at First-Class Mail prices or of postage not paid by advance deposit account. Records are kept for First-Class Mail price mailings that may qualify for a refund under the exception in [5.3.6e](#).

5.3 Decision on Application**5.3.1 Ruling**

The PCSC manager rules on all applications for Periodicals mailing privileges or news agent registry.

5.3.2 Additional Information

Before acting on an application, the PCSC manager may ask the publisher for more information or evidence to complete or clarify the application. Failure to provide such information is sufficient grounds to deny the application.

5.3.3 Mailability

If the PCSC manager grants an application for original entry, this approval does not represent a USPS determination that a publication is mailable under 39 USC 3001(a) and 18 USC 1461 and 1463. (See *Blount v. Rizzi*, 400 U.S. 410 (1971).)

5.3.4 Effective Date

The authorization takes effect on the date of application or the date of eligibility for Periodicals mailing privileges (or for news agent registry), whichever is later.

5.3.5 Refund

Except as noted in [5.3.6](#), when an authorization for Periodicals mailing privileges is granted, the postmaster refunds to the applicant the difference, if any, between the postage amount deposited and the applicable Periodicals postage for copies mailed while the application was pending. Refunds are made only for mailings deposited on or after the effective date of the authorization and only if postage was paid by advance deposit account for which the entry Post Office kept the necessary records.

5.3.6 No Refund

No refund is made for:

- a. A denied or withdrawn application.
- b. The period before the effective date of the authorization.
- c. Postage not paid by advance deposit account for which the required records were kept.
- d. Postage at any price affixed to copies of the publication.
- e. Postage paid at Express Mail or First-Class Mail prices. Exception: When postage is deposited at single-piece First-Class Mail prices because a mailing presorted and prepared as Periodicals mail is less than 200 pieces or 50 pounds, a refund may be authorized.
- f. Postage on mailings not meeting the applicable preparation or other eligibility standards for Periodicals.

5.3.7 Denial and Appeal

If the PCSC denies an application, the applicant is notified in writing and given the reasons for the denial. The denial takes effect 15 days from receipt of the notice by the applicant, unless an appeal is filed through the PCSC with the manager of Mailing Standards (see [608.8.0](#) for address). If the manager of Mailing Standards upholds the denial of an application submitted under the “New Launch” procedure or an application for news agent registry, that is the final agency decision. For other applications, the manager’s denial takes effect 15 days from the applicant’s receipt of the notice unless, during that time, an appeal is filed with the USPS Recorder under 39 CFR 954, a copy of which is included with the notice of denial.

5.4 Revocation or Suspension of Privileges

5.4.1 Revocation

The USPS revokes a publication’s or news agent’s Periodicals mailing privileges if it finds, after a hearing, that the publication or news agent no longer meets the applicable standards.

5.4.2 Initial Decision

The PCSC manager may ask a publisher or news agent to submit information on a publication’s eligibility for Periodicals mailing privileges. If the manager decides that a publication or news agent is no longer entitled to Periodicals mailing privileges, a notice of suspension or revocation of Periodicals mailing privileges is sent to the publisher or news agent at the last known address of the office of publication or of the news agent, giving the reasons for the ruling.

5.4.3 Appeal

A ruling to suspend or revoke a publication’s Periodicals mailing privileges takes effect 15 days from the publisher’s receipt of the notice unless, during that time, an appeal is filed through the PCSC with the manager of Mailing Standards (see [608.8.0](#) for address). If the manager upholds the denial of a news agent’s appeal, that is the final agency decision. For other actions, the manager’s decision takes effect 15 days from its receipt by the publisher unless, during that time, an appeal is filed with the USPS Recorder under 39 CFR 954, a copy of which is included with the notice.

707.6.1

6.0 Qualification Categories

6.1 General Publication

6.1.1 Basic Standards

General publications must meet the applicable basic standards for Periodicals in 4.0 through 9.0 and 11.0 and must be originated and published to disseminate information of a public character or be devoted to literature, the sciences, art, or some special industry.

6.1.2 Circulation Standards

General publications must meet these circulation standards:

- a. General publications must have a legitimate list of subscribers who have paid or promised to pay, at more than a nominal price, for copies to be received during a stated time.
- b. Records for subscriptions to a publication obtained with subscriptions to one or more other publications must be kept so that individual subscriptions to each publication, by title, can be verified.
- c. Persons whose subscriptions are obtained at a nominal price and those whose copies bear an alternative form of address must not be included in the legitimate list of subscribers. These copies must be treated as nonsubscriber copies, subject to the applicable price.
- d. Subscriptions may be paid for with dues or contributions, if the dues or contributions and the subscription price are separated to show compliance with 6.1.2, including the amount paid for the subscription. The USPS may require evidence of compliance (such as the forms used to obtain payments for dues and subscriptions). For example, dues statements would read: "Annual membership dues of [\$] include [\$] for a 1-year subscription to [Title]."
- e. To determine whether a subscription is genuine, it must be so separated from all other business transactions as to constitute a distinct, voluntary, and independent act. Publishers must be able to show that subscriptions to their publications are voluntary, that the subscription price is paid or definitely promised, and that the relationship of subscriber is understood and agreed to.
- f. At least 50% of a publication's distribution must be to persons who have paid above a nominal price. Nominal price subscriptions include those sold at a subscription price so low that the price cannot be considered a material consideration; or at a reduction to the subscriber (under a premium offer or any other arrangement) of more than 70% of the basic annual subscription price that would entitle the subscriber to receive one copy of each issue published during the subscription period. The value of a premium is considered its actual cost to the publisher, its recognized retail value, or its represented value, whichever is highest.
- g. Publications primarily designed for free circulation and/or circulation at nominal prices may not qualify for the general publications category. For this standard, the distribution of all copies of a publication is considered, whether circulated in

the mail or otherwise. Publications are considered primarily designed for free circulation and/or circulation at nominal prices when more than 50% of all copies circulated are:

1. Provided free of charge to the ultimate recipients;
2. Paid for at nominal prices by the ultimate recipients;
3. Addressed with an alternative form of address; or
4. Intended by the publisher to be circulated for free and/or at nominal prices.

6.1.3 Advertising Standards

Advertising is defined in 4.13. General publications primarily designed for advertising purposes do not qualify for Periodicals mailing privileges, including publications that:

- a. Contain more than 75% advertising in more than half of the issues published during any 12-month period.
- b. Are owned or controlled by individuals or business concerns and conducted as an auxiliary to and essentially for the advancement of any other business or calling of those who own or control the publications.
- c. Consist principally of advertising and articles about advertisers in the publication.
- d. Have only a token list of subscribers and that print advertisements free for advertisers who pay for copies to be sent to a list of persons furnished by the advertisers.
- e. Are published under a license from individuals or organizations and that feature other businesses of the licensor.

6.2 Publications of Institutions and Societies

6.2.1 Basic Standards

A publication that meets the applicable basic standards in 4.0 through 9.0 and 11.0 and contains only the publisher's own advertising and not, under any condition, the advertising of other persons or organizations, is eligible for Periodicals mailing privileges if it is:

- a. Published by a regularly incorporated nonprofit institution of learning, that is, an organization of a permanent nature where instruction is given in the higher branches of education only, owing its origin to private or public munificence, and established solely for the public good and not for private gain.
- b. Published by a regularly established state institution of learning supported in whole or in part by public taxation.
- c. Published by any public or nonprofit private elementary or secondary institution of learning or its administrative or governing body.
- d. A bulletin issued by a state board of health, a state industrial development agency, a state conservation or fish and game agency or department, or a state board or department of public charities or corrections.

707.6.2.2

- e. A program announcement or guide published by an educational radio or television agency of a state or political subdivision thereof or by a nonprofit educational radio or television station.

6.2.2 Types of Publications

Publications are eligible for Periodicals mailing privileges if they meet the basic standards of 4.0, contain only the publisher's own advertising or general advertising subject to 6.2.3, and are published by:

- a. A benevolent or fraternal society or order organized under the lodge system and having a bona fide membership of at least 1,000 persons (publications under the auspices of the society or order are also eligible).
- b. A trade union (publications under the auspices of the union are also eligible).
- c. A strictly professional society, that is, a group consisting solely of persons who have obtained professional status by advanced educational training, experience, specialized interest, or peer examination. Where applicable, public certification in a particular field of the arts or sciences (such as engineering, law, or medicine) is considered in determining eligibility. The members must be engaged in their given profession under its binding standards of performance and conduct on which the public is entitled to rely.
- d. A strictly literary society, that is, an organization whose sole purpose is to encourage and cultivate an appreciation of general literature, a literary subject, or an author of recognized literary accomplishment. The membership must be composed of individuals who discuss or analyze the style, composition, or other characteristics of the literature or authors in which they have a common interest.
- e. A strictly historical society, that is, an organization whose sole purpose is to discover, collect, and systematically record the history of civilization or of a particular segment. Such a society should preserve this material and make it available to its members and the general public, and should extend education by producing published material, holding regular meetings, presenting addresses and lectures, or using mass media.
- f. A strictly scientific society, that is, an organization whose sole purpose is to bring individuals together for scientific investigations and pursuits in the applied, pure, or natural sciences, and to disseminate technical information on these subjects.
- g. A church (a congregation of worshippers who conduct religious services) or a church organization (organizations of individual churches, organizations that are subsidiary to individual churches, and national or regional organizations of churches).

6.2.3 Advertising Standards

Advertising is defined in 4.13. A publication qualifying for Periodicals mailing privileges under 6.2.2 may contain advertising of other organizations or persons if:

- a. It is not designed or published primarily for advertising purposes.
- b. It is originated and published to further the purposes of the qualifying organization.

- c. Its mailed circulation is limited to copies mailed to members who pay, either as a part of their dues or assessments or otherwise, at least 50% of the subscription price regularly charged to other members; to other actual subscribers; to exchanges; and to 10% of such circulation as sample copies. When members pay for their subscriptions as a part of their dues or assessments, individual subscriptions or receipts are not required.

6.3 Publications of State Departments of Agriculture

6.3.1 Basic Standards

A publication issued by a state department of agriculture that meets the basic standards in 4.0 is eligible for Periodicals mailing privileges if it is published to further only the objectives of the department and contains no advertising.

6.3.2 In-County Prices

For determining the number of copies qualifying for In-County prices, all circulated copies are considered subscriber copies and the total number of such copies is the total paid circulation.

6.4 Requester Publications

6.4.1 Basic Standards

A publication, whether circulated free or to subscribers, may be authorized Periodicals prices if it meets the basic standards in 4.0 and:

- a. Each issue contains at least 24 pages.
- b. No issue contains more than 75% advertising (as defined in 4.13).
- c. The publication is not owned or controlled by one or more individuals or business concerns and conducted as an auxiliary to and essentially for the advancement of the main business or calling of those who own or control the publication.

6.4.2 Circulation Standards

Requester publications must meet these circulation standards:

- a. The publication must have a legitimate list of persons who have requested the publication, and 50% or more of the copies must be distributed to persons who have made such requests.
- b. Subscription copies of the publication that are paid for or promised to be paid for, including those at or below a nominal price, may be included in the determination of whether the 50% request requirement is met.
- c. Persons are not deemed to have requested the publication if their request is induced by a premium offer or by receipt of material consideration.
- d. Records of requests for a publication obtained with subscriptions or requests for one or more other publications must be kept so that individual subscriptions or requests for each publication, by title, can be verified.
- e. Requests that are more than 3 years old cannot be considered valid requests. Copies addressed using an alternative address format are not considered requested copies, and persons are not considered to have requested the publication if their copies are addressed in that manner.

707.6.5

- f. When a requester publication is issued by a membership organization, the organization may adopt a resolution specifying that each member receive a copy of each issue of the publication. *For example: "Resolved: That a copy of [publication title] shall be sent to each member of [organization name]."* Records must be kept to show that the publication is sent to organization members. Form 3500 must be accompanied by a certified copy of the resolution adopted and the written assurance of a responsible official that the required records are kept.

6.5 Foreign Publications**6.5.1 Basic Standards**

Foreign newspapers and other periodicals that meet the basic standards in 4.0 and have the same general character as domestic publications entered as Periodicals may be granted Periodicals mailing privileges.

6.5.2 Known Office

The known office of publication may be the office of the publisher's agent.

6.5.3 Prices

Foreign publications eligible for Periodicals mailing privileges are subject to the same Periodicals prices as domestic (U.S.) publications.

6.5.4 Circulation Standards

Review of applications is based only on U.S. circulation.

6.5.5 Copyright

This standard does not authorize the mailing of a publication that violates a copyright granted by the United States.

6.6 News Agent Registry**6.6.1 Definition**

The term *news agent* means a person or concern selling two or more Periodicals publications published by more than one publisher.

6.6.2 Authorization

A news agent must be authorized by the USPS before the agent may mail Periodicals publications at Periodicals prices.

6.6.3 Remailing

A news agent may not remove bundles of copies from a Post Office, write an address on each copy, and return them to the office for dispatch or delivery without paying additional postage.

6.6.4 Unsold Copies

Unsold copies returned to the publishers or other news agents, or copies sent to other news agents for purposes other than sale, or sent to persons not having subscriptions with news agents, are subject to the Outside-County Periodicals prices.

6.6.5 Parts Returned

Parts of publications returned to publishers to show that copies have not been sold are subject to the applicable Standard Mail or Package Services prices.

7.0 Mailing to Nonsubscribers or Nonrequesters

7.1 Sample Copies

Sample copies are nonsubscriber or nonrequester copies. They may be mailed at the prices and under the applicable standards below and in [10.0, Preferred Periodicals](#).

7.2 Simplified Address

Nonsubscriber or nonrequester copies may be mailed to boxholders with each copy addressed in the simplified address format if such copies are mailed to each boxholder on a rural route or highway contract route, or to each boxholder at Post Offices that do not have city carrier service. Copies addressed in this manner may be mailed only to nonsubscribers or nonrequesters. If simplified address mailing results in a subscriber or requester receiving a copy in addition to his or her subscriber or requester copy, the additional copy is considered a nonsubscriber or nonrequester copy.

7.3 Advertising Copies

Copies paid for by advertisers or others for advertising purposes are nonsubscriber or nonrequester copies. Copies mailed for advertising purposes under arrangements with advertisers or others, and copies mailed by a publisher acting as an agent for an advertiser, are nonsubscriber or nonrequester copies. Those copies are subject to the applicable prices for nonsubscriber or nonrequester copies.

7.4 Gift Subscriptions

The subscription list may contain the names of persons whose subscriptions were paid by other individuals as gifts; these subscriptions are considered subscriber copies. Subscriptions paid by advertisers or other persons promoting their own interests, and subscriptions given free by the publisher, are *not* gift subscriptions, and are considered nonsubscriber or nonrequester copies subject to the corresponding prices.

7.5 Exchange Copies

A small part of the subscription list may contain publishers to whom copies are sent in exchange for copies of the recipients' publications. Only one copy may be sent to each publisher. These exchange copies are considered subscriber or requester copies.

7.6 Expired Subscription

Copies may be mailed at the prices that apply to subscriber copies for 6 months after a subscription has expired if the publisher makes a good-faith attempt to obtain payment or a promise of payment for a renewal during the 6-month period. These copies are *not* considered subscriber copies for determining eligibility for Periodicals mailing privileges, the base for computing the 10% nonsubscriber limits, or whether an issue is a bona fide issue under [8.0, Record Keeping Standards for Publishers](#).

7.7 Complimentary Copies

All complimentary copies, including copies sent in fulfillment of subscriptions given free by the publisher, are considered nonsubscriber or nonrequester copies subject to the corresponding prices.

707.7.8

7.8 Proof Copies

One complete copy of each issue may be mailed at the applicable subscriber prices to each advertiser (or representative or agent) in the issue to prove that the advertisements are printed. These copies are considered subscriber or requester copies for Periodicals prices and eligibility. If more than one proof copy in an issue is sent to an advertiser (or representative or agent), the additional copies are considered nonsubscriber or nonrequester copies subject to the corresponding prices.

7.9 Nonrequester and Nonsubscriber Copies**7.9.1 Nonrequester Copies**

For authorized Periodicals requester publications, up to 10% of the total number of copies mailed to requesters during the calendar year may be mailed to nonrequesters at the Outside-County Periodicals prices, provided that those copies would be eligible for Outside-County prices if mailed to requesters, and if the copies are presorted under applicable standards. Nonrequester copies within the 10% limit do not need to be commingled in a mailing with requester copies to be eligible for Outside-County prices.

7.9.2 Nonsubscriber Copies

For other publications authorized Outside-County prices, up to 10% of the total number of copies mailed to subscribers during the calendar year may be mailed to nonsubscribers at the Outside-County Periodicals prices, provided that those copies would be eligible for Outside-County prices if mailed to subscribers, and if the copies are presorted under applicable standards. Nonsubscriber copies within the 10% limit do not need to be commingled in a mailing with subscriber copies to be eligible for Outside-County prices.

7.9.3 Preferred Prices

For In-County prices, Nonprofit, Classroom, Science-of-Agriculture, Limited Circulation, and Limited Circulation Science-of-Agriculture publications, nonsubscriber (for Periodicals except requester publications) or nonrequester (for requester publications) copies up to 10% of the total number of copies mailed to subscribers or requesters during the calendar year may be mailed at the applicable Preferred prices or Preferred price discount, provided that the nonsubscriber or nonrequester copies would qualify as Preferred price or Preferred price discount publications if mailed to subscribers or requesters and if the copies are presorted under applicable standards. Nonsubscriber or nonrequester copies mailed over the 10% limit are not eligible for Preferred prices or the Preferred price discount. To qualify for regular Outside-County prices, the nonsubscriber or nonrequester copies over the 10% limit must be part of a presorted, commingled mailing (one that includes subscriber or requester copies). Subject to [11.3](#), nonsubscriber or nonrequester copies may be mailed at In-County prices up to a 10% limit of the total number of subscriber or requester copies of the publication mailed at In-County prices during the calendar year. Once the 10% calendar year limit is exceeded for the number of nonsubscriber or nonrequester copies that may be mailed at Preferred prices or the Preferred price discount, the nonsubscriber or nonrequester copies may not then be mailed at In-County prices even if the 10% limit separately applied to those prices is not exceeded.

7.9.4 Publications of Institutions and Societies

For publications of institutions and societies that are not authorized to contain general advertising, all circulated copies are considered subscriber copies and the total number of such copies is the total paid circulation.

7.9.5 Mixed Preferred and Regular Prices

For publications authorized both Outside-County prices and In-County prices and/or Science-of-Agriculture prices, once the total number of nonsubscriber or nonrequester copies mailed during the calendar year (regardless of price) exceeds 10% of the total number of copies mailed to subscribers or requesters during the calendar year, further mailings of nonsubscriber or nonrequester copies are not eligible for any Preferred price. Nonsubscriber, or nonrequester, copies over the 10% allowance must be part of a presorted commingled mailing (i.e., including subscriber or requester copies) to qualify for Outside-County prices.

7.9.6 Copies Over 10% Allowance

Nonsubscriber or nonrequester copies, over 10% of the total number of copies mailed to subscribers or requesters during the calendar year, are eligible for Outside-County prices when they are commingled and presorted with subscriber or requester copies.

7.9.7 Excess Noncommingled Mailing

A mailing is not eligible for Periodicals prices if it consists entirely of nonsubscriber or nonrequester copies over the 10% limit of the total number of copies mailed to subscribers or requesters during the calendar year. These copies are subject to the appropriate Express Mail, First-Class Mail, Standard Mail, or Package Services price.

7.9.8 Mixed Mailing

If all copies in a mailing are to nonsubscribers or nonrequesters, and some copies are within the 10% limit while the rest are over the 10% limit, the portion exceeding the 10% limit is not eligible for Periodicals prices. That portion is subject to the appropriate Express Mail, First-Class Mail, Standard Mail, or Package Services price.

8.0 Record Keeping Standards for Publishers**8.1 Basic Standards****8.1.1 Purpose**

The publisher must keep records that can support the information required on the application for Periodicals mailing privileges (or any other form) and to confirm eligibility for entry of the publication at the requested Periodicals price. The records must show that the publication is distributed to a legitimate list of requesters (if applicable) or is not designed primarily for free circulation or circulation at nominal prices. If the publication is authorized to carry general advertising, the publisher must keep a list of legitimate subscribers. A publication of an institution or society that is authorized to carry general advertising may keep a list of subscribers or proof of a resolution to distribute to members, similar to that described in [5.0, Applying for Periodicals Authorization](#).

8.1.2 Information Required

Records must be available so that the USPS can determine:

- a. Number of copies printed.
- b. Manner of distribution and disposition of all copies.
- c. Accuracy of the zone distribution on the postage statement.
- d. The existence of a list of legitimate subscribers who have paid more than a nominal subscription price for publications authorized to carry general advertising (other than requester publications).
- e. The existence of a legitimate list of requesters for requester publications.

8.1.3 Retention

The publisher must keep records for each issue of a publication for 3 years from its issue date, except for circulation records for general or requester publications for which USPS verification of circulation is done by a USPS- authorized audit bureau. A publisher whose records are verified by an authorized audit bureau is not required to keep source records of requests and subscriptions longer than required by the audit bureau.

8.1.4 Types of Records

These records may be used to meet the standards in [8.1.1](#) and [8.1.2](#):

- a. Print orders and invoices showing the total number of copies printed.
- b. Individual and bulk orders for subscriptions and nonsubscriber copies.
- c. Newsstand and vending machine sales and returns.
- d. Stubs or copies of receipts issued.
- e. Sales records and returns for over-the-counter sales.
- f. Cash books, bank deposit receipts, or similar records.
- g. Records of copies of the publication destroyed.

8.2 Verification**8.2.1 Purpose**

A publisher must make records available for USPS review and verification on a periodic basis to evaluate indications of ineligibility for Periodicals entry, to verify that the postage statement shows the correct number of copies mailed to each zone and the correct postage, and to confirm that publications authorized to carry general advertising meet the applicable circulation standards.

8.2.2 Authorized Verification

USPS employees or an authorized audit bureau may conduct verifications of circulation for an application for Periodicals mailing privileges, reentry application, or other required circulation verification of general or requester publications.

8.2.3 Independent Audit Bureau

To have an authorized independent audit bureau conduct the audit, the publisher must make that request directly to the bureau and advise the original entry postmaster. The audit bureau coordinates the verification with the original entry postmaster.

8.3 Statement of Ownership, Management, and Circulation

8.3.1 Filing Form 3526

The publisher of each Periodicals publication, including foreign publications accepted at Periodicals prices, must file Form 3526 by October 1 of each year at the original entry Post Office.

8.3.2 Content

The information provided on Form 3526 must allow the USPS to determine whether the publication meets the standards for Periodicals mailing privileges. This information includes, as applicable, the identity of the editor, managing editor, publishers, and owners; the owning corporation and its stockholders; any further corporations and stockholders that own at least 1% of the stock of a corporation owning the publication; known bondholders, mortgagees, and other security holders; and the extent and nature of the circulation of the publication, including the number of copies distributed, the methods of distribution, and how much of the circulation is paid in whole or in part.

8.3.3 Publication

The publisher of each publication authorized Periodicals mailing privileges as a general or requester publication must publish a complete statement of ownership, containing all information required by Form 3526, in an issue of the publication to which that statement relates; other publications are not required to publish this statement. A reproduction of the Form 3526 submitted to the USPS may be used. The required information must appear in an issue whose primary mailed distribution is produced not later than October 10 for publications issued more frequently than weekly, or not later than October 31 for publications issued weekly or less frequently but more frequently than monthly; or in the first issue whose primary mailed distribution is produced after October 1 for all other publications.

8.3.4 Noncompliance

If a publisher does not comply with the filing or publishing standards of 8.3 and, after notice from the postmaster, further fails to comply within 10 days, that publisher's eligibility for Periodicals prices is suspended until compliance occurs.

8.4 Nonsubscriber and Nonrequester Copy Distribution

8.4.1 Multiple Issues—Same Day

The USPS may require the publisher to submit Form 3541-C when an issue is regularly published on the same day as another issue of the same publication under the Periodicals authorization of the parent publication. When requested, the publisher must complete Form 3541-C and attach it to the postage statements submitted with the corresponding mailings.

8.4.2 Multiple Issues—Different Days

The USPS may require the publisher to submit Form 3541-E when an issue is regularly published during the same month as another issue of the same publication under the Periodicals authorization of the parent publication. When requested, the publisher must complete Form 3541-E and attach it to the postage statements submitted with the corresponding mailings.

9.0 Changing Title, Frequency, or Known Office of Publication**9.1 General****9.1.1 When Required**

Except under [9.1.2](#), the publisher must file an application for reentry on Form 3510 to change the title, frequency of issue, or location of the known office of publication of an authorized Periodicals publication.

9.1.2 When Not Required

An application for reentry is not required if the current and requested known offices of publication are served by the same Post Office; or if only the ownership of the publication is changed, unless that change disqualifies the publication from eligibility under [10.0](#) for Preferred Periodicals prices or from authorized entry under [6.0](#) as a publication of an institution or society, as a publication of a state department of agriculture, or as a foreign publication.

9.1.3 Where to File

To change the title or frequency of issuance of a Periodicals publication, the publisher must submit Form 3510 to the original entry postmaster. To relocate the known office of publication, the publisher must submit Form 3510 to the postmaster with jurisdiction over the requested new location.

9.1.4 Accompanying Documentation

A Form 3510 must be accompanied by two copies of the publication that show the new title (if applicable), and that contain a complete identification statement that reflects the changes requested. A proof copy of the amended identification statement is acceptable if the publisher specifies the issue in which it is to be printed. Other documentation may be required:

- a. To change frequency of issuance: Form 3541-C (if the requested frequency of issuance includes more than one regular issue on any day) or Form 3541-E (if the requested frequency of issuance includes more than one regular issue per month, but not on the same day) (see [8.0, Record Keeping Standards for Publishers](#)).
- b. To change known office of publication: A complete distribution plan, including details on the mail volume to be deposited at the new original entry Post Office, regardless of whether relocation of the original entry Post Office changes that information. An additional fee (under [30.0, Additional Entry](#)) is not required if distribution changes affect only the original entry Post Office.

9.1.5 Location

The location shown on Form 3510 for the new original entry Post Office must be a Post Office. Other postal facilities (such as branches, stations, contract offices, and processing hubs) are not authorized as original entries.

9.1.6 Same County

Reentry may be authorized at a new original entry Post Office in the same county as an existing additional entry Post Office. If the publication is eligible for In-County prices, the publisher must give the original entry postmaster a copy of all postage statements claiming those prices to support compliance with the standards for In-County prices.

9.1.7 Filing Date

Publishers wanting to change the title or frequency of issuance of a publication must file Form 3510 by the date on which copies are to be issued with the new title or on the new frequency.

9.1.8 Effective Date

To permit adjustment of transportation without penalty to the USPS, the USPS may delay the effective date for a publisher's requested change in the known office of publication if the application was filed fewer than 40 days before that date.

9.1.9 Reentry Denial

Reentry may be denied at a Post Office where resources are not adequate for efficient and economical handling by postal transportation, distribution, and processing systems.

9.1.10 Application Fee

The correct fee must accompany an application for reentry to change a publication's title, frequency of issuance, or known office of publication. The fee is not refundable. No additional fee is required when Form 3500 is required as part of a reentry application.

9.1.11 Multiple Reentry Requests

A publisher may file a single Form 3510 and pay a single fee to request more than one reentry action under [9.1](#) if all required documentation is submitted with the Form 3510; all required information is given about the distribution plan for mailings at the new original entry Post Office (if applicable); and the effective dates for the reentry actions do not cover more than 30 calendar days. The publisher must submit a separate Form 3510 (and pay the fee) for each reentry action that cannot meet these conditions.

9.1.12 Other Actions

A publisher must submit a separate Form 3510 (and pay any required fee) for each reentry action under [28.4, Deposit at AMC/AMF](#), [30.0, Additional Entry](#), [10.0, Preferred Periodicals](#) (no fee), or [9.2, Changing Qualification Categories](#). A publisher must file a separate Form 3510 (and pay the applicable fee) if modifications are made to the publication's distribution plan other than the frequency of issuance or the location of the original entry Post Office.

9.2 Changing Qualification Categories

9.2.1 When Required

To change the category under which a publication is authorized Periodicals mailing privileges, the publisher must file an application for reentry on Form 3510 with the original entry postmaster and pay the applicable fee.

9.2.2 When Not Required

An application for reentry is not required if only the ownership of the publication is changed, unless that change disqualifies the publication for eligibility for Preferred Periodicals prices, or for entry as a publication of an institution or society, as a publication of a state department of agriculture, or as a foreign publication.

9.2.3 Forms Required

The publisher must submit Form 3500 and Form 3510 to change a publication's authorization category.

9.2.4 Filing

The publisher must make all filings under [9.2.3](#) to the original entry postmaster.

9.3 Application for Reentry

9.3.1 Pending

While an application for reentry is pending, copies of an authorized Periodicals publication are accepted for mailing at the Periodicals prices, subject to [9.3.5, Effective Date](#).

9.3.2 Additional Information

The PCSC manager may ask for more information or evidence from the publisher to complete or clarify an application. Failure to provide such information is sufficient grounds to deny the application.

9.3.3 Proof of Compliance

The publisher must be able to show to USPS satisfaction that the publication, as reentered, still meets all applicable Periodicals standards. As evidence of continued qualification that must be made available with the application for reentry, circulation records must be available to allow USPS verification that all issues or editions of the publication, as reentered, meet applicable standards. Other documentation, including circulation records for other issues or editions, must be available on request. Failure to provide this evidence is sufficient grounds to deny the reentry request.

9.3.4 Ruling

The PCSC manager reviews and rules on an application for reentry.

9.3.5 Effective Date

An entry office may not be used before authorization by the USPS. A publisher may not pay postage at another price to deposit copies at an unauthorized entry office. Subject to the restrictions in [9.1.12](#) through [9.1.10](#), the effective date of a reentry authorization is the application date (if the publication was eligible on that date) or the eligibility date (if the publication became eligible after the application date). The requested effective date for a change in original entry office may be deferred temporarily until transportation or mail processing resources are in place to handle

the action requested. If deferral is due to USPS transportation contract limitations, the publisher's requested effective date may be approved with the publisher's agreement to reimburse the USPS for any cost caused by modifying or canceling contracted transportation.

9.3.6 Denial After Verification

If a verification shows that the publication (as modified by the requested reentry) does not meet applicable Periodicals standards, the PCSC manager denies the reentry application and notifies the publisher in writing of the reasons for the denial. Within 15 days of receipt of such notice, the publisher may either return to the publication status before the application for reentry was submitted or appeal the denial under [9.3.8](#). If no appeal is filed, the denial takes effect 15 days from the publisher's receipt of the manager's decision.

9.3.7 Denial—No Verification

If the PCSC manager denies an application not requiring verification, the publisher receives written notice of the reasons for denial. The denial takes effect 15 days from the publisher's receipt of the notice, unless the publisher files an appeal under [9.3.8](#) within that time.

9.3.8 Appeal

An appeal must be filed through the PCSC with the manager of Mailing Standards (see [608.8.0](#) for address). The manager of Mailing Standards may ask the publisher for more information or evidence to clarify the appeal. Failure to provide such information is sufficient grounds to deny the appeal.

9.3.9 Mailing During Appeal

During the appeal:

- a. Copies of any issue of a publication denied reentry under [9.1](#) and found unqualified for Periodicals mailing privileges are accepted in a pending status at the applicable Standard Mail or Package Services prices. For this standard, the pending status begins when the appeal is filed and continues until the end of the appeal process.
- b. Copies of a publication denied reentry under [9.2](#) are accepted at the currently applicable Periodicals price.
- c. The publisher must submit the applicable Periodicals and Standard Mail or Package Services postage statements with each mailing of the publication in a pending status. Failure to submit these statements is sufficient grounds to deny a postage refund under [9.3.12](#).

9.3.10 Refund

If the reentry application is approved on appeal, the publisher receives the difference between the applicable Periodicals postage and the Standard Mail or Package Services postage paid during the pending status if the publisher submits records to substantiate the amount of the refund. If the reentry application is denied on appeal, no refund is made.

9.3.11 Final Decision

The manager of Mailing Standards (see [608.8.0](#) for address) issues the final agency decision on appeals under [9.1](#).

707.9.3.12

9.3.12 Denial

If the manager denies an appeal under [9.2, Changing Qualification Categories](#), it is effective 15 days from the publisher's receipt of the decision unless, during that time, the publisher files an appeal with the USPS Recorder under 39 CFR 954, a copy of which accompanies the decision.

10.0 Preferred Periodicals**10.1 Nonprofit Eligibility—Basic Standards****10.1.1 Authorization**

To be mailed at Nonprofit Periodicals prices, a publication must be granted Periodicals entry and a Nonprofit authorization for which eligibility was established under [10.2](#) or [10.3](#).

10.1.2 Other Prices and Discounts Claimed

Each piece must also meet the standards for the prices or discounts claimed. Nonsubscriber or nonrequester copies are subject to [7.0](#).

10.1.3 Advertising Percentage

Publications with an advertising percentage of 10% or less are considered 100% nonadvertising for price purposes. Those publications may use "0" as the advertising percentage when computing the nonadvertising adjustment to be applied to the outside-county piece price charges. Publications with an advertising percentage exceeding 10% are subject to Outside-County pound prices for the entire advertising portion of the publication.

10.2 Nonprofit Eligibility—Qualified Organizations**10.2.1 Types of Organizations**

A publication issued by and in the interest of one of the types of organizations described in [10.2.3](#) through [10.2.10](#) qualifies for the Nonprofit prices if the organization is not organized for profit and none of its net income inures to the benefit of any private stockholder or individual.

10.2.2 Primary Purpose

The standard of *primary purpose* used in the definitions in [10.2.3](#) through [10.2.10](#) requires that the organization be both organized and operated for the primary purpose. Organizations that incidentally engage in qualifying activities do not meet the primary purpose test.

10.2.3 Religious Organization

A *religious organization* is a nonprofit organization whose primary purpose is to:

- a. Conduct religious worship (such as churches, synagogues, temples, or mosques);
- b. Support the religious activities of nonprofit organizations whose primary purpose is to conduct religious worship; or
- c. Further the teaching of particular religious faiths or tenets, including religious instruction and the dissemination of religious information.

10.2.4 Educational Organization

An *educational organization* is a nonprofit organization whose primary purpose is the instruction or training of individuals for improving or developing their capabilities or the instruction of the public on subjects beneficial to the community. An organization may be educational even though it advocates a particular position or viewpoint, as long as it presents a specifically full and fair exposition of the pertinent facts to permit the formation of an independent opinion or conclusion. Conversely, an organization is not considered educational if its principal function is the mere presentation of unsupported opinion. These are examples of educational organizations:

- a. An organization (such as a primary or secondary school, a college, or professional or trade school) that has a regularly scheduled curriculum, a regular faculty, and a regularly enrolled body of students in attendance at a place where educational activities are regularly carried on.
- b. An organization whose activities consist of presenting public discussion groups, forums, panels, lectures, or similar programs, including on radio or television.
- c. An organization that presents a course of instruction by correspondence or on television or radio.
- d. Museums, zoos, planetariums, symphony orchestras, and similar organizations.

10.2.5 Scientific Organization

A *scientific organization* is a nonprofit organization whose primary purpose is to conduct research in the applied, pure, or natural sciences or to disseminate technical information dealing with the applied, pure, or natural sciences.

10.2.6 Philanthropic (Charitable) Organization

A *philanthropic (charitable) organization* is a nonprofit organization organized and operated to benefit the public. Examples include those that are organized to relieve the poor, distressed, or underprivileged; to advance religion, education, or science; to erect or maintain public buildings, monuments, or works; to lessen the burdens of government; or to promote social welfare for any of the above purposes or to lessen neighborhood tensions, eliminate prejudice and discrimination, defend human and civil rights secured by laws, or combat community deterioration and juvenile delinquency. That an organization organized and operated to relieve indigent persons receives voluntary contributions from those persons does not necessarily make it ineligible for Nonprofit prices as a philanthropic organization. That an organization, in carrying out its primary purpose, advocates social or civic changes or presents ideas on controversial issues to influence public opinion and sentiment to accept its views does not necessarily make it ineligible for Nonprofit prices as a philanthropic organization.

10.2.7 Agricultural Organization

An *agricultural organization* is a nonprofit organization whose primary purpose is the betterment of the conditions of those engaged in agricultural pursuits, improvement of the grade of their products, and the development of a higher degree of efficiency in agriculture; or the collection and dissemination of information or materials about agriculture. The organization may further and advance agricultural interests through educational activities; by holding agricultural fairs; by collecting and disseminating

707.10.2.8

information about cultivation of the soil and its fruits or the harvesting of marine resources; by rearing, feeding, and managing livestock, poultry, bees, and so forth; or by other activities related to agricultural interests.

10.2.8 Labor Organization

A *labor organization* is a nonprofit organization whose primary purpose is the betterment of the conditions of workers. Labor organizations include, but are not limited to, organizations in which employees or workers participate, whose primary purpose is to deal with employers about grievances, labor disputes, wages, hours of employment, working conditions, and so forth (such as labor unions and employee associations).

10.2.9 Veterans' Organization

A *veterans' organization* is a nonprofit organization of veterans of the armed services of the United States, or an auxiliary unit or society of, or a trust or foundation for, any such post or organization.

10.2.10 Fraternal Organization

A *fraternal organization* is a nonprofit organization whose primary purpose is fostering fellowship and mutual benefits among its members. For this standard, a qualified fraternal organization must also be organized under a lodge or chapter system with a representative form of government; must follow a ritualistic format; and must be composed of members who are elected to membership by vote of the members. Qualifying fraternal organizations include the Masons, Knights of Columbus, Elks, and college fraternities or sororities, and may have members of either or both sexes. Fraternal organizations do not include such organizations as business leagues, professional associations, civic associations, or social clubs.

10.3 Nonprofit Eligibility—Other Qualified Organizations**10.3.1 Basic Standards**

Subject to [10.3.2](#), a publication may qualify for Nonprofit prices regardless of the nonprofit status of the publishing organization if it is a:

- a. Publication issued by and in the interest of an association of rural electric cooperatives.
- b. Program announcement or guide published by an educational radio or television agency of a state or political subdivision thereof or by a nonprofit educational radio or television station.
- c. Publication of the official highway or development agency of the state that meets the standards for a general publication in [6.0](#) and contains no advertising other than the publisher's own advertising.
- d. Conservation publication published by a state agency responsible for management and conservation of the fish or wildlife resources of that state.

10.3.2 Limits

Only one publication per qualifying organization may qualify for the Nonprofit prices under [10.3.1c](#) or [10.3.1d](#).

10.4 Classroom Eligibility**10.4.1 Authorization**

To be mailed at the Classroom Periodicals prices, a publication must be granted Periodicals entry and a Classroom price authorization.

10.4.2 Types of Publications

Classroom prices apply only to educational, religious, or scientific publications designed for use in school classrooms or religious instruction classes.

10.4.3 Other Prices and Discounts Claimed

Each piece must also meet the standards for prices or discounts claimed. Nonsubscriber copies are subject to 7.0. Subject to 29.0, the DDU or DSCF piece price applies to each piece claimed in the pound price portion at the corresponding price.

10.4.4 Advertising Percentage

Publications with an advertising percentage of 10% or less are considered 100% nonadvertising for price purposes. Those publications may use "0" as the advertising percentage when computing the nonadvertising adjustment to be applied to the outside-county piece price charges. Publications with an advertising percentage exceeding 10% are subject to Outside-County pound prices for the entire advertising portion of the publication.

10.5 Application**10.5.1 Filing**

The Preferred price discount is available only after USPS authorization. An application or written request for authorization as a Nonprofit or Classroom publication must be filed at the publication's original entry Post Office. Application may be made by submitting an application for Periodicals mailing privileges (Form 3500) or by filing for reentry (on Form 3510) after Periodicals mailing privileges are authorized. The applicant must submit evidence to show eligibility under the corresponding standards in 10.0.

10.5.2 Fee

No fee is required for an application to mail at a preferred Periodicals price.

10.6 Mailing While Application Pending**10.6.1 Mailing Before Approval**

A publisher or news agent may not mail at a Periodicals Preferred price or deduct the Preferred price discount until the PCSC manager approves the application for such privilege. Until approval is given, postage must be paid at the Outside-County prices (if the publication is authorized), or at the applicable First-Class Mail, Standard Mail, or Package Services prices (if the publication or news agent is in a pending status for Periodicals mailing privileges).

10.6.2 Record of Deposits

If postage is paid through an advance deposit account, the USPS keeps a record of deposits and mailings made while the application for special prices is pending. The record is used to compute the difference between either the Outside-County price postage paid for an authorized Periodicals publication, or the Standard Mail or

707.10.7

Package Services postage paid before Periodicals mailing privileges are granted, and the applicable postage at the special price. No record is kept if postage is paid at First-Class Mail prices or if postage is not paid by advance deposit account.

10.7 Decision on Application

10.7.1 Ruling

The PCSC manager rules on special price applications that are filed concurrently with an original entry application. The PCSC manager also rules on requests for special prices made on Form 3510 for publications authorized Periodicals mailing privileges.

10.7.2 Additional Information

Before acting on an application, the manager may ask the publisher for more information or evidence to complete or clarify the application. Failure to provide such information is sufficient grounds to deny the application.

10.7.3 Effective Date

The authorization takes effect on the application date or the eligibility date, whichever is later.

10.7.4 Refund

Except as noted in [10.7.5](#), when an authorization for special prices is granted, the original entry postmaster refunds to the publisher the difference, if any, between the postage paid at the Outside-County Periodicals prices or deposited at Standard Mail or Package Services prices and the applicable special prices for copies mailed while the application was pending. Refunds are made only for mailings deposited on or after the effective date of the authorization and only if postage was paid by advance deposit account for which the entry Post Office kept the necessary records.

10.7.5 No Refund

No refund is made for:

- a. A denied or withdrawn application.
- b. The period before the effective date of the authorization.
- c. Postage paid at any price other than the Periodicals prices.
- d. Postage not paid by advance deposit account for which the required record was kept.
- e. Postage at any price affixed to copies of the publication.
- f. Postage paid at Express Mail or First-Class Mail prices.
- g. Postage on mailings not meeting the applicable standards for special Periodicals prices.

10.7.6 Denial and Appeal

If the application to mail at special prices is denied, the PCSC manager notifies the applicant in writing, giving the reasons for the denial. The denial takes effect 15 days from the publisher's receipt of the denial, unless within that time the publisher appeals to the manager of Mailing Standards (see [608.8.0](#) for address). Before taking action, the manager of Mailing Standards may ask the publisher for more

information or evidence to support the appeal. Failure to provide such information is sufficient grounds for denying the appeal. The manager of Mailing Standards issues the final agency decision.

11.0 Basic Eligibility

11.1 Outside-County Prices

11.1.1 General

Outside-County prices apply to copies of an authorized Periodicals publication mailed by a publisher or news agent that are not eligible for In-County prices under [11.3](#). Outside-County prices consist of an addressed per piece charge, a zoned charge for the weight of the advertising portion of the publication, an unzoned charge for the weight of the nonadvertising portion, and a bundle and container charge.

11.1.2 Nonrequester and Nonsubscriber Copies

For excess noncommingled mailings under [7.0](#), nonrequester and nonsubscriber copies are not eligible for Periodicals prices unless the publication is authorized under [6.2, Publications of Institutions and Societies](#), and is not authorized to contain general advertising. Nonrequester and nonsubscriber copies in excess of the 10% allowance under [7.0](#) are subject to Outside-County prices when commingled with requester or subscriber copies, as appropriate.

11.1.3 Preferred Price Discount

Publications qualifying as Nonprofit or Classroom Periodicals receive a 5% discount off the total Outside-County postage, excluding the postage for advertising pounds. Nonsubscriber or nonrequester copies claiming the Preferred price discount are subject to the standards in [7.0](#).

11.1.4 Limited Circulation Discount

Publications, excluding Nonprofit, Classroom, and Limited Circulation Science-of-Agriculture publications, receive a 5% discount off the total Outside-County postage, excluding the postage for advertising pounds, if eligible copies are mailed at In-County prices and the total number of Outside-County copies mailed for that issue is less than 5,000. Nonsubscriber or nonrequester copies claiming the Limited Circulation discount are subject to the standards in [7.0](#).

11.2 Outside-County Science-of-Agriculture Prices

11.2.1 Authorization

To be mailed at the Science-of-Agriculture prices, a publication must be granted Periodicals entry and granted a Science-of-Agriculture price authorization.

11.2.2 General

Science-of-Agriculture prices apply to Outside-County copies of authorized Periodicals publications mailed by publishers or news agents when the total copies provided during any 12-month period to subscribers or requesters residing in rural areas are at least 70% of the total number of copies distributed by any means for any purpose.

707.11.2.3

11.2.3 Limited Circulation Science-of-Agriculture Discount

Publications meeting the requirements of [11.2.2](#), receive a 5% discount off the total Outside-County postage, excluding the postage for advertising pounds, if eligible copies are mailed at In-County prices and the total number of Outside-County copies mailed for that issue is less than 5,000. Nonsubscriber or nonrequester copies claiming the Limited Circulation Science-of-Agriculture discount are subject to the standards in [7.0](#).

11.2.4 Filing

The Science-of-Agriculture price is available only after USPS authorization. An application or written request for Science-of-Agriculture prices must be filed at the publication's original entry Post Office. Application may be made by submitting an application for Periodicals mailing privileges (Form 3500) or by filing for reentry (on Form 3510) after Periodicals mailing privileges are authorized. The applicant must submit evidence to show eligibility under the corresponding standards in [11.0](#).

11.3 In-County Prices**11.3.1 Subscriber or Requester Copies**

In-County prices apply to subscriber or requester copies of any issue of a Periodicals publication entered within the county in which the Post Office of original entry is located for delivery to addressees within that county, if one of the following standards is met:

- a. The total paid or requested circulation of such issue is less than 10,000 copies.
- b. The number of paid or requested copies of such issue distributed within the county of publication is more than 50% of the total paid or requested circulation of such issue.

11.3.2 Exceptional Conditions

The standard in [11.3.1](#) also is applied under any of these exceptional conditions:

- a. If an entry office postmaster directs the publisher to deposit copies of the publication at a postal facility serving that office, those copies are considered as mailed at the entry office for purposes of In-County prices.
- b. A copy addressed to a destination within the county of publication is eligible for In-County prices when the entry Post Office serving that address is outside the county.
- c. Each Periodicals publication (except a requester publication or commingled nonsubscriber copies above the 10% allowance) having original entry at an incorporated city situated entirely within a county or contiguous to one or more counties in the same state, but politically independent of such county or counties, is considered within a part of the county with which it is principally contiguous. Copies mailed into that county are charged postage at the In-County prices. Where more than one county is involved, the publisher selects the principal county and notifies the postmaster.
- d. A publication entered within the county in which it is published, but distributed outside that county on a postal carrier route originating in the county of publication, is treated as if distributed within the county of publication.

11.3.3 Nonsubscriber or Nonrequester Copies

During a calendar year, the total number of nonsubscriber or nonrequester copies mailed at In-County prices may not exceed 10% of the number of subscriber or requester copies mailed at In-County prices. Mailers must include the number of nonsubscriber or nonrequester copies mailed at In-County prices when determining the overall 10% allowance under 7.0. Effectively, the allowance for nonsubscriber or nonrequester copies mailable at the In-County prices is the 10% allowed under this standard or the *overall* 10% limit under 7.0, whichever occurs first.

11.4 Discounts

The following discounts are available:

- a. *Nonadvertising*. The nonadvertising discount applies to the Outside-County piece price and is computed under 2.0.
- b. *Destination Entry*. Destination entry prices are available under 29.0 for copies entered at specific USPS facilities.

11.5 Copies Mailed by Public

The applicable single-piece First-Class Mail, Priority Mail, or Package Services price is charged on copies of publications mailed by the general public (i.e., other than publishers or registered news agents) and on copies returned to publishers or news agents.

12.0 Nonbarcoded (Presorted) Eligibility**12.1 Basic Standards****12.1.1 General**

The standards for nonbarcoded (Presorted) prices are in addition to the standards for other prices or discounts claimed and the applicable preparation standards. Not all combinations of presort level, automation, and destination entry discounts are permitted.

12.1.2 Address Quality

All pieces in a Periodicals nonbarcoded price mailing must bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:

- a. The ZIP Code accuracy standard in 12.4.
- b. If an alternative addressing format is used, the additional standards in 602.3.0.

12.1.3 Barcode Quality

Any POSTNET barcode on a mailpiece must be correct for the delivery address and meet the standards in 708.4.0 and 708.3.0.

12.1.4 Documentation

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing, supported by standardized documentation meeting the basic standards in 708.1.0. Documentation of postage

707.12.2

is not required if each piece in the mailing is of identical weight and the pieces are separated when presented for acceptance by price, by zone (including separation by In-County and Outside-County prices), and by entry (such as DDU and DSCF).

12.2 Prices—Outside-County

Outside-County nonbarcoded (Presorted) prices are based on the following criteria (see [2.0](#) for price application and computation):

- a. Piece prices are based on shape, machinability, barcoding, and presort level. The presort level of the piece is based primarily on the bundle level of the piece, except the presort level of pieces loose in trays is based on the tray level.
- b. Bundle prices are based on the bundle and container sortation level.
- c. Container prices are based on the type of container (tray, sack, or pallet), the level of sortation of the container, and where the container is entered.

12.3 Prices—In-County

12.3.1 Five-Digit Prices

5-digit prices apply to:

- a. Letter-size pieces in 5-digit bundles of six or more pieces each, placed in 5-digit trays.
- b. Nonletter-size pieces in 5-digit scheme ([L007](#)) bundles and 5-digit bundles of six or more addressed pieces each, placed in applicable merged 5-digit scheme ([L001](#)) sacks, merged 5-digit sacks, 5-digit scheme ([L001](#)) sacks, or 5-digit sacks, or palletized under [705.8.0](#) or [705.10.0](#), [705.12.0](#), or [705.13.0](#).

12.3.2 Three-Digit Prices

3-digit prices apply to:

- a. Letter-size pieces in 5-digit and 3-digit bundles of six or more pieces each, placed in 3-digit trays.
- b. Nonletter-size pieces in 5-digit scheme ([L007](#)), 5-digit, 3-digit scheme ([L008](#)) and 3-digit bundles of six or more addressed pieces each, placed in 3-digit sacks; or 3-digit scheme, and 3-digit bundles of six or more addressed pieces each, prepared under [705.8.0](#) or [705.10.0](#), [705.12.0](#), or [705.13.0](#).

12.3.3 Basic Prices

Basic prices apply to pieces that are not eligible for and claimed at 5-digit and 3-digit prices, including pieces prepared using the optional flat tray sortation under [22.7](#).

12.4 ZIP Code Accuracy

12.4.1 General

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain prices that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [12.4.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and price is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Periodicals nonbarcoded prices, regardless of any required surcharge, must meet the ZIP Code accuracy standard.

12.4.2 Authorized Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
 1. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
 2. Any mailing list service in [507.7.0](#).
 3. An authorized service provider.
 4. CASS-certified matching software.
 5. USPS Web site www.usps.com.

12.4.3 Mailer Certification

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

13.0 Carrier Route Eligibility

13.1 Basic Standards

13.1.1 General

The standards for carrier route prices are in addition to the standards for other prices or discounts claimed and the applicable preparation standards. Not all combinations of presort level, automation, and destination entry discounts are permitted.

707.13.1.2

13.1.2 Address Quality

All pieces in a Periodicals carrier route price mailing must bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:

- a. The carrier route accuracy standard in [13.4](#).
- b. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- c. If flat-size pieces are prepared with detached address labels, the additional standards in [602.4.0](#).

13.1.3 Carrier Route Sequencing

All pieces in a carrier route price mailing must also meet the applicable sequencing requirements in [13.2.2](#), [13.3](#), and [23.8](#).

13.1.4 Barcode Quality

Any POSTNET barcode on a mailpiece must be correct for the delivery address and meet the standards in [708.4.0](#) and [708.3.0](#).

13.1.5 Documentation

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing, supported by standardized documentation meeting the basic standards in [708.1.0](#). Documentation of postage is not required if each piece in the mailing is of identical weight and the pieces are separated when presented for acceptance by price, by zone (including separation by In-County and Outside-County prices), and by entry (such as DDU and DSCF). Documentation of sequencing and of density standards under [23.8](#) must be submitted with each mailing.

13.2 Sorting**13.2.1 Basic Standards**

Preparation to qualify eligible pieces for carrier route prices is optional and need not be performed for all carrier routes in a 5-digit area. Carrier route prices apply to copies that are prepared in carrier route bundles of six or more addressed pieces each, subject to these standards:

- a. *Letter-size mailings.* Carrier route prices apply to carrier route bundles that are sorted into carrier route, 5-digit carrier routes, or 3-digit carrier routes trays under [23.0](#). Trays may be palletized under [705.8.0](#).
- b. *Nonletter-size mailings.* Carrier route prices apply to carrier route bundles that are sorted in one of the following ways:
 1. Bundles sorted onto pallets prepared under [705.8.0](#), [705.10.0](#), [705.12.0](#), or [705.13.0](#), as appropriate.
 2. Bundles in carrier route, 5-digit scheme carrier routes, 5-digit carrier routes sacks, or 3-digit carrier routes sacks under [23.0](#). Sacks may be palletized under [705.8.0](#).
 3. Unsacked bundles entered at a destination delivery unit according to preparation standards in [23.4.2](#) and entry standards in [29.5.5](#).

13.2.2 Sequencing Requirements

Carrier route mail must be prepared in delivery sequence as follows:

- a. Basic carrier route price mail must be prepared either in carrier walk sequence or in line-of-travel (LOT) sequence according to LOT schemes prescribed by the USPS (23.8).
- b. The high density and saturation prices apply to pieces that are eligible for carrier route prices under 13.2.1, are prepared in carrier walk sequence, and meet the applicable density standards in 13.3 for the price claimed.

13.3 Walk-Sequence Prices

13.3.1 Eligibility

The high density or saturation prices apply to each walk-sequenced piece in a carrier route mailing, eligible under 13.2.1 and prepared under 705.8.0, 23.0, or (nonletter-size mail only) 705.10.0, 705.12.0, or 705.13.0, that also meets the corresponding addressing and density standards in 13.3.4. High density and saturation price mailings must be prepared in carrier walk sequence according to schemes prescribed by the USPS (see 23.8).

13.3.2 Copies Claimed at Other Prices

A mailing that includes copies claimed at a walk-sequence price may include other copies claimed at other prices. When presented to the USPS, the trays or sacks containing the walk-sequence price copies must be separated from other trays or sacks. Any effective separation method may be used.

13.3.3 Addressing

Walk-sequence mail must meet these addressing standards:

- a. Each addressed piece must bear a complete delivery address or an alternative format address, subject to the applicable standards.
- b. Official matter, whether mailed under congressional frank or by certain government entities for delivery on a city route, may use the appropriate simplified address format described in 23.8.

13.3.4 Density

Walk-sequence price mailings are subject to these density standards:

- a. Once the minimum volume per carrier route is met, there is no further minimum volume for the 5-digit ZIP Code delivery area. Walk-sequence price mail need not be sent to all carrier routes within a 5-digit delivery area.
- b. Except under 13.3.4c, at least 125 walk-sequenced addressed pieces must be prepared for each carrier route receiving mail claimed at the high density price. Mail for carrier routes of 124 or fewer possible deliveries can qualify for the high density price if there are at least 125 addressed pieces for the route or if pieces are addressed to every possible delivery on the route. This mail may also qualify for the saturation price, subject to 13.3.4e. In-County price pieces may also qualify for high density prices under 13.3.4c.
- c. Mail may qualify for In-County high density prices when there are addressed pieces for a minimum of 25% of the total active possible deliveries on a carrier route. If a route contains addresses both within and outside the county, the

707.13.4

number of pieces addressed to the entire carrier route will be used to determine if the 25% requirement has been met. However, for such carrier routes meeting the 25% requirement, only the pieces for that carrier route that are addressed to addresses within the county in which the original entry is located may qualify for the In-County high density prices.

- d. Pieces eligible for and claimed at the saturation price must be addressed to either 90% or more of the active residential addresses or 75% or more of the total number of active possible delivery addresses, whichever is less, on each carrier route receiving saturation price mail, except that mail addressed in the simplified address format must meet the coverage standards in [602., 3.0 Use of Alternative Addressing](#).
- e. More than one addressed piece per delivery address may be included in a high density price mailing and may be counted for the density standard in [13.3.4b](#) for the high density price. Only one piece per delivery address may be counted toward the density standards for high density in [13.3.4c](#) and for the saturation price in [13.3.4d](#).

13.4 Carrier Route Accuracy

13.4.1 General

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming certain prices that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [13.4.2](#).
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.
- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and price is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and price.
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Periodicals carrier route prices, regardless of any required surcharge, must meet the carrier route accuracy standard.

13.4.2 Authorized Methods

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0](#) and [708.3.0](#). Printed Carrier Route Files (schemes) may be used only for Periodicals carrier route mail and for Standard Mail Enhanced Carrier Route flat-size mail at basic, high density, and saturation prices.

13.4.3 Mailer Certification

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS.

14.0 Barcoded (Automation) Eligibility**14.1 Basic Standards****14.1.1 General**

All pieces in a Periodicals barcoded (automation) price mailing must:

- a. Be in the same processing category and meet the physical standards in [201.3.0](#), or [301.3.0](#).
- b. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
 1. The address matching and coding standards in [14.4](#) and [708.3.0](#).
 2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- c. Bear an accurate barcode meeting the standards in [708.4.0](#), under these conditions:
 1. If a letter: the mailer may use a DPBC or an Intelligent Mail barcode (see [708.4.3](#)).
 2. If a flat: the mailer may use a ZIP+4 barcode, a DPBC, or an Intelligent Mail barcode with a ZIP+4 or delivery point routing code, under [708.4.0](#).
Mailers may apply the barcode either on the piece or on an insert showing through a window.
- d. Be marked, sorted, and documented as specified in [705.8.0](#) (if palletized), or [24.0](#) (for letters) or [25.0](#) (for flats) or, for nonletter-size mail, [705.9.0](#), [705.10.0](#), [705.12.0](#), or [705.13.0](#).
- e. Meet the applicable documentation standards in [708.1.0](#) and postage payment standards in [2.0](#), [16.0](#), and [17.0](#).

14.1.2 Enclosed Reply Cards and Envelopes

All letter-size reply cards and envelopes provided as enclosures in barcoded price Periodicals and addressed for return to a domestic delivery address must meet the standards in [201.3.15](#) for enclosed reply cards and envelopes. The mailer's signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS.

14.2 Prices—Outside-County

Outside-County barcoded (automation) prices are based on the following criteria (see [2.0](#) for price application and computation):

707.14.3

- a. Piece prices are based on mailpiece shape (letter, flat, or parcel), machinability, barcoding, and presort level. The presort level of the piece is based on the bundle level of the piece, except the presort level of pieces loose in trays is based on the tray level.
- b. Bundle prices are based on the bundle and container sortation level.
- c. Container prices are based on the type of container (tray, sack, pallet), the level of sortation of the container, and where the container is entered.

14.3 Prices—In-County

14.3.1 Five-Digit Prices

5-digit automation prices apply to:

- a. Letters in groups of 150 or more pieces to the same 5-digit or 5-digit scheme placed in a 5-digit or 5-digit scheme tray or trays prepared under [24.0](#). (Preparation to qualify for the 5-digit price is optional and, if performed, need not be done for all 5-digit or 5-digit scheme destinations.)
- b. Flats in 5-digit bundles and 5-digit scheme bundles of six or more pieces each, prepared under [25.0](#) or [705.8.0](#) through [705.13.0](#).

14.3.2 Three-Digit Prices

3-digit automation prices apply to:

- a. Letters in groups of 150 or more pieces to the same 3-digit or 3-digit scheme placed in a 3-digit/scheme tray or trays under [24.0](#).
- b. Flats in 3-digit scheme, and 3-digit bundles of six or more pieces each, prepared under [25.0](#) or [705.8.0](#) through [705.13.0](#).

14.3.3 Basic Prices

Basic automation prices apply to:

- a. Letters prepared under [24.0](#) that are not claimed at 5-digit or 3-digit prices.
- b. Flats prepared under [25.0](#) or [705.8.0](#) through [705.13.0](#) that are not claimed at 5-digit or 3-digit prices.
- c. All pieces in any bundle that contains fewer than six pieces.

14.4 Address Standards for Barcoded Pieces

14.4.1 General

To qualify for barcoded prices, addresses must be sufficiently complete to enable matching to the current USPS ZIP+4 Product when used with current CASS-certified address matching software. Standardized address elements are not required. Any barcode as defined in [708.4.0](#) that appears on a mailpiece must be the correct barcode for the corresponding delivery address on the piece.

14.4.2 ZIP+4 Code

A numeric ZIP+4 code must consist of five digits, a hyphen, and four digits.

14.4.3 Numeric Delivery Point Barcode

A numeric equivalent of the delivery point barcode (DPBC) consists of five digits followed by a hyphen and seven digits as specified in [708.4.0](#). The numeric equivalent is formed by adding three digits directly after the ZIP+4 code.

14.4.4 Firm Name

An address must include a firm name when necessary to obtain a match with the finest level of ZIP+4 code in the USPS ZIP+4 Product. If an address contains a firm name assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used. If the firm name is not one assigned a unique ZIP+4 code in the USPS ZIP+4 Product and the apartment/suite number is included in the address, the ZIP+4 code for the range in which the apartment/suite number appears must be used in that address. If the firm name does not correspond to a firm name that has a unique ZIP+4 code assigned in the USPS ZIP+4 Product and the apartment/suite number is not included in the address, the ZIP+4 code for the building must be used.

14.4.5 Address Elements

Addresses must include the correct street number, predirectional, street name, suffix, and postdirectional that are input to obtain a match with the current USPS ZIP+4 Product.

14.4.6 Secondary Designator

If a secondary address designator (for example, an apartment number) is shown in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that secondary address as contained in the current USPS ZIP+4 Product. If a secondary address designator is required to obtain an exact match with the finest level of ZIP+4 code in the USPS ZIP+4 Product but the information is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the building must be used.

14.4.7 Rural and Highway Contract Routes

If a rural route or highway contract route box number is included in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that box number as contained in the current USPS ZIP+4 Product. If a rural route or highway contract route box number is required to obtain a match with the finest level of ZIP+4 code but is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the rural route or highway contract route must be used. If used, the rural route or highway contract route box number must be placed on the line immediately above the city/state/ZIP Code line.

14.4.8 Post Office Box

A Post Office box address must contain a Post Office box number that can be exactly matched with the USPS ZIP+4 Product in effect.

707.15.1

15.0 Ride-Along Eligibility

15.1 General

The standards in 15.0 apply to Standard Mail material paid at the Periodicals Ride-Along price that is attached to or enclosed with Periodicals mail. All Periodicals subclasses may enclose eligible material at the Ride-Along price.

15.2 Basic Standards

Only one Ride-Along piece may be attached to or enclosed with an individual copy of Periodicals mail. The Ride-Along price must be paid on each copy in the mailing, not addressed pieces. If more than one Ride-Along piece is attached or enclosed, mailers have the option of paying Standard Mail postage for all the enclosures or attachments, or paying the Ride-Along price for the first attachment or enclosure and Standard Mail prices for subsequent attachments and enclosures. Ride-Along pieces eligible must be eligible as Standard Mail and must:

- a. Not exceed any dimension of the host publication except when the host publication and the Ride-Along piece are contained in an envelope, polybag, or other complete wrapper.
- b. Not exceed 3.3 ounces and must not exceed the weight of the host publication.
- c. Not obscure the title of the publication or the address label.

15.3 Physical Characteristics

The host Periodicals piece and the Ride-Along piece must meet the following physical characteristics:

- a. Construction:
 1. Bound publications. If contained within the host publication the Ride-Along piece must be securely affixed to prevent detachment during postal processing. If loose, the Ride-Along piece and publication must be enclosed together in a full wrapper, polybag, or envelope.
 2. Unbound publications. A loose Ride-Along enclosure with an unbound publication must be combined with and inserted within the publication in a manner that prevents detachment during postal processing. If the Ride-Along piece is included outside the unbound publication, the publication and the Ride-Along piece must be enclosed in a full wrapper, polybag, or envelope.
- b. A Periodicals letter-size or flat-size piece with the addition of a Ride-Along must remain uniformly thick.
- c. A Periodicals piece with a Ride-Along must maintain the same processing category as before the addition of the Ride-Along.

15.4 Marking

The marking "Ride-Along Enclosed" must be placed on or in the host publication if it contains an enclosure or attachment paid at the Ride-Along price. If placed on the outer wrapper, polybag, envelope, label carrier, or cover of the host publication, the marking must be set in type no smaller than any used in the required "POSTMASTER: Send change of address..." statement. If placed in the

identification statement, the marking must meet the applicable standards. The marking must not be on or in copies not accompanied by a Ride-Along attachment or enclosure.

16.0 Postage Payment

16.1 Filing Each Issue

The publisher must file a copy of each issue with the postmaster of the original entry office.

16.2 Filing Marked Copy

The publisher must file a copy of each edition of each issue marked by the publisher so the advertising content may be verified when necessary. This marked copy must be filed either with the postmaster of the original entry office or the postmaster of the additional entry office where the publication is produced or prepared for mailing. On the first page of each marked copy, the publisher must show the total units and percentage of space devoted to advertising and nonadvertising in the copy. Advertising matter printed on envelopes, wrappers, and the back of detached address cards must be included in the measurement of the advertising space. The computed percentage of advertising must be rounded off to two decimal places, if necessary, as shown in 2.0. Mailers are not required to submit marked copies if they are certified by the USPS to use the Periodicals Accuracy, Grading, and Evaluation (PAGE) Program.

16.3 Mailer and Publisher Responsibility

The mailer is responsible for proper payment of postage. Postage must be fully prepaid before Periodicals mailings are dispatched. The publisher must ensure that all information on postage statements is correct and that all copies qualify for the prices claimed.

16.4 Payment Method

Mailers must pay Periodicals postage by advance deposit account at the original or additional entry Post Office, except under procedures in for Centralized Postage Payment or in 705.15.2.4. Mailers may not pay postage for Periodicals using permit imprint, meter stamp, postage stamp, or precanceled stamps. Mailers must pay postage for First-Class Mail and Standard Mail enclosures under 703.9.8 through 703.9.12 and 705.16.1. Mailers who prepare Periodicals publications as a combined mailing by merging copies or bundles of copies under 27.0 may pay the Outside-County bundle and container charges on one mailer's Form 3541, on one consolidated Form 3541, or on each mailer's Form 3541 (see 2.2.7). Centralized Postage Payment System

Subject to specific standards and authorization by the Pricing and Classification Service Center (PCSC), the Centralized Postage Payment (CPP) System allows the publisher of a Periodicals publication to pay Periodicals postage for that publication at the PCSC instead of at each authorized additional entry office. An additional entry is required at each Post Office where copies of the Periodicals publication are presented for postal verification under 30.0.

707.16.5

16.5 Periodicals Accuracy, Grading, and Evaluation Program**16.5.1 General**

The Periodicals Accuracy, Grading, and Evaluation (PAGE) Program is a process to evaluate publishing and print planning (PPP) software and to determine its accuracy in computing per-copy weights and calculating advertising percentages for Periodicals. Certification of PAGE software is available only to those companies that develop or write PPP software. PAGE certification does not guarantee acceptance of the publisher's per-copy weights and advertising percentages prepared with PAGE-certified software.

16.5.2 Program Elements

The PAGE Program evaluates and tests PPP software. In addition, the PAGE Program tests and qualifies publishing personnel to submit data to the USPS using PAGE-certified PPP software. The USPS National Customer Support Center (NCSC) certifies developer's software and publisher's employees to use certified PPP software to submit Periodicals mailings. The PAGE Program involves the following three elements:

- a. Stage I, Product Certification for Software Developers. NCSC evaluates the accuracy of the calculations of PPP software by processing a test publication file either at the NCSC or at the developer's location (on-site visit).
- b. Stage II, User certification for PPP software. NCSC provides test bundles to the users and evaluates the results.
- c. Stage III, PAGE Program authorization. Publishers who want to use PAGE-certified software and PAGE-certified users to submit per-copy weight and calculated advertising percentages must apply for authorization to the manager, PCSC.

16.5.3 Participation

For information about charges and the PAGE Program, publishers may request a technical guide (including order forms) from the NCSC (see [608.8.0](#) for address). Additional information is also available from the PCSC (see [608.8.0](#) for address).

17.0 Documentation**17.1 Postage Statement**

Periodicals mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). The mailer may submit a computer-generated facsimile. A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction.

17.2 Documentation

The postage statement must be supported by documentation (see [708.1.0](#)) unless each piece in the mailing is of identical weight and the pieces are separated when presented for acceptance by price, by zone (including separation by In-County and Outside-County prices), and by entry (DDU, DSCF, DADC, and DBMC). Additional documentation must be submitted if required by the standards for the price or

discount claimed. Subject to [17.5](#), the entry office postmaster, on request, may authorize the publisher of a publication regularly printed on sheets of uniform weight to provide one postage statement after each calendar month for mailings made during that month.

17.3 Basic Standards for Documentation

17.3.1 General

Documentation describes the preparation and price levels of the mailing, details the volume and postage data, substantiates the price or discount eligibility, reports the result of a process (i.e., presort or barcoding), and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy.

17.3.2 Format

Periodicals documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and price claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the elements described in [708.1.0](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation.

17.3.3 Presenting Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

17.3.4 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

17.3.5 Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0](#).

17.4 Basic Standards for Postage Statements

17.4.1 General

Each Periodicals mailing must be accompanied by a postage statement using the correct USPS form or an approved facsimile. Supporting documentation may be required under [8.0](#) or, for specific prices, under [10.0](#), [12.0](#) through [15.0](#), and [29.0](#).

17.4.2 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job (for example, a carrier route price mailing, an automation price mailing, and a nonautomation price mailing) on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

17.4.3 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (such as permit imprint), and four-digit form number (hyphen and suffix, optional). All parts, and line numbers within each part, must reflect those on the USPS form(s). In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the "Certification" and "USPS Use Only" fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. Periodicals mailers authorized centralized postage payment (CPP) procedures receive approval from the PCSC.

17.4.4 Advertising Percentage

At least once a year, the USPS verifies the advertising percentage reported on the corresponding postage statement by measuring the advertising and nonadvertising portions of one issue.

17.4.5 Measuring Advertising

The total advertising and nonadvertising portions may be determined by column inches, square inches, pages, or by another recognized unit of measure if the same unit of measure is used for both portions. One full page of advertising must equal one full page of nonadvertising regardless of the amount of blank space between each advertisement or nonadvertising article on a page. If measured in column inches, nonadvertising inches are determined by subtracting the total measured advertising inches from the total column inches of the publication. A blank page, portion of a page, or blank border or margin is counted as advertising if consideration was received for the whole page, the blank portion, or the blank border or margin. The border of a page is otherwise considered neither advertising nor nonadvertising and is not measured, but it is included in the total weight of the publication for purposes of postage calculation. When measuring nonrectangular sheets, the measurement is based on the smallest rectangle that could contain the irregular sheet; exact measurement is not attempted. When two or more sheets are

permanently glued together to form a single sheet, the surface area of the resulting sheet (front and back) is included when measuring the advertising or nonadvertising portion.

17.4.6 Waiving Nonadvertising Prices

Instead of marking a copy of each issue to show the advertising and nonadvertising portions, the publisher may pay postage at the advertising zoned prices on both portions of all issues or editions of a Periodicals publication (except a requester publication). *This option is not available if the price for advertising is lower than the price for nonadvertising.* When the amount of advertising exceeds 75%, the copies provided to the postmaster must be marked "Advertising over 75%." When the amount of advertising is 75% or less, the copies provided to the postmaster must be marked "Advertising not over 75%" on the first page. The entire weight of the copy must be entered on the postage statement in the column provided for the advertising portion. The words "Over 75%" or "Not over 75%" must be annotated on the postage statement and the word "Waived" must be written in the space provided for the weight of the nonadvertising portion.

17.4.7 Copies of Previous Issues

When a reasonable number of copies of previous issues are included in a mailing of a current issue, those issues may be accepted and charged with postage by the percentages of advertising and nonadvertising material in the current issue. The issue forming the bulk of the mailing is regarded as the current issue. The advertising and nonadvertising percentages for the current issue are based on the edition forming the bulk of the current issue.

17.4.8 Mailing While Application Pending

A publisher mailing under an advance deposit account while a Periodicals application is pending must submit with each mailing both a Periodicals postage statement (annotated with the words "Pending Application") and a Standard Mail, Parcel Select, or Package Services postage statement.

17.4.9 Sequenced Postage Statement

A mailer who provides more than one postage statement per day must enter a sequenced statement number in the proper block on each postage statement prepared that day. At the mailer's discretion are the content and length of the number, the cycle of the sequence (beyond 1 day), and the number of concurrently active cycles, if the same series of numbers is not active in two cycles at the same time. If the same mailing of one edition of one issue includes copies reported on two postage statements (for example, when additional postage is paid for nonsubscriber/nonrequester copies over the 10% limit), the sequenced statement number of the second form must be included with the other information required on the primary postage statement reporting the total postage for the mailing.

17.4.10 Official Mail

Official (penalty) Periodicals matter is also subject to the standards in [703.7.0](#), which supersede conflicting standards below.

17.4.11 News Agent's Statement

A news agent presenting Periodicals matter subject to the zone prices of postage must provide a statement showing the percentages of such matter devoted to advertising and nonadvertising.

707.17.5

17.5 Monthly Postage Statements**17.5.1 General**

The postmaster may authorize a publisher to submit Form 3541-M after the month for all issues mailed during that month, if all issues are printed on sheets of the same weight. If authorized, the publisher must provide Form 3541-M no more than 72 hours after the first mailing of the last issue mailed each month.

17.5.2 Measuring Advertising

The total advertising and nonadvertising portions may be expressed in column inches, square inches, pages, or by any other recognized unit of measure. The same unit of measure must be used for the advertising and nonadvertising portions. When measuring nonrectangular sheets, base the measurement on the smallest rectangle that could contain the irregular sheet. No attempt is made to determine the exact area of the irregular shape. When two or more sheets or parts thereof are glued together, the surface area of each sheet (front and back) is counted when measuring the advertising or nonadvertising portion for determining postage.

17.5.3 Determining Combined Weight

The combined weight of one copy from each issue mailed during a calendar month is obtained as follows:

- a. Determine the weight of one copy as described in [2.0](#).
- b. Determine the weight of one sheet by dividing the average weight of one copy by the number of sheets (not pages) in the copy. Express the result in decimal pounds rounded off to four decimal places.
- c. Select one copy of each of the issues mailed during the month; count the sheets (not pages) in each; add these figures to determine the total number of sheets.
- d. Multiply the total number of sheets by the weight of one sheet; do not round the product.

17.6 Detailed Zone Listing for Periodicals**17.6.1 Basic Standards**

The publisher must be able to present documentation to support the actual number of copies of each edition of an issue, by entry point, mailed to each zone, at DDU, DSCF, DADC, and In-County prices. This listing is separated from the standardized documentation required under [17.3](#) to support presort. This listing may be submitted with each mailing, or, as an alternative, a publisher may keep records supporting zone and destination entry information reported on the postage statement for each mailing. Records must be kept for 2 months after the mailing date. A publisher must be able to submit detailed zone listings for specific mailings when requested in advance by the USPS.

17.6.2 Format

Report the number of copies mailed to each 3-digit ZIP Code area at applicable zone prices using one of the following formats:

- a. Report copies by 3-digit ZIP Code, listed in ascending numeric order, for all ZIP Codes in the mailing. The listing must include the following columns: 3-digit ZIP Code, zone, and number of copies (for the zone). Include a summary of the number of copies at each zone price at the end of the report. A 3-digit ZIP Code may appear more than once if there are copies at different zone prices for that ZIP Code (for example, In-County and Outside-County price copies within the same 3-digit ZIP Code area).
- b. Report copies by zone (In-County DDU, In-County others, Outside-County DDU, Outside-County DSCF, and Outside-County DADC) and by 3-digit ZIP Code, listed in ascending numeric order, for each zone. For each zone, the listing must include the following columns: 3-digit ZIP Code and number of copies (for each zone) in the mailing. Include a summary of the total number of copies for each zone at the end of each zone listing. A 3-digit ZIP Code may appear under more than one zone if there are copies at different zone prices for that ZIP Code (for example, In-County and Outside-County price copies within the same 3-digit ZIP Code area).

17.6.3 Zone Abbreviations

Use the actual price name or the authorized zone abbreviation in the listings in [17.5, Monthly Postage Statements](#), and [17.6.2, Format](#):

ZONE ABBREVIATION	PRICE EQUIVALENT
ICD	In-County, DDU
IC	In-County, Others
DDU	Outside-County, DDU
SCF	Outside-County, DSCF
ADC	Outside-County, DADC
1-2 or 1/2	zones 1 and 2
3, 4, 5, 6, 7, 8 (as applicable)	zones 3 through 8 (as applicable)
M	mixed zones

17.7 Additional Standards

17.7.1 Presorted Mailings

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing, supported by standardized documentation meeting the basic standards in [708.1.0](#). Documentation of postage is not required if each piece in the mailing is of identical weight and the pieces are separated when presented for acceptance by price, by zone (including separation by In-County and Outside-County prices), and by entry discount (such as DDU and DSCF). For Carrier Route price mailings, documentation of sequencing and of density standards under [23.8](#) and [23.9](#) also must be submitted with each mailing.

17.7.2 Destination Entry Price Mailings

Subject to [708.1.0](#), the mailer must be able to show compliance with eligibility requirements (by bundle, tray, sack, or pallet) and list the number of addressed pieces by presort level for each 5-digit and 3-digit ZIP Code destination as

appropriate for the prices and discounts claimed. Documentation is not required if each addressed piece in the mailing is of identical weight, and are separated by zone, price, and destination entry (if applicable), when presented for mailing.

17.7.3 Outside-County Bundle and Container Price Documentation

The documentation must show how many bundles are used and how many trays, sacks, and pallets are required for the prices and discounts claimed.

18.0 General Mail Preparation

18.1 Definition of Presort

“Presort” is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the price claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Under standards for bundle reallocation for Periodicals flats and irregular parcels and Standard Mail flats on pallets, mail will not necessarily be placed on the lowest (finest) level pallets (bundle reallocation is optional, but, if performed, must be done for the complete mailing job). Not all presort levels are applicable in all situations.

18.2 Definition of Mailings

“Mailings” are defined as:

- a. A mailing is a group of pieces within the same class of mail and, except for certain parcel prices, the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (for example, machinable, nonmachinable, and carrier route) must be prepared as separate mailings. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Mail qualifying for the In-County prices may be part of a mailing that includes pieces eligible for the Outside-County prices. Mail at carrier route prices, nonmachinable flats prices, and machinable flats prices must each be sorted as separate mailings. However, each of these mailings may be reported on the same postage statement if the pieces are for the same publication and edition. See [705.8.0](#), [22.0](#), and [23.0](#) for copalletized, combined, or mixed-price mailings. See [705.9.0](#) through [705.13.0](#) for advanced preparation options for nonletter-size mail.

18.3 Presort Terms

Terms used for presort levels are defined as follows:

- a. *Firm*: all pieces for delivery at the address shown on the top piece (for nonautomation Periodicals only).
- b. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, Post Office box section, or general delivery unit.
- c. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.

- d. *5-digit scheme (trays) for barcoded letters*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Code areas processed by the USPS as a single scheme, as shown in the USPS City State Product.
- e. *5-digit scheme (bundles and sacks) for flats prepared according to 301.3.0*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Codes processed by the USPS as a single scheme, as shown in L007.
- f. *5-digit scheme carrier routes (pallets and sacks) for Periodicals flats and irregular parcels*: the ZIP Code in the delivery address on all pieces in carrier route bundles is one of the 5-digit ZIP Codes processed by the USPS as a single scheme, as shown in L001.
- g. *5-digit scheme (pallets) for Periodicals flats and irregular parcels*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Codes processed by the USPS as a single scheme, as shown in L001.
- h. *Merged 5-digit sacks*: the carrier route bundles and/or machinable barcoded or nonbarcoded price 5-digit bundles in a sack are all for a 5-digit ZIP Code that has an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product.
- i. *Merged 5-digit pallets*: the carrier route bundles and/or machinable barcoded or nonbarcoded price 5-digit bundles are prepared under one of the following standards:
 - 1. Prepared under 705.10.0 and are all for a 5-digit ZIP Code that has an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product.
 - 2. Prepared under 705.12.0 and the pieces in 5-digit bundles meet the 5% threshold requirement.
 - 3. Prepared under 705.13.0 and pieces are either all for a 5-digit ZIP Code that has an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product or are all for a ZIP Code with a “B” or “D” indicator in the City State Product and the pieces in 5-digit bundles meet the 5% threshold requirement.
- j. *Merged 5-digit scheme sack*: the 5-digit ZIP Codes on pieces in carrier route bundles and/or machinable barcoded or nonbarcoded price 5-digit bundles in a sack are all for 5-digit ZIP Codes that are part of a single scheme as shown in L001, and the machinable barcoded or nonbarcoded price 5-digit bundles also are for 5-digit ZIP Codes that have an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product.
- k. *Merged 5-digit scheme pallet*: contains carrier route bundles and noncarrier route 5-digit bundles (machinable barcoded or nonbarcoded price 5-digit bundles) for those 5-digit ZIP Codes that are part of a single scheme as shown in L001.
- l. *5-digit metro pallets for Periodicals flats and irregular parcels*: the 5-digit ZIP Codes on pieces in carrier route, machinable barcoded or nonbarcoded price bundles are all destined for the same mail processing facility listed in L006.

707.18.4

- m. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- n. *3-digit scheme*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed by the USPS as a single scheme, as shown in [L003](#).
- o. *3-digit scheme bundles for flats prepared according to 301.3.0*: the ZIP Code in the delivery address on all pieces is one of the 3-digit ZIP Codes processed by the USPS as a single scheme, as shown in [L008](#).
- p. *Origin/entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Separation is optional for each such 3-digit area.
- q. *SCF*: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- r. *Origin/entry SCF*: the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) (see [L002](#), Column C, or [L005](#)) in whose service area the mail is verified/entered. Subject to standard, this separation is required regardless of the volume of mail.
- s. *ADC/AADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) or automated area distribution center (AADC) (see [L004](#) or [L801](#)).
- t. *Origin mixed [ADC]*: the pieces are for delivery in the service area of the origin processing facility's surface preferential transportation network (see [L201](#)).
- u. *Mixed [ADC, AADC, etc.]*: the pieces are for delivery in the service area of more than one ADC, AADC, and so forth.

18.4 Mail Preparation Terms

[\[8-14-08\]](#) [\[7-3-08\]](#) For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full letter tray* is one in which faced, upright pieces fill the length of the tray between 85% and 100% full.
- c. A *less-than-full* letter tray is one that contains mail for the same destination regardless of quantity or whether a full tray was previously prepared for that destination. Less-than-full trays may be prepared only if permitted by the standards for the price claimed.
- d. An *overflow* letter tray is a less-than-full tray that contains all pieces remaining after preparation of full trays for the same destination. Overflow trays may be prepared only if permitted by the standards for the price claimed.
- e. A *full sack* is defined in the standards for the class and price claimed.

- f. A *full flat tray* is one that is physically full. Although a specific minimum volume may be required (at least a single stack of mail lying flat on the bottom of the tray and filling the tray to the bottom of the handholds) before a tray may or must be prepared for certain presort destinations, trays must be filled with additional available pieces (up to the reasonable capacity of the tray) when standards require preparation of full trays.
- g. A *less-than-full flat tray* is one that contains Periodicals mail for the same destination regardless of quantity or whether a full tray was previously prepared for that destination. Less-than-full flat trays may be prepared only if permitted by the standards for the price claimed.
- h. A *5-digit scheme sort for barcoded letters* yields 5-digit scheme trays for those 5-digit ZIP Codes identified in the USPS City State Product and 5-digit trays for other areas. Mail prepared using 5-digit scheme sort must be entered no later than 90 days after the release date of the City State Product used to obtain the scheme information (see [708.3.0](#)). The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 5-digit ZIP Code required. Trays prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is required for price eligibility but need not be used for all 5-digit ZIP Codes that are part of a scheme.
- i. A *5-digit scheme sort* yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#). When 5-digit scheme sorting is required, mailers must presort according to [L007](#). Pieces prepared in scheme bundles must meet the automation flat criteria in [301.3.0](#). Mailpieces must be labeled using an optional endorsement line (OEL) under [708.7.0](#) or bundles may be labeled with a red “5 SCH” bundle label. Periodicals firm bundles must not be combined within 5-digit scheme bundles.
- j. A *5-digit scheme carrier routes sort for carrier route price Periodicals flats and irregular parcels (nonletters) prepared in sacks or as bundles on pallets* yields a 5-digit scheme carrier routes sack or pallet for those 5-digit ZIP Codes listed in [L001](#) and 5-digit carrier routes sacks or pallets for other areas. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum sack or pallet volume, with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme carrier routes destination that contain carrier route bundles for only one of the schemed 5-digit areas are still considered to be sorted to 5-digit scheme carrier routes and are labeled accordingly. The 5-digit scheme carrier routes sort is required for carrier route bundles of flat-size and irregular parcel Periodicals. Preparation of 5-digit scheme carrier routes sacks or pallets must be done for all 5-digit scheme destinations.
- k. A *5-digit scheme sort for Periodicals flats prepared as bundles on pallets* yields 5-digit scheme pallets containing machinable barcoded and nonbarcoded price 5-digit bundles for those 5-digit ZIP Codes listed in [L001](#) and for other areas. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum pallet volume, with no further

707.18.4

separation by 5-digit ZIP Code required. Pallets prepared for a 5-digit scheme destination that contain 5-digit bundles for only one of the schemed 5-digit areas are still considered to be sorted to the 5-digit scheme and are labeled accordingly. The 5-digit scheme sort is required for flat-size Periodicals. Preparation of 5-digit scheme pallets must be done for all 5-digit scheme destinations.

- i. *A merged 5-digit sort for Periodicals flats prepared in sacks yields merged 5-digit sacks that contain carrier route bundles and/or machinable barcoded and nonbarcoded price 5-digit bundles that are all for a 5-digit ZIP Code that has an "A" or "C" indicator in the Carrier Route Indicators field in the City State Product. The merged 5-digit sort is optional for Periodicals flats. Sacks prepared for a merged 5-digit destination that contain only a single price level of bundles or that contain only two price levels of bundles are still considered to be merged 5-digit sorted and are labeled accordingly. If preparation of merged 5-digit sacks is performed, it must be done for all 5-digit ZIP Code destinations with an "A" or "C" indicator in the Carrier Route Indicators field in the City State Product.*
- m. *A merged 5-digit sort for Periodicals flats prepared as bundles on pallets yields merged 5-digit pallets that contain carrier route bundles and machinable barcoded and nonbarcoded price 5-digit bundles. The merged 5-digit sort is optional for Periodicals flats in sacks under [705.10.0](#). Pallets prepared for a merged 5-digit destination that contain only a single price level of bundles or that contain only two price levels of bundles are still considered to be merged 5-digit sorted and must be labeled accordingly.*
- n. *A merged 5-digit scheme sort for Periodicals flats prepared in sacks yields merged 5-digit scheme sacks that contain carrier route bundles and machinable barcoded and nonbarcoded price 5-digit bundles for those 5-digit ZIP Codes that are part of a single scheme as shown in [L001](#). Sacks prepared for a merged 5-digit scheme destination that contain only a single price level of bundles, or only two price levels of bundles, or bundles for only one of the schemed 5-digit ZIP Codes are still considered to be merged 5-digit scheme sorted and must be labeled accordingly. If preparation of merged 5-digit scheme sacks is performed, it must be done for all 5-digit scheme destinations in [L001](#).*
- o. *A merged 5-digit scheme sort for Periodicals flats prepared as bundles on pallets yields merged 5-digit scheme pallets that contain carrier route bundles and machinable barcoded and nonbarcoded price 5-digit bundles for those 5-digit ZIP Codes that are part of a single scheme as shown in [L001](#). Pallets prepared for a merged 5-digit scheme destination that contain only a single price level of bundles, or only two price levels of bundles, or bundles for only one of the schemed 5-digit ZIP Codes are still considered to be merged 5-digit scheme sorted and must be labeled accordingly. If preparation of merged 5-digit scheme pallets is performed, it must be done for all 5-digit scheme destinations in [L001](#).*

- p. A *5-digit metro sort for Periodicals nonletters (flats and irregular parcels) prepared as bundles on pallets* yields 5-digit metro pallets that contain carrier route, machinable flats, and parcel price 5-digit and 3-digit bundles for the 5-digit ZIP Codes listed in L006. The ZIP Codes in L006 are treated as a single presort destination, with no further separation by 5-digit ZIP Code required. The 5-digit metro sort is optional and need not be done for all possible destinations in L006.
- q. A *3-digit scheme sort* yields 3-digit scheme trays for those 3-digit ZIP Code prefixes listed in L003 and 3-digit trays for other areas. The 3-digit ZIP Code prefixes in each scheme are treated as a single presort destination subject to a single minimum tray volume, with no further separation by 3-digit prefix required. Trays prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit areas are still considered 3-digit scheme sorted and are labeled accordingly. The 3-digit scheme sort is required for barcoded price letter-size Periodicals.
- r. A *3-digit scheme sort* yields 3-digit scheme bundles for those 3-digit ZIP Codes identified in L008. When 3-digit scheme sorting is required, mailers must presort according to L008. Pieces prepared in scheme bundles must meet the automation flat criteria in 301.3.0. Mailpieces must be labeled using an optional endorsement line (OEL) under 708.7.0 or bundles may be labeled with a green “3 SCH” bundle label. Periodicals firm bundles must not be combined within 3-digit scheme bundles.
- s. An *origin 3-digit (or origin 3-digit scheme) tray/sack* contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. A separate tray/sack may be prepared for each 3-digit ZIP Code (or 3-digit scheme) area.
- t. An *origin/entry SCF sack* contains all 5-digit and 3-digit bundles (regardless of quantity) for the SCF in whose service area the mail is verified. At the mailer's option, such a sack may be prepared for the SCF area of each entry Post Office. This presort level applies only to nonletter-size Periodicals prepared in sacks.
- u. The *required at [quantity]* instruction (for example, “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable price eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding price.
- v. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable price

707.18.4

eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.

- w. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (for example, “entry SCF”) that serves the Post Office at which the mail is entered by the mailer. If the Post Office where the mail is entered is not the one serving the mailer’s location (such as for plant-verified drop shipment), the Post Office of entry determines the *entry* facility.
- x. The *group pieces* instruction means the pieces are to be sorted together but not secured into a bundle.
- y. A *bundle* is a group of addressed pieces secured together as a unit. Bundle preparation is described in [19.0](#).
- z. A “*logical presort destination*” represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (sack or pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a Periodicals “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles. For pallets, 2,800 pounds of mail may be destined to an SCF destination, and these would form the “logical” SCF pallet, but the mail is placed on two physical SCF pallets each weighing 1,400 pounds because of the 2,200 pound maximum pallet weight requirement.
- aa. *Cobundling* is an alternate preparation method available under [705](#) for Periodicals that allows the combining of flat-size machinable barcoded and nonbarcoded price pieces within the same bundle under the single minimum bundle size requirement. Pieces may not be combined in more than one physical bundle for each logical presort destination unless presented using an approved manifest mailing system under [705.2.0](#).
- ab. *Machinable flats* are:
 - 1. Flat-size pieces meeting the standards in [301.3.0](#) that are sorted into 5-digit, 3-digit, ADC, and mixed ADC bundles. These pieces are compatible with processing on the AFSM 100.
 - 2. Barcoded flat-size pieces meeting the standards in [26.0](#) that are sorted into 5-digit bundles.
- ac. *Nonmachinable flats* are flat-size pieces meeting the standards in [26.0](#), with the exception of barcoded 5-digit pieces under [18.4ab](#) (item 2) above. Nonmachinable flats are not compatible with processing on the AFSM 100.

19.0 Bundles

19.1 Definition of a Bundle

Mailers assemble pieces available for different presort destinations into groups. A *bundle* is a group of addressed pieces secured together as a unit. The term *bundle* does not apply to pieces grouped or prepared loose in trays.

19.2 Arranging Pieces in a Bundle (“Facing”)

Except as noted in 19.3, all pieces in a bundle must be “faced” (arranged with the addresses in the same read direction), with an address visible on the top piece.

19.3 Preparing Bundles of Nonuniform Pieces (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling.

19.4 Securing Bundles

Bundles must withstand normal transit and handling without breaking and without causing injury to USPS employees or damage to USPS equipment. Mailers must meet the following standards when preparing and securing bundles:

- a. Secure bundles with banding, shrinkwrap, or shrinkwrap supplemented with one or more bands. *Banding* includes plastic bands, rubber bands, twine, string, and similar material. Mailers must meet the following standards when banding bundles:
 1. Do not place any bands closer than 1 inch from any bundle edge.
 2. When using twine or string to band bundles, secure the knot(s) so the twine or string does not come loose during transit and processing.
 3. Do not use wire or metal banding.
 4. Do not use any loose banding.

- b. When using only banding to secure bundles, apply banding under the following additional requirements:
 - 1. Use at least one band to encircle the length of the bundle and use at least one band to encircle the girth of the bundle.
 - 2. Use tension sufficient to tighten and depress the edges of the bundle so that pieces do not slip out of the banding during transit and processing.

19.5 Letter-Size Bundles

Letter-size pieces are subject to these bundling standards:

- a. The maximum thickness for bundles of carrier route price mail is 4 inches. The maximum thickness for other bundles is 6 inches.
- b. Bundles must be prepared for mail in all less-than-full trays and 3-digit carrier routes trays; and for nonbarcoded Periodicals.
- c. Separator cards or tic marks *may* be used instead of bundling for letter-size pieces in full 5-digit carrier routes trays of Periodicals. The cards must be of paper or card stock, at least 0.25 inch higher than the highest pieces in the mailing, and in front of the corresponding groups of mail. The tic mark must be applied during the mailpiece production process and be printed on the top edge of the envelope, to the left of the center line of the envelope. Each tic mark must have its location referenced to the center line. The right edge of the tic mark must be 0.5 inch (+ 0.125 inch) from the center line of the envelope. The width of the tic mark must be 0.5 inch (+ 0.125 inch). The tic mark must extend over the top of the envelope, down each side a distance of 0.25 inch (+ 0.125 inch). In trays of tic-marked mail, all mailpieces must be the same dimension so that the tic marks are visible.
- d. For mailings consisting entirely of card-size pieces and mail in less-than-full trays, mailers must secure bundles with rubber bands, elastic strapping, flat plastic strapping, or string. Elastic strapping must be approved by USPS Engineering. If requested, the mailer must be able to show such approval for the strapping material used for a mailing.
- e. Bundles up to 1 inch thick must be secured with appropriate banding placed once around the girth (narrow dimension). Bundles over 1 inch thick must be secured with at least two bands, one around the length and one around the girth.

19.6 Flat-Size Bundles

Bundles of flat-size pieces must be secure and stable subject to the following:

- a. If placed on pallets, the specific weight limits in [705.8.0](#).
- b. If placed in sacks, the specific weight and height limits in [19.8](#).

19.7 Exception to Bundle Preparation—Full Single-Sort-Level Trays

Mailers must always bundle card-size pieces. For pieces larger than card-size, mailers need not prepare bundles when placing mail in a full tray to the corresponding tray level if none of the mail in that tray would have been more finely

sorted if bundled. For example, mailers need not bundle the contents of a full ADC tray if, when correctly sorted, it would have all been prepared in ADC bundles to the same destination.

19.8 Preparing Bundles in Sacks

In addition to the standards in [19.4](#), mailers must prepare and secure bundles placed in sacks as follows:

- a. The maximum weight for all bundles is 20 pounds.
- b. Measure bundles at the lowest (thinnest) point to determine the bundle height.
- c. A bundle that exceeds the maximum prescribed height by less than the thickness of a single piece meets the standard (for example, if a piece is 0.75 (3/4) of an inch thick, 11 pieces may be secured in a bundle 8.25 inches high, even though the maximum bundle height is 8 inches).
- d. Bundles of pieces with covers of “coated stock” (for example, magazines or catalogs with glossy covers) that are not individually enclosed in an envelope or mailing wrapper are subject to these conditions:
 1. Bundles secured with rubber bands, twine, string, or only shrinkwrap must not exceed 3 inches in height.
 2. Bundles secured with shrinkwrap plus one or two plastic straps, or with at least two plastic straps, one around the length and one around the girth, must not exceed 6 inches in height.
- e. Bundles of pieces with outer surfaces of “uncoated stock” are subject to these conditions:
 1. Bundles must not exceed 8 inches in height (recommended maximum height is 6 inches).
 2. “Uncoated stock” refers to pieces with outer surfaces composed of material other than paper (such as plastic, cloth, or fiberboard) and also refers to pieces with coated covers that are individually enclosed in a cover or mailing wrapper of uncoated stock, such as an envelope or polybag.

19.9 Preparing Bundles on Pallets

In addition to [19.2](#), [19.3](#), [19.4](#), and [19.13](#), bundles on pallets must meet the following standards:

- a. Bundles up to 1 inch in height (thickness) must be secured with appropriate banding, placed at least once around the girth, or with shrinkwrap. Bundles over 1 inch in height must be secured with at least two bands (plastic bands, rubber bands, twine/string, or similar material), one around the length and one around the girth; or with shrinkwrap; or with shrinkwrap plus one or two bands.
- b. Bundles may be secured with heavy-gauge shrinkwrap plus plastic banding, only shrinkwrap, or only banding material if they can stay together during normal processing. If used, banding material must be applied at least once around the length and once around the girth; wire and metal strapping are prohibited.

707.19.10

19.10 Pieces With Simplified Addresses

For mail prepared with a simplified address, all pieces for the same Post Office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (such as rural route, city route, or Post Office boxholder). Bundles must be secure and stable subject to specific weight limits in [705.8.0](#) if placed on pallets, specific weight and height limits in [19.8](#) for Periodicals placed in sacks, and specific thickness limits in [19.5](#) for cards and letter-size pieces.

19.11 Bundles With Fewer Than the Minimum Pieces Required

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the price claimed without loss of price eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (for example, 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (for example, 505 pieces prepared in 10 50-piece bundles and one five-piece bundle).

19.12 Address Visibility

Mailers preparing presort bundles must ensure that the delivery address information on the top mailpiece in each bundle is visible and readable by the naked eye. Mailers using strapping that might cover the address can avoid obstructing visibility by using clear, smooth strapping tightly secured around the bundle. Mailers using barcoded pressure-sensitive bundle labels, optional endorsement lines, carrier route information lines, or carrier route facing slips also must ensure that the information in these presort designations is visible and readable by the naked eye. This standard does not apply to the following:

- a. Bundles placed in or on 5-digit or 5-digit scheme ([L001](#)) sacks or pallets.
- b. Bundles placed in carrier route and 5-digit carrier routes sacks.
- c. Bundles of mailpieces at carrier route prices entered at a destination delivery unit (DDU).

19.13 Labeling Bundles

[7-3-08] Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. On letter-size mail (including card-size pieces), the bundle label must be placed in the lower left corner of the address side of the top piece in the bundle. On flat-size mail, the label may be placed anywhere on the address side of the top piece in the bundle. Barcoded pressure-sensitive bundle labels must not obscure the delivery address block. Banding or shrinkwrap must not obscure any bundle label. The following colors and presort characters apply to bundle labels:

- a. Firm (Periodicals use only), blue Label F.
- b. Five-digit scheme presort level, red Label 5 SCH.

- c. Five-digit presort level, red Label 5.
- d. Three-digit scheme presort level, green Label 3 SCH.
- e. Three-digit presort level, green Label 3.
- f. ADC presort level, pink Label A.
- g. Origin mixed ADC presort level, tan Label X or OEL.
- h. Mixed ADC presort level, tan Label X.

19.14 **Carrier Route Information Lines**

Bundles for individual carrier routes, rural routes, highway contract routes, Post Office box sections, or general delivery units must be prepared with facing slips under [19.0, Bundles](#), optional endorsement lines under [708.7.0](#), or carrier route information lines under [708.6.0](#). These standards apply to Carrier Route Periodicals mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level.

19.15 **Facing Slips for Carrier Route Mail**

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content (as appropriate to the class), followed by carrier route type and route number (for example, "NEWS LTRS CR R 012").
- c. Line 3: City and two-letter state abbreviation of the origin Post Office.

20.0 Sacks and Trays

20.1 **Basic Standards**

20.1.1 **General**

Mailings must be prepared in trays or sacks as shown in [Exhibit 20.1.1](#) and under other applicable standards in this section. The following additional standards apply to [Exhibit 20.1.1](#):

- a. Palletized mail is subject to [705.8.0](#).
- b. A postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing.

Exhibit 20.1.1 USPS Containers

PROCESSING CATEGORY	USPS CONTAINER
Periodicals	
Letter-size	Letter tray (with sleeve)
Flat-size, parcels	Sack

20.1.2 Letter Tray Sizes

These approximate measurements define the tray sizes that apply to all mail preparation standards:

- a. 2-foot managed mail (MM) trays: 21 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- b. 1-foot managed mail (MM) trays: 10-1/4 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- c. 2-foot extended managed mail (EMM) trays: 21-3/4 inches long by 11-1/2 inches wide (inside bottom dimensions) by 6-1/8 inches high.

20.1.3 Tray Sleeving and Strapping

Each letter tray must be sleeved, using USPS-provided sleeves. Except under [20.1.4](#), each sleeved letter tray must then be secured with one plastic strap placed tightly around the length of the tray without crushing the tray or sleeve.

20.1.4 Strapping Exception

Strapping is not required for any letter tray placed on a 5-digit, 3-digit, or SCF pallet secured with stretchwrap. In addition, if the processing and distribution manager gives a written waiver, strapping is not required for any letter tray that originates and destines in the same SCF (mail processing plant) service area.

20.1.5 Origin/Entry 3-Digit/Scheme Trays

For letter-size Periodicals, after all finer sort levels are prepared, an origin/entry 3-digit tray (or, if applicable, origin/entry 3-digit scheme tray) must be prepared to contain any remaining mail for each 3-digit (or 3-digit scheme) area serviced by the SCF serving the Post Office where the mail is verified (origin), and may be prepared for each 3-digit (or 3-digit scheme) area served by the SCF/plant where mail is entered (if that is different from the SCF/plant serving the Post Office where the mail is verified—for example, a PVDS deposit site). In all cases, only one less-than-full tray may be prepared for each 3-digit (or 3-digit scheme) area.

20.1.6 Flats and Irregular Parcels—Origin/Entry SCF Sacks

For flat-size and irregular parcel-size Periodicals, after all finer sort levels are prepared, an origin/entry SCF sack must be prepared to contain any remaining 5-digit and 3-digit bundles for the 3-digit ZIP Code area(s) served by the SCF serving the Post Office where the mail is verified (origin), and may be prepared for the area served by the SCF/plant where mail is entered (if that is different from the SCF/plant serving the Post Office where the mail is verified—for example, a PVDS deposit site). In all cases, only one less-than-full sack may be prepared for each SCF area.

20.1.7 Flats and Irregular Parcels—Origin Mixed ADC Sacks

For flat-size and irregular parcel-size Periodicals, after all finer sort levels are prepared, mailers must prepare an origin mixed sack containing any remaining bundles for the ZIP Codes listed in [L201](#), Column B, that correspond to the 3-digit origin entry point of the mailing as listed in Column A. Mailers may prepare only one less-than-full origin mixed sack.

20.2 Letter Tray Preparation

Letter trays are prepared as follows:

- a. Subject to availability of equipment, standard managed mail trays must be used for all letter-size mail, except that extended managed mail trays must be used when available for letter-size mail that exceeds the inside dimensions of managed mail trays defined in [20.1.2](#). When extended managed mail trays are not available for those larger pieces, they must be placed in managed mail trays, angled back, or placed upright perpendicular to the length of the tray in row(s) to preserve their orientation.
- b. Pieces must be “faced” (oriented with all addresses in the same direction with the postage area in the upper right).
- c. Each tray prepared must be filled before filling the next tray, with the contents in multiple trays relatively balanced. When preparing full trays, mailers must fill all possible 2-foot trays first; if there is mail remaining for the presort destination, mailers must use a combination of 1-foot and 2-foot trays that results in the fewest total number of trays for that presort level. As an alternative, if there is mail remaining, mailers may move those pieces to the next higher presort level at which there is a minimum quantity (for example, 150 pieces).
- d. For presort destinations that do not require full trays, pieces are placed in a less-than-full tray.
- e. Mailers must use as few trays as possible without jeopardizing price eligibility. For instance, a mailer will never have two 1-foot trays to a single destination; instead, that mail must be placed in a single 2-foot tray. A 1-foot tray is prepared only if it is a full tray with no overflow; or if there is less than 1 foot of mail for that destination; or if the overflow from a full 2-foot tray is less than 1 foot of mail.
- f. Each tray must bear the correct tray label.
- g. Each tray must be sleeved and strapped under [1.3](#) and [1.4](#).
- h. If a mailing is prepared using an MLOCR/barcode sorter and is submitted with standardized documentation, then pieces do *not* have to be grouped by 3-digit ZIP Code prefix (or by 3-digit scheme, if applicable) in AADC trays, or by AADC in mixed AADC trays.

20.3 Sack Preparation

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds.

20.4 Use of Flat Trays (Optional)

20.4.1 General

When using this option (see [22.7](#) and [25.5](#)), mailers must prepare mailpieces in flat trays with green lids. Flat Tray Sizes

Flat tray sizes are as follows:

- a. Inside bottom dimensions: 14-3/4 inches long by 10-3/4 inches wide.

707.20.4.2

- b. Height: 8 inches to bottom of handhold, 11-1/4 inches to top of tray.

20.4.2 Flat Tray Preparation

Mailers using this option must prepare flat trays subject to these standards:

- a. Addresses on all pieces must face upward in the same direction.
- b. Pieces must be placed in trays to maintain their orientation (double stacks of mail are allowed). Once the required minimum volume is reached to allow or require preparation of a 5-digit scheme, 5-digit, 3-digit, SCF, or ADC tray, additional pieces must be placed in the same tray up to its capacity to minimize the number of trays used. Trays must not be so full that the mailpieces inhibit adequate closure or covering of the contents.
- c. The weight of a tray and its content must not exceed 70 pounds.
- d. Each tray must bear the correct tray label.
- e. When pieces remain after one or more full trays are prepared for a 5-digit scheme, 5-digit, 3-digit, SCF, or ADC destination, an additional tray to the destination must be prepared if the remaining pieces reach the required volume. If the remaining volume is below the required minimum, the pieces must be moved to the next tray level that meets the minimum volume.
- f. Each flat tray must be covered with a green lid. Each covered flat tray must be secured with two straps placed tightly around the width (shorter dimension) of the tray.

21.0 Sack and Tray Labels

21.1 Basic Standards

21.1.1 General

Sack and tray labels are subject to the following:

- a. Use 1-inch labels for sacks with metal 1-inch label holders/closures.
- b. Use 2-inch labels for sacks with 2-inch label holder pockets.
- c. Use 2-inch labels for sacks with dual plastic label holders/closures. One-inch labels may be used but are not recommended.
- d. Use 2-inch labels for trays.
- e. Illegible labels are not acceptable. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable.
- f. Container labels for automation price mailings are subject to 4.9 and 708.6.0.

21.1.2 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.

- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (for example, “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (for example, 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray.

21.1.3 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards. Except as provided in [27.0](#) for combined mailings, Periodicals publications must use one of the following for Line 2 class information:
 1. “PER.”
 2. “NEWS” if published weekly or more often or if authorized newspaper treatment as of March 1, 1984.
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack, tray, and pallet labels.

CONTENT TYPE	CODE
Barcoded	BC
Barcoded and Nonbarcoded	BC/NBC
Carrier Route	C (type of route)
Carrier Routes	CR-RT or CR-RTS
Digit	D
Flats	FLTS
General Delivery Unit	G
Highway Contract Route	H
Irregular Parcels	IRREG
Letters	LTR or LTRS
Machinable	MACH
Mixed	MXD
Nonbarcoded	NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under 705.9.0)
Origin Mixed	OMX

CONTENT TYPE	CODE
Periodicals	PER or NEWS (see 21.1.3a)
Post Office Box Section	B
Rural Route	R
Scheme	SCH
Working	WKG

21.1.4 Line 3 (Office of Mailing or Mailer Information Line)

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office.

21.1.5 Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- It may appear below Line 3.
- A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on Line 3.

21.1.6 Abbreviations

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product.

21.2 Sack Labels

21.2.1 Physical Characteristics

A sack label must meet these specifications:

- Color: pink for Periodicals.
- Weight: minimum 70-pound stock (500 sheets, 24 by 36 inches).
- Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- Height (perpendicular to printing):
 - For 1-inch labels: 0.937 inch minimum; 0.980 inch maximum.
 - For 2-inch labels: 1.860 inches minimum; 2.015 inches maximum.

21.2.2 Additional Standards for Barcoded Sack Labels

In addition to [21.2.1](#), barcoded sack labels must meet the standards in [21.4](#) and [708.6.2](#) (for 2-inch labels) or [708.6.3](#) (for 1-inch labels).

21.2.3 Additional Standards for Automation-Compatible Flats

For sack labels used on mailings of automation-compatible flats only:

- a. The human-readable content of sack labels must be machine-printed at five lines per inch. If the information cannot be shortened by postal abbreviations, it may be printed at a pitch of up to 15 characters per inch, if at least 22 human-readable characters fit on the label without interfering with the “quiet zone.”
- b. The minimum acceptable height for the destinating ZIP Code is 0.111 inch (8-point type).
- c. The minimum acceptable character height for all other information on Lines 1, 2, and 3 is 0.083 inch (6-point type).

21.3 Tray Labels**21.3.1 Placement**

Place the tray label securely in an adhesive-backed label holder affixed to the location designated on the tray. If no specific location is indicated, place the label securely in an adhesive-backed label holder affixed horizontally to the top left corner of one end of the tray. Do not use tape. Insert the label completely into the label holder to ensure that it does not fall out during processing. Do not insert labels upside down.

21.3.2 Physical Characteristics

A tray label must meet these specifications:

- a. Color: pink for Periodicals.
- b. Weight: minimum 70-pound stock (500 sheets, 24 by 36 inches).
- c. Height (perpendicular to printing): 1.860 inches minimum; 2.015 inches maximum.
- d. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.

21.3.3 Additional Standards for Barcoded Tray Labels

In addition to [21.3](#), barcoded tray labels must meet the standards in [708.6.2](#).

21.4 Use of Barcoded Sack and Tray Labels

[Exhibit 21.4](#) shows the types of mail requiring barcoded sack or tray labels.

Barcoded labels must meet these general standards:

- a. Mailers must use the appropriate size label as described in [21.1.1](#).
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Do not make alterations (such as handwritten changes) to preprinted barcoded labels.
- d. Mailers must insert barcoded labels completely into the label holder on the sack or tray to prevent their loss during transport and processing.

707.22.1

Exhibit 21.4 Required Barcoded Sack and Tray Labels

PRICE OR TYPE	PROCESSING CATEGORY
Periodicals	
Automation price	Letter-size, flat-size
Cobundled and cosacked under 705.9.0 through 705.13.0	Flat-size

22.0 Preparing Nonbarcoded (Presorted) Periodicals

22.1 Basic Standards

22.1.1 General

For letter-size mail, nonletter-size mail in sacks, and palletized mail, the following standards apply:

- a. All pieces in each mailing must be in the same processing category.
- b. Letter-size pieces must be bundled under [22.2](#) and prepared in trays under [22.5](#). Trays prepared under this section may subsequently be palletized under [705.8.0](#).
- c. Nonletter-size pieces must be bundled under [22.2](#). Bundles placed on pallets must meet additional bundling criteria under [705.8.0](#).
- d. Bundles of nonletter-size pieces must be sacked or palletized (except under [23.4.2](#)) under one of the following:
 1. Sacked under [22.6](#), except that a nonbarcoded price mailing that is part of a mailing job that also contains a barcoded mailing must be sacked as described in [22.1.2](#).
 2. Palletized under [705.8.0](#), [705.10.0](#), [705.12.0](#), or [705.13.0](#).
- e. Sacks prepared under [22.6](#), *Sack Preparation—Flat-Size Pieces and Parcels*, may subsequently be prepared on pallets under [705.8.0](#).
- f. All pieces must be sorted together to the finest extent required under the applicable sortation standards described above.

22.1.2 Additional Standards for Nonletter-Size Sacked Mailing Jobs Containing More Than One Mailing

The following standards apply:

- a. Mailings prepared in sacks that are part of a mailing job that includes a carrier route, barcoded price, and nonbarcoded price mailing must be prepared under one of the options listed below. Machinable nonbarcoded price pieces may be cobundled with machinable barcoded price pieces under the standards in [705.11.0](#).
 1. The carrier route mailing must be prepared under [13.0](#), *Carrier Route Eligibility*, and [23.0](#), *Preparing Carrier Route Periodicals*, and the barcoded price and nonbarcoded price mailing must be prepared under [705.9.0](#).
 2. All three mailings in the mailing job must be prepared under [705.10.0](#).

- b. Mailings prepared in sacks that are part of a mailing job that includes a barcoded price and nonbarcoded price mailing must be prepared under the cosacking standards in [705.9.0](#).
- c. Sacked mailing jobs that contain only a carrier route mailing and a nonbarcoded price mailing may be separately sacked, or may be prepared using the merged sacking option under [705.10.0](#).
- d. Sacked mailing jobs that contain only a carrier route mailing and a barcoded price mailing may be separately sacked under [23.0](#) and [25.0](#), or may be prepared using the merged sacking option under [705.10.0](#).

22.1.3 Documentation

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing, supported by documentation meeting the basic standards in [708.1.0](#). Postage statements must be supported by documentation produced by PAVE-certified software or standardized documentation under [708.1.0](#). Documentation of postage is not required if each piece is of identical weight and the pieces are separated by price and zone when presented for acceptance.

22.1.4 Merged Containerization of Nonletter-Size Carrier Route, Barcoded Price, and Nonbarcoded Price Mail

Under the optional preparation in [705.10.0](#), nonbarcoded price 5-digit bundles prepared under [22.1](#) and [22.2](#) are cosacked with carrier route bundles prepared under [23.0](#) and with barcoded price 5-digit bundles prepared under [25.0](#) in merged 5-digit sacks and in merged 5-digit scheme sacks. Under the optional preparation in [705.10.0](#), [705.12.0](#), or [705.13.0](#), nonbarcoded price 5-digit bundles prepared under [22.1](#) and [22.2](#) are copalletized with carrier route bundles prepared under [23.0](#) and with barcoded price 5-digit bundles prepared under [25.0](#) on merged 5-digit pallets and on merged 5-digit scheme pallets. See [22.1.2a](#) for information on when preparation under [705.10.0](#) may be required. Machinable barcoded and nonbarcoded price pieces may be cobundled under [705.11.0](#).

22.2 Bundle Preparation

[7-3-08] Mailings consisting entirely of nonbarcoded pieces meeting the criteria in [301.3.0](#) may be prepared in 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#) and in 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches the minimum bundle size (except under [22.7](#)). Smaller volumes are not permitted except in mixed ADC bundles and 5-digit/scheme and 3-digit/scheme bundles prepared under [22.4](#). Bundling is also subject to [19.0](#), [Bundles](#). Preparation sequence, bundle size, and labeling:

- a. Firm (optional); two-piece minimum; blue Label F or optional endorsement line (OEL).
- b. 5-digit scheme (optional); six-piece minimum; Red Label 5 SCH or OEL.
- c. 5-digit (required); six-piece minimum; Red Label 5 or OEL; bundle labeling optional for pieces in full 5-digit trays
- d. 3-digit scheme (optional); six-piece minimum; Green Label 3 SCH or OEL.

- e. 3-digit (required); six-piece minimum; Green Label 3 or OEL.
- f. ADC (required); six-piece minimum; Pink Label A or OEL.
- g. Origin mixed ADC (required); no minimum; for any remaining pieces for destinations in [L201](#), Column B, corresponding to the origin ZIP Code in Column A; Tan label X or OEL.
- h. Mixed ADC (required); no minimum; Tan Label X or OEL.

22.3 Firm Bundles

A “firm bundle” is defined as two or more copies for the same address placed in one bundle. If each copy has a delivery address, each may be claimed as a separate piece for presort and on the postage statement, or the firm bundle may be claimed as one addressed piece. A firm bundle claimed as one addressed piece must be physically separate from other bundles and may only be used to satisfy a six-piece bundle requirement to a presort destination for In-County prices. Firm bundles must not be placed in 5-digit scheme sacks.

22.4 Bundles With Fewer Than Six Pieces

Nonletter-size Periodicals may be prepared in 5-digit and 3-digit bundles containing fewer than six pieces when the publisher determines that such preparation improves service. Pieces in these low-volume bundles must be claimed at the applicable mixed ADC price (Outside-County) or basic price (In-County). Low-volume bundles are permitted only when they are sacked or prepared on pallets as follows:

- a. Place bundles in only 5-digit, 3-digit, and SCF sacks that contain at least 24 pieces, or in origin/entry SCF sacks, as appropriate.
- b. Place bundles on only merged 5-digit scheme, 5-digit scheme, merged 5-digit, 5-digit, 5-digit metro, 3-digit, and SCF pallets.

22.5 Tray Preparation—Letter-Size Pieces

Preparation sequence, tray size, and labeling:

- a. *5-digit*: required at 24 pieces, optional with one six-piece bundle minimum.
 - 1. Line 1: use city, state, and 5-digit ZIP Code on mail (see [21.1.2](#) for overseas military mail).
 - 2. Line 2: “PER” or NEWS” as applicable; followed by “LTRS 5D NON BC.”
- b. *3-digit*: required at 24 pieces (no minimum for required origin/optional entry 3-digit(s)), optional with one six-piece bundle minimum.
 - 1. Line 1: use [L002](#), Column A.
 - 2. Line 2: “PER” or NEWS” as applicable; followed by “LTRS 3D NON BC.”
- c. *ADC*: required at 24 pieces, optional with one six-piece bundle minimum.
 - 1. Line 1: use [L004](#), Column B.
 - 2. Line 2: “PER” or NEWS” as applicable; followed by “LTRS ADC NON BC.”
- d. *Mixed ADC*: required (no minimum).
 - 1. Line 1: Use [L011](#), Column B.

2. Line 2: "PER" or NEWS" as applicable; followed by "LTRS NON BC WKG."

22.6 Sack Preparation—Flat-Size Pieces and Parcels

For mailing jobs that also contain a barcoded price mailing, see [22.1.2](#) and [705.9.0](#) or [705.10.0](#). For other mailing jobs, preparation sequence, sack size, and labeling:

- a. *5-digit scheme*, optional; for pieces meeting the standards in [301.3.0](#); 24-piece minimum, fewer pieces not permitted.
 1. Line 1: [L007](#), Column B.
 2. Line 2: "PER" or NEWS" as applicable, followed by "FLTS 5D SCH NON BC."
- b. *5-digit*, required at 24 pieces, fewer pieces not permitted.
 1. Line 1: use city, state, and 5-digit ZIP Code on mail (see [21.1.2](#) for overseas military mail).
 2. Line 2: "PER" or NEWS" as applicable; followed by "FLTS" or "IRREG" as applicable; followed by "5D"; followed by "NON BC" for flats.
- c. *3-digit*, required at 24 pieces, fewer pieces not permitted.
 1. Line 1: use [L002](#), Column A.
 2. Line 2: "PER" or "NEWS" as applicable; followed by "FLTS" or "IRREG" as applicable; followed by "3D"; followed by "NON BC" for flats.
- d. *SCF*, required at 24 pieces, fewer pieces not permitted.
 1. Line 1: use [L002](#), Column C.
 2. Line 2: "PER" or "NEWS" as applicable; followed by "FLTS" or "IRREG" as applicable; followed by "SCF"; followed by "NON BC" for flats.
- e. *Origin/entry SCF*, required for the SCF of the origin (verification) office, optional for the SCF of an entry office other than the origin office, (no minimum); for Line 1 use [L002](#), Column C.
 1. Line 1: use [L002](#), Column C.
 2. Line 2: "PER" or "NEWS" as applicable; followed by "FLTS" or "IRREG" as applicable; followed by "SCF"; followed by "NON BC" for flats.
- f. *ADC*, required at 24 pieces, fewer pieces not permitted.
 1. Line 1: use [L004](#), Column B.
 2. Line 2: "PER" or "NEWS" as applicable; followed by "FLTS" or "IRREG" as applicable; followed by "ADC"; followed by "NON BC" for flats.
- g. *Origin mixed ADC*, required; no minimum; for any remaining bundles for destinations in [L201](#), Column B, corresponding to the origin ZIP Code in Column A.
 1. Line 1: Use [L201](#), Column C.
 2. Line 2: "PER" or "NEWS" as applicable, followed by "FLTS" or "IRREG" as applicable, followed by "WKG W FCM."
- h. *Mixed ADC*, required (no minimum).

707.22.7

1. Line 1: Use [L009](#), Column B.
2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “NON BC WKG” for flats or “WKG” for irregular parcels.

22.7 **Optional Tray Preparation — Flat-Size Nonbarcoded Pieces**

As an option, mailers may place in flats trays (see [20.4](#)) machinable pieces meeting the criteria in [301.3.0](#) that would normally be placed in sacks. Mailers must either bundle or group together all pieces for each 5-digit scheme, 5-digit, 3-digit, SCF, and ADC destination. Bundling is not permitted unless it achieves a finer presort than the presort destination of the tray. The trays are subject to a container charge, and any bundles are subject to a bundle charge. Tray preparation, sequence, and labeling:

- a. *5-digit scheme* (required), 24-piece minimum, labeling:
 1. Line 1: [L007](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “5D SCH NON BC.”
- b. *5-digit* (required), 24-piece minimum, labeling:
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [708.6.1.2](#) for overseas military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “5D NON BC.”
- c. *3-digit* (required), 24-piece minimum, labeling:
 1. Line 1: [L002](#), Column A.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “3D NON BC.”
- d. *SCF* (required), 24-piece minimum, labeling:
 1. Line 1: [L002](#), Column C.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “SCF NON BC.”
- e. *Origin SCF* (required) and entry SCF(s) (optional), no minimum, labeling:
 1. Line 1: [L002](#), Column C.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “SCF NON BC.”
- f. *ADC* (required), 24-piece minimum, no overflow tray allowed, labeling:
 1. Line 1: use [L004](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “ADC”; followed by “NON BC.”
- g. *Origin mixed ADC* (required), no minimum, for any remaining pieces for destinations in [L201](#), Column B, of the origin ZIP Code in Column A, labeling:

1. Line 1: Use [L201](#), Column C.
 2. Line 2: “PER” “NEWS” as applicable; followed by “FLTS”; followed by “WKG W FCM.”
- h. *Mixed ADC* (required), no minimum, labeling:
1. Line 1: Use [L009](#).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “NON BC WKG.”

23.0 Preparing Carrier Route Periodicals

23.1 Basic Standards

23.1.1 General

Mailers must meet the following standards for carrier route mailings:

- a. All pieces in each carrier route Periodicals mailing must be in the same processing category.
- b. Letter-size pieces must be bundled under [23.2](#) and prepared in trays under [23.3](#). Trays prepared under this section may subsequently be palletized under [705.8.0](#).
- c. Nonletter-size pieces must be bundled under [23.2](#). Bundles placed on pallets must meet additional bundling standards under [705.8.0](#).
- d. Except as noted in [23.4.2](#), mailers must sack or palletize bundles of nonletter-size pieces according to one of the following:
 1. Sack under [23.4](#), or under [705.10.1](#) if eligible to be cosacked with barcoded price and nonbarcoded price Periodicals pieces.
 2. Palletized under [705.8.0](#), [705.10.0](#), [705.12.0](#), or [705.13.0](#).
- e. Sacks prepared under [23.4](#), *Preparation—Flat-Size Pieces and Irregular Parcels*, may subsequently be prepared on pallets under [705.8.0](#).
- f. All pieces must be sorted together to the finest extent required under the applicable sortation standards described above.
- g. Pieces with a simplified address must meet the corresponding preparation standards in [602.3.0](#), *Use of Alternative Addressing*, and the eligibility standards in [7.0](#), *Mailing to Nonsubscribers or Nonrequesters*.

23.1.2 Documentation

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing, supported by documentation meeting the basic standards in [708.1.0](#). Postage statements must be supported by documentation produced by PAVE-certified software or standardized documentation under [708.1.0](#). Documentation of postage is not required if each piece is of identical weight and the pieces are separated by price and zone when presented for acceptance. Documentation of sequencing and of density standards under [23.8](#) and [23.9](#) must be submitted with each mailing.

23.1.3 Sequencing

Preparation for carrier route prices is optional and subject to additional standards. Periodicals for which a carrier route discount is claimed must be prepared as a carrier route mailing under this section, using either walk sequencing or line-of-travel sequencing, applicable to the price claimed (see [23.8](#) and [23.9, *Delivery Sequence Documentation*](#)). Mailpieces prepared with a simplified address must meet the additional standards in [602.3.0, *Use of Alternative Addressing*](#).

23.1.4 Merged Containerization of Nonletter-Size Carrier Route and Machinable Barcoded and Nonbarcoded Price Mail

For sacked mailing jobs that contain a machinable barcoded and nonbarcoded price and a carrier route price mailing, mailers must prepare the machinable barcoded and nonbarcoded price mailings under [705.9.0](#) (see [22.1.2a](#)) and the carrier route mailing under [23.0](#), unless they elect to prepare the mailings under [705.10.0](#). Under the optional preparation in [705.10.0](#), carrier route bundles prepared under [23.1](#) and [23.2.3](#) are cosacked with machinable nonbarcoded price 5-digit bundles prepared under [22.0](#) and with machinable barcoded price 5-digit bundles prepared under [25.0](#) in merged 5-digit sacks and merged 5-digit scheme sacks. Under the optional preparation in [705.10.0](#), [705.12.0](#), or [705.13.0](#), carrier route bundles prepared under [23.1](#) and [23.2.3](#) are copalletized with machinable nonbarcoded price 5-digit bundles prepared under [22.0](#) and with machinable barcoded price 5-digit bundles prepared under [25.0](#) on merged 5-digit pallets and on merged 5-digit scheme pallets. Machinable barcoded and nonbarcoded price pieces may be cobundled with automation price pieces under [705.11.0](#).

23.2 Bundle Preparation**23.2.1 General**

Bundle preparation is subject to [19.0, *Bundles*](#), and the specific standards below.

23.2.2 Walk-Sequence Identification

In addition to the bundle label showing carrier route type and number under [23.2.3](#), each bundle of Periodicals walk-sequence mail must show that the mail is walk sequenced and the level of sequencing. A facing slip with the phrase “HIGH DENSITY WALK-SEQUENCED CARRIER ROUTE MAIL” or “SATURATION WALK-SEQUENCED CARRIER ROUTE MAIL” (as applicable) may be placed on the top of each bundle of walk-sequence mail. It may be an address label with the required information placed on a sample mailpiece that is the top piece in the bundle, or a slip of paper affixed to the top of the bundle. If bundles are prepared without facing slips, an optional endorsement line or carrier route information line must be placed on each piece in the bundle to provide the equivalent information.

23.2.3 Bundling and Labeling

Preparation sequence, bundle size, and labeling:

- a. Firm (optional); two-piece minimum; blue Label F or optional endorsement line (OEL).
- b. Carrier route (optional, but required for price eligibility); six-piece minimum (fewer pieces permitted under [23.6](#)); labeling required (facing slip, OEL, or carrier route information line) except for bundles placed in a carrier route tray or sack.

23.3 Preparation—Letter-Size Pieces

23.3.1 Basic Preparation

Preparation sequence, tray size, and labeling:

- a. *Carrier route*: required at 24 pieces, optional with one six-piece bundle.
 1. Line 1: use city, state, and 5-digit ZIP Code on mail (see [21.1.2](#) for overseas military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “LTRS;” followed by “WSS” for saturation price mail, or “WSH” for high density price mail, or “CR” for basic price mail; followed by the route type and number.
- b. *5-digit carrier routes*: required if full tray, optional with one six-piece bundle.
 1. Line 1: use city, state, and 5-digit ZIP Code destination of bundles, preceded for military mail by the prefixes under [21.1.2](#).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “LTRS CR-RTS.”
- c. *3-digit carrier routes*, optional with one six-piece bundle for each of two or more 5-digit areas.
 1. Line 1: use the city, state, and ZIP shown in [L002](#), Column A that corresponds to the 3-digit ZIP Code prefix of bundles.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “LTRS 3D CR-RTS.”

23.3.2 Tray Line 2 for Simplified Address

For trays that contain letter-size pieces with a simplified address prepared under [602.3.0, Use of Alternative Addressing](#), use “MAN” on Line 2 in place of “BC.”

23.4 Preparation—Flat-Size Pieces and Irregular Parcels

23.4.1 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. *Carrier route*, required at 24 pieces, fewer pieces not permitted.
 1. Line 1: use city, state, and 5-digit ZIP Code on mail (see [21.1.2](#) for overseas military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “WSS” for saturation price mail, or “WSH” for high density price mail, or “CR” for basic price mail; followed by the route type and number.
- b. *5-digit scheme carrier routes*, required at 24 pieces, fewer pieces not permitted.
 1. Line 1: use [L001](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR-RTS SCH.”
- c. *5-digit carrier routes*, required at 24 pieces, fewer pieces not permitted.
 1. Line 1: use city, state, and 5-digit ZIP Code destination of bundles, preceded for military mail by the prefixes under [21.1.2](#).

707.23.4.2

2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR-RTS.”
- d. *3-digit carrier routes*, required with one six-piece bundle. As an option to preparing carrier route bundles in 3-digit carrier routes sacks, mailers may place those bundles in flats trays (see [20.4](#)).
 1. Line 1: use the city, state, and ZIP Code shown in [L002](#), Column A, that corresponds to the 3-digit ZIP Code prefix of bundles.
 2. Line 2: “PER” or “NEWS” as applicable, followed by “FLTS 3D” or “IRREG 3D” as applicable, followed by “CR-RTS.”

23.4.2 Exception to Sacking

Sacking is not required for carrier route or 5-digit bundles prepared for and entered at a DDU when the mailer unloads bundles under [29.5.5](#). Mail presented under this exception is not subject to the container charge (but is still subject to the bundle charge). Mailers must prepare unsacked bundles as follows:

- a. The maximum weight for a single bundle is 40 pounds; the maximum number of bundles per carrier route is one bundle for each 10 pounds (or increment) of mail for that route, as follows:
 1. Mailers must make the fewest number of bundles possible, up to the 40-pound maximum, while maintaining bundle integrity. To determine the maximum number of bundles allowable for a route, divide the total weight of mail for that route by 10 and round up to the next whole number. For example, if there are 34 pounds of mail for a carrier route, the maximum number of bundles for that route is four ($34 \div 10 = 3.4 = 4$ bundles).
 2. Mailers may balance the weight of the bundles across the maximum number of allowable bundles for a route. For example, if there are 36 pounds of mail for a carrier route, the maximum number of bundles for that route is four ($36 \div 10 = 3.6 = 4$ bundles), which may be in four 9-pound bundles.
- b. Mailers must clearly label carrier route bundles using optional endorsement lines under [708.7.0](#) or facing slips under [19.15](#).

23.5 Firm Bundles

A *firm bundle* is two or more copies for the same address placed in one bundle. If each copy has a delivery address, each may be claimed as a separate piece for presort and on the postage statement or the firm bundle may be claimed as one piece. The USPS considers a firm bundle that is sorted and claimed as one piece to be one addressed piece for price eligibility purposes, regardless of the number of copies in the bundle. Mailers must clearly label firm bundles using facing slips or barcoded pressure-sensitive labels under [19.0](#), or optional endorsement lines under [708.7.0](#).

23.6 Bundles With Fewer Than Six Pieces

Nonletter-size Periodicals may be prepared in carrier route bundles containing fewer than six pieces when the publisher determines that such preparation improves service. Pieces in these low-volume bundles must be claimed at the applicable

mixed ADC price (Outside-County) or basic price (In-County). Low-volume carrier route bundles are permitted only when they are sacked or prepared on pallets as follows:

- a. Place bundles in only 5-digit scheme carrier routes and 5-digit carrier routes sacks that contain at least 24 pieces, or 3-digit carrier routes or merged 3-digit sacks that contain at least one six-piece carrier route bundle.
- b. Place bundles on only merged 5-digit scheme, 5-digit scheme carrier routes, merged 5-digit, 5-digit carrier routes, 5-digit metro, 3-digit, and SCF pallets.

23.7 Multi-Box Section Bundles—Optional Preparation

[8-14-08] A mailer may combine individual copies of Periodicals for Post Office box sections into a multi-box section bundle or bundles of copies to the same 5-digit ZIP Code under these conditions:

- a. Each multi-box section bundle must contain at least six copies.
- b. Fewer than six copies to each Post Office box section are included in the bundle or bundles.
- c. Copies must be prepared in order from the lowest to the highest Post Office box section and if more than one piece exists for a specific Post Office box section, existing sequencing requirements as specified in 23.0 must be met.
- d. Each multi-box section bundle must be secured with at least two bands, one around the length and one around the girth; or with shrinkwrap; or with shrinkwrap plus one or more bands.
- e. Each multi-box section bundle must be labeled with an optional endorsement line (OEL). The top bundle must contain the box section information for the individual bundle preceded by the endorsement "Multi" and two asterisks (e.g., *****Multi**B-001).
- f. Bundles must be placed in existing carrier-route, 5-Digit scheme, or 5-Digit carrier routes sacks.
- g. Copies prepared in multi-box section bundles qualify for 5-digit prices.
- h. Copies prepared in multi-box section bundles may qualify for DDU container discounts.

23.8 Delivery Sequence Information

23.8.1 General

Mailpieces for which a walk-sequence discount is claimed must be organized in the delivery sequence determined by the USPS and prepared as a carrier route mailing under 23.0 and the standards below. Pieces prepared with a simplified address must also meet the corresponding standards.

23.8.2 Missing Addresses

Some mailpieces cannot be sequenced because an exact match for a name or address cannot be obtained. These pieces may be included in a sequenced mailing only if they are placed behind or after the sequenced mail. Arrange these pieces:

707.23.8.3

- a. Alphabetically by complete street name, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.
- b. Numerically for numbered streets, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.

23.8.3 Pieces With Simplified Address

Walk-sequence price pieces prepared with a simplified address must be based on delivery stop information obtained within 90 days before the mailing date, either from the Delivery Statistics File or from the postmaster of the destination office.

23.8.4 Pieces Without Simplified Address

Walk-sequence price pieces prepared with other than a simplified address format under [23.8.3](#) must be sequenced using USPS data from one of the following sources, issued within 90 days before the mailing date:

- a. The Computerized Delivery Sequence (CDS) file.
- b. The Delivery Sequence File, Second Generation (DSF²).
- c. Delivery sequence information from USPS address sequencing services, as requested by the customer.

23.8.5 Out-of-Date Sequencing Information

Mailings prepared with out-of-date walk-sequencing information are not eligible for walk-sequence prices.

23.8.6 Line-of-Travel Sequence

Unless the mail is prepared in carrier walk sequence, line-of-travel (LOT) sequence is required for mailings at Standard Mail Enhanced Carrier Route basic prices and Periodicals carrier route basic prices. LOT sequence is not an exact walk sequence but a sequence of ZIP+4 codes arranged in the order that the route is served by a carrier. (First the ZIP+4 groups are sequenced, then the addresses within each are identified as being in ascending or descending order.) The USPS eLOT product provides a list of the ZIP+4 codes each carrier route serves, identifies the order in which they are delivered, and provides an indicator specifying whether the addresses that share the same ZIP+4 code must be sorted in ascending or descending order. When a range of ZIP+4 codes on the same carrier route are assigned the same sequence number, the addresses bearing those ZIP+4 codes must be arranged in ascending ZIP+4 code order before the sequence number is assigned. LOT information must be updated within 90 days before the date of mailing.

23.9 Delivery Sequence Documentation**23.9.1 General**

The postage statement must be annotated in the “Carrier Route Sequencing Date” block on page 1. The mailer must annotate the postage statement to show the earliest (oldest) date of the method used to obtain sequencing information for the mailing. The mailer’s signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. The mailer must maintain documentation to substantiate compliance with the standards for

carrier route sequencing. Unless submitted with each corresponding mailing, the mailer must be able to provide the USPS with documentation (if requested) of accurate sequencing or delivery statistics for each carrier route to which pieces are mailed. Acceptable forms of documentation are:

- a. The invoice showing that the addresses came from CDS.
- b. DSF² invoice or documentation.
- c. Copies of the delivery unit summaries that served as the mailer's bills for address sequencing service charges.
- d. Evidence of receipt of information from postmasters for simplified address mailings (see [509.1.0, Address Information System Products](#)).
- e. Form 3553 showing the date of the eLOT product used, or the date from the USPS Qualification report produced by presort software.

23.9.2 High Density Price Mail

The following documentation must be submitted for high density price mail:

- a. Periodicals Other Than In-County Mail. For each carrier route to which high density price mail is addressed, the mailer must document the total number of addressed pieces to the route. If there are fewer than 125 addressed pieces for a given route, the documentation also must show the number of possible deliveries on the route.
- b. Periodicals In-County Mail. For each carrier route for which Periodicals In-County high density prices are claimed under the minimum 25% of the total active possible deliveries per carrier route, the documentation must show for each carrier route for which the prices are claimed the total number of active possible deliveries and the number and percentage of deliveries to which mailpieces are addressed. The documentation must be listed by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing.

23.9.3 Saturation Density Price Mail—Simplified Address

For each carrier route to which mail with a simplified address is sent at the saturation price, the mailer must be able to document that the mailing meets the applicable density standard. This documentation must show the total number of active possible deliveries and the total number to which mailpieces in the mailing are being addressed, by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing.

23.9.4 Saturation Density Price Mail—Other

For each carrier route to which mail without a simplified address is sent at the saturation price, the mailer must be able to document that the mailing meets the applicable density standards. This documentation must show either the total number of active possible *residential* deliveries and the number and percentage to which mailpieces are addressed, or the total number of *all* active possible deliveries and the number and percentage to which mailpieces are addressed, depending on whether qualification is based on the 90% or 75% criterion, respectively. The documentation must be listed by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing.

707.23.9.5

23.9.5 High Density and Saturation Density Price Mail

If a mailing contains pieces qualifying for both walk-sequence prices, the documentation may be combined. Entries for pieces at the high density price must be so annotated on the documentation. For the entire mailing, a summary of the total number of pieces at each price must be provided. This documentation must be submitted with each applicable mailing.

23.9.6 Carrier Route Price Mail

If a mailing includes high density and saturation price and basic carrier route price pieces, in addition to the applicable information required by [23.9.2](#) through [23.9.5](#), the documentation for the basic carrier route price mail must show, by 5-digit ZIP Code and, within each, by carrier route, the total number of addressed pieces at each price for each carrier route to which pieces are addressed. Pieces qualifying for the basic carrier route price must be so annotated. For the entire mailing, a summary by 5-digit ZIP Code of the total number of pieces at each price must be provided. This documentation must be submitted with each applicable mailing to meet the documentation standard for the carrier route price.

24.0 Preparing Letter-Size Barcoded (Automation) Periodicals**24.1 Basic Standards****24.1.1 General**

Letter-size barcoded price Periodicals must be prepared under [24.0](#). Bundle and tray preparation are subject to [19.0](#) through [21.0](#). Trays must bear barcoded tray labels under [708.6.0](#).

24.1.2 Mailings

All pieces in a mailing must meet the standards in [201.3.0](#) and must be sorted together to the finest extent required for the price claimed. A single barcoded price Periodicals mailing may include pieces prepared at 5-digit, 3-digit, ADC and mixed ADC (Outside-County), and basic (In-County) prices.

24.1.3 Documentation

A complete postage statement must accompany each mailing. Each mailing also must be accompanied by presort and price documentation produced by PAVE-certified or MAC-certified software or by standardized documentation under [708.1.0](#). *Exception:* For mailings of fewer than 10,000 pieces, presort and price documentation is not required if postage at the correct price is affixed to each piece or if each piece is of identical weight and the pieces are separated by price when presented for acceptance. Mailers may use a single postage statement and a single documentation report for all price levels in a single mailing. Combined mailings of more than one Periodicals publication also must be documented under [22.0](#) and [23.0](#).

24.1.4 Marking

Only pieces claimed at an automation price may bear "AUTO."

24.1.5 General Preparation

[8-14-08] Grouping, bundling, and labeling are not generally required or permitted, except that bundles must be prepared in any mailing consisting entirely of card-size pieces and for mail in all less-than-full trays (including overflow trays) as specified in [707.24.2, Additional Standards](#). Bundles are not required to be identified with an optional endorsement line or a barcoded pressure-sensitive bundle label when placed into a correctly labeled tray.

24.2 Additional Standards**24.2.1 Preparing Barcoded Price Letters**

Tray size, preparation sequence, and Line 1 labeling:

- a. 5-digit/scheme: optional, but 5-digit trays required for price eligibility (150-piece minimum); overflow allowed; for Line 1, for 5-digit trays, use city, state, and 5-digit ZIP Code destination of pieces, preceded for military mail by the prefixes under [21.1.2](#); for Line 1, for optional 5-digit scheme trays, use destination shown in the current USPS City State Product.
- b. 3-digit/scheme: required (150-piece minimum except no minimum for required origin/optional entry 3-digit(s)/scheme); overflow allowed; for Line 1, use [L002](#), Column B.
- c. AADC: required (150-piece minimum); overflow allowed; group pieces by 3-digit ZIP Code prefix (or 3-digit/scheme if applicable); for Line 1, use [L801](#), Column B.
- d. Mixed AADC: required (no minimum); group pieces by AADC; for Line 1, use [L011](#), Column B.

24.2.2 Tray Line 2

Line 2: "PER LTRS" or "NEWS LTRS" (except "NEWS LTR" for 5-digit scheme trays), as applicable, and:

- a. 5-digit scheme: "BC 5D SCHEME."
- b. 5-digit: "5D BC."
- c. 3-digit scheme: "BC SCHEME" and, if applicable, as shown in [L002](#), Column B, followed by the letter "A," "B," or "C."
- d. 3-digit: "3D BC."
- e. AADC: "AADC BC."
- f. Mixed AADC: "BC WKG."

707.25.1

25.0 Preparing Flat-Size Barcoded (Automation) Periodicals

25.1 Basic Standards

25.1.1 General

Each piece must meet the physical standards in [301.3.0](#) or in [26.0](#). Bundle, sack, and tray preparation are subject to [18.0](#) through [21.0](#) and this section. Trays and sacks must bear the appropriate barcoded container labels under [708.6.0](#). Pieces may be prepared in bundles that are not placed in sacks or pallets only as provided in [23.4.2](#).

25.1.2 Documentation

A complete postage statement must accompany each mailing, supported by documentation produced by PAVE-certified software or standardized documentation under [708.1.0](#). Mailers may use a single postage statement and a single documentation report for all price levels in a single mailing. Documentation of postage is not required if the correct price is affixed to each piece or if each piece is of identical weight and the pieces are separated by price when presented for acceptance. Combined mailings of Periodicals publications must also be documented under [22.0](#) and [23.0](#).

25.1.3 Marking

Only pieces claimed at a barcoded price may bear "AUTO."

25.1.4 Bundle Preparation

All pieces must be prepared in bundles (except under [25.5](#)) and meet the following requirements:

- a. Pieces that meet the standards in [301.3.0](#) must be prepared in separate bundles from pieces that meet the standards in [26.0](#).
- b. Firm bundles must not be included in Periodicals mailings prepared under [25.0](#).
- c. Each bundle of pieces prepared under [301.3.0](#) and each bundle of pieces prepared under [26.0](#) must separately meet the bundle minimums in [25.4](#).
- d. Bundles may contain fewer than six pieces when the mailpieces are too thick or too heavy to create a six-piece bundle. Piece price eligibility is not affected if the total number of pieces bundled for a presort destination meets or exceeds the minimum for price eligibility under [14.0](#).

25.1.5 Scheme Bundle Preparation

Pieces must be prepared in 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#) and in 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). These bundles must meet the additional standards in [18.4i](#) or [18.4r](#).

25.1.6 7Sack Preparation

Mailers may combine bundles of pieces prepared under [301.3.0](#) and bundles of pieces prepared under [26.0](#) in the same sack, with the exception of 5-digit scheme sacks, which may contain only pieces prepared under [301.3.0](#).

25.1.7 Exception—Barcoded and Nonbarcoded Flats on Pallets

When the physical dimensions of the mailpieces in a Periodicals mailing meet the definition of both a letter-size piece and a machinable barcoded flat-size piece, the entire job may be prepared, merged, and palletized under [705.9.0](#) through [705.13.0](#). The following standards apply:

- a. The nonbarcoded portion is paid at the nonbarcoded prices.
- b. Mailing jobs prepared entirely in sacks and claiming this exception must be cobundled under [705.11.0](#).
- c. As an alternative to [705.9.0](#) through [705.13.0](#), if a portion of the job is prepared as palletized barcoded flats, the nonbarcoded portion may be prepared as palletized flats and paid at nonbarcoded machinable and carrier route prices. The nonbarcoded price pieces that cannot be placed on ADC or finer pallets may be prepared as flats in sacks and paid at the nonbarcoded prices.

25.1.8 Bundles With Fewer Than Six Pieces

5-digit scheme, 5-digit, 3-digit scheme, and 3-digit bundles may contain fewer than six pieces when the publisher determines that such preparation improves service. Pieces in these low-volume bundles must be claimed at the applicable mixed ADC price (Outside-County) or basic price (In-County). These low-volume bundles are permitted only when they are sacked or prepared on pallets under these conditions: Place 5-digit and 3-digit bundles in only 5-digit scheme, 5-digit, 3-digit, and SCF sacks, as appropriate, that contain at least 24 pieces, or in merged 3-digit sacks that contain at least one six-piece carrier route bundle, or in origin/entry SCF sacks.

- a. Place 5-digit and 3-digit bundles on only merged 5-digit scheme, 5-digit scheme, merged 5-digit, 5-digit, 5-digit metro, 3-digit, and SCF pallets, as appropriate.
- b. Place 5-digit scheme and 3-digit scheme bundles in only 5-digit scheme, 3-digit, and SCF sacks, as appropriate, that contain at least 24 pieces, or in merged 3-digit sacks that contain at least one six-piece carrier route bundle, or in origin/entry SCF sacks.
- c. Place 5-digit scheme and 3-digit scheme bundles on only 3-digit and SCF pallets, as appropriate.

25.1.9 Cotraying, Cosacking, and Cobundling With Nonbarcoded and Carrier Route Price Mail

The following standards apply (except as provided in [25.1.7](#)):

- a. If the mailing job contains a carrier route mailing and a machinable barcoded and nonbarcoded price mailing, then it must be prepared under one of the following options:
 1. The carrier route mailing must be prepared under [13.0](#) and [23.0](#) and the machinable barcoded and nonbarcoded mailings must be prepared under [705.9.0](#).
 2. All three mailings in the mailing job must be prepared under [705.10.0](#).

707.25.1.10

- b. If the mailing job contains an a machinable barcoded and nonbarcoded price mailing, then it must be prepared under the cosacking standards in [705.9.0](#). Machinable barcoded and nonbarcoded price pieces may be cobundled under the standards in [705.11.0](#), *Combining Automation Price and Nonautomation Price Flats in Bundles*.
- c. If the mailing job contains a carrier route mailing and a machinable barcoded price mailing, then it must be separately sacked under [23.0](#) and [25.0](#) or prepared using the merged sack option under [705.10.0](#).

25.1.10 Merged Containerization With Nonbarcoded and Carrier Route Flats

When the standards in [705.10.0](#), [705.12.0](#), or [705.13.0](#) are met, 5-digit bundles of machinable barcoded, machinable nonbarcoded, and carrier route price mail that are part of the same mailing job may be combined on merged 5-digit scheme sacks or pallets and merged 5-digit sacks or pallets. Bundles that are cosacked or copalletized must be part of the same mailing job and mail class. Machinable barcoded price pieces may be cobundled with machinable nonbarcoded price pieces under [705.11.0](#).

25.2 Physical Standards

Each flat-size piece must meet the standards in [301.3.0](#) or, for barcoded pieces in 5-digit bundles, the standards in [26.0](#).

25.3 Bundling and Labeling

[7-3-08] Preparation sequence, bundle size, and labeling:

- a. 5-digit scheme (required for pieces meeting the criteria in [301.3.0](#)); six-piece minimum (fewer pieces permitted under [25.1.4](#)); red Label 5 SCH or OEL.
- b. 5-digit (required); six-piece minimum (fewer permitted under [25.1.8](#)); red Label 5 or OEL.
- c. 3-digit scheme (required for pieces meeting the criteria in [301.3.0](#)); six-piece minimum (fewer pieces permitted under [25.1.4](#)); green Label 3 SCH or OEL.
- d. 3-digit (required); six-piece minimum (fewer permitted under [25.1.8](#)); green Label 3 or OEL.
- e. ADC (required); six-piece minimum (fewer permitted under [25.1.8](#)); pink Label A or OEL.
- f. Origin mixed ADC (required); no minimum; for any remaining pieces for destinations in [L201](#), Column B, corresponding to the origin ZIP Code in Column A; tan label X or OEL.
- g. Mixed ADC (required); no minimum; tan Label X or OEL.

25.4 Sacking and Labeling

For mailing jobs that also contain a machinable nonbarcoded price mailing, see [25.1.9](#) and [705.9.0](#). Other mailing jobs are prepared, sacked, and labeled as follows:

- a. 5-digit scheme, required at 24 pieces, fewer pieces not permitted; may contain 5-digit scheme bundles only; labeling:

1. Line 1: [L007](#), Column B.
 2. Line 2: “PER FLTS 5D SCH BC” or “NEWS FLTS 5D SCH BC,” as applicable.
- b. *5-digit*, required at 24 pieces, fewer pieces not permitted; labeling:
1. Line 1: city, state, and 5-digit ZIP Code on mail (see [708.6.1.2](#) for overseas military mail).
 2. Line 2: “PER FLTS 5D BC” or “NEWS FLTS 5D BC,” as applicable.
- c. *3-digit*, required at 24 pieces, fewer pieces not permitted; labeling:
1. Line 1: [L002](#), Column A.
 2. Line 2: “PER FLTS 3D BC” or “NEWS FLTS 3D BC,” as applicable.
- d. *SCF*, required at 24 pieces, fewer pieces not permitted; labeling:
1. Line 1: [L002](#), Column C.
 2. Line 2: “PER FLTS SCF BC” or “NEWS FLTS SCF BC,” as applicable.
- e. *Origin SCF* (required) and *entry SCF(s)* (optional), no minimum; labeling:
1. Line 1: [L002](#), Column C.
 2. Line 2: “PER FLTS SCF BC” or “NEWS FLTS SCF BC,” as applicable.
- f. *ADC*, required at 24 pieces, fewer pieces not permitted; labeling:
1. Line 1: [L004](#), Column B.
 2. Line 2: “PER FLTS ADC BC” or “NEWS FLTS ADC BC,” as applicable.
- g. *Origin mixed ADC*, required, no minimum; for any remaining pieces for destinations in [L201](#), Column B, corresponding to the origin ZIP Code in Column A; labeling:
1. Line 1: Use [L201](#), Column C.
 2. Line 2: “PER FLTS WKG W FCM” or “NEWS FLTS WKG W FCM,” as applicable.
- h. *Mixed ADC* (required), no minimum; labeling:
1. Line 1: Use [L009](#), Column B.
 2. Line 2: “PER FLTS BC WKG” or “NEWS FLTS BC WKG,” as applicable.

25.5 Optional Tray Preparation — Flat-Size Barcoded Pieces

As an option, mailers may place in flats trays (see 20.4) machinable pieces prepared under [301.3.0](#) that would normally be placed in sacks. Mailers must either bundle or group together all pieces for each 5-digit scheme, 5-digit, 3-digit scheme, 3-digit, SCF, and ADC destination. Bundling is not permitted unless it achieves a finer presort than the presort destination of the tray. The trays are subject to a container charge, and any bundles are subject to a bundle charge. Tray preparation, sequence, and labeling:

- a. *5-digit scheme* (required), 24-piece minimum, labeling:
 1. Line 1: [L007](#), Column B.

707.26.1

2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “5D SCH BC.”
- b. *5-digit* (required), 24-piece minimum, labeling:
 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [708.6.1.2](#) for overseas military mail).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “5D BC.”
- c. *3-digit* (required), 24-piece minimum, labeling:
 1. Line 1: [L002](#), Column A.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “3D BC.”
- d. *SCF* (required), 24-piece minimum, labeling:
 1. Line 1: [L002](#), Column C.
 2. Line 2: “PER” “NEWS” as applicable; followed by “FLTS”; followed by “SCF BC.”
- e. *Origin SCF* (required) and *entry SCF(s)* (optional), no minimum, labeling:
 1. Line 1: [L002](#), Column C.
 2. Line 2: “PER” “NEWS” as applicable; followed by “FLTS”; followed by “SCF BC.”
- f. *ADC* (required), 24-piece minimum, no overflow tray allowed, labeling:
 1. Line 1: use [L004](#), Column B.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “ADC”; followed by “BC.”
- g. *Origin mixed ADC* (required), no minimum, for any remaining pieces for destinations in [L201](#), Column B, of the origin ZIP Code in Column A, labeling:
 1. Line 1: Use [L201](#), Column C.
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “WKG W FCM.”
- h. *Mixed ADC* (required), no minimum, labeling:
 1. Line 1: Use [L009](#).
 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS”; followed by “BC WKG.”

26.0 Physical Criteria for Nonmachinable Flat-Size Periodicals

26.1 General

Prepare barcoded flat-size pieces according to [25.0](#) above. Pieces may meet the physical criteria in [26.0](#) or in [301.3.0](#), but mailers cannot combine these two types of flat-size pieces in the same bundle.

26.2 Weight and Size

The maximum weight for each piece is 4.4 pounds. The following minimum and maximum dimensions apply (determine length and height according to [301.1.2](#)):

- a. Minimum height is 5 inches. Maximum height is 12 inches.
- b. Minimum length is 6 inches. Maximum length is 15 inches.
- c. Minimum thickness is 0.009 inch. Maximum thickness is 1.25 inches.

26.3 Flexibility and Deflection

Pieces prepared under [26.0](#) are not subject to the standards for flexibility in [301.1.3](#) or the standards for deflection in [301.3.2.3](#).

26.4 Additional Criteria

Pieces must meet the standards for polywrap coverings in [301.3.3](#); protrusions and staples in [301.3.4](#); tabs, wafer seals, tape, and glue in [301.3.5](#); and uniform thickness and exterior format in [301.3.6](#).

27.0 Combining Multiple Editions or Publications**27.1 Description**

Mailers may prepare Periodicals publications as a combined mailing by merging copies or bundles of copies to achieve the finest presort level possible or to reduce the total Outside-County postage. Each publication in a combined mailing must be authorized (or pending authorization) to mail at Periodicals prices. Mailers may use the following methods:

- a. Mailers may comail individually addressed copies of different editions of a Periodicals publication (one title) or individually addressed copies of different Periodicals publications (more than one title) to obtain finer presort levels.
- b. Mailers may place two or more copies of different Periodicals publications (more than one title), and/or multiple editions of the same publication in the same mailing wrapper or firm bundle and present it as one addressed piece to a single addressee to reduce the per piece charge.
- c. Mailers may copalletize separately presorted bundles of different Periodicals titles and editions to achieve minimum pallet weights (see [705.8.7.3](#)). Mailers do not have to achieve the finest pallet presort level possible.

27.2 Authorization**27.2.1 Basic Standards**

Each mailer must be authorized to comail or copalletize mailings under [27.1a](#) and [27.1c](#) by Business Mailer Support (see [608.8.1](#) for address). Requests for authorization must show:

- a. The mailer's name and address.
- b. The mailing office.
- c. Procedures and quality control measures for the combined mailing.
- d. The expected date of the first mailing.

707.27.2.2

- e. A sample of the standardized documentation.

27.2.2 Denial

If the application is denied, the mailer or consolidator may reapply at a later date, or submit additional information needed to support the request.

27.2.3 Termination

An authorization may not exceed 2 years. Business Mailer Support may take action to terminate an authorization at any time, by written notice, if the mailer does not meet the standards.

27.3 Minimum Volume

The following minimum volume standards apply:

- a. For comailings prepared under [27.1a](#), multiple publications or editions are combined to meet the required minimum volume per bundle, sack, or tray for the price claimed.
- b. For combined mailings prepared under [27.1b](#), the minimum volume requirements in [22.0](#), [23.0](#), or [25.0](#) apply for the price claimed.
- c. For copalletized mailings prepared under [27.1c](#), the minimum volume requirements for pallets in [705.8.5.3](#) apply for the price claimed.

27.4 Labeling

Mailers must label all containers in a combined mailing as either "NEWS" (see [21.1.3](#)) or "PER" as follows:

- a. If at least 51% of the total number of copies in the combined mailing can qualify for "NEWS" treatment then all containers in the mailing are labeled "NEWS," unless the mailer chooses to use "PER."
- b. If less than 51% of the total number of copies in a combined mailing can qualify for "NEWS" treatment then all containers in the mailing are labeled "PER."

27.5 Documentation

Each mailing must be accompanied by documentation meeting the standards in [17.0](#), as well as any additional mailing information requested by the USPS to support the postage claimed (such as advertising percentage and weight per copy). The following additional standards apply:

- a. Presort documentation required under [708.1.0](#) must show the total number of addressed pieces and total number of copies for each publication and each edition in the combined mailing claimed at the carrier route, 5-digit, 3-digit, ADC, and mixed ADC prices. The mailer also must provide a list, by 3-digit ZIP Code prefix, of the number of addressed pieces for each publication and each edition claimed at any destination entry discount.
- b. Copalletized mailing documentation must consolidate and identify each title and version (or edition) in the mailing. Mailers may use codes in the summary heading to represent each title and version (or edition) presorted together on pallets. The documentation must include presort and pallet reports showing by title and version (or edition) how the bundles are presorted and where they will be entered.

27.6 Postage Statements

Mailers must prepare postage statements for a combined mailing as follows:

- a. Copy weight and advertising percentage determine whether separate postage statements are required for editions of the same publication:
 1. If the copy weight and advertising percentage for all editions of a publication are the same, mailers may report all the editions on the same postage statement or each edition on a separate postage statement.
 2. If the copy weight or the advertising percentage is different for each edition of a publication, mailers must report each edition on a separate postage statement.
- b. For a combined mailing prepared under [27.1a](#), mailers must prepare a separate postage statement that claims all applicable per piece, per pound, and bundle and container charges (if apportioned) for each publication or edition. The mailer must annotate on, or attach to, each postage statement, the title and issue date of each publication or edition and indicate that the pieces were prepared as part of a combined mailing under [27.1a](#).
- c. For mailings under [27.1b](#), mailers must prepare a separate postage statement claiming the applicable per pound charges for each publication or edition in the combined mailing except as provided in [27.2.5a](#). The mailer must annotate on, or attach to, each postage statement, the title and issue date of each publication or edition and indicate that the copies were prepared as part of a combined mailing under [27.1b](#). The per piece charges must be claimed as follows:
 1. If *all* copies in the combined mailing are eligible for the Classroom or Nonprofit discount, or if *all* copies are not eligible for the Classroom or Nonprofit discount, mailers may claim the per piece charges only on the postage statement for the publication that contains the highest amount of advertising.
 2. If a portion of the copies in the combined mailing are eligible for the Classroom or Nonprofit discount and a portion are not eligible, mailers may claim the per piece charges only on the postage statement for the publication that contains the highest amount of advertising and is not eligible for the Classroom or Nonprofit discount. The Classroom or Nonprofit per piece discount must not be claimed.
- d. For copalletized mailings under [27.1c](#), mailers must prepare a separate postage statement for each publication in the mailing. One consolidated postage statement and a register of mailings for each publication must accompany mailings consisting of different editions or versions of the same publication.

27.7 Postage Payment

Each mailing must meet the postage payment standards in [16.0](#). For copalletized mailings under [27.1c](#), mailers must pay postage at the Post Office serving the facility where consolidation takes place, except that postage for publications authorized under the Centralized Postage Payment (CPP) system may be paid to the Pricing and Classification Service Center (see [608.8.4.1](#) for address).

707.27.8

27.8 Deposit of Mail

Each publication in a combined mailing must be authorized (or pending authorization) for original entry or additional entry at the Post Office where the mailing is entered. For copalletized mailings under [27.1c](#), mailers must enter each mailing at the Post Office serving the facility where consolidation takes place.

28.0 Enter and Deposit**28.1 Service Objectives**

The USPS does not guarantee the delivery of Periodicals within a specified time. Publications authorized or pending authorization for Periodicals entry receive, where practicable, expeditious distribution, dispatch, transit handling, and delivery. Publications labeled "NEWS" receive newspaper treatment if published weekly or more often or if authorized such treatment as of March 1, 1984.

28.2 Basic Standards

Only a publisher or registered news agent authorized Periodicals mailing privileges may mail at the Periodicals prices. The First-Class Mail, Standard Mail, Parcel Select, or Package Services price must be paid on all copies mailed by the public or by a printer to a publisher. The publisher or news agent must present mailings at the Periodicals prices only:

- a. At Post Offices where original entry, additional entry, or exceptional dispatch is authorized.
- b. At the times and places designated by the postmaster of the office of mailing or by the AMC/AMF manager.

28.3 Exceptional Dispatch**28.3.1 General**

The postmaster of an entry Post Office may authorize a publisher to deliver copies of a time-sensitive Periodicals publication, at the publisher's own expense and risk, by exceptional dispatch from the Post Office of original or additional entry to other Post Offices.

28.3.2 Intended Use

The provision for exceptional dispatch is intended for short-haul local distribution (zones 1 and 2) of publications with total circulation of no more than 25,000 and is not to be used to circumvent additional entry standards. Applications for exceptional dispatch for publications with over 25,000 total circulation may be considered on a case-by-case basis for possible waiver of the 25,000-circulation limit.

28.3.3 Prohibited Use

Exceptional dispatch may not be used for publications authorized to be mailed under the Centralized Postage Payment System or under the plant-verified drop shipment postage payment system.

28.3.4 Destination Prices

Copies of Periodicals publications deposited under exceptional dispatch may be eligible for and claimed at the destination sectional center facility (DSCF) or destination delivery unit (DDU) prices if the applicable standards in 29.0 are met.

28.3.5 Applying for Exceptional Dispatch

The publisher must file an application for exceptional dispatch at the office of original or additional entry where the postage is paid on the copies to be transported. The application must fully explain the proposed exceptional dispatch and include information on the mode of transportation and approximate time of arrival and the number of pieces qualifying for and mailed at the various presort level discount prices. If the number of pieces qualifying for and mailed at such prices changes more than 2%, the publisher must file an amended application with the approving office. The application may be filed jointly with applications for original entry, reentry, or special prices, or filed separately. No form is provided for this application.

28.3.6 Decision on Application

The postmaster who received the application approves it if the requested exceptional dispatch improves service and does not add to USPS costs.

28.3.7 Appeal

Denial of an application for exceptional dispatch may be appealed to the PCSC. The PCSC manager issues the final decision.

28.4 Deposit at AMC/AMF**28.4.1 General**

Periodicals publications air freighted to an AMC/AMF must have either an original or additional entry authorization at the verifying office (i.e., the Post Office where those copies are presented for postal verification) and must be presented to an AMC/AMF under the PVDS program. Postage must be paid at the verifying office unless the publication is authorized under the Centralized Postage Payment program.

28.4.2 Applying for AMF Deposit

Authorization to enter airfreighted copies of a Periodicals publication at an AMF is obtained by filing an additional entry application. The distribution plan on Form 3510 must show the AMF as the entry point rather than the administering office (i.e., the Post Office responsible for the AMF). A publisher using plant-verified drop shipment must submit a copy of the distribution plan for the airfreighted copies to the administering office postmaster.

28.4.3 Fee

The required additional entry fee is not due if:

- a. Form 3510 is submitted with either an initial application for Periodicals mailing privileges or an application for reentry at a new original entry office, and the AMF is under the jurisdiction of that original entry office.
- b. The verifying office is already an authorized original or additional entry for the publication.

28.4.4 Publisher Responsibilities

For each mailing to be presented at the AMF, the publisher or agent is required:

707.28.4.5

- a. To provide the administering office postmaster with a delivery schedule (including the publication title, volume, air carrier, flight number, and arrival schedule) before the first mailing under the authorization. A revised schedule must be provided when there are changes.
- b. To arrange for delivery of the airfreighted copies of the publication to the AMC/AMF “back dock” or other area designated by the AMC/AMF manager.
- c. To arrange for payment of postage and submission of required postage statements and documentation with the copies of the publication to the verifying Post Office.
- d. To notify the designated AMF contact person when there are deviations from established transportation and delivery schedules.
- e. To ensure that Form 8125 accompanies each shipment. The total number of airline cargo containers must be annotated on the form in the comment section. Each airline cargo container must be sequentially numbered (for example, “1 of 4,” “2 of 4,” and so on), and a copy of Form 8125 must be affixed to each airline cargo container.
- f. To provide a list, at least once a year, of publications entered at the AMC/AMF and a 24-hour contact number to the AMC/AMF manager.
- g. To follow procedures outlined in Network Operation Management’s standard operating procedures (SOP). The procedures are available from the AMC/AMF manager.

28.4.5 Nonconforming Mailers

When a Periodicals mailing presented to an AMC/AMF fails to meet the procedures outlined in Network Operation Management’s SOP or fails to meet either the basic mail preparation standards or the PVDS entry integrity and safety standards, the USPS will inform the mailer, or the mailer’s agent, who presented the mailing. If, after the initial notification, the mailer continues to fail to meet the standards, the mailer is considered nonconforming. If a mailer is found to be nonconforming, its authorization to enter mail at an AMC/AMF may be revoked.

29.0 Destination Entry**29.1 Basic Standards****29.1.1 Price Application**

Periodicals may qualify for destination entry prices under [29.3](#) through [29.5](#). The following standards apply:

- a. An individual bundle, tray, sack, or pallet may contain pieces claimed at different destination entry pound prices.
- b. In-County carrier route price addressed pieces may qualify for the DDU discount under [29.5](#).
- c. The advertising and nonadvertising portions may be eligible for DADC, DSCF, or DDU pound prices based on the entry facility and the address on the piece.

29.1.2 Documentation

Subject to [708.1.0](#), the mailer must be able to show compliance with eligibility requirements (by bundle, tray, sack, or pallet), and list the number of addressed pieces by presort level for each 5-digit and 3-digit ZIP Code destination as appropriate for the prices and discounts claimed. Documentation is not required if each addressed piece in the mailing is of identical weight and pieces are separated by zone, price, and destination entry (if applicable) when presented for mailing.

29.2 Destination Bulk Mail Center**29.2.1 Definition**

For this standard, destination bulk mail center (DBMC) includes the facilities in [Exhibit 346.3.1](#), or a USPS-designated facility.

29.2.2 Price Eligibility

DBMC container prices apply as follows:

- a. Pieces must be prepared in bundles on ADC or more finely presorted pallets or in sacks or trays on ADC or more finely presorted pallets under [705.8.0](#).
- b. Mailers may claim a DBMC container price if the facility ZIP Code (as shown on Line 1 of the corresponding container label) is within the service area of the BMC or ASF at which the container is deposited, as shown in [Exhibit 346.3.1](#).

29.3 Destination Area Distribution Center**29.3.1 Definition**

For this standard, destination area distribution center (DADC) includes the facilities listed in [L004](#), or a USPS-designated facility.

29.3.2 Price Eligibility

Determine price eligibility as follows:

- a. Pound Prices. Outside-County pieces are eligible for DADC pound prices when placed on an ADC or more finely presorted container, deposited at an ADC (or USPS-designated facility), and addressed for delivery to one of the 3-digit ZIP Codes served by the facility where deposited. Automation pieces in AADC trays placed on optional SCF pallets under [705.8.10.1](#) are eligible for DADC prices when the 3-digit ZIP Code on the tray label is within that SCF's service area according to [L005](#).
- b. Container Prices. Mailers may claim a DADC container price for ADC and more finely presorted containers that are entered at and destined within the service area of the ADC at which the container is deposited.

29.4 Destination Sectional Center Facility**29.4.1 Definition**

For this standard, destination sectional center facility (DSCF) includes the facilities listed in [L005](#) and [L006](#), or a USPS-designated facility.

29.4.2 Price Eligibility

Determine price eligibility as follows:

707.29.5

- a. Pound Prices. Outside-County pieces are eligible for DSCF pound prices when placed on an SCF or more finely presorted container, deposited at an SCF (or USPS-designated facility), and addressed for delivery to one of the 3-digit ZIP Codes served by the facility where deposited. Nonletter-size pieces are also eligible when the mailer deposits 5-digit bundles at the destination delivery unit (DDU) (the facility where the carrier cases mail for delivery to the addresses on the pieces) and the 5-digit bundles are in or on the following types of containers:
 1. A merged 5-digit scheme or merged 5-digit sack.
 2. A merged 5-digit scheme, merged 5-digit, or 5-digit scheme pallet.
- b. Container Prices. Mailers may claim a DSCF container price for SCF and more finely presorted containers that are entered at and destined within the service area of the SCF at which the container is deposited.

29.5 Destination Delivery Unit

29.5.1 Definition

For this standard, the destination delivery unit (DDU) is the facility where the carrier cases mail for delivery to the addresses on the pieces in the mailing.

29.5.2 Price Eligibility

Determine price eligibility as follows:

- a. Piece Prices. In-County pieces are eligible for a per piece discount off the addressed piece price.
- b. Pound Prices. Carrier route pieces (In-County and Outside-County) are eligible for DDU pound prices when deposited at the facility where the carrier serving the delivery address on the mail is located.
- c. Container Prices. Outside-County mailers may claim a DDU container price for 5-digit scheme and more finely presorted containers that are entered at and destined within the service area of the DDU at which the container is deposited.

29.5.3 Maximum Volume

The same mailer may not present for deposit more than four DDU price mailings at the same delivery unit (or another acting as its agent) in any 24-hour period. This limit may be waived if local conditions permit. A mailer may ask for such a waiver when scheduling deposit of the mailings. There is no maximum for plant-verified drop shipments made under [705.15.0](#). This standard does not apply to mailings presented to the publication's authorized original entry, or additional entry, serving the place where the pieces were prepared for mailing, if that entry Post Office is also the facility at which the DDU price pieces must be deposited.

29.5.4 Deposit Schedule

The mailer may schedule deposit of DDU price mailings at least 24 hours in advance by contacting the district office in whose service area the destination facility is located. The mailer must follow the scheduled deposit time provided. The mailer may request standing appointments for renewable 6-month periods by written application to the district office in whose service area the destination facility is located. Mixed loads of Periodicals and Standard Mail or Package Services mail

require advance appointments for deposit. For mail entered under exceptional dispatch, the application for exceptional dispatch required under [28.3](#) also serves as a request for standing appointments.

29.5.5 Vehicle Unloading

At delivery units, drivers must unload all mail within 1 hour of arrival. Unloading procedures are as follows:

- a. If pallets or pallet boxes are stacked, drivers must unload, unstrap, and unstack them.
- b. When drivers unload containerized mail, delivery unit employees may require drivers to place the containers together by 5-digit ZIP Codes or 5-digit schemes.
- c. When mail is not containerized or on pallets, drivers must place the mail into containers as delivery unit employees specify. Delivery unit employees may require drivers to place mail into containers to separate mail by 5-digit ZIP Codes or 5-digit schemes.
- d. At facilities that cannot handle pallets, drivers must unload any palletized mail from the pallets and place the mail into containers as delivery unit employees specify.
- e. For scheduled arrivals at DDUs when USPS employees are not present, drivers must place the mail in a secure location protected from the weather.

30.0 Additional Entry

30.1 Basic Standards

30.1.1 Definition

The term “additional entry office” refers to a Post Office where a publisher is authorized by the USPS to present copies of a Periodicals publication for postal verification. An additional entry authorization must be in effect for each Post Office where copies of the Periodicals publications are presented for postal verification. The publisher must deposit money and file postage statements for copies presented at an additional entry office unless the USPS authorizes an alternative postage payment method (such as Centralized Postage Payment (CPP) System under [16.0](#) and [17.0](#)). Except for publications authorized an alternative payment method, the verification Post Office is also the office where Periodicals postage is paid.

30.1.2 Facility

The additional entry office must be a Post Office.

30.1.3 Restrictions

An additional entry may be authorized only at a Post Office where transportation and mail processing resources are adequate. The USPS does not authorize an additional entry if the publisher’s requested effective date would cause the USPS additional transportation costs in serving the affected entry office.

707.30.1.4

30.1.4 Same County

Additional entries may be authorized in the same county as the office of original entry. If the publication is eligible for In-County prices, the publisher must provide the original entry office postmaster with a duplicate of all postage statements on which those prices are claimed.

30.1.5 Distribution Plan

The publisher must establish a distribution plan for each additional entry to detail the volume and ZIP Code ranges to be presented. Revisions to a distribution plan must account for copies for any additional entry being modified or canceled. When applicable, the publisher must specify how the distribution plan is to vary during the year (such as periodic fluctuations or transfers of volume or mailing activity). Separate distribution plans are required if there are differences in the distribution of regular issues, special issues, or back issues.

30.2 Authorization**30.2.1 Filing**

The publisher is responsible for timely filing of all forms and supporting documentation to establish, modify, or cancel an additional entry. Under the standards for combining mailings on pallets in [27.0](#), consolidators may apply for additional entry authorizations on behalf of publishers at the Post Office serving the consolidator's facility.

30.2.2 Method

To establish or cancel an additional entry for the scheduled presentation of regular, special, or back issues or for unscheduled contingency use, the publisher must submit two copies of Form 3510 marked "Pending" to the postmaster of the original entry Post Office. A publisher authorized to mail under the Centralized Postage Payment (CPP) System has additional filing requirements.

30.2.3 Documentation

Two copies of the most recent issue of the publication must accompany the application. If applicable, these copies must either contain an amended identification statement or show how it is to be amended in a specific future issue.

30.2.4 Modifying Distribution

The publisher must file Form 3510 and pay the required fee to modify a distribution plan and cancel additional entry points no longer used.

30.2.5 Concurrent Application

The publisher may *concurrently* apply for:

- a. Original entry and additional entry, although separate forms and fees are required for each.
- b. Establishment, modification, and/or cancellation of more than one additional entry, by filing a single Form 3510 and paying a single fee, if all required information is supplied for each entry, and the effective dates for the additional entry actions cover no more than 30 calendar days.

30.2.6 Separate Application

The publisher must submit a *separate* Form 3510 (with the applicable fee) for:

- a. Each additional entry action that cannot meet the standards of [30.2.5](#).
- b. Each reentry request.
- c. Any modification to the publication's distribution plan other than frequency of issuance or location of original entry.

30.2.7 Fee

The required additional entry fee must accompany an application for additional entry. One fee is charged regardless of the number of additional entries established. No additional fee is charged if the same Form 3510 is used to close or modify other additional entries, subject to the conditions stated above. The required reentry fee must accompany a Form 3510 that modifies or closes an additional entry. Only one fee is charged if the same Form 3510 is used to close or modify more than one additional entry, subject to the conditions stated above.

30.2.8 Submission Date

Timely adjustment of transportation without penalty to the USPS requires the publisher to submit requests for establishing, modifying, or canceling an additional entry at least 30 days before the requested effective date. A publisher authorized to mail under the Centralized Postage Payment (CPP) System has additional filing requirements.

30.2.9 Additional Information

The USPS reserves the right to ask for more information about the application. The publisher's failure to provide such information is sufficient grounds to deny the application.

30.2.10 Denial and Appeal

Except for pending publications, the manager of the PCSC rules on all applications requesting additional entry. If the application is denied, the denial takes effect 15 days from the publisher's receipt of the notice unless, within that time, the publisher files an appeal, through the PCSC, with the manager of Mailing Standards (see [608.8.0](#) for address), who issues the final agency decision.

30.3 Use of Additional Entry

30.3.1 Effective Date

Subject to the restrictions detailed above, the effective date for use of an additional entry authorization is that requested by the publisher. However, the USPS may defer that date until transportation or other resources are in place to support the action requested. If the deferral is due to contractual limitations, the publisher's requested effective date may be approved if the publisher agrees to reimburse the USPS for any cost for modifying or canceling contracted transportation.

30.3.2 Unauthorized Entry

An additional entry may not be used until authorized by the USPS. A publisher may not pay postage at another price to present copies at an unauthorized additional entry.

30.3.3 Annual Use

Copies of a Periodicals publication must be presented at each additional entry (including contingency entries) at least once each calendar year.

707.30.3.4

30.3.4 Distribution Plan

Once an entry and its distribution plan are authorized, the publisher must ensure that copies are presented accordingly or as provided in [30.4, Modification](#), for limited temporary changes. Additional entry offices may not accept copies not included in the publisher's authorized distribution plan.

30.3.5 Mixed Loads

Advance appointments for deposit must be made for mixed loads of Periodicals and Standard Mail, handled operationally as Standard Mail.

30.3.6 Postage

Postage must be prepaid and available for all copies presented for verification at an additional entry office before their release.

30.4 Modification**30.4.1 Permanent Change**

Except as provided below, the publisher may modify the use of an authorized entry Post Office only after submitting Form 3510 and receiving USPS approval.

30.4.2 Temporary Change

When a limited, temporary change affects only the distribution plans of two existing authorized entry Post Offices for one specific issue of a publication, the publisher must submit a letter detailing the specific issue, the dates and duration of mailing of the issue, the entry offices, and the volume and distribution area (ZIP Codes) affected by the modification. The postmaster of the original entry and additional entry offices affected for the issue of the publication involved and all distribution networks offices involved must receive the request at least 10 calendar days before the effective date of the change. See [30.3.1](#) above.

30.4.3 Misuse

Limited temporary changes must not be used instead of permanent alterations to authorized distribution plans.

30.5 Cancellation, Revocation, and Restoration**30.5.1 Cancellation**

When a distribution plan modification results in nonuse of an additional entry, that entry must be canceled as part of the additional entry action. If a publisher fails to file Form 3510 to cancel an authorized additional entry, the PCSC manager cancels the additional entry upon notification by the additional entry postmaster that no mailings have been made for an entire calendar year.

30.5.2 Revocation

The USPS may revoke an additional entry authorization when the publication is found ineligible for such authorization. The revocation takes effect 15 days after the publisher receives notice, unless an appeal is filed through the PCSC with the manager of Mailing Standards (see [608.8.0](#) for address), who issues the final agency decision.

30.5.3 Restoration

To restore an additional entry authorization previously canceled or revoked, the publisher must submit Form 3510 and pay the required fee.

708 Technical Specifications

Overview

- 1.0 Standardized Documentation for First-Class Mail, Periodicals, Standard Mail, and Flat-Size Bound Printed Matter
- 2.0 Presort Accuracy Validation and Evaluation (PAVE)
- 3.0 Coding Accuracy Support System (CASS)
- 4.0 Standards for POSTNET and Intelligent Mail Barcodes
- 5.0 Standards for Postal Routing Barcodes
- 6.0 Barcoding Standards for Container Labels
- 7.0 Optional Endorsement Lines (OELs)
- 8.0 Carrier Route Information Lines
- 9.0 Facing Identification Mark (FIM)
- 10.0 Postal Zones

1.0 Standardized Documentation for First-Class Mail, Periodicals, Standard Mail, and Flat-Size Bound Printed Matter

1.1 Basic Standards

For First-Class Mail, Periodicals, Standard Mail, and flat-size Bound Printed Matter, documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and price claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the elements described in 1.2 through 1.8, as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation.

1.2 Format and Content

For First-Class Mail, Periodicals, Standard Mail, and flat-size Bound Printed Matter, standardized documentation includes:

- a. A heading identifying the listing as a “USPS Qualification Report” appearing at the top of each page. The heading must contain these elements:
 1. For First-Class Mail and Standard Mail, the name of the mailer and the mailing, a mailing identification code corresponding to the postage statement, the date (e.g., the date when the list was processed or the documentation was produced), the class of mail, and either the DMM standard under which the mail was prepared (e.g., 245.5.0 for letters, 345.5.0 for flats, and 445.5.0 for parcels or 234.4.0 and 235.6.0 for First-Class Mail Letters, and 244.4.0 and 245.7.0 for Standard Mail Letters) or the type of prices claimed.
 2. For Periodicals, each publication title and publication number corresponding to the postage statement and entry office, the date (e.g., the date when the list was processed or the documentation was

708.1.2

produced), the class of mail, and either the DMM standard under which the mail was prepared (e.g., [707.22.0, Preparing Nonbarcoded \(Presorted\) Periodicals](#), [707.23.0, Preparing Carrier Route Periodicals](#), or [707.24.0, Preparing Letter-Size Barcoded \(Automation\) Periodicals](#)) or the type of prices claimed. For publications that are combined or copalletized and represented on the same documentation, all publication titles and publication numbers are required to be listed in the header only on the first page.

- b. Sequential page numbers in the body of the listing.
- c. For mail in trays or sacks, the body of the listing reporting these required elements:
 1. Tray/sack sortation level. Mailers must note with an asterisk (“**”) all trays containing overflow mail moved into that tray under [235.6.6](#) and [245.7.5](#).
 2. Tray/sack destination ZIP Code (use destination on top line of tray/sack label except that, for 3-digit carrier routes trays, list the individual 5-digit ZIP Codes contained in each tray).
 3. The number of pieces for each 5-digit ZIP Code in 5-digit/scheme bundles or trays; for each 3-digit ZIP Code in 3-digit/scheme bundles or trays; for each 3-digit/scheme in (A)ADC bundles or trays; for each (A)ADC in mixed (A)ADC bundles or trays (or, for Periodicals, origin mixed ADC trays). For automation-price mailings prepared under the reduced overflow option, the number of pieces in the next higher level tray in lieu of overflow trays. For ECR letters prepared under [245.6.0](#), the number of pieces in carrier routes within full trays. For automation and nonautomation mail, and ECR Standard Mail, the number of pieces in each bundle level and presort destination.
 4. Separate columns for each price reported in the mailing, with pieces reported in the appropriate column, and a running total of pieces mailed that is continuous for each mailing (group information either in ZIP Code order and by sortation level or by sortation level and within each sortation level, by ZIP Code; report trays and sacks on pallets by pallet level and destination; include all information required in [1.2c](#) for mail in trays or sacks). Pieces prepared in 5-digit scheme bundles (Periodicals, Standard Mail, and Bound Printed Matter flats) must be listed by individual 5-digit ZIP Code within the 5-digit scheme bundle. Pieces prepared in 3-digit scheme bundles (Periodicals, Standard Mail, and Bound Printed Matter flats) must be listed by individual 3-digit ZIP Code within the 3-digit scheme bundle. Pieces prepared as firm bundles (Periodicals) may be listed in a separate firm bundle column or in the appropriate column based on container level. Document SCF or BMC pallets created as a result of bundle reallocation under [705.8.11](#) or [705.8.13](#) on the USPS Qualification Report by designating the protected pallet with an identifier of “PSCF” (for an SCF pallet) or “PBMC” (for a BMC pallet). These identifiers are required only on the USPS Qualification Report; they are not required on pallet labels or on any other mailing documentation.
 5. A running total of pieces mailed that is continuous for each mailing.

6. The tray identification number and tray size (1-foot or 2-foot) if available for letter mail in trays. The tray identification number is optional for tray-based automation flats.
 7. Separate columns for each price reported in the mailing, with pieces reported in the appropriate column (group information either in ZIP Code order and by sortation level or by sortation level and within each sortation level, by ZIP Code).
 8. For all Periodicals mailings, include a separate "Zone" column. If all copies for a specific tray destination (automation letters only), group destination, or bundle destination are subject to the same zone price or entry discount, show the applicable zone or destination entry discount for those copies using the zone abbreviations in [1.6.3](#). If copies for a bundle destination or pieces for a tray destination (barcoded letters only) are for multiple zones, show all zones included (e.g., "3/4/6") or show "Mixed" (or the authorized abbreviation "M") in the "Zone" column.
 9. For Periodicals mailings that contain both In-County and Outside-County pieces, the body of the listing may include a separate "Container Charge" and "Bundle Charge" column. Indicate which trays, sacks, and bundles are subject to the container or bundle charges and a total or, optionally, a running total.
- d. For bundles on pallets, the body of the listing reporting these required elements:
1. Pallet sortation level.
 2. Pallet destination ZIP Code (use destination on top line of pallet label).
 3. For each bundle, the sortation level and number of pieces claimed at each price.
 4. Separate columns for each price reported in the mailing, with pieces reported in the appropriate column, and a running total of pieces mailed that is continuous for each mailing (group information either in ZIP Code order and by sortation level or by sortation level and within each sortation level, by ZIP Code; report trays and sacks on pallets by pallet level and destination; include all information required in [1.2c](#) for mail in trays or sacks). Pieces prepared as firm bundles (Periodicals) may be listed in a separate firm bundle column or in the appropriate column based on container level. Document SCF, ADC, or BMC pallets created as a result of bundle reallocation under [705.8.11](#), [705.8.12](#), or [705.8.13](#) on the USPS Qualification Report by designating the protected pallet with an identifier of "PSCF" (for an SCF pallet), "PADC" (for an ADC pallet), or "PBMC" (for a BMC pallet). These identifiers are required to appear only on the USPS Qualification Report; they are not required to appear on pallet labels or on any other mailing documentation.
 5. For mailings prepared as bundles on pallets under [705.12.0](#) and [705.13.0](#), a separate 5% threshold summary must appear beneath the pallet price summary for the last physical pallet of each logical merged 5-digit scheme pallet and logical merged 5-digit pallet as provided in [705.12.1](#), [705.12.2](#), [705.13.1](#), or [705.13.2](#), as applicable.

708.1.2

6. For all Periodicals mailings, include a separate "Zone" column. If all copies for a specific bundle destination are subject to the same zone price or entry discount, show the applicable zone or destination entry discount for those copies using the zone abbreviations in [707.17.6.3](#). If copies for a bundle destination are for multiple zones, show all zones included (e.g., "3/4/6") or show "Mixed" (or the authorized abbreviation "M") in the "Zone" column. Report foreign copies separately.
 7. For Periodicals mailings that contain both In-County and Outside-County pieces, the body of the listing may include a separate "Container Charge" and "Bundle Charge" column. Indicate which pallets and bundles are subject to the container or bundle charges and a total or, optionally, a running total.
 8. At the end of the listing, a summary report of the total number of pieces claimed at each postage price on the pallet by postage payment method, and the total number of pieces and the total weight of the mail on the pallet.
- e. At the end of the documentation, a summary report of the total number of pieces mailed at each postage price for each mailing reported on the listing by postage payment method (and by entry point for drop shipment mailings) and the total number of pieces in each mailing. This information must correspond to the information reported on the postage statement(s) for the pieces reported. For Periodicals mailings, documentation also must provide:
1. A summary of the total number of each type of bundle in the mailing and, optionally, the total bundle charge paid. Report only bundles subject to the Outside-County bundle price under [707.1.1.3](#).
 2. A summary of the total number of each type of container in the mailing and, optionally, the total container charge paid. Report only trays, sacks, and pallets subject to the Outside-County container prices under [707.1.1.4](#).
 3. For combined mailings, a summary by individual mailer of the number of each type of bundle and container in the mailing and, optionally, the bundle and container price paid. Report only bundles, trays, sacks, and pallets subject to the Outside-County bundle and container prices under [707.1.1.3](#) and [707.1.1.4](#).
 4. A summary of the total number of copies for each zone, including In-County, DDU, SCF, and ADC prices. A separate summary report is not required if a PAVE-certified postage statement facsimile generated by the presort software used to prepare the standardized documentation is presented for each mailing.

1.3 Price Level Column Headings

The actual name of the price level (or corresponding abbreviation) is used for column headings required by 1.2, *Format and Content*, and shown below:

a. Automation First-Class Mail, Standard Mail, and barcoded Periodicals:

PRICE	ABBREVIATION
5-Digit [First-Class Mail letters and flats, Periodicals letters and flats, and Standard Mail letters and flats]	5B
3-Digit [First-Class Mail letters and flats, Periodicals letters and flats, and Standard Mail letters and flats]	3B
AADC [First-Class Mail, Periodicals, and Standard Mail letters]	AB
ADC [First-Class Mail, Periodicals, and Standard Mail Flats]	AB
Mixed AADC [First-Class Mail, Periodicals, and Standard Mail letters]	MB
Mixed ADC [First-Class Mail, Periodicals, and Standard Mail flats]	MB
Basic [In-County Periodicals]	BB
Firm [Outside-County Periodicals]	FB

b. Presorted First-Class Mail, barcoded and nonbarcoded Periodicals flats, nonbarcoded Periodicals letters, and machinable and nonmachinable Standard Mail:

PRICE	ABBREVIATION
Presorted [First-Class Mail letters/cards, flats, and parcels]	Presort
5-Digit [First-Class Mail parcels, all Standard Mail, and Periodicals letters]	5D
3-Digit [First-Class Mail parcels, all Standard Mail and Periodicals letters]	3D
AADC [Standard Mail machinable letters]	AB
ADC [First-Class Mail parcels, Standard Mail nonmachinable letters, flats, irregular parcels and NFMs; and all Periodicals]	AD
Basic [In-County Periodicals]	BS
Mixed AADC [Standard Mail machinable letters]	MB
Mixed ADC [Standard Mail nonmachinable letters, flats, irregular parcels and NFMs; and all Periodicals]	MD
Mixed ADC [First-Class Mail parcels]	SP
BMC [Standard Mail machinable parcels and NFMs 6 ounces and over]	BMC
Mixed BMC [Standard Mail machinable parcels and NFMs 6 ounces and over]	MBMC
Firm [Outside-County Periodicals]	FB

c. Carrier Route Periodicals and Enhanced Carrier Route Standard Mail:

PRICE	ABBREVIATION
Saturation [letters, flats, and irregular parcels]	WS
High Density [letters, flats, and irregular parcels]	HD
Basic [letters, flats, and irregular parcels]	CR
Firm [Outside-County Periodicals]	FB

708.1.4

1.4 Sortation Level

The actual sortation level (or corresponding abbreviation) is used for the bundle, tray, sack, or pallet levels required by 1.2 and shown below:

SORTATION LEVEL	ABBREVIATION
Carrier Route	CRD
5-Digit Carrier Routes	CR5
5-Digit Scheme Carrier Routes [sacks and pallets, Periodicals flats and irregular parcels, Standard Mail flats]	CR5S
5-Digit Scheme [barcoded and machinable letters]	5DGS
5-Digit Scheme [pallets, Periodicals flats and irregular parcels, Standard Mail flats]	5DGS
Merged 5-Digit [sacks and pallets, Periodicals flats and irregular parcels, Standard Mail flats]	M5D
Merged 5-Digit Scheme [sacks and pallets, Periodicals flats and irregular parcels, Standard Mail flats]	M5DS
5-Digit	5DG
5-Digit Metro [pallets only, for Periodicals flats and irregular parcels, Standard Mail flats, and Bound Printed Matter flats]	MET
3-Digit Carrier Routes	CR3
3-Digit Scheme [barcoded letters, barcoded and cobundled flats]	3DGS
Merged 3-Digit [sacks, Periodicals flats and irregular parcels]	M3D
3-Digit	3DG
ADC	ADC
ADC [pallets created from bundle reallocation]	PADC
AADC	AADC
Mixed ADC	MADC
Origin Mixed ADC	OMX
Mixed AADC	MAAD
SCF [pallets, Periodicals flats, Bound Printed Matter]	SCF
SCF [pallets created from bundle reallocation]	PSCF
BMC	BMC
ASF	ASF
BMC [pallets created from bundle reallocation]	PBMC
Mixed BMC [working]	MBMC

1.5 Combined, Copalletized, and Merged Mailings

For combined or copalletized mailings of Periodicals and Standard Mail prepared under 705.8.0, 705.10.0, 705.12.0, or 705.13.0, the listing must show this additional information:

- a. For mailings that require a separate postage statement, a column that further identifies the contents of all trays/bundles by product or edition code. The applicable prices for each product or edition must be shown in the correct

“Price” column and must be summarized for each tray, sack, or pallet and for the entire mailing. For Periodicals, when copies of multiple editions or publications are combined in a firm bundle claimed as one piece, report “0” in the “Product/Edition Code” column for all but one edition or publication contained in the firm bundle, report “1” in the appropriate associated “Piece Price” column for that edition or publication, and report “0” in the “Piece Price” column for the other editions or publications contained in the firm bundle.

- b. For large-volume mailing jobs reported on a single listing, the mailer may provide abbreviated documentation that shows full bundle detail for the first 20 pallets/sacks and every twentieth pallet/sack after that if the mailer keeps full bundle detail (by product or edition code and price) for the entire mailing job for 90 days and can provide it to the USPS on request within 3 working days. Abbreviated documentation must include the price summary by product or edition for each pallet/sack, including those for which full detail bundle listings are not reported.

1.6 Detailed Zone Listing for Periodicals

1.6.1 Definition and Retention

The publisher must be able to present documentation to support the actual number of copies of each edition of an issue, by entry point, mailed to each zone, at DDU, DSCF, DADC, DBMC, and In-County prices. This listing is separate from the standardized documentation required under 1.0 to support presort. This listing may be submitted with each mailing, or, as an alternative, a publisher may keep records supporting zone and destination entry information reported on the postage statement for each mailing. Records must be kept for 2 months after the mailing date. A publisher must be able to submit detailed zone listings for specific mailings when requested in advance by the USPS.

1.6.2 Characteristics

Report the number of copies mailed to each 3-digit ZIP Code area at applicable zone prices using one of the following formats:

- a. Report copies by 3-digit ZIP Code, listed in ascending numeric order, for all ZIP Codes in the mailing. The listing must include the following columns: 3-digit ZIP Code, zone, and number of copies (for the zone). Include a summary of the number of copies at each zone price at the end of the report. A 3-digit ZIP Code may appear more than once if there are copies at different zone prices for that ZIP Code (e.g., In-County and outside-county price copies within the same 3-digit ZIP Code area).
- b. Report copies by zone (In-County DDU, In-County others, Outside-County DDU, Outside-County DSCF, and Outside-County DADC) and by 3-digit ZIP Code, listed in ascending numeric order, for each zone. For each zone, the listing must include the following columns: 3-digit ZIP Code and number of copies (for each zone) in the mailing. Include a summary of the total number of copies for each zone at the end of each zone listing. A 3-digit ZIP Code may appear under more than one zone if there are copies at different zone prices for that ZIP Code (e.g., In-County and outside-county price copies within the same 3-digit ZIP Code area).

708.1.6.3

1.6.3 Zone Abbreviations

Use the actual price name or the authorized zone abbreviation in the listings in [1.0](#) and [707.17.6.2](#):

ZONE ABBREVIATION	RATE EQUIVALENT
ICD	In-County, DDU
IC	In-County, Others
DDU	Outside-County, DDU
SCF	Outside-County, DSCF
ADC	Outside-County, DADC
1-2 or 1/2	zones 1 and 2
3, 4, 5, 6, 7, 8 (as applicable)	zones 3 through 8 (as applicable)
M	mixed zones

1.7 Bundle and Container Reports for Outside-County Periodicals Mail

A mailer must present documentation to support the actual number of bundles and containers of each edition of an issue as explained in [1.7.1](#) and [1.7.2](#) below.

1.7.1 Outside-County Bundle Report

The bundle report must contain, at a minimum, the following elements:

- a. Container identification number.
- b. Container type.
- c. Container presort level.
- d. Bundle ZIP Code.
- e. Bundle level.
- f. Price category.
- g. Number of copies by version in the bundle.
- h. An indicator showing which bundles are subject to the bundle charge.

1.7.2 Outside-County Container Report

The container report must contain, at a minimum, the following elements:

- a. Container identification number.
- b. Container type.
- c. Container level.
- d. Container entry level (origin, DDU, DSCF, DADC, or DBMC).
- e. An indicator showing which containers are subject to the container charge.

1.8 Optional Information

Standardized documentation may include additional information about the pieces mailed (such as individual tray or sack total piece counts, optional identification codes, bundle weights) if this information does not conflict with the information required under [1.2](#) through [1.7](#).

2.0 Presort Accuracy Validation and Evaluation (PAVE)

2.1 Presort Accuracy Validation and Evaluation (PAVE)

2.1.1 Basic Information

The Presort Accuracy Validation and Evaluation (PAVE) program is a process to evaluate presort software and determine its accuracy in sorting address files under DMM standards. PAVE is available only to software and hardware manufacturers (i.e., companies that develop presort software or manufacture presorting equipment). PAVE certification does not guarantee acceptance of customer mail prepared with PAVE-validated hardware/software.

2.1.2 Process

PAVE evaluates the accuracy of presort products by providing test address files to vendors. Vendors process the test file(s) through their presort software or hardware and return the resulting postage statement facsimile(s) and other presort documentation to the USPS National Customer Support Center (NCSC) for evaluation of the answers. Each test file is evaluated for its accuracy of presort, compliance with current DMM standards, accuracy of sack/tray/pallet tag labels, and general acceptability of computer-generated facsimiles of postage statements and other presort documentation. If the answers are accurate, the vendor's presort product is validated for a 12-month period or until the end of the current annual period.

2.1.3 Participation

For information on participation in PAVE, presort product developers may request the *PAVE Program Technical Guide* from the NCSC by calling 1-800-238-3150. Participants may use the PAVE form included in that guide to order PAVE test files.

3.0 Coding Accuracy Support System (CASS)

3.1 Basic Information

3.1.1 Purpose

The Coding Accuracy Support System (CASS) improves the accuracy of delivery point codes, ZIP+4 codes, 5-digit ZIP Codes, and carrier route codes on mailpieces. CASS provides a common platform to measure the quality of address matching software and to diagnose and correct software problems.

3.1.2 Requirement

Any mailing claimed at an automation price must be produced from address lists properly matched and coded with CASS-certified address matching methods listed below. A mailer using multiline optical character readers (MLOCRs) to print delivery point barcodes on mailpieces (or for flats, ZIP+4 barcodes) must also obtain CASS certification (including Multiline Accuracy Support System (MASS)) for the address matching software used on the MLOCRs.

3.1.3 Methods

Delivery point or ZIP+4 coding may be obtained by using the CASS-certified DPC address matching software with components DPV and LACS^{Link}; CASS-certified Z4CHANGE process; CASS-certified DirectDPV process; NCOA^{Link}; or DSF² process.

3.2 Software Certification**3.2.1 General**

Any user of address matching software that applies ZIP+4 codes to address lists to obtain an automation price must use address matching software that is CASS-certified. Address matching software used to ZIP+4 code address records must, as part of its process, return a standardized address to ensure that the ZIP+4 code or mailer-applied barcode represents the proper depth of code available. The original input address submitted for coding may also be returned. The CASS-certified address matching software must be used according to specific parameter settings (configurations) as described below.

3.2.2 Software Configuration

All address lists used to produce mailings for automation prices must be matched and ZIP+4 coded with current CASS-certified software in line with the configuration standards shown below. Summary output reports or computer-generated facsimile Forms 3553 must contain information about the configuration used when processing the address list on the CASS-certified address matching software.

3.2.3 Permissible Configurations

These are permissible configurations for address matching software:

- a. Vendor-Supplied Software With Vendor CASS-certified Software Configurations. The software vendor is CASS-certified for specific configurations. The user is using that software as prescribed by the vendor and with the CASS-certified configurations obtained by the vendor.
- b. Vendor-Supplied Software With User CASS-certified Software Configurations. The software user is using vendor-supplied software in a configuration not CASS-certified by the vendor but by the user.
- c. User-Developed Software for Which User Obtained CASS Certification. The software user obtained individual user CASS certification for self-developed software and is using it as certified.

3.2.4 Use

When used for ZIP+4 or delivery point barcoding, the address matching software and coding methods must have a valid CASS certification and use the current USPS ZIP+4 Product updated to include all applicable change transaction files.

3.3 Date of Address Matching and Coding**3.3.1 Update Standards**

Unless Z4CHANGE or DirectDPV is used, all automation and carrier route mailings bearing addresses coded by any AIS product must be coded with current CASS-certified software and the current USPS database. Coding must be done within 90 days before the mailing date for all carrier route mailings and within

180 days before the mailing date for all non-carrier route automation price mailings. All AIS products may be used immediately on release. New product releases must be included in address matching systems no later than 45 days after the release date. The overlap in dates for product use allows mailers adequate time to install the new data files and test their systems. Mailers are expected to update their systems with the latest data files as soon as practicable and need not wait until the “last permissible use” date. The mailer’s signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. The “current USPS database” product cycle is defined by the following table.

FILE RELEASE <i>Use of file released on...</i>	REQUIRED USE <i>Must begin no later than...</i>	LAST PERMISSIBLE USE <i>And must end no later than...</i>
February 15	April 1	May 31
April 15	June 1	July 31
June 15	August 1	September 30
August 15	October 1	November 30
October 15	December 1	January 31
December 15	February 1	March 31

3.3.2 Z4CHANGE List Matching

When using Z4CHANGE to match and code address lists for automation price mailings:

- a. The entire address list must first be matched and ZIP+4 coded with current CASS-certified software and the current USPS ZIP+4 Product.
- b. Every 60 days after the first matching, the address list must be processed through Z4CHANGE using USPS-certified software to identify changed records since the last update.
- c. The changed records identified through the Z4CHANGE processing must then be matched and coded using current CASS-certified address matching software and the current ZIP+4 Product.
- d. The entire address list must be rematched and ZIP+4 coded every 3 years using current CASS-certified software and the current USPS ZIP+4 Product.

3.3.3 DirectDPV List Matching

When using DirectDPV to match and code address lists for automation price mailings:

- a. The entire address list must first be matched and ZIP+4 coded with Cycle L (or later) CASS-certified software and the current USPS ZIP+4 product.
- b. Every 180 days after the initial matching, the address list must be processed through DirectDPV using Cycle L (or later) CASS-certified address matching software to identify changed records since the last update.
- c. If an address record was previously ZIP+4 coded and that ZIP+4 code is not in DirectDPV, it does not need to be run through CASS-certified address matching software until the annual run. Address records identified as changed through DirectDPV that have a valid converted 11-digit record require additional

708.3.4

processing. These records can either be reconstructed using the 11-digit code provided or reprocessed through CASS-certified software. Address records identified as changed through DirectDPV that have a zero 11-digit code must then be matched and coded using Cycle L (or later) CASS-certified address matching software and the current USPS ZIP+4 product.

- d. The entire address list must be processed once a year using current CASS-certified address matching software and the current USPS ZIP+4 product.

3.4 Definitions—Mailing and Address Lists

For this section, *mailing list* or *address list* is the group of names and addresses to which mailpieces in the corresponding mailing are addressed. Whether the addresses used in a mailing are obtained from a single list or from two or more lists (whole lists or extracts of those lists), each list used to produce a mailing claimed at an automation price must meet the standards in [3.0](#).

3.5 Documentation

3.5.1 Form 3553

Unless excepted by standard, the mailer must complete a Form 3553 for each mailing claimed at all automation prices and all carrier route prices. A computer-generated facsimile may be used if it contains the required data elements in a format similar to the USPS form. The data recorded on Form 3553 must refer only to the address list used to produce the mailing with which it is presented. The postage statement must be annotated in the block(s) provided to reflect the date when address matching and coding were performed. When a mailing is produced using multiple lists, the mailer must show the earliest (oldest) date of address matching and coding (shown on Form 3553, section B2). The mailer certifies compliance with this standard when signing the corresponding postage statement.

3.5.2 Retention Period

Form 3553 and other documentation must be retained by the mailer or the mailer's agent for 1 year from the date of mailing and be made available to the USPS on 24-hour notice.

3.5.3 Using Output Information

The data recorded on Form 3553 is taken from the summary output report generated by the computer process by which address lists are matched and ZIP+4 coded using CASS-certified software. The summary output information may also be generated as a facsimile Form 3553. Form 3553 may show summary output information for a single address list or consolidate summary output information from multiple address lists combined to produce a single mailing. Figures on Form 3553 are not required to match total mailpiece figures on the corresponding postage statement.

3.5.4 Providing Required Data

Summary output reports or computer-generated Forms 3553 must contain this information:

- a. CASS-certified company name as it appears on the CASS certificate; name and software version that received CASS certification; and the software configuration used when processing the address list.
- b. Name of the list processor using the CASS-certified software to match and code the address list, the date the address list was processed, the date of the USPS database used to code the address list, the address list name or identification number, the total number of address records on the list submitted for coding, the total number of address records successfully coded to the appropriate depth of code, and the valid dates for the records successfully coded.

3.5.5 Using a Single List

When a mailing is produced using all or part of a single address list, the mailer must retain one Form 3553 and other required documentation reflecting the summary output information for the entire list, as obtained when the list was coded. When the same address list is used for other mailings within 180 days of the date it was matched and coded, a copy of the Form 3553 must be retained with the documentation for each mailing.

3.5.6 Using Multiple Lists

When a mailing is produced using multiple address lists, the mailer must retain a consolidated Form 3553 summarizing the individual summary output and/or facsimile Forms 3553 for each list used (and other required documentation). As an alternative, the mailer may combine the addresses selected from the multiple lists into a single new list, reprocess the addresses using CASS-certified address matching software, and retain one Form 3553 for the summary output generated by that process.

3.5.7 Using CASS Certificate

If the name of the CASS-certified company entered on Form 3553 does not appear on the list published by the USPS, a copy of the CASS certificate for the software used also must be retained by the mailer with the documentation.

3.6 CASS Certification

3.6.1 Testing Arrangements

To obtain information on standards and arrange for testing of carrier route, ZIP+4, or delivery point address matching software, contact the National Customer Support Center by calling 1-800-238-3150, or by writing to the CASS Certification Department, National Customer Support Center (see [608.8.0](#) for address).

3.6.2 CASS Stage I

The CASS certification process is a two-stage procedure. Stage I is a test file with answers supplied on request to customers wanting to certify an address matching software product. The Stage I file contains fabricated sample addresses from address ranges across the country with missing or incorrect address elements. The correct answers supplied on this Stage I test file allow self-assessment of address matching software/hardware accuracy so that software/hardware vendors or users can predetermine product readiness for the actual test.

3.6.3 CASS Stage II

The Stage II file is the actual test without answers. This test measures the accuracy of address matching software/hardware. Similar to the Stage I file, the Stage II file contains fabricated sample addresses from address ranges across the country with missing or incorrect address elements that the address matching software must correct. Software vendors or users process the Stage II file against their address matching products, appending the correct or missing information in each address record. After completing the test, the vendor or user returns the Stage II file to the USPS for analysis, scoring, and, if qualified, certification. For multiline optical character readers (MLOCs) and encoding stations, CASS certification is obtained by barcoding sample mailpieces in a test deck. After completing the test, the vendor or user returns the test deck to the USPS for analysis, scoring, and, if qualified, certification.

3.6.4 Certification Standards

To be CASS-certified:

- a. Delivery point code address matching software/hardware must correctly ZIP+4 code the addresses in the Stage II file or test deck with an accuracy rate determined by the CASS Certification Department and must correctly append the additional two digits of the delivery point code (plus a check digit) to the Stage II file or test deck with 100% accuracy.
- b. A 2-digit utility (separate or stand-alone address matching software that appends only the correct 2-digit DP9019C information) must use the standardized address information returned by DPC address matching software when determining the correct delivery point code. A 2-digit utility must assign the 2-digit delivery point code (plus a check digit) to the addresses in the Stage II file with 100% accuracy.
- c. Address matching software used to assign 5-digit ZIP Codes and carrier route codes must assign the appropriate codes to the Stage II file with an accuracy rate determined by the CASS Certification Department.

3.6.5 Customer Notification

The USPS sends written notice informing the customer of the results of the analysis and the product certification status. Follow-up notification is mailed to remind previously certified vendors and users of the next certification.

4.0 Standards for POSTNET and Intelligent Mail Barcodes

4.1 General

POSTNET (Postal Numeric Encoding Technique) and Intelligent Mail barcodes are USPS-developed methods to encode ZIP Code information on mail that can be read for sorting by automated machines. Intelligent Mail barcodes also encode other tracking information.

4.2 POSTNET Barcode

4.2.1 General

POSTNET (Postal Numeric Encoding Technique) is the USPS-developed barcode method to encode ZIP Code information on mail that can be read for sorting by automated machines. A POSTNET barcode can represent a 5-digit ZIP Code (32 bars), a 9-digit ZIP+4 code (52 bars), or an 11-digit delivery point code (62 bars). The information content of the barcode is based on the combination of tall (full) bars and short (half) bars. A tall bar represents “1,” and a short bar represents “0.” When separated into groups of five, these bars sequentially represent each of the digits of the ZIP Code (or ZIP+4 code or delivery point code) for the delivery address, plus an additional digit designated as the *correction digit*. The correction digit is derived from adding the numbers in the ZIP Code (or ZIP+4 or delivery point code) and determining which single-digit number must be added to that sum to make the total a multiple of 10. The first and last bars of the barcode are *frame bars* and must always be full bars.

4.2.2 5-Digit Barcode

A 5-digit barcode is a single field of 32 bars consisting of a frame bar, a series of 25 bars that represent the correct 5-digit ZIP Code for the address on the piece, 5 bars that represent the correction digit, and a final frame bar.

4.2.3 ZIP+4 Barcode

A ZIP+4 barcode is a single field of 52 bars consisting of a frame bar, a series of 45 bars that represent the correct ZIP+4 code for the address on the piece, 5 bars that represent the correction digit, and a final frame bar.

4.2.4 Delivery Point Barcode

A delivery point barcode (DPBC) is formed by adding 10 bars (representing two additional digits) to the ZIP+4 barcode. The correct DPBC must be derived from a CASS-certified delivery point code address matching process. To obtain information on the rules for delivery point code calculation, contact the National Customer Support Center by calling (toll-free) 1-800-642-2914, or by writing to CASS/ZIP+4 Matching, National Customer Support Center (see [608.8.0](#) for address). The following unique codes are also valid DPBCs:

- a. For a firm (unique) 5-digit ZIP Code, the correct DPBC represents the 5-digit ZIP Code: either the USPS-assigned -0001 or (if the customer assigns four-digit add-ons to internal separations) the correct four digits applicable to the point of delivery, followed by the last two digits of the primary street number, Post Office box number, or rural/highway contract route box number derived from the standardized address returned by the CASS-certified ZIP+4 or delivery point code address matching process.
- b. For an individual (unique) ZIP+4 code assigned to a business customer, the correct DPBC represents the ZIP+4 code followed by the last two digits of the primary street number derived from the standardized address returned by the CASS-certified ZIP+4 or delivery point address matching process.

4.2.5 POSTNET Barcode Dimensions and Spacing

POSTNET barcodes are subject to these standards for bar dimensions and spacing. Extraneous ink or ink voids must not cause any bar to fail to meet these standards:

708.4.3

- a. A full bar must be 0.125 ±0.010 inch high.
- b. A half bar must be 0.050 ±0.010 inch high.
- c. All bars must be 0.020 ±0.005 inch wide.
- d. Measured over any 1/2 inch, horizontal spacing of the bars must be 22 ±2 bars per inch, and pitch (a bar and a space) must average at least 0.0416 inch but no more than 0.05 inch. The clear vertical space between bars must not be less than 0.012 inch or more than 0.04 inch.

4.3 Intelligent Mail Barcodes

4.3.1 Definition

An Intelligent Mail barcode is the USPS-developed barcode that mailers use to encode routing and tracking information on mail that can be read by automated mail processing equipment to sort mail and to provide tracking information to the mailers. An Intelligent Mail barcode consists of 65 vertical bars, each representing one of four possible states: full bar, ascender, tracker, and descender. These 65 bars encode a string of 31 digits, divided into two parts: a 20-digit tracking code and an 11-digit routing code (when required). The 11-digit routing code may contain a ZIP Code, a ZIP+4 code, or a delivery point code, unless required to contain a certain level of code in specific applications; no correction digit is needed within an Intelligent Mail barcode. Mailers may use Intelligent Mail barcodes as follows:

- a. When used on letters for automation-price eligibility purposes, the routing code must contain a delivery point code that accurately matches the delivery address.
- b. When used on flat-size pieces for automation-price eligibility purposes, the barcode must contain either a ZIP+4 or a delivery point routing code that accurately matches the delivery address. When flat-size pieces bear an Intelligent Mail barcode for automation price eligibility, the barcode on a piece that contains an optional endorsement line (OEL) must contain OEL coding that includes information in [Exhibit 7.1.1](#) corresponding to the correct sortation level of each bundle. The OEL information in the Intelligent Mail barcode is required in addition to a physical OEL. See the *Intelligent Mail Barcode Resource Guide* available at ribbs.usps.gov/OneCodeSOLUTION for more information on incorporating OELs in Intelligent Mail barcodes.
- c. Mailers must incorporate the Mailer ID (MID) code in the Customer Identifier field. To obtain a MID, OneCode ACS subscribers can contact the ACS department at the National Customer Support Center at 1-800-331-5746. Confirm subscribers approved for OneCode Confirm must incorporate their Confirm Subscriber ID (which is their MID) when using Intelligent Mail barcodes. OneCode Confirm subscribers can contact Confirm Customer Assistance at 1-800-238-3150 or refer to Publication 197 for specific instructions. Mailers printing the Intelligent Mail barcode solely for automation price eligibility can contact the PostalOne! Help Desk at 1-800-522-9085 to obtain a MID.

4.3.2 Specifications

Complete specifications for Intelligent Mail barcodes are defined in USPS publication USPS-B-3200, which is available at ribbs.usps.gov/OneCodeSOLUTION. This publication also provides details on how to encode the routing code and tracking code into an Intelligent Mail barcode, barcode dimensions and spacing, clear zone, skew and rotation tolerance, and print characteristics. The assignment of a Barcode Identifier, Service Type Identifier, and Mailer ID are described by the respective publications for each extra service. These publications are available at ribbs.usps.gov/OneCodeSOLUTION.

4.4 Reflectance

4.4.1 Background Reflectance

A background reflectance of at least 50% in the red portion and 45% in the green portion of the optical spectrum must be produced in the following locations when measured with a USPS or USPS-licensed envelope reflectance meter:

- a. The barcode clear zone of a card-size or a letter-size piece barcoded in the lower right corner.
- b. The area surrounding the barcode (within 1/8 inch of the leftmost and rightmost bars and 1/25 inch above and below the barcode) of a card-size, letter-size, or flat-size piece barcoded in the address block and of a flat-size, First-Class Mail parcel, or Not-Flat Machinable piece barcoded elsewhere.

4.4.2 Print Reflectance Difference

A print reflectance difference (PRD) of at least 30% in the red and green portions of the optical spectrum is required between the background material of the mailpiece and the barcode, when measured with a USPS or USPS-licensed envelope reflectance meter. (PRD equals the reflectance of the background minus the reflectance of the ink.)

4.4.3 Opacity

The material on which the barcode appears must have enough opacity to prevent printing from “showing through” to the extent that it interferes with postal equipment that reads the barcode. The print contrast ratio (PCR) of print (other than the barcode) that shows through the barcode clear zone or the barcode area in the address block must not exceed 15% when measured in the red and green portions of the optical spectrum.

4.4.4 Dark Fibers and Background Patterns

Dark fibers or background patterns that produce a print contrast ratio of more than 15% when measured in the red and green portions of the optical spectrum are prohibited in these locations:

- a. The area of the address block or the barcode clear zone where the barcode appears on a card-size or a letter-size piece mailed at automation prices or at Enhanced Carrier Route saturation or high density prices.
- b. The area of the address block or the area of the mailpiece where the barcode appears on a flat-size piece in an automation price mailing or on a First-Class Mail parcel or a Not Flat-Machinable piece.

4.5 Skew and Baseline Shift

4.5.1 Card-Size and Letter-Size Pieces

For a barcode on a card-size or a letter-size piece, the combined effects of positional skew (slant or tilt of the entire barcode baseline) and rotational skew (slant or tilt of the individual barcode bars) must be limited to a maximum rotation of the bars of ± 5 degrees from a perpendicular to the bottom edge of the piece. The individual bars of a barcode must not shift (be vertically offset) more than 0.015 inch from the average baseline of the barcode. For information on barcode placement for card-size and letter-size pieces, see [202.5.0](#).

4.5.2 Flat-Size Pieces, First-Class Mail Parcels, Standard Mail Irregular Parcels, and Not Flat-Machinable Pieces

The maximum rotational skew (slant or tilt of the individual barcode bars) for barcodes is ± 10 degrees from a perpendicular to the baseline of the barcode. There is no positional skew requirement. The individual bars of a barcode must not shift (be vertically offset) more than 0.015 inch from the average baseline of the barcode. For information on barcode placement for flat-size pieces, see [302.4.0](#). For information on barcode placement on parcels and Not Flat-Machinable pieces weighing less than 6 ounces, see [402.4.0](#).

4.6 Barcode Software and Hardware Certification

4.6.1 Purpose

To help mailers evaluate the quality of their equipment producing barcodes, the USPS offers optional testing and certification to manufacturers of barcoding software and hardware. Certified barcoding equipment ensures that the equipment can produce dimensionally correct barcodes meeting postal specifications. Certification does not ensure that barcodes produced from that equipment can meet the requirements for automation prices because many other variables in barcode production (e.g., ink color and quality, paper color and contrast, equipment operation and maintenance) affect the quality of the barcodes printed on mailpieces.

4.6.2 Testing Arrangements

Manufacturers who want their products tested and mailers who want information on available certified products should contact the National Customer Support Center (see [608.8.0](#) for address).

5.0 Standards for Postal Routing Barcodes

5.1 Basic Requirements

Mailers may use a postal routing barcode on parcels and Not Flat-Machinable pieces that meet the eligibility requirements in [433.1.1](#) for First-Class Mail, [443.4.4](#) and [443.5.5](#) for Standard Mail, [453.3.1](#) for Parcel Select, [463.5.1](#) for Bound Printed Matter, [473.3.4](#) for Media Mail, or [483.3.4](#) for Library Mail. Each parcel must bear a properly prepared UCC/EAN Code 128 barcode symbology as described in [5.3](#) that accurately represents the correct ZIP Code or ZIP+4 code of the delivery address. For information on barcode placement for parcels, see [402.4.0](#).

5.2 Basic Elements of Postal Routing Barcodes

UCC/EAN Code128 postal routing barcode data elements (see Exhibit 1.2) include:

- a. *Barcode Type*. UCC/EAN Code 128 is the only acceptable barcode and must be printed within Subset C.
- b. *Start Code*. Postal routing barcodes must start with a Symbol Start Code, which is not shown in the human-readable text.
- c. *Function One (FNC1)*. The FNC1 numeric character for UCC/EAN Code 128 follows the symbol start character, is part of the symbology overhead, and is not shown in the human-readable text.
- d. *Application Identifier (AI)*. The AI for a postal routing barcode is “420” for domestic mail and is not shown in the human-readable text.
- e. *ZIP Code or ZIP+4 Code*. Postal routing barcodes must include the 5-digit ZIP Code or ZIP+4 code of the address. Only the 5-digit ZIP Code appears in the human-readable text.
- f. *Check Digit*. A check digit must be added at the end of the sequence of numbers to validate the authenticity of the number. UCC/EAN Code 128 postal routing barcodes must utilize a MOD 103 check digit, which is not shown in the human-readable text.
- g. *Stop Code*. The UCC/EAN Code 128 postal routing barcode must end with a Symbol Stop Code, which is not shown in the human-readable text.

Exhibit 5.2 Postal Routing UCC/EAN Code 128 Barcode Format

UCC/EAN Code 128 Format (as described in a-g)

Start	FNC1	4	2	0	2	2	0	2	1	Mod 103	Stop
-------	------	---	---	---	---	---	---	---	---	---------	------

ZIP 22021

22021

5.3 Use With Delivery Confirmation or Signature Confirmation Service

Eligible machinable parcels may qualify for the barcode discount and bear a Delivery Confirmation or Signature Confirmation barcode using one of the following options:

- a. The Single Concatenated Barcode (see [Exhibit 5.3a](#)). Mailers may place a single concatenated barcode that combines the postal routing information and Delivery Confirmation or Signature Confirmation information. Single concatenated barcodes must be prepared in accordance with the technical specifications and requirements in [503.9.0](#) for Delivery Confirmation service, [503.10.0](#) for Signature Confirmation service, and Publication 91, Confirmation

Services Technical Guide. If a parcel bears a single concatenated barcode, then no other barcode that contains the postal routing barcode may be affixed to the package.

Exhibit 5.3a Confirmation Services Concatenated UCC/EAN Code 128 Barcode Format

- b. Separate Barcodes (see [Exhibit 5.3b](#)). Mailers may place both a postal routing barcode described in 5.2 and a Delivery Confirmation barcode described in 503.9.0 or a Signature Confirmation barcode described in 503.10.0 (and Publication 91) on the same parcel.

Exhibit 5.3b Confirmation Services UCC/EAN Code 128 Barcode Format Using a Separate Postal Routing Barcode

5.4 Use With Confirmation Services and Insurance (Integrated Barcode)

To eliminate the need to place one barcode for Delivery Confirmation or Signature Confirmation and another barcode for insurance, eligible machinable parcels may qualify for the barcode discount by placing a single integrated barcode that combines Delivery Confirmation or Signature Confirmation and insurance using one of the following options:

- a. **Single Concatenated Integrated Barcode.** Mailers may place a single concatenated integrated barcode that combines postal routing information and postal insurance (see [503.9.0](#)) with Delivery Confirmation service or Signature Confirmation service. The single concatenated integrated barcode option allows electronic option mailers to combine multiple special services into a single barcode on their packages. Single concatenated integrated barcodes must be prepared in accordance with the technical specifications and requirements in [503.9.0](#) for Delivery Confirmation service, [503.10.0](#) for Signature Confirmation service, and Publication 91. If a parcel bears a single concatenated integrated barcode then no other barcode that contains the postal routing barcode may be affixed to the package.
- b. **Separate Barcodes.** Mailers may place both a postal routing barcode described in [5.2](#) and an integrated barcode that combines insurance as described in [5.4a](#) on the same parcel with Delivery Confirmation in [503.9.0](#) or Signature Confirmation in [503.10.0](#). The integrated barcode option allows electronic mailers to combine multiple special services into a single barcode on their packages.

5.5 Dimensions

The preferred range of widths of narrow bars and spaces is 0.015 inch to 0.017 inch. The width of the narrow bars or spaces must be at least 0.013 inch but no more than 0.021 inch. All bars must be at least 0.75 inch high.

5.6 Location

The address and barcode must be placed squarely onto the largest surface area of the parcel, except when its shape and contents requires specific orientation for stability during processing; then the address and barcode(s) must be placed on the top. The address and barcode label(s) must not overlap any side of the parcel or other label. The barcode should be placed immediately adjacent to the delivery address and at least 1 inch from the edge of the parcel. The delivery address and barcode may be printed on an attachment or enclosure in a window envelope affixed to the parcel, subject to the reflectance standards in [4.4](#). The barcode may be placed on a separate label or in an alternate location on the address label, subject to the clearance standards in [5.7](#). Barcodes that are not placed immediately adjacent to the delivery address must not encroach the return address, postage, applicable markings, endorsements, and extra service labels.

5.7 Clear Zone

The barcode must be located as specified in [5.6](#). No printing may appear in an area 1/8 inch above and below the barcode. A minimum clear (quiet) zone equal to 10 times the average measured narrow element (bars or space) width must be maintained to the left and right of the barcode.

708.5.8

5.8 Reflectance

When measured in the red spectral range between 630 nanometers and 675 nanometers, the minimum white bar (space) reflectance (Rs) must be greater than 50%, and the maximum bar reflectance (Rb) must be less than 25%. The minimum print reflectance difference (Rs-Rb) is 40%. Reflectance must be measured with a USPS-specified reflectance meter or barcode verifier.

5.9 Quality

All barcodes in each mailing must measure American National Standards Institute (ANSI) grade C or above. ANSI grade barcodes D or F are unacceptable. It is strongly recommended that all printing processes be tested to ensure that they meet specification requirements. Information concerning ANSI guidelines X3.182-1990 may be obtained from the American National Standards Institute (see [608.8.0](#)).

5.10 Human-Readable Information

The human-readable information on the barcode must conform to one of the following options:

- a. For postal routing barcodes printed under [5.2](#), [5.3b](#), and [5.4b](#), if the postal routing barcode is printed on a separate label, the human-readable equivalent of the ZIP Code or ZIP+4 code encoded in the barcode preceded by the word “ZIP” must be printed between 1/8 inch and 1/2 inch below the barcode in 10-point or larger bold sans-serif type. Alternatively, the word “ZIP” may be placed no less than 10 times the average narrow bar or space element width and no more than 1/2 inch to the left of the barcode, in 10-point or larger bold sans-serif type (see [Exhibit 5.2](#)). While not recommended, if the postal routing barcode is printed on the delivery address label and is in close proximity to the address, the human-readable equivalent of the ZIP Code (and the word “ZIP”) may be omitted.
- b. For barcodes printed under [5.3b](#) or [5.4b](#) the human-readable information for the concatenated or concatenated/integrated barcode must include as text the application identifiers (AI) 420 and 91 and the full tracking identification number. When the AI 420 and ZIP Code information is used, it must be parsed separately from the main body of text. The first group will contain the 420 AI, space, 5-digit ZIP Code, space, +4 code (if used), space, with the remaining human-readable text parsed in groups of four with the remaining digits grouped at the end (e.g., 420 22021 9122 1234 5678 9123 4567 83).

5.11 Technical Specifications

Postal routing codes must meet the technical specifications in the UCC/EAN-128 Application Identifier Standard, which can be obtained from Uniform Code Council Inc. (see [608.8.0](#)), and the barcode characteristics in [5.0](#).

5.12 Substrate Material

Barcodes must be printed on substrate material that preserves the optical specification as described in the AIM-USA Uniform Symbology Specification documents. Typically, white label stock commonly used for barcode generation is suitable, providing it is not glossy (causing mirror-like, specular reflection) or prone to smearing or smudging.

6.0 Barcoding Standards for Container Labels

6.1 Basic Standards—Tray and Sack Labels

6.1.1 Use

[Exhibit 6.1.1](#) shows the types of mail requiring barcoded tray or sack labels. Barcoded labels must meet these general standards:

- a. Mailers must use the appropriate size label for the sack or tray.
- b. Mailer-produced barcoded labels must meet the standards in [6.0](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray or sack to prevent their loss during transport and processing.

Exhibit 6.1.1 Required Barcoded Container Labels

PRICE OR TYPE	PROCESSING CATEGORY
First-Class Mail	
Automation price	Letter-size, flat-size
Cobundled and cotrayed under 705.9.0 through 705.13.0	Flat-size
Periodicals	
Automation price	Letter-size, flat-size
Cobundled and cosacked under 705.9.0 through 705.13.0	Flat-size
Standard Mail	
Automation price	Letter-size, flat-size
Enhanced Carrier Route high-density and saturation letter prices	Letter-size (barcoded labels not required for letter-size pieces with simplified addresses or paid at nonletter prices)
Cobundled and cosacked under 705.9.0 through 705.13.0	Flat-size
Automation, Presorted, and Enhanced Carrier Route in letter trays under 345.3.0	Flat-size
Automation and Presorted in letter trays cotrayed under 705.9.0 using 345.3.0 option	Flat-size
Bound Printed Matter	
Barcoded	Flat-size

6.1.2 Line 1 (Destination Line)

The destination line must meet these standards:

- a. *Placement.* The destination line must be the top line of the label, placed in the position shown in [Exhibit 6.1.2a](#) or [Exhibit 6.1.2b](#) (above the barcode on tray labels or 2-inch sack labels and to the right of the barcode on 1-inch sack labels). An exception is that one line of extraneous information may appear above the destination line on tray and sack labels as provided in [6.2.2](#), and [6.2.2f](#). The destination line must be completely visible when placed in the label holder. This visibility is ensured if the destination line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.

Exhibit 6.1.2a Barcoded 2-Inch Sack Labels and Barcoded Tray Labels

- b. *Information.* The destination line must contain only the information required by the applicable standards for the class, processing category, sortation level of the tray or sack, and the prices claimed. This information is contained in the labeling lists for all sortation and price levels except trays and sacks to carrier route, 5-digit carrier routes, merged 5-digit, and 5-digit destinations, and except for automation letter trays to 5-digit scheme destinations. For the destination line of carrier route, 5-digit carrier routes, merged 5-digit, and 5-digit trays and sacks, the city, two-letter state abbreviation, and 5-digit ZIP Code of the destination 5-digit ZIP Code area must be shown. For 5-digit scheme trays, the city, two-letter state abbreviation, and ZIP Code for the destination scheme must be obtained from the City State Product. The destination line may contain abbreviated city and state information if such abbreviations are those in the City State Product.

Exhibit 6.1.2b Barcoded 1-Inch Sack Labels

Extraneous
Information
Placement:

Below origin line

Above destination line

Between content and origin lines

- c. *Overseas Military Mail.* The exact content identifier number (CIN) that matches the level of tray or sack must be used in the barcode and barcode numeric line on barcoded tray or sack labels. The required second line of information that corresponds to the CIN must appear on the human-readable content line of the label. The human-readable content line is automatically printed when labels are obtained through the PASSPORT system or ordered on Form 1578-B for printing at the Label Printing Center in Topeka, Kansas. A footnote at the end of the content line information means that the mailer must add appropriate information when ordering and printing tray and sack labels. Any mailer using PASSPORT to order labels must also add the appropriate additional information to the human-readable content line for those content lines marked with a footnote.

6.1.3 Line 2 (Content Line)

The content line must meet these standards:

- a. *General.* The content line must appear directly below the destination line as shown in [Exhibit 6.1.2a](#) or [Exhibit 6.1.2b](#). This line must show the class, processing category, and the sortation level of the tray or sack as required by the applicable standards for the mailing. The appropriate content identifier number (CIN) in [6.1.4](#) that corresponds to that content line must be used in the barcode.
- b. *Periodicals.* Except as provided in [705.8.16](#) for copalletized mailings and in [707.27.2](#) for combined mailings, Periodicals publications must use one of the following for Line 2 class information:
 1. "PER."
 2. "NEWS" if published weekly or more often or if authorized newspaper treatment as of March 1, 1984.
- c. *Additional Information.* For 3-digit scheme trays as specified by the labeling list, the content line for some destinations must be followed by the letter "A," "B," or "C," which is not required to be right-justified. For carrier route trays and sacks, the content information must be followed by a one-letter carrier route type description followed by a space and a 3-digit route number for the route to which the tray is destined.

6.1.4 3-Digit Content Identifier Numbers

The exact content identifier number (CIN) that matches the level of tray or sack must be used in the barcode and barcode numeric line on barcoded tray or sack labels. The required second line of information that corresponds to the CIN must appear on the human-readable content line of the label. The human-readable content line is automatically printed when labels are obtained through the PASSPORT system or ordered on Form 1578-B for printing at the Label Printing Center in Topeka, Kansas. A footnote at the end of the content line information means that the mailer must add appropriate information when ordering and printing tray and sack labels. Any mailer using PASSPORT to order labels must also add the appropriate additional information to the human-readable content line for those content lines marked with a footnote. See [Exhibit 6.1.4](#).

6.1.5 Line 3 (Origin Line)

The origin line must appear below the content line in a location appropriate for a tray or sack as shown in [Exhibit 6.1.2a](#) or [Exhibit 6.1.2b](#). This line must show the city and state of the entry Post Office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry Post Office. The origin line may contain abbreviated city and state information if such abbreviations are those in the USPS City State Product. A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on this line.

6.2 Additional Standards—Barcoded 2-Inch Sack Labels and Barcoded Tray Labels**6.2.1 Paper Stock, Size, and Color**

Barcoded 2-inch sack labels and barcoded tray labels must meet these specifications:

- a. Color: white or manila for First-Class Mail and Standard Mail; pink for Periodicals.
- b. Reflectance: minimum reflectance requirements in [6.2.3i](#).
- c. Perforations: perforations are not permitted through the barcode and barcode quiet zone on labels.
- d. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- e. Height: 1.860 inches minimum; 2.015 inches maximum.
- f. Length: 3.250 inches minimum; 3.515 inches maximum.
- g. Thickness: 0.005 inch minimum.

6.2.2 Printed Human-Readable Lines

The printed human-readable text lines must meet these specifications:

- a. *General*. The human-readable lines must be printed in uppercase letters, with no run-on letters or numerals. The letters and numerals in the destination, content, and origin lines must be easy to read. The character spacing can be proportional with respect to the type font used.
- b. *Destination Line (Line 1)*. The printed destination line must have a minimum character height of 0.120 inch and a maximum character density of 17 characters per inch. The corresponding ZIP Code must have a minimum character height of 0.190 inch and a maximum character density of 10 characters per inch. The destination line must accommodate at least 21 characters for the destination city and state and any required prefixes, and 5 characters for the ZIP Code. Only the correct 3-digit ZIP Code prefix is to be printed when the required labeling for a tray includes only a 3-digit ZIP Code prefix for Line 1 (trailing zeros are not permitted).
- c. *Content Line (Line 2)*. The printed content line must have a minimum character height of 0.120 inch. The content line must accommodate at least 21 characters and have an effective font density of no greater than 17 characters per inch.

- d. *Origin Line (Line 3).* The printed origin line must have a maximum character height of 0.085 inch and must accommodate at least 21 characters.
- e. *Barcode Numeric Line.* The barcode numeric line must consist of a numeric representation of the information contained in the barcode as required by [6.2.3b](#) (5-digit ZIP Code, CIN, processing code). The printed numeric barcode line must have a maximum character height of 0.085 inch, must accommodate 10 characters, and must be placed below the barcode and lower barcode quiet zone as shown in [Exhibit 6.1.2a Barcoded 2-Inch Sack Labels and Barcoded Tray Labels](#).
- f. *Extraneous Information Lines.* Extraneous information may be printed only at the top of the label and/or at the bottom of the label. The preferred location is the bottom of the label. If placed at the bottom of the label, the information must appear only in a rectangular area that begins 1.620 inches from the top of the label and extends to the bottom of the label. Within this lower area, the information may extend 2.75 inches to the right from the left edge of the label. See [Exhibit 6.2.2f](#). Extraneous information at the bottom of the label must appear below the barcode numeric and origin lines. There are no font restrictions for information printed in this area at the bottom of the label with one exception: if information in this area resembles a day of the week or a USPS air stop code it must be in 10-point or smaller type. Extraneous information printed at the top of the label must have a maximum character height of 0.083 inch. Barcodes for a mailer's internal use may not be placed in extraneous information areas or anywhere else on the label, unless approved on a case-by-case test basis by USPS Engineering (see [608.8.0](#) for address).

Exhibit 6.2.2f Extraneous Information Area

Extraneous Information Placement:

6.2.3 Barcode

The label barcode must meet these specifications:

- a. *Type of Barcode.* The barcode must be an interleaved 2-of-5 code according to the Automatic Identification Manufacturers' Uniform Symbology Specification (AIM/USS-I 2/5) with the exceptions noted below.
- b. *Information.* The barcode must represent three numeric elements:
 1. The 5-digit ZIP Code destination of the tray. For a 3-digit tray destination, the 3-digit ZIP Code prefix is followed by two zeros.
 2. The applicable 3-digit content identifier number (CIN) for the tray as shown in [6.1.4](#).
 3. A 2-digit USPS processing code on all 2-inch tray labels. A processing code is optional on 2-inch sack labels. Use code "01" for all automation price and machinable letter-size pieces, and for all automation-compatible and cotrayed flat-size pieces. Use code "07" for all other mail, including manual pieces, nonmachinable letter-size pieces, and nonautomation Carrier Route price pieces.
- c. *Placement.* The barcode must be on the left side of the tray label, below the destination and content lines. The top of the barcode must be not less than 0.6 inch from the top of the label. The bottom of the barcode must be no more than 1.5 inches from the top of the label. The barcode must not extend more than 2.0 inches to the right from the left edge of the label.
- d. *Quiet Zones.* Two quiet zones (clear areas) must be maintained, one to the left and one to the right of the barcode, each measuring at least 10 times the X dimension (see [6.2.3f](#)) and extending the full height of the barcode. Two additional quiet zones must be maintained, one above and one below the barcode for its full width, each measuring at least 0.070 inch. The quiet zones must meet the space reflectance specification in [6.2.3i](#).
- e. *Height.* The height of the barcode must be from 0.65 to 0.75 inch.
- f. *X Dimension.* The width of the narrow bar element and narrow space element is defined as the X dimension. It must be selected as a single dimension and it must be uniform within the barcode. The minimum X dimension or narrow element width is 0.012 inch and the maximum is 0.016 inch. The optimum X dimension or narrow bar/space width is 0.015 inch.
- g. *Wide-to-Narrow Bar Ratio.* The wide-to-narrow ratio for bars and spaces within the barcode must be between 3 to 1 and 2.3 to 1 and uniform within the barcode. The optimum ratio is 3 to 1.
- h. *Printing Tolerances.* The maximum irregularity in the edge straightness of any bar element is 0.3 times the X dimension. The printing tolerance for any (narrow or wide) bar or space is +0.004 inch and is not cumulative. Example 1: If an X dimension of 0.015 inch is selected, each individual narrow bar or narrow space element on the printing of the barcode must not be less than 0.011 inch or more than 0.019 inch. Example 2: If the wide bar/space dimension of 0.045 inch is selected, each individual wide bar or space must not be less than 0.041 inch or more than 0.049 inch.

- i. *Reflectance.* When measured at 633 nanometers, bar reflectance must be less than 30% and space reflectance must be more than 40%. The bar-to-space reflectance difference must be more than 40%.

6.3 Additional Standards—Barcoded 1-Inch Sack Labels

6.3.1 Paper Stock, Size, and Color

Barcoded 1-inch sack labels must meet these specifications: Color: white or manila for First-Class Mail and Standard Mail and Package Services; pink for Periodicals.

- a. Reflectance: minimum reflectance requirements in [6.3.3i](#).
- b. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- c. Height: 0.937 inch minimum; 0.980 inch maximum.
- d. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.

6.3.2 Printed Human-Readable Lines

The printed human-readable text lines must meet these specifications:

- a. *General.* The human-readable lines must be printed in uppercase letters, with no run-on letters or numerals. The letters and numerals in the destination, content, and origin lines must be easy to read. The character spacing can be proportional with respect to the type font used, and should not exceed 17 characters per inch. When the information cannot be shortened by acceptable postal abbreviations, it may be printed in a compressed font. The information must appear to the right of the right barcode quiet zone.
- b. *Destination Line (Line 1).* The printed destination line must have a minimum character height of 0.083 inch. The corresponding ZIP Code must have a minimum character height of 0.111 inch. The destination line must accommodate at least 22 characters.
- c. *Content Line (Line 2).* The printed content line must have a minimum character height of 0.083 inch. The content line must accommodate at least 21 characters.
- d. *Origin Line (Line 3).* The printed origin line must have a minimum character height of 0.083 inch.
- e. *Barcode Numeric Line.* A barcode numeric line is optional. If used, the numeric line must consist of a numeric representation of the eight digits of information contained in the barcode as required by [6.3.3b](#) (5-digit ZIP Code and CIN). The printed numeric barcode line must have a maximum character height of 0.085 inch. It must be placed a minimum of 0.070 inch below the barcode (see [Exhibit 6.1.2b Barcoded 1-Inch Sack Labels](#)).
- f. *Extraneous Information Lines.* Extraneous information may be printed only to the right of the right quiet zone if it does not interfere with scanning and sorting by automated equipment. Extraneous information may be placed (1) below the origin line; (2) above the destination line; or (3) either between the content and origin lines or to the right of required information on the origin line, provided that the information does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix. It is recommended that this information be placed below the origin line. If placed above the destination line, the maximum height of

708.6.3.3

the type is 0.083 inch, and it is further recommended that the information be printed in a size of type much smaller than the size used on the destination line. Extraneous information must not be placed between the destination and content lines.

6.3.3 Barcode

The label barcode must meet these specifications:

- a. *Type of Barcode.* The barcode must be an interleaved 2-of-5 code according to the Automatic Identification Manufacturers' Uniform Symbology Specification (AIM/USS-I 2/5) with the exceptions noted below.
- b. *Information.* The barcode must represent the following information: the 5-digit ZIP Code destination of the sack (for sacks with a 3-digit destination, this is the 3-digit ZIP Code prefix followed by two zeros); and the 3-digit content identifier number (CIN) applicable to the content of the sack in [Exhibit 6.1.4, 3-Digit Content Identifier Numbers](#).
- c. *Placement.* The barcode must be on the left side of the sack label.
- d. *Quiet Zones.* Two quiet zones (clear areas) must be maintained, one to the left and one to the right of the barcode, each measuring at least 10 times the X dimension (see [6.3.3f](#)) and extending the full height of the barcode. The quiet zones must meet the space reflectance specification in [6.3.3i](#).
- e. *Height.* The height of the barcode must be at least 0.700 inch.
- f. *X Dimension.* The width of the narrow bar element and narrow space element is defined as the X dimension. It must be selected as a single dimension and it must be uniform within the barcode. The minimum X dimension or narrow element width is 0.012 inch and the maximum is 0.016 inch. The optimum X dimension or narrow bar/space width is 0.015 inch.
- g. *Wide-to-Narrow Bar Ratio.* The wide-to-narrow ratio for bars and spaces within the barcode must be between 3 to 1 and 2.3 to 1 and be uniform within the barcode. The optimum ratio is 3 to 1.
- h. *Printing Tolerances.* The maximum irregularity in the edge straightness of any bar element is 0.3 times the X dimension. The printing tolerance for any (narrow or wide) bar or space is +0.004 inch and is not cumulative. Example 1: If an X dimension of 0.015 inch is selected, each individual narrow bar or narrow space element on the printing of the barcode must not be less than 0.011 inch or more than 0.019 inch. Example 2: If the wide bar/space dimension of 0.045 inch is selected, each individual wide bar or space must not be less than 0.041 inch or more than 0.049 inch.
- i. *Reflectance.* When measured at 633 nanometers, bar reflectance must be less than 30% and space reflectance must be more than 40%. The bar-to-space reflectance difference must be more than 40%.

7.0 Optional Endorsement Lines (OELs)

7.1 OEL Use

7.1.1 Basic Standards

[7-3-08] An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece of bundles. The OEL must show carrier route information or the type of bundle and ZIP Code information as shown in [Exhibit 7.1.1, OEL Formats](#). Use of OELs on bundles is subject to the standards for the price claimed. At the mailer's option, pieces in trays of noncarrier route automation letter-size mail may bear OEL information that corresponds to the sortation level of the tray in which the pieces are placed. The ZIP Code for use on OELs must include the 3-digit ZIP Code prefix or 5-digit ZIP Code as required.

Exhibit 7.1.1 OEL Formats

SORTATION LEVEL	OEL EXAMPLE
Firm—BPM machinable parcels	***** FIRM 12345
Firm—Periodicals	***** FIRM 12345
Origin Mixed ADC—Periodicals (3-digit ZIP Code prefix)	***** ORIGIN MIXED ADC 117
Carrier Route—Periodicals basic	***** CAR-RT LOT**C-001 ***** CR LOT 1234A**C-001
Carrier Route—Periodicals high density	***** CAR-RT WSH**C-001
Carrier Route—Periodicals saturation	***** CAR-RT WSS**C-001

Mixed ADC (5-digit ZIP Code)	***** MIXED ADC 60821

SORTATION LEVEL	OEL EXAMPLE
Optional tray level piece ID for automation letters:	
AADC (3-digit ZIP Code prefix)	*****ALL FOR AADC 050
AADC (5-digit ZIP Code)	*****ALL FOR AADC 07099
Mixed AADC (3-digit ZIP Code prefix)	***** MIXED AADC 870
Mixed AADC (5-digit ZIP Code)	***** MIXED AADC 75197

7.1.2 Intelligent Mail Barcodes

[7-3-08] When flat-size pieces bear an Intelligent Mail barcode (under 4.3) for automation-price eligibility purposes, the barcode on a piece that contains an optional endorsement line (OEL) must contain OEL coding that includes information in Exhibit 708.7.1.1 that corresponds to the correct sortation level of each bundle. The OEL information in the Intelligent Mail barcode is required in addition to a physical OEL. See the *Intelligent Mail Barcode Resource Guide* available at ribbs.usps.gov/OneCodeSOLUTION for more information on incorporating OELs in Intelligent Mail barcodes.

7.1.3 Keyline

A mailer's keyline or comparable information may not be placed on the same line as the OEL or on the line above the OEL. A keyline used on valid ACS mailpieces is subject also to 7.2.4, *No ACS Code in OEL*.

7.1.4 Firm Bundles

On a firm bundle of carrier route presorted Periodicals, "FIRM" may precede "CAR-RT SORT" in the carrier route information line under 6.0.

7.1.5 Price Markings

At the mailer's option, price markings required by the standards for the price claimed may be included in the OEL if the OEL appears on each piece in the mailing and if it remains a single line with the basic bundle label information (required by 7.1.1) at the right end (e.g., on a carrier route bundle of Enhanced Carrier Route Saturation Standard Mail: **** ECRWSS**C-001; on an automation Standard Mail 3-digit bundle: **** AUTO**3-DIGIT 750).

7.1.6 Exceptional Address Format

The exceptional address format may appear above the OEL as specified in 602.3.0, *Use of Alternative Addressing*.

7.1.7 OEL With LOT Information

At the mailer's option, line-of-travel (LOT) information for carrier route Periodicals and Enhanced Carrier Route Standard Mail may be included in the OEL using the applicable format in 7.1.1. All other OEL requirements apply. If there is insufficient space within the OEL to include any other information required (e.g., ACS participant code), this OEL format may not be used.

7.2 OEL Format

7.2.1 Presort Identification

Except when an address block barcode is placed above the optional endorsement line (OEL), the appropriate presort identification must be the first line at the top of the address block or label. A mailer receiving address corrections through Address Change Service (ACS) may use the first eight positions on the left side of the OEL for an ACS human-readable participant code.

7.2.2 Style and Size of Type

The information in the OEL must be in capital letters with letter size and line spacing no less than the size and line spacing of the largest letters or characters in the address block or any part of the address label. Letters in the endorsement line must be the same type font as those in the address block. Only capital letters of the alphabet, Arabic numerals, or asterisks may be used in the OEL.

7.2.3 ACS Code in OEL

If an ACS human-readable participant code (see 507.4.2) is used in an OEL on a label or in an address block, the delimiter symbol (#) must be in the first position at the left margin of the OEL, followed by the seven-character USPS-assigned ACS participant code, then one blank space. The remaining blank spaces between the left-justified delimiter and ACS participant code and the first character of the right-justified mail sortation information of the OEL must be filled with asterisks.

7.2.4 No ACS Code in OEL

If an ACS human-readable participant code is not placed in the OEL as permitted by 507.4.2.4, the OEL must be filled with asterisks from the left margin of the label or address block up to the first character in the OEL. A keyline prepared under 7.1.3 is required on valid ACS mailpieces if an ACS participant wants to receive notification of nondelivery information under 507.1.4.1 in addition to address correction service.

7.2.5 ZIP Code Information

Except for carrier route bundles, the OEL must include the ZIP Code information (5-digit ZIP Code or 3-digit ZIP Code prefix) determined by the sortation level and, when applicable, by the labeling list designated in Exhibit 7.2.5 for ADC, mixed ADC, AADC, or mixed AADC sortation levels. Carrier route OELs must show carrier route information as specified in 8.2.

1. For automation-compatible flats, label according to [L007](#) for optional 5-digit scheme preparation.

2. [L010](#) if mail entered by mailer at a destination ASF or BMC or for mail placed on an ASF or BMC pallet under [705.8.0](#).

3. For irregular parcels of uniform thickness (see [445.5.4.1](#)), use [L004](#) for ADCs and [L009](#) for mixed ADCs.

8.0 Carrier Route Information Lines

8.1 Basic Information

Mailers must prepare bundles of all mailpieces mailed at carrier route prices with optional endorsement lines under [7.0](#), carrier route information lines under [8.2](#), or facing slips (see [245.2.10](#) for Standard Mail letters, [345.2.13](#) for Standard Mail flats, [365.2.12](#) for Bound Printed Matter flats, [445.2.11](#) for Standard Mail parcels, [465.2.11](#) for Bound Printed Matter parcels, and [707.19.15](#) for Periodicals). Carrier route information lines may be on all pieces in a mailing, regardless of presort level. Mailers must use optional endorsement lines or carrier route information lines on all pieces in mailings of Standard Mail letters prepared under [245.6.7](#), except for pieces in full carrier route trays.

8.2 Format and Content

8.2.1 Route Information

Carrier route information consisting of a descriptive prefix (or its abbreviation), plus a route number or numeric code, must be on the top line of the address, either alone or with other information (e.g., addressee, account data). Alternatively, when permitted by standard, the carrier route information may appear with the applicable carrier route endorsement on the line above or two lines above the address if the carrier route price marking is in the address area (see [Exhibit 8.2.1](#)).

Exhibit 8.2.1 Address Format With Carrier Route Information**8.2.2 Descriptive Prefix**

The authorized descriptive prefixes and their abbreviations are “Carrier Route” (“C”), “Rural Route” (“R”), “Highway Contract Route” (“H”), “Post Office Box Section” (“B”), and “General Delivery Unit” (“G”).

8.2.3 Route Code

These conditions apply to the carrier route code:

- The one-character descriptive prefix in 8.2.2 must be followed by a 3-digit route or Post Office box section number.
- On Periodicals and Standard Mail pieces bearing a simplified address that does not include a ZIP Code, the descriptive prefix in 8.2.2 must be followed by the last two digits of the 5-digit ZIP Code and the 3-digit route number or Post Office box section number.
- The route code required for simplified address mailings in 8.2.3b may also be used on mailings of any class that contain a ZIP Code in the address.

8.2.4 Other Elements

The following elements also are included in the carrier route information line:

- The carrier route code must be preceded by at least two asterisks (**).
- At least 10 spaces must be reserved for the carrier route code if other information is included on the top line.
- The carrier route information line may also contain the basic markings required by standard for the class of mail and price claimed, prepared under 202 for letters, 302 for flats, and 402 for parcels.
- The carrier route information line may also include information to identify bundles of Periodicals matter mailed at:
 - carrier route saturation prices (“SATURATION WALK-SEQUENCED CARRIER ROUTE MAIL” or the abbreviation “CAR-RT WSS”),
 - high density walk-sequenced prices (“HIGH DENSITY WALK-SEQUENCED CARRIER ROUTE MAIL” or the abbreviation “CAR-RT WSH”), or
 - basic carrier route prices (“CARRIER ROUTE LINE-OF-TRAVEL” or the abbreviation “CAR-RT LOT”).

8.2.5 Firm Bundle

On a firm bundle of carrier route presorted Periodicals, “FIRM” may precede “CAR-RT LOT” or “CAR-RT WSH” or “CAR-RT WSS,” as applicable, in the carrier route information line.

9.0 Facing Identification Mark (FIM)

9.1 Using FIMs

The facing identification mark (FIM) serves to orient and separate certain types of First-Class Mail during the facing-canceling process. Mailers must use the appropriate FIM as follows:

- a. All letter-size business reply mail (BRM) under [507.9.0](#).
- b. All letter-size permit reply mail (PRM) under [507.10.0](#).
- c. Letter-size courtesy reply mail (CRM) and meter reply mail (MRM) provided as enclosures in automation-price mailings under [201.3.0](#).
- d. Letter-size mail with IBI printed with nonfluorescent ink directly onto the envelope by an IBI meter or a PC postage system must use FIM D.
- e. Cards and letter-size envelopes containing absentee balloting materials under [703.8.0](#).
- f. A FIM must not be used on other types of mail, except that a FIM may be used on a letter-size envelope with a permit imprint indicia when that envelope is designed for use as a reusable mailpiece under [601.6.0](#). A FIM used for this purpose must be the appropriate FIM for the postage payment method on the returned envelope (see [9.2](#)).

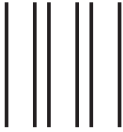

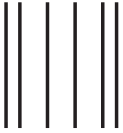

9.2 Pattern

The FIM pattern is a nine-bit binary code represented by vertical bars (with corresponding space element). A printed bar is considered binary 1; a nonprinted bar (placeholder), binary 0. The required FIM pattern as shown below depends on the type of mail and the presence of a POSTNET barcode as follows:

- a. FIM A is used for CRM and MRM with a preprinted barcode. (FIM A binary code is 110010011.)
- b. FIM B is used for BRM without a preprinted BRM ZIP+4 barcode. (FIM B binary code is 101101101.)
- c. FIM C is used for BRM with a preprinted BRM ZIP+4 barcode and for PRM with a preprinted delivery-point barcode. (FIM C binary code is 110101011.)

708.9.3

- d. FIM D is used for letter-size First-Class Mail with IBI printed with nonfluorescent ink directly on the envelope. (FIM D binary code is 111010111.)

NAME	PATTERN	USE	POSTNET BARCODED?
FIM A		Courtesy reply mail Meter reply mail	Yes
FIM B		Business reply mail	No
FIM C		Business reply mail	Yes
FIM D		IBI meters and PC Postage systems	Not required

9.3 Specification

The FIM must meet these specifications:

- a. A FIM clear zone to the upper right of the address side of the mailpiece must be maintained and must contain no printing other than the FIM. [Exhibit 9.3](#) shows the FIM position and the FIM clear zone as defined by these boundaries:
 1. Left: 3 inches from the right edge of the piece.
 2. Right: 1-3/4 inches from the right edge of the piece.
 3. Top: top edge of the piece.
 4. Bottom: 5/8 inch from the top edge of the piece.
- b. The FIM bars must be 5/8 inch ($\pm 1/8$ inch) high and 1/32 inch (± 0.008 inch) wide and positioned as follows:
 1. The right edge of the rightmost bar of the FIM must be 2 inches ($\pm 1/8$ inch) from the right edge of the piece.
 2. The tops of the FIM bars must be no lower than 1/8 inch from the top edge of the piece. The tops of the bars may extend over the top edge of the piece to the back (flap) of the piece if at least a 1/2-inch bar height is maintained on the address side.

3. The bottoms of the FIM bars must touch the bottom boundary of the FIM clear zone or be no more than 1/8 inch above or below this boundary.

Exhibit 9.3 Position of FIM

9.4 Dimensional Tolerances

Extraneous ink must not cause a FIM bar to exceed the specifications in 9.3. The combined effects of positional skew (slant of the entire FIM) and rotational skew (slant of the individual FIM bars) must be limited to ± 5 degrees from the perpendicular edge of the printed FIM to the top edge of the mailpiece. Mail required to bear a FIM is considered nonmailable when the FIM has insufficient ink coverage, improper measurement, or ink in the space between the bars or when the FIM is enlarged or reduced. Camera-ready positives of FIMs, which must not be enlarged or reduced, are available at no charge from the USPS.

9.5 Reflectance

There must be at least a 30% print reflectance difference between the ink used for printing the FIM and the background material on which the FIM is printed in the red and green portions of the optical spectrum when measured with a USPS or USPS-licensed envelope reflectance meter.

10.0 Postal Zones

10.1 Basis

Postal prices for certain subclasses of mail are based on the weight of the individual piece and the distance that the piece travels from origin to destination (i.e., the number of postal zones crossed). For the administration of these postal zones, the earth is divided into units of area 30 minutes square, identical with a quarter of the area formed by the intersecting parallels of latitude and meridians of longitude. Postal zones are based on the distance between these units of area. The distance is

708.10.2

measured from the center of the unit of area containing the SCF serving the origin Post Office to the SCF serving the destination Post Office. The SCFs serving the origin and destination Post Offices are determined by using [L005](#), Column B.

10.2 Application

Zones are used to compute postage on zoned mail sent between USPS facilities, including military Post Offices (MPOs), as follows:

- a. For the purposes of computing postal zone information, except for items [10.2b](#) and [10.2c](#), the following table applies to MPOs not listed in [L005](#).

3-DIGIT ZIP CODE PREFIX GROUP	SCF SERVING THE DESTINATION OFFICE
090-098	SCF New York NY 100
340	SCF Miami FL 331
962-966	SCF San Francisco CA 940

- b. The postage prices for zoned mail transported between the United States, the Canal Zone, Puerto Rico, or U.S. territories or possessions, including the Trust Territory of the Pacific on the one hand, and MPOs on the other, or, among the MPOs, are the applicable zone prices for mail between the place of mailing or delivery and the city of the postmaster serving the MPO concerned.
- c. The postage price for zoned mail mailed at or addressed to an MPO and transported directly to or from MPOs at Department of Defense expense, without transiting any of the 48 contiguous states (including the District of Columbia), is the applicable local zone price. If such mail transits any area served by the USPS at USPS expense and the distance from the place of mailing to the embarkation point or from the debarkation point to the place of delivery is more than the local zone for such mail, postage is assessed by the distance from the place of mailing to the embarkation point or from the debarkation point to the place of delivery of such mail, as the case may be. The word transiting does not include en route transfers at coastal gateway cities necessary to transport military mail directly between MPOs. For example, a parcel mailed at Honolulu, HI, for direct dispatch by the Department of Defense from Honolulu to an MPO in the Pacific is subject to the local zone price. A parcel mailed at Hilo, HI, and transported at USPS expense to Honolulu, HI, for direct dispatch at Department of Defense expense from Honolulu to an MPO in Japan is subject to zone 2 prices.

10.3 Zone Charts

The USPS Official National Zone Chart Data Program is administered from the National Customer Support Center (NCSC) in Memphis, TN. Single-page zone charts for originating mail are available at no cost from local Post Offices or online at pe.usps.com. Zone chart data for the entire nation can be purchased in print and CD-ROM formats. For more information or to purchase zone charts, call the Zone Chart program administrator at 800-238-3150 or write to the NCSC (see [608.8.0](#) for address).

10.4 Specific Zones

10.4.1 Local Zone

The local zone applies to mail deposited at any Post Office for delivery to addresses within the delivery area of that Post Office. For various types of Post Offices, the local zone applies to all mail that both originates and destines within:

- a. The 5-digit ZIP Code area(s) assigned to the same Post Office.
- b. Any of the 5-digit ZIP Codes that are part of any unique 3-digit ZIP Code prefix(es) or other separate 5-digit ZIP Code(s), as applicable, assigned to the same Post Office.

10.4.2 Nonlocal Zone

Nonlocal zones are defined as follows:

- a. The zone 1 price applies to pieces not eligible for the local zone in [10.4.1](#) that are mailed between two Post Offices with the same 3-digit ZIP Code prefix identified in [L005](#), Column A. Zone 1 includes all units of area outside the local zone lying in whole or in part within a radius of about 50 miles from the center of the area.
- b. Zone 2 includes all units of area outside zone 1 lying in whole or in part within a radius of about 150 miles from the center of a given unit of area.
- c. Zone 3 includes all units of area outside zone 2 lying in whole or in part within a radius of about 300 miles from the center of a given unit of area.
- d. Zone 4 includes all units of area outside zone 3 lying in whole or in part within a radius of about 600 miles from the center of a given unit of area.
- e. Zone 5 includes all units of area outside zone 4 lying in whole or in part within a radius of about 1,000 miles from the center of a given unit of area.
- f. Zone 6 includes all units of area outside zone 5 lying in whole or in part within a radius of about 1,400 miles from the center of a given unit of area.
- g. Zone 7 includes all units of area outside zone 6 lying in whole or in part within a radius of about 1,800 miles from the center of a given unit of area.
- h. Zone 8 includes all units of area outside zone 7.

10.4.3 Delivery Unit (Office)

The delivery unit price applies to mail destinating within the delivery area of the delivery unit at which it is deposited by the mailer.

708.10.4.3

708.10.4.3

709 Experimental Classifications and Prices

Overview

1.0 General Requirements for Negotiated Service Agreements (NSAs)

1.0 General Requirements for Negotiated Service Agreements (NSAs)

1.1 Basic Information

1.1.1 Definition and Purpose

A negotiated service agreement (NSA) is a customized and mutually beneficial contractual agreement between the USPS and a specific mailer (customer or organization). An NSA provides for customized pricing, prices, and classifications under the terms and conditions established in the NSA and may include modifications to current mailing standards and other postal requirements. Any mailer may submit an application for an NSA if the mailer meets the requirements in [1.2](#) and follows the process in [1.3](#).

1.1.2 Legal Framework

Terms and conditions of an NSA affecting prices or classifications require that the USPS request a recommended decision from the Postal Regulatory Commission before the USPS may approve and implement the NSA. NSAs must be recommended and approved under 39 U.S.C. 36 and the Postal Regulatory Commission's rules of practice and procedure.

1.2 Candidate Factors and Requirements

1.2.1 Factors

The USPS considers the following factors in evaluating any candidate's NSA proposal:

- a. Candidate's presentation of information as requested by the USPS to document the following:
 1. Current mailing systems, postage payment systems, and quality control procedures and programs.
 2. Historical data showing mail volumes and use of specific mail services or mailpiece characteristics, as applicable. The candidate, as necessary, must also provide the effect on mail volumes of any corporate mergers, acquisitions, divestitures, and similar events.
- b. Candidate's ability to make and present in an acceptable format accurate forecasts of future mail volumes for USPS products and services proposed for an NSA.
- c. Candidate's ability to collect necessary data in an acceptable format to support an NSA.

709.1.2.2

- d. Candidate's willingness to establish and maintain electronic systems and quality control programs as specified by the USPS for paying postage and generating records to facilitate monitoring and reconciling mail volumes, prices, and fees, including volumes and postage paid by a mail preparation agent on behalf of the candidate.
- e. Candidate's production of mail using a formal system to ensure proper mail preparation and accurate postage calculations.
- f. Candidate's use or planned implementation of a Certified Mail preparation total quality program to ensure proper mail preparation and to provide accurate documentation of mailings and postage payment.

1.2.2 General Requirements

No proposed NSA may have an overall negative financial impact on the USPS. Any proposed NSA must also contain, at a minimum, the following general candidate requirements and conditions:

- a. The candidate must permit USPS inspection of mail content to determine price eligibility.
- b. The candidate must prepare mail under current applicable mailing standards, unless they are to be modified under a proposed NSA.
- c. The candidate must meet and adhere to quality management standards for the classes of mail and prices claimed.
- d. The candidate must make available to the USPS necessary records and data related to the NSA in a form that facilitates monitoring of compliance with the terms and conditions of the NSA.
- e. The candidate must provide proper specified notice to cancel the NSA.
- f. The USPS has the right to cancel the NSA at any time with specified proper notice for any failure or, where appropriate, material failure of the mailer to:
 - 1. Use the NSA within the time period specified in the NSA.
 - 2. Provide accurate data, present properly prepared and paid mailings, or comply with any other material term or condition in the NSA.
- g. The candidate must engage counsel and file testimony as necessary in support of the NSA before the Postal Regulatory Commission.

1.3 Application Process**1.3.1 Initial Proposal**

A mailer seeking to enter into an NSA with the USPS must submit a written proposal, with appropriate supporting documentation, to the USPS manager of Pricing Strategy (see [608.8.0](#) for address). The proposal must contain the reasons for requesting the NSA along with a summary of the information responding to the applicable candidate features and general requirements described in [1.2](#). A nondisclosure agreement must be signed before any substantive discussion of the proposal.

1.3.2 Negotiations and Contractual Agreement

As a result of the proposal, the candidate and the USPS may enter into negotiations to establish an NSA, with terms and conditions specific to the candidate, that is either a functionally equivalent NSA (i.e., comparable to an existing baseline NSA) or a new baseline NSA (i.e., not comparable to an existing NSA). A candidate in the negotiation process may withdraw a proposal for an NSA at any time prior to the execution of the NSA. Once the NSA is executed, the NSA is controlled by its terms and conditions.

1.3.3 Additional Consideration

If the USPS decides to end negotiations with the candidate before reaching an agreement to enter into an NSA under [1.1](#), the manager of Pricing Strategy notifies the candidate in writing and gives the reasons for the decision. Within 15 days from the receipt of the written explanation, the candidate may ask for reconsideration of the manager's decision. The candidate's request for reconsideration must include additional information and reasons why negotiations for an NSA should be resumed. The candidate submits the request for reconsideration through the manager of Pricing Strategy to the vice president of Pricing and Classification (see [608.8.0](#) for address).

L001 5-Digit Scheme—Periodicals, Standard Mail, and Package Services Flats and Irregular Parcels

[8-14-08] L001 describes the 5-digit scheme sort list for pallets and sacks of Periodicals, Standard Mail, and Package Services flats and irregular parcels destined for multiple 5-digit ZIP Codes served by a single delivery unit. When the 5-digit scheme sort is used, mail for the 5-digit ZIP Codes shown in Column A must be combined on pallets or in sacks as follows:

- a. Bundles on merged 5-digit scheme or 5-digit scheme carrier routes pallets.
- b. Bundles on 5-digit scheme pallets only for Periodicals and BPM irregular parcels and flats not meeting the dimension, weight, and flexibility criteria for automation flats (301.3.0), including automation-compatible flats copalletized with other flats.
- c. Merged 5-digit scheme or 5-digit scheme carrier routes sacks labeled to the corresponding destination shown in Column B.

L002 3-Digit ZIP Code Prefix Matrix

[6-5-08] L002 lists every 3-digit Zip Code prefix for mail destined to 3-digit, 3-digit scheme, and sectional center facility (SCF) destinations as follows:

- a. 3-Digit ZIP Code Prefix: Use this column to find a 3-digit ZIP Code prefix. Those prefixes indicated by an **X** are unassigned. Those prefixes indicated by an **N** have been designated as 3-digit ZIP Codes for which the preparation of a 3-digit sack is optional, and for which the preparation of the optional 3-digit pallet is prohibited.
- b. Column A, 3-Digit Destinations: Use this information for Line 1 on 3-digit container labels (subject to the standards for the rate claimed). Unique 3-digit cities are indicated by a **U**.
- c. Column B, 3-Digit/Scheme Destinations: Use this information for Line 1 on 3-digit or 3-digit scheme container labels (subject to the standards for the rate claimed). Line 2 of container labels for destinations indicated by an S must include either "SCHEME" or the specific information shown (3-digit groups by scheme group, where applicable, are shown in L003).
- d. Column C, SCF Destinations: Use this information for Line 1 on SCF container labels (subject to the standards for the rate claimed). SCFs serving only a single 3-digit area are indicated by a **D** (3-digit groups are shown by SCF in L005). Destination SCF Standard Mail rates, destination SCF Package Services rates, or destination SCF rates and per piece discounts for Periodicals mail are available only to those ZIP Code areas for which an SCF is shown.

To order labels from the USPS Label Printing Center, use Form 1578-B and indicate set number 001 (unique 3-digit cities only), set number 002 (3-digit destinations), or set number 003 (SCF destinations). Requests are supplied in lots of 300 (minimum) for each label on the list.

L003 3-Digit ZIP Code Prefix Groups—3-Digit Scheme Sortation

L003 describes the 3-digit automation letters scheme sortation ZIP Code prefix list for trayed mail.

When required by the standards for specific rates, pieces for the 3-digit ZIP Code prefixes shown in Column A must be combined in trays labeled to the corresponding destination shown in Column B. Line 2 on tray labels must include “SCHEME” except as shown below.

Column A 3-Digit ZIP Code Prefix Group	Column B Label To	Column A 3-Digit ZIP Code Prefix Group	Column B Label To

L004 3-Digit ZIP Code Prefix Groups—ADC Sortation

L004 describes the service area by individual 3-digit ZIP Code prefix for mail destined to an area distribution center (ADC).

Subject to the standards for the rate claimed, pieces for the 3-digit ZIP Code prefixes shown in Column A must be combined and labeled to the corresponding ADC destination shown in Column B. Where noted, the destination must be selected based on the class of mail prepared. Unassigned 3-digit prefixes or assigned 3-digit prefixes not associated with an ADC are omitted.

To order labels from the USPS Label Printing Center, use Form 1578-B and indicate set number 008 (First-Class Mail), set number 009 (Periodicals), or set number 010 (Standard Mail and Bound Printed Matter). Requests are supplied in lots of 300 (minimum) for each label on the list.

L005 3-Digit ZIP Code Prefix Groups—SCF Sortation

[6-5-08] L005 describes the service area by individual 3-digit ZIP Code prefix for mail destined to a sectional center facility (SCF).

Subject to the standards for the rate claimed, pieces for the 3-digit ZIP Code prefixes shown in Column A must be combined and labeled to the corresponding SCF destination shown in Column B. SCFs serving only one 3-digit area are identified with ^S; Line 1 on labels for these destinations does not include the “SCF” prefix before the facility name. Unassigned 3-digit prefixes or assigned 3-digit prefixes not associated with an SCF are omitted.

L006 5-Digit Metro Scheme

[6-5-08] L006 is an optional 5-digit metro-area scheme pallet preparation for Periodicals flats and irregular parcels, Standard Mail flats, and Bound Printed Matter flats. The scheme describes situations where processing responsibility for 5-digit ZIP Code destinations within a 3-digit ZIP Code prefix have been split between two or more facilities.

The first column lists the 3-digit ZIP Codes that have zones (5-digit ZIP Codes) assigned to the scheme shown in Column A. Residual 3-digit bundles may be placed on 5-digit metro pallets as shown in Column B. Label containers as shown in Column C.

3-Digit ZIP Codes	Column A 5-Digit Destination ZIP Codes	Column B Placement for Residual 3-Digit Bundles	Column C Label Container To

L007 5-Digit Scheme—Periodicals, Standard Mail, and Package Services Flats in Bundles

[8-14-08] [7-3-08] [6-5-08] L007 describes the 5-digit scheme sortation list for automation price (see [345.7.0](#) for Standard Mail, [365.7.0](#) for Bound Printed Matter, and [707.25.0](#) for Periodicals) and cobundled automation and Presorted rate (see [705.11.0](#)) Periodicals and Standard Mail flat-size pieces and Presorted rate Bound Printed Matter (BPM), Media Mail, and Library Mail flat-size pieces that meet the automation criteria under [301.3.0](#). The pieces within the scheme bundles are processed in the same operation and therefore are not required to be prepared in individual 5-digit bundles.

When the 5-digit scheme sort is used, mail for the 5-digit ZIP Codes shown in Column A must be combined in bundles for all combinations for which mail exists and density dictates. All 5-digit scheme bundles must include the appropriate OEL under [708.7.0](#), which must contain the 5-digit ZIP Code listed in Column B.

5-digit scheme bundles using OELs must include the appropriate OEL under [708.7.0](#), which must contain the 5-digit ZIP Code listed in Column B.

L008 3-Digit Scheme—Periodicals, Standard Mail, and BPM Flats in Bundles

[7-3-08] L008 describes the 3-digit scheme sortation list for automation price (see 345.7.0 for Standard Mail, 365.7.0 for Bound Printed Matter, and 707.25.0 for Periodicals) and cobundled automation and Presorted rate (see 705.11.0)

Periodicals and Standard Mail flat-size pieces and Presorted rate Bound Printed Matter (BPM) flat-size pieces that meet the automation criteria in 301.3.0. Pieces within scheme bundles are processed in the same operation and therefore are not required to be prepared in individual 3-digit bundles.

When the 3-digit scheme sort is used, mail for the 3-digit ZIP Codes shown in Column A must be combined in bundles for all combinations for which mail exists and density dictates. 3-digit scheme bundles using OELs must include the appropriate OEL under 708.7.0, which must contain only the 3-digit ZIP Code listed in Column B. The city and state are provided as information only.

L009 Mixed ADCs—Periodicals, Standard Mail, and Package Services Flats and Irregular Parcels

[6-5-08] Mailers must use L009 to label mixed ADC bundles and sacks of Periodicals, Standard Mail, Bound Printed Matter, Media Mail, and Library Mail flats. Mailers also must use L009 to label mixed ADC bundles and sacks containing Periodicals irregular parcels; Bound Printer Matter irregular parcels; and Standard Mail irregular parcels of uniform thickness under 445.5.4. Label mail originating in the 3-digit ZIP Code areas in Column A by using the corresponding destination line in Column B.

L010 BMC/ASF Entry—Standard Mail Letters and Package Services Irregular Parcels

[6-5-08] L010 indicates the label destination (Column B) for mixed AADC and mixed ADC trays of Standard Mail letters entered at an ASF or BMC (Column A) or placed on an ASF or BMC pallet, or placed on a SCF pallet entered at an SCF facility listed in column B. L010 indicates the label destination (Column B) for mixed sacks of Package Services irregular parcels placed on ASF or BMC pallets.

Use L009 when labeling mixed ADC bundles and sacks of automation price Periodicals and Standard Mail flats and barcoded Bound Printed Matter flats.

L201 Periodicals Origin Split and First-Class Mail Mixed ADC/AADC

[8-14-08] [6-5-08] L201 describes the First-Class Mail surface transportation reach of an origin facility for use in preparing bundles and sacks of Periodicals mail (including Periodicals labeled “news”) and in preparation of First-Class Mail mixed containers.

For Periodicals addressed to destinations within the First-Class Mail surface reach of the origin facility, mailers must use L201 to prepare mixed origin ADC bundles and sacks to enable integration of this volume into the First-Class Mail mailstream. Label bundles and sacks of mail originating in the 3-digit entry ZIP Code in Column A for delivery to 3-digit ZIP Code destinations listed in Column B using the corresponding city, state, and ZIP Code information in Column C. Use L009 for the preparation of mixed ADC bundles and sacks for any remaining pieces addressed to 3-digit ZIP Code destinations not listed in Column B.

For First-Class Mail letters, flats, and parcels originating in the 3-digit entry ZIP Code in Column A, label trays and sacks to the corresponding destination in Column C. Use “MXD” instead of “OMX.” Ignore Column B.

L601 BMCs

[6-5-08] L601 describes the service area by individual 3-digit ZIP Code prefix for sorting mail to BMC destinations.

Use this list for:

- a. Standard Mail machinable parcels except ASF mail (other than mail for the Buffalo ASF service area) prepared and claimed at DBMC rates. Machinable parcels for the Buffalo ASF service area prepared and claimed at DBMC rates must be sorted to the Pittsburgh BMC.
- b. Standard Mail bundles, letter trays, or sacks on pallets.
- c. Bound Printed Matter machinable parcels except ASF mail (other than mail for the Buffalo ASF service area) prepared and claimed at DBMC rates. Machinable parcels for the Buffalo ASF service area prepared and claimed at DBMC rates must be sorted to the Pittsburgh BMC.
- d. Bound Printed Matter bundles or sacks on pallets.
- e. Parcel Post except for ASF mail (other than mail for the Buffalo ASF service area) prepared and claimed at DBMC rates and nonmachinable BMC Presort or OBMC Presort rate mail. Machinable parcels for the Buffalo ASF service area prepared and claimed at DBMC rates must be sorted to the Pittsburgh BMC. Nonmachinable parcels for the Buffalo ASF service area claimed at DBMC rates may be sorted to the Pittsburgh BMC if bedloaded and presented with machinable parcels.
- f. Presorted Media Mail and Presorted Library Mail to BMC destinations.

For labeling mixed BMC sacks and pallets, mailers must add “MXD” before the Column B information of the BMC serving the 3-digit ZIP Code prefix of the Post Office at which the mail is entered.

1. Mailed from ZIP Code areas 006-009.

2. Except for mail prepared for destination entry rates, if the origin entry Post Office is in ZIP Code areas 894, 895, 897, 889-891, 893, 900-908, 910-928, 930-935, 936-969 and the destination Post Office is in ZIP Code areas 850, 852, 853, 855, 859, 860, 863, or 864, label the mail to the Los Angeles BMC rather than the Denver BMC as follows: BMC LOS ANGELES CA 90901.

3. May be combined in the same sack with ADC mail for ZIP Code areas 894-897, 936-961, and 967-969, labeled to BMC SAN FRAN CA 94850.

L603

Labeling Lists: ADCs—Irregular Standard Mail Parcels

L604 Originating ADCs—Standard Mail Irregular Parcels

[6-5-08] L604 describes the service area by individual 3-digit ZIP Code prefix for mixed ADC Standard Mail irregular parcels.

For Line 1 (destination line) for labels for containers of mixed ADC mail: (1) determine the ZIP Code of the origin office (the Post Office where the mail is to be entered and postage paid); (2) find the first three digits of that ZIP Code in Column A; and (3) use the Column B entry as Line 1.

L606 5-Digit Scheme—Standard Mail, First-Class Mail, and Package Services Parcels

[8-14-08] [6-5-08] L606 lists the 5-digit scheme sort for Standard Mail machinable and irregular parcels (excluding ECR irregular parcels), First-Class Mail Presorted parcels, and Package Services machinable and nonmachinable parcels destined for multiple 5-digit ZIP Codes served by a single delivery unit.

Use of the 5-digit scheme sort for parcels is required for 5-digit price eligibility. When used, all parcels for the 5-digit ZIP Codes shown in Column A must be combined in a 5-digit scheme sack(s) or on a 5-digit scheme pallet(s) labeled to the corresponding destination shown in Column B.

L607 3-Digit ZIP Code Sort Option for Drop-Ship Mailers

L607 lists the 5-digit ZIP Codes for machinable parcels eligible to be entered at designated SCFs when sorted into 3-digit containers. The corresponding rate eligibility and mail preparation standards are described in [453.3.1.4](#), [455.4.2](#), [466.4.1](#), and [466.4.2](#).

Column A lists the 5-digit destination ZIP Codes that may be included in this sortation. Column B lists the corresponding 3-digit destination for container labeling. Use [L005](#) for determining the corresponding SCF entry facility.

Forms Glossary

The Forms Glossary lists all of the forms and postage statements referenced in the DMM. These forms and many others are available on Postal Explorer at pe.usps.com (click on “Postage Statements” in the left frame). Postal Service forms may be preceded by “PS Form,” which simply stands for “Postal Service Form.” For example: “3541,” “Form 3541,” and “PS Form 3541” all refer to the Periodicals postage statement.

Summary of Changes

Overview

The Summary of Changes lists revisions to this edition of *Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM)* by effective date and by module.

1.0 Summary of Changes by Effective Date

1.1 September 11, 2008

Postage Payment for Bound Printed Matter Limited to Permit Imprint

We revised [363](#), [364](#), [365](#), [366](#), [463](#), [464](#), [465](#), [466](#), and [604](#) for all Bound Printed Matter (BPM). Postage payment for all BPM mailings: carrier route, presorted, and nonpresorted (single-piece) flats and parcels, regardless of volume, are limited to permit imprint. We published this revision in the September 11, 2008, *Postal Bulletin*.

Express Mail or Priority Mail Open and Distribute Shipments to a DDU

We revised [705.5.0](#) to provide an option for customers to use an Express Mail® flat-rate envelope or Priority Mail® flat-rate envelope and box for Open and Distribute shipments destined only to a Destination Delivery Unit (DDU). We published this revision in the September 11, 2008, *Postal Bulletin*.

Changes in Application Procedures for Nonprofit Standard Mail Prices

We revised [703.1.0](#) to reflect changes in the process to apply and receive approval for mailings at Nonprofit Standard Mail® prices. We published this revision in the August 14, 2008, *Postal Bulletin*.

Address Facing Standards for Presort Bundles on Pallets

We revised [705.8.5.6](#) to require mailers to place presort bundles on pallets with the addresses facing up. We published this revision in the August 28, 2008, *Postal Bulletin*.

Waiver of Signature Delivery Process

We revised [113.4.1](#), [115.2.2](#), [413.4.1](#), [415.2.2](#), and [503.8.3.2](#) to update the standards regarding delivery of Express Mail® items with waiver of signature requested and return receipt for merchandise items with waiver of signature requested. We published this revision in the August 28, 2008, *Postal Bulletin*.

1.2 August 14, 2008

Search and Pay for Post Office Boxes Online

We revised [508.4.0](#) to include the ability to apply and pay for Post Office™ boxes online. The online option also allows existing customers to make onetime renewal payments and to establish recurring payments. The online capabilities are not available for free (Group E) Post Office box service or for caller service boxes. We published this revision in the August 14, 2008, *Postal Bulletin*.

Summary of Changes

Mailability of Day-old Emu Chicks

We revised [601.9.3.2](#) to permit the mailing of day-old emu chicks. We published this revision in the August 14, 2008, *Postal Bulletin*.

Automation Prices for Letter-Size Mailpieces with Enclosed Discs

We revised [201.3.1](#) and added [201.3.3](#) to include new optional mailing standards describing mailpiece characteristics for automation letters with compact discs (CDs) and digital video discs (DVDs). We published this revision in the August 14, 2008, *Postal Bulletin*.

Clarification of Bundling Standards

We revised [235.1.4](#), [235.2.3](#), [245.1.4](#), [245.2.3](#), [335.1.4](#), [365.1.5](#), [465.1.5](#), [707.19.4](#), and [707.24.1.5](#) to clarify that automation or machinable card- and letter-sized pieces, in correctly labeled overflow or less-than-full trays must be bundled for the purpose of retaining the orientation of the pieces within the tray. These bundles do not require an optional endorsement line or a barcoded pressure-sensitive bundle label. We are also removing obsolete preparation standards regarding the use of tic marks and separator cards in automation mailings. We published this revision in the August 14, 2008, *Postal Bulletin*.

Labeling Lists

We revised labeling lists [L001](#), [L007](#), [L201](#), and [L606](#), to reflect changes in mail processing operations. We published this revision in the August 14, 2008, *Postal Bulletin*.

New Price Marking Options

We revised [202.3.0](#), [245.5.0](#), [245.6.0](#), [302.2.0](#), [345.5.0](#), [345.6.0](#), [402.2.0](#), [445.5.0](#), [445.7.0](#), and [604.5.0](#) to provide a new price-marking option for mailings at Standard Mail® prices. We also are providing a new option for mailers of letters or flats, bearing a manifest keyline, when pieces are included as part of an automation mailing. We published this revision in the August 14, 2008, *Postal Bulletin*.

Clarification—COD Prohibited to APO/FPO Addresses

We revised [609.1.4](#) to clarify standards that apply to the sending of Collect on Delivery (COD) items in the domestic mailstream. This clarification is consistent with [503.11.2.6](#) and with Military Mail Operations prohibiting the use of COD to APO/FPO destination addresses. We published this revision in the August 14, 2008, *Postal Bulletin*.

Periodicals Preparation—Flats—Multi-Box Section Bundles

We revised [707.23.7](#) to allow publishers of Periodicals flats to combine copies addressed for box section distribution into multi-box section bundles when there are fewer than 6 copies to each Post Office Box section. We published this revision in the August 14, 2008, *Postal Bulletin*.

1.3 July 3, 2008

Express Mail Custom Designed Ineligible for Flat-Rate Prices

We revised [113.1.4](#), [413.1.4](#), and [413.4.4.1](#) to clarify that flat-rate pricing is not available with Express Mail® Custom Designed agreements. We published this revision in the July 3, 2008, *Postal Bulletin*.

Summary of Changes

Service Barcode Required for Priority Mail Open and Distribute Container Address Labels

We revised [705.16.0](#) to require the use of an electronic Service barcode on all Priority Mail® Open and Distribute container address labels effective July 1, 2008. The new standard will require mailers to use a concatenated UCC/EAN Code 128 symbology Service barcode with a unique Service Type Code (STC) "55" and the human-readable text, "USPS SCAN ON ARRIVAL," above the barcode on each Priority Mail Open and Distribute container address label. We published this revision in the July 3, 2008, *Postal Bulletin*

Commercial Base Pricing for Priority Mail Open and Distribute

We revised [423.1.1.1](#) to include the availability of commercial base prices for Priority Mail® Open and Distribute customers using permit imprint with the Service barcode. We published this revision in the June 19, 2008, *Postal Bulletin*

New Pressure-Sensitive Barcoded Bundle Labels

We revised [335](#), [345](#), [365](#), [375](#), [385](#), [705](#), [707](#), [708](#), [L007](#), and [L008](#) to provide a new option for mailers who prepare flat-size mail bundled for 5-digit scheme or 3-digit scheme presort levels. Currently, mailers who prepare 5-digit scheme or 3-digit scheme bundles of flats are required to identify the presort level through the use of an optional endorsement line (OEL). With this change the Postal Service is making 3-digit scheme and 5-digit scheme pressure-sensitive barcoded bundle labels available, which can be affixed to the top piece in a bundle in lieu of an OEL. The new labels are red for 5-digit scheme bundles, green for 3-digit scheme bundles, and bear the letters "SCH." We published this revision in the June 19, 2008, *Postal Bulletin*

1.4 June 5, 2008

Labeling Lists

We revised labeling lists [L002](#), [L005](#), [L006](#), [L007](#), [L008](#), [L009](#), [L010](#), [L011](#), [L201](#), [L601](#), [L603](#), [L604](#), [L606](#), and [L801](#) to reflect changes in mail processing operations. We published this revision in the June 5, 2008, *Postal Bulletin*.

Clarification of Caller Service and Reserve Caller Number Issuance and Fees

We revised [508.5.0](#) to clarify standards that apply to the application for and payment of fees for Caller Service and for Reserve Caller Numbers. We published this revision in the June 5, 2008, *Postal Bulletin*

Clarification of New Standards for Confirm Service

We revised [503.13.2.3](#) and [503.13.3.1](#) to clarify the standards pertaining to Confirm® Service. Currently, mailers have the option to use an Intelligent Mail® barcode when requesting Origin Confirm service. In this case a POSTNET™ barcode is not a required element. Until May, 2010, we will continue to allow the use of a PLANET Code® barcode in conjunction with a POSTNET barcode but we will not require a POSTNET barcode for mailpieces bearing an Intelligent Mail barcode. We also revised [503.13.4](#) to make reference to the use of a preshipment notification with Destination Confirm service. We published this revision in the June 5, 2008, *Postal Bulletin*.

Summary of Changes

New Tray Preparation Option for Automation Letters

We revised [235.6.6](#) and [245.7.5](#) to allow mailers preparing automation First-Class Mail® or Standard Mail® letters to place overflow pieces in the front or back of trays when mailers merge overflow pieces into trays made at the next sortation level, instead of making separate overflow trays. We published this revision in the June 5, 2008, *Postal Bulletin*.

2.0 Summary of Changes by DMM Module

2.1 100—Retail Mail

[113.1.4](#) is revised to clarify that flat-rate pricing is not available with Express Mail® Custom Designed agreements. Effective July 3, 2008.

[113.4.1](#) and [115.2.2](#) are revised to update the standards regarding delivery of Express Mail® items with waiver of signature requested and return receipt for merchandise items with waiver of signature requested. Effective August 28, 2008.

2.2 200—Commercial Letters and Cards

[202.3.0](#), [245.5.0](#), and [245.6.0](#) are revised to provide a new price-marking option for mailings at Standard Mail® prices. We also are providing a new option for mailers of letters or flats, bearing a manifest keyline, when pieces are included as part of an automation mailing. Effective August 14, 2008.

[235.1.4](#), [235.2.3](#), [245.1.4](#), and [245.2.3](#) are revised to clarify that automation or machinable card- and letter-sized pieces, in correctly labeled overflow or less-than-full trays must be bundled for the purpose of retaining the orientation of the pieces within the tray. These bundles do not require an optional endorsement line or a barcoded pressure-sensitive bundle label. We are also removing obsolete preparation standards regarding the use of tic marks and separator cards in automation mailings. Effective August 14, 2008.

[235.6.6](#) and [245.7.5](#) are revised to allow mailers preparing automation First-Class Mail® or Standard Mail® letters to place overflow pieces in the front or back of trays when mailers merge overflow pieces into trays made at the next sortation level, instead of making separate overflow trays. Effective June 5, 2008.

2.3 300—Commercial Flats

[302.2.0](#), [345.5.0](#), and [345.6.0](#) are revised to provide a new price-marking option for mailings at Standard Mail® prices. We also are providing a new option for mailers of letters or flats, bearing a manifest keyline, when pieces are included as part of an automation mailing. Effective August 14, 2008.

[335](#), [345](#), [365](#), [375](#), and [385](#) were revised to provide a new option for mailers who prepare flat-size mail bundled for 5-digit scheme or 3-digit scheme presort levels. Currently, mailers who prepare 5-digit scheme or 3-digit scheme bundles of flats are required to identify the presort level through the use of an optional endorsement line (OEL). With this change the Postal Service is making 3-digit scheme and 5-digit scheme pressure-sensitive barcoded bundle labels available, which can be affixed

Summary of Changes

to the top piece in a bundle in lieu of an OEL. The new labels are red for 5-digit scheme bundles, green for 3-digit scheme bundles, and bear the letters "SCH." Effective July 3, 2008.

[335.1.4](#) and [365.1.5](#) are revised to clarify that automation or machinable card- and letter-sized pieces, in correctly labeled overflow or less-than-full trays must be bundled for the purpose of retaining the orientation of the pieces within the tray. These bundles do not require an optional endorsement line or a barcoded pressure-sensitive bundle label. We are also removing obsolete preparation standards regarding the use of tic marks and separator cards in automation mailings. Effective August 14, 2008.

[363](#), [364](#), [365](#), and [366](#) have been revised for all Bound Printed Matter (BPM). Postage payment for all BPM mailings: carrier route, presorted, and nonpresorted (single-piece) flats and parcels, regardless of volume, are limited to permit imprint. Effective September 11, 2008.

2.4 400—Commercial Parcels

[402.2.0](#), [445.5.0](#), and [445.7.0](#) are revised to provide a new price-marking option for mailings at Standard Mail® prices. We also are providing a new option for mailers of letters or flats, bearing a manifest keyline, when pieces are included as part of an automation mailing. Effective August 14, 2008.

[413.1.4](#) and [413.4.4.1](#) are revised to clarify that flat-rate pricing is not available with Express Mail® Custom Designed agreements. Effective July 3, 2008.

[413.4.1](#) and [415.2.2](#), are revised to update the standards regarding delivery of Express Mail® items with waiver of signature requested and return receipt for merchandise items with waiver of signature requested. Effective August 28, 2008.

[423.1.1.1](#) is revised to include the availability of commercial base prices for Priority Mail® Open and Distribute customers using permit imprint with the Service barcode. Effective July 3, 2008.

[463](#), [464](#), [465](#), and [466](#) have been revised for all Bound Printed Matter (BPM). Postage payment for all BPM mailings: carrier route, presorted, and nonpresorted (single-piece) flats and parcels, regardless of volume, are limited to permit imprint. Effective September 11, 2008.

[465.1.5](#) is revised to clarify that automation or machinable card- and letter-sized pieces, in correctly labeled overflow or less-than-full trays must be bundled for the purpose of retaining the orientation of the pieces within the tray. These bundles do not require an optional endorsement line or a barcoded pressure-sensitive bundle label. We are also removing obsolete preparation standards regarding the use of tic marks and separator cards in automation mailings. Effective August 14, 2008.

2.5 500—Additional Services

[503.8.3.2](#) is revised to update the standards regarding delivery of Express Mail® items with waiver of signature requested and return receipt for merchandise items with waiver of signature requested. Effective August 28, 2008.

Summary of Changes

503.13.2.3 and 503.13.3.1 are revised to clarify the standards pertaining to Confirm® Service. Currently, mailers have the option to use an Intelligent Mail® barcode when requesting Origin Confirm service. In this case a POSTNET™ barcode is not a required element. Until May, 2010, we will continue to allow the use of a PLANET Code® barcode in conjunction with a POSTNET barcode but we will not require a POSTNET barcode for mailpieces bearing an Intelligent Mail barcode. We also revised 503.13.4 to make reference to the use of a preshipment notification with Destination Confirm service. Effective June 5, 2008.

508.4.0 is revised to include the ability to apply and pay for Post Office™ boxes online. The online option also allows existing customers to make onetime renewal payments and to establish recurring payments. The online capabilities are not available for free (Group E) Post Office box service or for caller service boxes. Effective August 14, 2008.

508.5.0 is revised to clarify standards that apply to the application for and payment of fees for Caller Service and for Reserve Caller Numbers. Effective June 5, 2008.

2.6 600—Basic Standards

601.9.3.2 is revised to permit the mailing of day-old emu chicks. Effective August 14, 2008.

604 has been revised for all Bound Printed Matter (BPM). Postage payment for all BPM mailings: carrier route, presorted, and nonpresorted (single-piece) flats and parcels, regardless of volume, are limited to permit imprint. Effective September 11, 2008.

604.5.0 is revised to provide a new price-marking option for mailings at Standard Mail® prices. We also are providing a new option for mailers of letters or flats, bearing a manifest keyline, when pieces are included as part of an automation mailing. Effective August 14, 2008.

609.1.4 is revised to clarify standards that apply to the sending of Collect on Delivery (COD) items in the domestic mailstream. This clarification is consistent with 503.11.2.6 and with Military Mail Operations prohibiting the use of COD to APO/FPO destination addresses. Effective August 14, 2008.

2.7 700—Special Standards

703.1.0 is revised to reflect changes in the application and authorization processes for Nonprofit Standard Mail® prices. Effective September 11, 2008.

705, 707, and 708 were revised to provide a new option for mailers who prepare flat-size mail bundled for 5-digit scheme or 3-digit scheme presort levels. Currently, mailers who prepare 5-digit scheme or 3-digit scheme bundles of flats are required to identify the presort level through the use of an optional endorsement line (OEL). With this change the Postal Service is making 3-digit scheme and 5-digit scheme pressure-sensitive barcoded bundle labels available, which can be affixed to the top piece in a bundle in lieu of an OEL. The new labels are red for 5-digit scheme bundles, green for 3-digit scheme bundles, and bear the letters “SCH.” Effective July 3, 2008.

Summary of Changes

[705.5.0](#) is revised to provide an option for customers to use an Express Mail® flat-rate envelope or Priority Mail® flat-rate envelope and box for Open and Distribute shipments destined only to a Destination Delivery Unit (DDU). Effective September 11, 2008.

[705.8.5.6](#) is revised to require mailers to place presort bundles on pallets with the addresses facing up. Effective September 11, 2008.

[705.16.0](#) is revised to require the use of an electronic Service barcode on all Priority Mail® Open and Distribute container address labels effective July 1, 2008. The new standard will require mailers to use a concatenated UCC/EAN Code 128 symbology Service barcode with a unique Service Type Code (STC) "55" and the human-readable text, "USPS SCAN ON ARRIVAL," above the barcode on each Priority Mail Open and Distribute container address label. Effective July 1, 2008.

[707.18.4](#) and [707.24.1.5](#) are revised to clarify that automation or machinable card- and letter-sized pieces, in correctly labeled overflow or less-than-full trays must be bundled for the purpose of retaining the orientation of the pieces within the tray. These bundles do not require an optional endorsement line or a barcoded pressure-sensitive bundle label. We are also removing obsolete preparation standards regarding the use of tic marks and separator cards in automation mailings. Effective August 14, 2008.

[707.23.7](#) is revised to allow publishers of Periodicals flats to combine copies addressed for box section distribution into multi-box section bundles when there are fewer than 6 copies to each Post Office Box section. Effective August 14, 2008.

2.8 Appendix 1 – Labeling Lists

Labeling lists are updated frequently to reflect changes in mail processing operations. Please see individual lists.

1. Parcels addressed for delivery to zones 1-4 (including local) that weigh less than 20 pounds but measure more than 84 inches in combined length and girth (but not more than 108 inches) are charged the applicable price for a 20-pound parcel (balloon price).
2. Parcels addressed for delivery to zones 5-8 that exceed 1 cubic foot (1,728 cubic inches) are charged based on the actual weight or the dimensional weight (as calculated in 123.1.3), whichever is greater.
3. For keys and ID devices that weigh:
 - Up to 13 ounces, refer to retail First-Class Mail parcel prices.
 - More than 13 ounces but not more than 1 pound, \$5.52.
 - More than 1 pound but not more than 2 pounds, \$6.32.
4. \$4.80 is charged for matter sent in a Priority Mail flat-rate envelope provided by the USPS, regardless of weight or destination.
5. \$9.80 is charged for material sent in a Priority Mail regular flat-rate box provided by the USPS, regardless of weight or destination.
6. \$12.95 is charged for material sent in a Priority Mail large flat-rate box provided by the USPS, regardless of weight to domestic addresses, and \$10.95 for material sent in a Priority Mail large flat-rate box to APO/FPO destination addresses.

- For parcels that originate and destinate in the same BMC service area.
- For parcels that measure in combined length and girth:
 - More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use the 20-pound price (balloon price).
 - More than 108 inches but not more than 130 inches, use the oversized price, regardless of weight.
- Regardless of weight, a parcel that meets any of the criteria in [101.7.2](#) must pay the nonmachinable price.
- Prices include the \$2.73 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

- For parcels that destinate to different BMC service areas (see 153.1.1).
- For parcels that measure in combined length and girth:
 - More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use the 20-pound price (balloon price).
 - More than 108 inches but not more than 130 inches, use the oversized price, regardless of weight.
- Regardless of weight, a parcel that meets any of the criteria in 101.7.2 must pay the nonmachinable price.
- Prices include the \$3.70 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

Parcel Post (Inter-BMC/ASF)

1. Parcels addressed for delivery to zones 1-4 (including local) that weigh less than 20 pounds but measure more than 84 inches in combined length and girth (but not more than 108 inches) are charged the applicable price for a 20-pound parcel (balloon price).
2. Parcels addressed for delivery to zones 5-8 that exceed 1 cubic foot (1,728 cubic inches) are charged based on the actual weight or the dimensional weight, whichever is greater.
3. \$4.75 is charged for matter sent in a Priority Mail flat-rate envelope provided by the USPS, regardless of weight or destination.
4. \$9.30 is charged for material sent in a Priority Mail regular flat-rate box provided by the USPS, regardless of weight or destination.
5. \$12.50 is charged for material sent in a Priority Mail large flat-rate box provided by the USPS, regardless of weight to domestic addresses, and \$10.50 for material sent in a Priority Mail large flat-rate box provided by the USPS to APO/FPO destination addresses.
6. Commercial base prices are available for postage paid through Click-N-Ship service at usps.com, authorized PC Postage vendors, and other authorized postage payment methods.

1. Parcels that measure in combined length and girth:
 - More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use 20-pound prices (balloon price).
 - More than 108 inches but not more than 130 inches, use oversized prices (regardless of weight).
2. Regardless of weight, a parcel that meets any of the criteria in 401.2.3.2 must pay the nonmachinable prices.
3. Machinable parcels must be barcoded. Nonbarcoded machinable parcels are eligible only for retail Intra-BMC/ASF prices.
4. Prices include the \$0.91 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.
5. Prices include the \$2.03 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

 - More than 108 inches but not more than 130 inches, use oversized prices (regardless of weight).
- Regardless of weight, a parcel that meets any of the criteria in [401.2.3.2](#) must pay the nonmachinable prices.
- Machinable parcels must be barcoded. Nonbarcoded machinable parcels are eligible only for retail Intra-BMC/ASF prices.
- Prices include the \$0.91 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.
- Prices include the \$2.03 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

Parcel Select BMC and OBMC Presort (Inter-BMC)

- Must be part of a mailing of 50 or more pieces and prepared as an OBMC Presort or BMC Presort mailing.
 - For OBMC Presort, deduct \$1.42 per parcel.
 - For BMC Presort, deduct \$0.32 per parcel.
- For parcels that destinate to different BMC service areas see 453.3.1.
- Parcels that measure in combined length and girth:
 - More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use 20-pound price (balloon price).
 - More than 108 inches but not more than 130 inches, use oversized prices regardless of weight.
- Machinable parcels may be eligible for a barcode discount of \$0.03 per parcel.
- Regardless of weight, a parcel that meets any of the criteria in 401.2.3.2 must pay the nonmachinable price.
- Prices include the \$3.70 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized prices or parcels sent with special handling.

- All Parcel Select Barcoded Inter-BMC pieces must be part of a mailing of 50 or more pieces.
- For parcels that destinate to a different BMC service area (see 453.3.1).
- Parcels that measure in combined length and girth:
 - More than 84 inches but not more than 108 inches, and the piece weighs less than 20 pounds, use 20-pound price (balloon price).
 - More than 108 inches but not more than 130 inches, use oversized prices regardless of weight.
- For nonbarcoded pieces, add \$0.03 per parcel.
- Regardless of weight, a parcel that meets any of the criteria in 401.2.3.2 must pay the retail Parcel Post Inter-BMC price.
